

## TWENTY-THIRD CANADIAN HIGH POLYMER FORUM

The Twenty-third Canadian High Polymer Forum will be held during

**August 7-9, 1985**

**Auberge Mont Gabriel, Quebec, Canada**

*(located in the Laurentians; approx. 60 km. north of Montreal)*

The Forum will cover all aspects of polymer science and will be of interest to workers in industry, universities and government. Professor P. Teyssié, Université de Liège, Belgium, will be the Xerox Forum Lecturer and will talk about "*Molecular Control of Polymeric Materials and Properties*". The invited speakers include:

Prof. C. A. Fyfe, University of Guelph  
*(Solid State NMR)*

Prof. A. Rudin, University of Waterloo  
*(Shear Modification of Polymers)*

Prof. R. S. Stein, University of Massachusetts  
*(Neutron Scattering Studies of Polymers)*

Prof. J. E. McGrath, Virginia Polytechnic Institute  
*(Recent Studies Utilizing Anionic Polymerization).*

Individuals are encouraged to contribute to the forum. Papers in all areas of polymer science are being solicited with contributions from synthetic polymer chemistry being particularly welcome. Titles, authors names and abstracts of 200-300 words should be sent to:

**Dr. A. Garton**  
**Division of Chemistry**  
**National Research Council of Canada**  
**Ottawa, Ontario K1A 0R6, Canada**  
**(613-993-2268)**

The deadline for abstracts is April 12, 1985. Those planning to attend are advised to preregister. Further details of the Forum will be mailed at a later date.
