

PHYTOCHEMICAL SOCIETY OF NORTH AMERICA

TENTH ANNIVERSARY MEETING

THE 1970 Symposium is entitled "Functional and Structural Aspects of Phytochemistry".
Provisional programme:

- W. R. BRIGGS (Harvard)—Physiological and Biochemical Studies of the Plant Chromoprotein Phytochrome.
- R. F. DAWSON (Rutgers)—A Speculative View of Tobacco Alkaloid Biosynthesis.
- D. S. FREAR (USDA)—Herbicide Metabolism in Plants.
- A. H. GALSTON (Yale)—Physiological Implications of Flavonoids in Pea Plants.
- L. JURD (USDA)—Chemistry of Flavylum Salts.
- T. J. MABRY (Texas)—The Betalains: Structure, Function, and Biosynthesis.
- G. W. SANDERSON (T. J. Lipton)—Chemistry of Tea and Tea Manufacture.
- L. M. SCHOONHOVEN (Netherlands)—Secondary Plant Substances and Insects.
- D. S. VANFLEET (Georgia)—Histochemistry of Plants in Health and Disease.
- J. H. WANG (Yale)—Primary Energy Conversion Reactions in Phytosynthesis.

Dates: 6–7 October 1970. *Location:* Washington and Beltsville, U.S.A.

Registration forms and further details from:

Dr. T. C. Tso, USDA Crops Research Division, Beltsville, Md 20705, U.S.A.
