

NOTICE

THE PLANT PHENOLICS GROUP OF NORTH AMERICA

THE FIFTH annual meeting of the Group will include a Symposium of the theme: Phenolic Compounds in Metabolic Regulation. The Symposium will attempt to correlate the metabolic roles of phenolic compounds in the plant and animal kingdoms; it is expected to include papers on phenolic mediators of animal metabolism, phenolics in abnormal metabolism, phenolics as co-carcinogens, phenolic compounds and metabolic chelation, phenolic compounds affecting plant metabolism and factors affecting phenolic biosynthesis. The proceedings of the Symposium will be published. Details of the speakers will be announced at a later date. The meeting will be held at the Western Regional Laboratory, U.S. Department of Agriculture, Albany, California, 23-25 August, 1965, and will also include general sessions of contributed papers.

Notice is also given that copies of the Proceedings of the Group's Symposia held in 1961 and 1963 are still available while those of the 1964 Symposium will be ready shortly. The respective themes were: The Biochemistry of Plant Phenolic Substances (1961); Aspects of Plant Phenolic Chemistry (1963); and Phenolics in Normal and Diseased Fruits and Vegetables (1964). Copies of these and further information about the Group's forthcoming meeting can be obtained from Dr. V. C. Runeckles, Secretary-Treasurer, Plant Phenolics Group of North America, P.O. Box 6500, Montreal, Quebec, Canada.
