

PAPERS ACCEPTED FOR PUBLICATION IN MAY AND JUNE

- R. POWLS and F. W. HEMMING: The properties and significance of rhodoquinone-9 in autotrophic and etiolated cultures of *Euglena gracilis* var. *bacillaris*
- E. HEFTMANN, SHUI-TZE KO and R. D. BENNETT: Identification of estrone in pomegranate seeds
- M. R. YOUNG and A. C. NEISH: Properties of the ammonia-lyases deaminating phenylalanine and related compounds in *Triticum aestivum* and *Pteridium aquilinum*
- E. MOUSTAFA: Specificity between L-lysine: sRNA ligases and sRNA from wheat germ and pea seed
- T. DAHL, T. B. H. MCMURRY, P. I. AMENECHI and R. T. APLIN: 3 β -Acetyloleanolic acid from *Drepanocarpus lunatus*
- H. KINDL and O. HOFFMAN-OSTENHOF: Vorkommen und Biosynthese von Cycliten in Asclepiadaceae
- S. B. YUE: Isoenzymes of malate dehydrogenase from barley seedlings
- R. POWLS and F. W. HEMMING: The biosynthesis of quinones from *p*-hydroxybenzoic acid in *Euglena gracilis* var. *bacillaris*
- P. M. NAIR, P. V. S. RAO and C. S. VAIDYANATHAN: Anthranilic acid oxidase system of *Tecoma stans*—III. Studies on the conversion of *o*-aminophenol to catechol
- R. W. SCORA, A. B. ENGLAND and W. P. BITTERS: Studies of the essential oils of *Poncirus trifoliata* L. and its selections in relation to classification
- A. JINDRA, P. KOVACS, Z. PITNEROVA and M. PSENAK: Biochemical aspects of the biosynthesis of opium alkaloids
- K. SCHREIBER, G. SHNEIDER, G. SEMBNER and I. FOCKE: Gibberelline—X. Isolierung von *O*(2)-Acetyl-gibberellinsäure als Stoffwechselprodukt von *Fusarium moniliforme* Sheld.
- H. RONSCHE and K. SCHREIBER: Solanum-Alkaloide—LXXII. Über γ - und δ -Solamarin, zwei neue Tomatidenolglykoside aus *Solanum dulcamara* L.
- D. J. CHAPMAN: Three new carotenoids isolated from algae
- H. C. MECKLENBURG: Inflorescence hydrocarbons of some species of *Solanum* L., and their possible taxonomic significance
- G. COMBES, L. FONZES and F. WINTERNITZ: Sur les alcaloïdes des *Rauwolfia* de Madagascar
- E. A. BELL and J. P. O'DONOVAN: The isolation of α - and γ -oxalyl derivatives of α , γ -diaminobutyric acid from seeds of *Lathyrus latifolius* and the detection of the α -oxalyl isomer of the neurotoxin α -amino- β -oxylaminopropionic acid which occurs together with the neurotoxin in this and other species
- H. M. ALVES, V. H. ARNDT, W. D. OLLIS, W. B. EYTON, O. R. GOTTLIEB and M. T. MAGALNAES: Triterpenoids isolated from *Machaerium incorruptibile*
- J. S. HAWKER: Studies on the location of sucrose phosphate in plant tissues
- L. NOVOTNY, J. TOMAN, F. STARY, A. D. MARQUEZ, V. HEROUT and F. SORM: Contribution to the chemotaxonomy of some European *Petasites* species
- T. GRIFFITH and G. D. GRIFFITH: Biosynthesis of piperidine alkaloids—I. Evidence for use of the diaminopimelic acid pathways for lysine in *Nicotiana glauca*
- R. C. CLAPP, F. H. BISSETT, R. A. COBURN and L. LONG, JR.: Cyanogenesis in manioc linamarin and isolinamarin
- R. E. HAMPTON, D. L. HOPKINS and T. G. NYE: Biochemical effects of tobacco etch virus infection on tobacco leaf tissue—I. Protein synthesis by isolated chloroplasts
- T. G. NYE and R. E. HAMPTON: Biochemical effects of tobacco etch virus infection on tobacco leaf tissue—II. Polyphenol oxidase activity
- L. MINALE, M. PIATTELLI, S. DE STEFANO and R. A. NICOLAUS: Pigments of centrospermae—VI. Acylated betacyanins
- W. E. HILLIS: Polyphenols in the leaves of *Eucalyptus l'herit*: a chemotaxonomic survey—I. Introduction and a study of the series Globulares
- J. H. WIEFFERING: Aucubinartige Glucoside (Pseudoindikane) und verwandte Neteroside als systematische Merkmale
- H. YOKOYAMA and M. J. WHITE: Citrus carotenoids—VI. Carotenoid pigments in the flavedo of *Sinton citrangequat*
- B. C. SMALE and H. L. KEIL: A biochemical study of the intervarietal resistance of *Pyrus communis* to fire blight
- A. TSE and G. H. N. TOWERS: The occurrence of psilotin in *Tmesipteris*
- C. L. BOWER and J. W. ROWE: Extractives of Jack Pine bark: occurrence of (+)-13-epimanoyl oxide and related labdane diterpenes
- I. K. GRAY, M. G. RUMSBY and J. C. HAWKE: The variations in linolenic acid and galactolipid levels in Gramineae species with age of tissue and light environment
- I. SCHMELTZ, C. J. DOOLEY, R. L. STEDMAN and W. J. CHAMBERLAIN: Composition studies on tobacco—XXII. The nitromethane-soluble, neutral fraction of tobacco
- S. I. GOLDBERG and R. F. MOATES: Alkaloids of tobacco—Nutt.
- J. C. OVEREEM, A. FUCHS and A. SUPPESTIJN: The occurrence of 1,4-dimethylerylenequinones in etiolated cucumber seedlings infected with *Cladosporium cucumerinum*
- D. J. BAISTED: Incorporation of label from geraniol-¹⁴C into squalene, β -amyrin and β -sitosterol in germinating pea seeds
- H. KINDL and O. HOFFMANN-OSTENHOF: Untersuchungen über die Biosynthese der Cyclite—XIV. Die Bildung von L-Viburnin in *Chrysanthemum leucanthemum*
- G. G. LATIES and C. HOELLE: The α -oxidation of long chain fatty acids as a possible component of the basal respiration of potato slices
- T. J. MABRY: Report on an International Phytochemical meeting
- W. E. SPLITTSTOESSER and M. MAZELIS: The metabolism of methionine in higher plants—I. Catabolism of the methyl group by seedlings of various species
