New Technical Possibilities for Shortening the Publication Time

One of the main focuses of Polymer Bulletin has always been its rapid publication of the papers. It is therefore printed from camera-ready copies. In order to speed up the publication time even further, we have created templates for the preparation of the manuscripts.

The *benefits* for the authors are:

- easy preparation of your paper (also for papers you have already written), no need to think about printing formats, type sizes of headings or text body;
- fast communication between you and the editor by sending the manuscript as an e-mail attachment;
- fast communication between the editor and the referees by sending your manuscript electronically and receiving the review the same way; thus shortening the refereeing process.

The *benefits* for the readers:

- You will be able to obtain the latest research results in Polymer Science within a very short period of time (approximately two months from submission of the manuscript by the author).
- The layout of the papers are more uniform and thus easier to read.

The Publisher

You can download the templates at
