

## PHYTOCHEMICAL REPORTS

### INTRODUCTION

IN ORDER to try to help authors and readers alike, the Editors have decided to combine all papers dealing with reports of the isolation of previously known compounds and closely related substances e.g. new glycosides of known aglycones from new sources into one continuous section with an index. Eventually it is hoped that the data may be presented in tabular form. Contributors wishing to submit papers for inclusion in future issues should try to reduce their contributions to the minimum necessary for adequate presentation. This will ensure rapid publication.

### INDEX

#### ANGIOSPERMAE DICOTYLEDONEAE

<i>Family</i>	<i>Species</i>	<i>Compounds</i>
Compositae	<i>Artemisia verlotorum</i> <i>Baccharis sarothroides</i>	Sesquiterpenoid lactones Cytotoxic flavonols*
Cucurbitaceae	<i>Luffa echinata</i>	Flavones, cucurbitacins
Leguminosae	<i>Cassia</i> spp. <i>Lupinus luteus</i>	Sterol glucosides Gibberellin A <sub>28</sub> *
Malvaceae	<i>Hibiscus mutabilis</i>	Free cyanidin
Papaveraceae	<i>Argemone glauca</i>	Protopine and related alkaloids
Polemoniaceae	<i>Phlox drummondii</i>	C-Glycosyl flavones*
Primulaceae	<i>Primula acaulis</i>	Nitrogentisic ester*
Rutaceae	<i>Fagara capensis</i>	Protoberberine alkaloid*
Solanaceae	<i>Withania coagulans</i>	Steroidal lactone*
Sterculiaceae	<i>Sterculia</i> spp.	Pelargonidin-3-arabinoside*

\* New compounds.
