In Eqs. (5.11), (5.13), (5.14), (5.15), and (5.16), the  $\sigma$  should be  $\Sigma$  instead. These errors do not alter the results of the paper, and a reader easily can conclude that the correct  $\Sigma$  that should be used is a  $4 \times 4$  matrix, while  $\sigma$  is a  $2 \times 2$  matrix.
