In Eq. (4.1) the lower limit of the z integration should be $-\infty$ and e^{ikz} should be e^{-ikz} .
 Equation (4.2) should read

$$\frac{1}{\tau} = \lambda Y \frac{E^2 L^2}{(ik + E)^2 (-ik + L)^2}.$$

The stability condition on L/E , derived via Eq. (4.3), should be

$$3 - 2\sqrt{2} < \frac{L}{E} < 3 + 2\sqrt{2}.$$

The author is indebted to Dr. Alan Williams for pointing out these errors and providing the correct expression.
