The captions of Figs. 4, 5, 6, and 8 contain erroneous information about the parameters of loads for the curves that were calculated. Figure 4 shows the dispersion plot for a grid of cylinders loaded by inductive impedance loads with  $L = 5\mu_0$ , not  $L = 20\pi\mu_0$  as it was printed. Figures 5 and 6 show dispersion plots for grids of cylinders loaded by capacitive impedances with  $C = 0.05\epsilon_0 a^2$  and  $C = 2\epsilon_0 a^2$ , respectively, not  $C = 0.05\pi\epsilon_0$  and  $C = 2\pi\epsilon_0$  as it was printed. The inductance of the loading parallel resonant circuit in Fig. 8 is  $L = 0.5\mu_0$ , not  $L = 2\pi\mu_0$ .
