

## ERRATA

T. R. RICKETTS: Magnesium 2,4-divinylphaeoporphyrin a<sub>5</sub> monomethyl ester, a protochlorophyll-like pigment present in some unicellular flagellates. *Phytochem.* 5, 223 (1966).

The author regrets that on p. 224, the footnote to Fig. 1 should read:

“B=protochlorophyll-like pigment; A=pigment after hydrochloric acid treatment.”

and on p. 225, the footnote to Fig. 2 should read:

“Broken line=protochlorophyll-like pigment; continuous line=pigment after hydrochloric acid treatment. Note that the spectra are not at the same pigment concentration.”
