A misprint was noticed in Eq. (13) for the critical point of the Ising model on a bcc lattice. It should be written as follows:

$$\beta_c^{(bcc)} = \vartheta_2^3(0, e^{-4/3}) + \vartheta_3^3(0, e^{-4/3}) - 1 \quad (\text{bcc lattice}) \quad (13)$$

The value of the critical temperature in Table I was calculated from the correct formula from Eq. (13) and, therefore, was correct.
