

# ANNOUNCEMENT

## FOURTEENTH SYMPOSIUM OF THE PHYTOCHEMISTRY SOCIETY OF JAPAN

The symposium will be held at Faculty of Pharmaceutical Sciences, The University of Tokyo, on 28 January 1978. The following papers will be presented:

- (1) Biochemical processes during fruiting body formation in Basidiomycetes, by T. Ishikawa (Institute of Applied Microbiology, The University of Tokyo).
- (2) The substances related to the life cycle of a cellular slime mold, by H. Abe (Faculty of Agriculture, Tokyo University of Agriculture and Technology).
- (3) Biological active substances on the growth of plant cultured cells, by K. Koshimizu (Faculty of Agriculture, Kyoto University).
- (4) Biochemical aspects of growth and differentiation in plant tissue and cell cultures, by A. Komamine (Faculty of Science, The University of Tokyo).
- (5) Physiological activities and chemistry of phytotoxins—the case of coronatine, by A. Ichihara (Faculty of Agriculture, Hokkaido University).
- (6) Chemistry of tremorgenic mycotoxins from *Aspergillus fumigatus*, by M. Yamazaki (Research Institute for Chemobiodynamics, Chiba University).

The next symposium will be held near Tokyo in January 1979 organized by Professor M. Yamazaki, Chiba University.

*The University of Tokyo, Bunkyo-Ku, Japan*

N. TAKAHASHI and U. SANKAWA
