

PHYTOCHEMICAL SOCIETY SYMPOSIUM

NON-PROTEIN AMINO ACIDS, PEPTIDES AND ANALOGOUS METABOLITES IN HIGHER PLANTS AND FUNGI

To be held at Gif-sur-Yvette, near Paris, France, on 11 and 12 September 1969

Symposium Organizers

Professor T. W. GOODWIN, F.R.S., Chairman of the Phytochemical Society.

Professor E. LEDERER, Head of the Department of Biochemistry, The Institut de Chimie des Substances Naturelles, Gif-sur-Yvette.

PROGRAMME

This will consist of nine review lectures of 45 minutes' length, each followed by discussion time. The speakers and their topics are as follows:

Dr. R. Goutarel (Gif-sur-Yvette), "Peptide Alkaloids".

Dr. B. C. Das (Gif-sur-Yvette), "Mass Spectrometry in Peptide Chemistry".

Professor L. Fowden, F.R.S. (with J. W. Anderson and May-Lin Sung) (University College, London), "Unusual Amino Acids of the Sapindaceae: Biosynthesis and Analogue Function".

Dr. P. J. Peterson (DSIR, Palmerston North, New Zealand), "Sulphur and Selenium Containing Amino Acids".

Dr. P. O. Larsen (Copenhagen), "General Survey of Amino Acid Types in Higher Plants".

Professor R. L. M. Synge, F.R.S. (Food Research Institute, Norwich), "Bound Amino Acids in Plants other than in Protein".

Professor C. H. Hassall (University College, Swansea), "Biologically Active Cyclodepsipeptides".

Professor Th. Wieland (Max Planck Institute, Heidelberg), "Peptides of the Higher Fungi".

Dr. E. G. Brown (University College, Swansea), "Some Aspects of Amino Acid Biosynthesis".

Half a day will be given over to the presentation of 15-minute contributed papers from: Professor E. A. Bell (Austin, Texas), Dr. J. R. Lewis (Aberdeen), Dr. G. Samuelsson (Uppsala University, Sweden), Dr. T. Hartmann (University of Bonn, Germany) and others.
