

Erratum

Group-Theoretical Consideration of Landau Level Broadening in Crystals, J. ZAK [Phys. Rev. **136**, A776 (1964)]. The asymptotic expansion (32) holds only when $x < 4n$, and can therefore not be used for the numerical values in the estimate (34). For these numerical values one should use the formula (30), which leads to a much smaller broadening than that given by (34).
