GENERAL INFORMATION

Aims and Scope. *Physics and Chemistry of Liquids* publishes experimental and theoretical papers aimed at furthering the understanding of the liquid state. The coverage embraces the whole spectrum of liquids, from simple monatomic liquids and their mixtures, through charged liquids (e.g. ionic metals, liquid metals and their alloys, ions in aqueous solution, and metal-electrolyte systems) to molecular liquids of all kinds.

An important aim of the journal is to provide a medium for the publication of interdisciplinary papers on liquids.

Original papers, letters warranting speedy publication, as well as appropriate and timely review articles, are invited. There are no page charges to authors or to institutions.

Notes for contributors can be found at the back of the journal.
