

## Classified Contents

- Acrylamide, non-catalyzed polymerization of, 1
- Acrylonitrile, polymerization of in DMF, photosensitized by ferric chloride inhibited by cupric chloride, 89
- Amines and aromatic nitriles, polymers from, 923
- Amylose and amylose acetate in various solvents, application of Ptitsyn theory to viscosity data, 257
- Anionic polymerization of ethylene oxide in dimethyl sulphoxide, 653
- Annealing of PET, morphological changes, 117
- Annealing, oil and air, effect of on drawn PET, 539
- Association in polyacrylonitrile solutions, effect of solvent on, 791
- Azo-*bis*-isobutyronitrile and silver perchlorate, complex formation between, 713
- Catalyzed polymerization of styrene, 11
- Cationic and free radical propagation of copolymerization by the N-vinyl carbazole cation-radical, 327
- Cellulose acetate, secondary, wet spinning of, 135
- Cellulose triacetate, single crystals of by film formation, 932
- Cloud-point method for determining theta-conditions, theory of, 181
- Cohesive energy density, dependence on polymer stereostructure, 708
- Comparative thermal diffusivity measurements, detection of transition points of polymers from, 148
- Complex formation between silver perchlorate and azo-*bis*-isobutyronitrile, 713
- Computer calculation of reactivity ratios from the integrated form of the copolymer 333
- Conformational changes of oligomeric polymethylenes with chain length, an NMR study of, 951
- Copolymers, regular, of vinyl compounds with aliphatic dihalides, spectroscopic analysis of, 611
- Critical solution temperatures, lower, of polyisobutylene plus isomeric alkanes, 247
- Critical solution temperature, lower, thermodynamic solution properties of polymers, 467
- Crosslinking of branched poly(vinyl acetate) by radiation, 439
- Crystal density, crystallinity and heat of fusion of poly(tetramethylene oxide), 715
- Crystalline polymer ribbons, transverse screw dislocations, 271
- Crystallization kinetics of poly(ethylene oxide), 187, 203
- Crystallization of poly(ethylene terephthalate) and related copolymers, 873
- Crystallization of polymers, kinetics of, use of differential scanning calorimetry, 95
- Cu(I), Fe(III)/Cu(II), Fe(II) equilibrium and its influence on the ferric chloride photosensitized, cupric chloride inhibited polymerization of acrylonitrile in N,N-dimethylformamide, 89
- Densities of liquid polymers, effects of pressure and temperature on, 841
- Dibromostyrene and 2,4,5-tribromostyrene, copolymerization with styrene, 489
- Dibromostyrene and 2,4,5-tribromostyrene, synthesis and polymerization of, 479
- Differential scanning calorimetry, measurements of glass transition of polystyrene, 319
- exo*- and *endo*-Dicyclopentadiene, structure of polymers derived from, 393
- Differential scanning calorimetry, use of to study polymer crystallization kinetics, 95
- Diffusion of gas mixtures, the time lag for, 265
- Dihalides, aliphatic, reactions involving, 603
- Dihalides, aliphatic, and vinyl compounds, regular copolymers of, 611
- 1,3-Dioxan, a note on, 105
- 1,3-Dioxepan, polymerization of, structure of polymer and thermodynamics of its formation, 105
- Dispersions, dielectric and mechanical, equivalence of in some polymers, 859
- Dimethylsiloxanes, oligomeric, equilibrium ring concentrations and the statistical conformation of, 543
- Dynamic mechanical properties of some polyamides, effect of absorbed water on, 159
- Eigenvalues and the intrinsic viscosity of short gaussian chains, 421
- Elastomer networks, characterization of, 55
- Electrical conductivity and preparation of TCNQ complexes of some simple stilbazoles, and of a poly(vinylstyrylpyridine), 691
- Electrical conductivity of some nitrogen containing heterocyclic polymers, 645
- Emantiomorphic crystal-crystal transition of *trans*-polybutadiene, 175
- Equilibrium modulus factors, approximate calculation of for rubber networks, from swollen compression data, 711
- Equilibrium ring concentrations and the statistical conformation of oligomeric dimethylsiloxanes, 543
- Ethylene oxide, anionic polymerization of in dimethyl sulphoxide, 653

- Free radical and cationic propagation of copolymerization by the N-vinyl carbazole cation-radical, 327
- Free radical decay with irradiated polyethylene, 579
- Free radical polymerization, the nature of the termination reaction in, 885
- Gaussian chains, short, eigenvalues and the intrinsic viscosity of, 421
- Gel permeation chromatograms, an extrapolation method for eliminating overload effects from, 213
- Gel permeation chromatography, molecular weights by, 154
- GLC, micropyrolysis, kinetic measurements by, 683
- Glass transition measurements on polystyrene by differential scanning calorimetry, 319
- Glass transition temperatures of polymers, dependence on heating rate, 151
- H(2S), fast atoms from electron-beam excitation of polyethylene, 721
- Heat of fusion of PET, 113
- Heat of fusion of poly(tetramethylene oxide), 715
- Heterocyclic compounds, thermodynamics of polymerization of, 910
- Heterocyclic polymers, nitrogen containing, electrical conductivity of, 645
- Hydrophilic/hydrophobic balance and the dispensibility of polymeric acrylic soaps, relationship between, 633
- Infra-red and laser-Raman spectra of poly(methyl methacrylate), 737
- Infra-red spectra and molecular structure of poly(ethylene terephthalate), 339
- Infra-red spectrum and vibrational assignments of poly(phosphonitrilic chloride) 307
- $\beta$ -Keratin, structure of, 810
- Kinetics of crystallization of poly(ethylene oxide), 187, 203
- Kinetic measurements by micropyrolysis-GLC, 683
- Kinetics of polymer crystallization, use of differential scanning calorimetry, 95
- Laser-Raman and infra-red spectra of poly(methyl methacrylate), 737
- Light scattering data, multiple and curvilinear regression analysis of, 804
- Light scattering measurements, influence of order in solutions of polyvinylcarbazolate, 29
- Liquid polymers, effects of pressure and temperature on the densities of, 841
- Macrocyclics in Nylon 6, 597
- Macrocyclic polymers, 559
- Mannan from the cell wall of the green seaweed, *codium fragile*, degree of polymerization and polydispersity of, 621
- Mechanical anisotropy and volume changes of strained rubbers, 279
- Medical implant applications, piperazine copolymers for, 939
- Molecular structure and infra-red spectra of poly(ethylene terephthalate), 339
- Molecular weight distributions from turbidimetric titration and related techniques: theoretical evidence for a new calibration procedure, 827
- Molecular weights by gel permeation chromatography: unperturbed dimensions calibration for polyisoprene, 154
- Molecular weight measurements and limiting viscosity number on poly(1,2-cyclohexene oxide), 233
- Morphological changes on annealing PET, 117
- Multiple and curvilinear regression analysis of light scattering data, 804
- Network structure, influence of organometallic initiator on, 771
- Nitriles (aromatic) and amines, polymers from, 923
- N.M.R. studies of conformational changes of oligomeric polymethylenes with chain length, 951
- Nucleation, heterogeneous, at interfaces in isotactic polypropylene, 747
- Nucleation and propagation of cracks in polystyrene, 451
- N-Vinyl carbazole cation-radical, cationic and free radical propagation of copolymerization by, 327
- Nylon 6, macrocyclics in, 597
- Organometallic initiator, influence of on network structure, 771
- Oxidative coupling of some 2,6-disubstituted phenols, 701
- Phenols, 2,6-disubstituted, oxidative coupling of, 701
- Photolysis of polyvinylbenzophenone, 21
- Piperazine copolymers for medical implant applications, 939
- Polyacrylonitrile solutions, effect of solvent on association, 791
- Polyamides, dynamic mechanical properties of, 159
- Polybenzimidazoles and related polymers, 923
- Polycondensation reaction, 661
- Poly(1,2-cyclohexene oxide), molecular weight measurements and limiting viscosity number, 233
- Poly(dimethyl siloxane), thermodynamic analysis of the elastic properties of, 573

- Polyethylene, drawn, surface free energy of the crystallites in, 718
- Polyethylene, fast H(2S) atoms from electron-beam excitation of, 721
- Polyethylene, irradiated, free radical decay, 579
- Polyethylene (oxidized) crystals, thermodynamic properties of, 900
- Polyethylene, stirrer crystallized thermal properties of, 127
- Poly(ethylene oxide) kinetics of crystallization of, 187, 203
- Poly(ethylene terephthalate), drawn, effect of oil and air annealing on the structure of, 539
- Poly(ethylene terephthalate), drawn, effect of oil and air annealing on the structure of, 539
- Poly(ethylene terephthalate) heat of fusion, 111
- Poly(ethylene terephthalate), infra-red spectra and molecular structure of, 339
- Poly(ethylene terephthalate), morphological changes on annealing, 117
- Poly(ethylene terephthalate) and related copolymers, crystallization of, 873
- Polyglycine, water adsorption isotherm of, 833
- Polyisobutylene plus isomeric alkanes, lower critical solution temperatures of, 247
- Polyisoprene, unperturbed dimensions calibration for: molecular weights by GPC, 154
- Polymeric acrylic soaps, the relationship between the hydrophilic/hydrophobic balance and the dispersibility of, 633
- Polymethylenes, oligomeric, an NMR study of conformational changes with chains length, 951
- Poly(methyl methacrylate), infra-red and laser-Raman spectre of, 737
- Polymethylmethacrylate possessing laurylmercaptyl end groups, thermal degradation of, 683
- Poly(*n*-octyl methacrylate), equivalence of dielectric and mechanical dispersions, 859
- Poly(phosphonitrilic chloride), infra-red spectrum and vibrational assignments, 307
- Polypropylene, isotactic, heterogeneous nucleation at interfaces in, 747
- Polypropylene, syndiotactic, effect of syndioindex on the thermal properties of, 239
- Polystyrene, glass transition measurements by differential scanning calorimetry, 319
- Polystyrene, narrow-distribution, dilute solution properties of, 399
- Polystyrene, nucleation and propagation of cracks in, 451
- Polystyrene, relaxation of, 751
- Polystyrenes of different molecular weights, fracture surfaces of, 724
- Poly-*trans*-1,4-isoprene, ringed spherulites in, 800
- Poly(tetramethylene oxide) crystal density, crystallinity and heat of fusion of, 715
- Poly(vinyl acetate), branched radiation crosslinking studies on, 439
- Polyvinylbenzophenone, photolysis of, 21
- Polyvinylcarbanilate, influence of order in solutions of on light scattering measurements, 29
- Polyvinyl chloride, thermal degradation of, 63
- Poly(vinylstyrylpyridine), TCNQ complexes of, 691
- Propylene sulphide, initiation of polymerization by ammonia-zinc carbonate, 784
- Ptitsyn theory, application of to viscosity data for amylose and amylose acetate in various solvents, 257
- Radiation crosslinking studies on branched poly(vinyl acetate), 439
- Radical-forming process in the presence of solvents, 759
- Reactivity ratios, computer calculations of, from the integrated form of the copolymer equation, 333
- Relaxation times of polystyrene, 751
- Rubber network, approximate calculation of equilibrium modulus factors from swollen compression data, 711
- Rubber network, effects of strain on the equilibrium properties of rubber networks, 495
- Rubbers, strained, mechanical anisotropy and volume changes of, 279
- Rubber in torsion, theoretical stress/temperature relations for, 291
- Silver perchlorate and azo-*bis*-isobutyronitrile, complex formation between, 713
- Single crystals by film formation, 932
- Solid phase polymerization, 661
- Solution (dilute) properties of narrow distribution polystyrene, 399
- Spectroscopic analysis of regular copolymers of vinyl compounds with aliphatic dihalides, 611
- Spherulites, ringed, in poly-*trans*-1,4-isoprene, 800
- Statistical conformation and equilibrium ring concentrations of oligomeric dimethylsiloxanes, 543
- Stereostructure, polymer, dependence of cohesive energy density on, 708
- Stilbazoles, simple, TCNQ complexes of, 691
- Strain, effects of on the equilibrium properties of rubber networks, 495
- Stress relaxation, intermittent, and thermal aging of vulcanized rubber, 852
- Stress/temperature relations, theoretical, for rubber in torsion, 291
- Styrene-butadiene block copolymer films cast from toluene solution, fine structures of, 79

- Styrene, copolymerization with dibromostyrene and 2,4,5-tribromostyrene, 489
- Styrene/methyl methacrylate block copolymers in dilute solution, behaviour in theta solvents, 517
- Styrene/methyl methacrylate block copolymers, preparation and characterization, 501
- Styrene, polymerization mechanism of when catalyzed by ceric salt containing *n*-dodecylbenzene sulphonic ion and ethyl alcohol or cyclohexanone, 11
- Surface free energy of the crystallites in drawn polyethylene, 718
- Syndioindex, effect on the thermal properties of syndiotactic polypropylene, 239
- TCNQ complexes of some simple stilbazoles and of a poly(vinylstyrylpyridine), 691
- Termination reaction in free radical polymerization, nature of the termination reaction in, 885
- Thermal aging and intermittent stress relaxation of vulcanized rubber, 852
- Thermal degradation of polymethylmethacrylate possessing lauryl-mercaptyl end groups, 683
- Thermal degradation of poly(vinyl chloride), 63
- Thermal properties of stirrer crystallized polyethylene, 127
- Thermal properties of syndiotactic polypropylene, 239
- Thermodynamic analysis of the elastic properties of poly(dimethyl siloxane), 573
- Thermodynamics of polymerization of heterocyclic compounds, 910
- Thermodynamic properties of oxidized polyethylene crystals, 900
- Thermodynamic solution properties of polymers exhibiting lower critical solution temperature, 467
- Theta-conditions, theory of the cloud-point method for determining, 181
- Transition measurements, glass, on polystyrene by differential scanning calorimetry, 319
- Transition points of polymers, detection of by comparative thermal diffusivity measurements, 148
- Transition temperature, glass dependence on heating rate, 151
- trans*-Polybutadiene, enantiomorphic crystal-crystal transition of, 175
- Transverse screw dislocations, a source of twist in crystalline polymer ribbons, 271
- Turbidimetric titration and related techniques, molecular weight distributions from, 827
- Vinyl aromatic polymer solutions, viscosity of, 43
- Vinylcarbazole, imitation of polymerization by lithium halides, 531
- Vinyl chloride polymerization to 2 500 atm, 385
- Vinyl compounds and aliphatic dihalides, regular copolymers of, 611
- Virial coefficient, second, of sodium carboxymethyl amylose, second virial coefficient of, 167
- Viscosity data, application of Ptiytsyn theory to, for amylose and amylose acetate in various solvents, 257
- Viscosity, intrinsic of short gaussian chains, and eigenvalues, 421
- Viscosity number (limiting) and molecular weight measurements on poly(1,2-cyclohexene oxide), 233
- Viscosity of vinyl aromatic polymer solutions, 43
- Volume changes and mechanical anisotropy of strained rubbers, 279
- Vulcanized rubber, thermal aging and intermittent stress relaxation of, 852
- Water adsorption isotherm of polyglycine, 833
- Water adsorption of small amounts of hygroscopic materials, measurement of, 833
- Wet spinning of secondary cellulose acetate, solution rheology and filament spinnability, 135
