

**Erratum: Dependence on the scattering angle of the electron temperature and electron density
in Thomson-scattering measurements on an atmospheric-pressure plasma jet
[Phys. Rev. E 61, 1920 (2000)]**

An exponent of $\frac{1}{2}$ was inadvertently included in Eq. (4) of this paper. The correct form of Eq. (4) is

$$\tilde{T}_e = T_e \left[1 + \frac{\omega_p^2}{(k\nu_t)^2} \delta \right].$$

The subsequent discussion about fitting Eq. (4) to our electron temperature as a function of scattering angle data, summarized in Figs. 6 and 7, is not affected by this oversight since these calculations were done using the correct form of Eq. (4). Also, the data presented in Fig. 7 was taken with a laser wavelength of 355 nm, not 532 nm as stated in the figure caption. The authors sincerely regret any confusion these errors may have caused.
