Correction

In our contribution:

Determination of the Repartition of Monomers Between Sol and Gel Fractions in Copolycondensate Glycerol/ Azelaïc Acid by Radioassay

(Pol.Bull. *3*, 383 pp (1980)), the equations on pg 385 are to read:

$$w_{A,s} = \frac{n_A \sum_{k=0}^{2} \nu_{A,s}^{(k)} (M_A - kM_{EA})}{\overline{M}_{no} - 2n_A p_A M_E} = \frac{n_A \pi_A \{\pi_A M_A - 2[\pi_A - (1-p_A)]M_{EA}\}}{\overline{M}_{no} - 2n_A p_A M_E}$$

where $\overline{M}_{no} = n_A M_A + n_B M_B$

$$w_{A,s} = \frac{n_A [\pi_A^2 M_A - 2p_{A,s} M_{EA}]}{\overline{M}_{no} - 2n_A p_A M_E} \qquad p_{A,s} = \sum_{k=0}^{2} k \nu_{A,s}^{(k)} = \pi_A [\pi_A - (1-p_A)]$$

$$w_{B,s} = \frac{n_B \sum_{k_1=0}^{2} \sum_{k_2=0}^{1} \nu_{B,s}^{(k_1,k_2)} [M_B - (k_1+k_2)M_{EB}]}{\overline{M}_{no} - 2n_A p_A M_E} = \frac{n_B [\pi_{B1}^2 \pi_{B2} M_B - 3p_{B,s} M_{EB}]}{\overline{M}_{no} - 2n_A p_A M_E}$$

$$w_s = \frac{n_A \pi_A^2 M_A + n_B \pi_{B1}^2 \pi_{B2} M_B - 2n_A \pi_A [\pi_A - (1-p_A)]M_E}{\overline{M}_{no} - 2n_A p_A M_E}$$

Dominique Durand, Pascal Helias and Claude-Marcel Bruneau
