Received 14 February 2003; accepted 14 February 2003

The sentence at page 1082, second column, lines 40–43: “This more symmetric situation is due to the formation of a bond between O(5) and Cu(II) while the O(4)–H(4) bond is maintained;” lacks the two words “no more” between “is” and “maintained”. The correct sentence becomes: “This more symmetric situation is due to the formation of a bond between O(5) and Cu(II) while the O(4)–H(4) bond is no more maintained;”.
