

# Classified Contents

- Acoustic modes, longitudinal, of polytetrafluoroethylene copolymers and oligomers, 1258
- Acoustic studies of heterophase systems: styrene-butadiene-styrene, 919
- Acoustic vibrations, longitudinal, in polyethers and polythioethers, 573
- Adhesive, anionically prepared flexible: 4. Acrylonitrile modified adhesive, 514
- Adhesive, epoxide, an aliphatic amine cure rubber modified: 1. Preparation and preliminary evaluation using a room temperature cure, 945, 2. Further evaluation, 951
- Adhesive properties of ABA poly(styrene-*b*-isoprene) block copolymers, 587
- Adsorption of polymers at the solid-liquid interface: a comparison of the e.p.r. and i.r. techniques, 500
- Alkali refining, cold, of cellulosic pulps derived from Egyptian cotton and bagasse, 315
- Amorphous polymers, enthalpy relaxation in, 413
- Anionic polymerization of ethylene oxide with cryptates as counterions, 1047
- Anionically prepared flexible adhesive: 4. Acrylonitrile modified adhesive, 514
- Anisotropy, optical, of a worm-like chain and its application to the determination of the persistence length in an aromatic polyamide, 262
- Annealing of solution-grown single crystals of ethylene-butadiene copolymers, 887
- Antitumour and toxicologic properties of related polyanions, a comparative study, 461
- Apparatus for the manipulation of polymer supported reagents, 1291
- Axial arrangement of  $\alpha$ -chains in the collagen molecule: intramolecular polar and apolar interactions, 1091
- Benzoyloxy radical, effect of pressure upon the dissociation, 749
- Bioadhesion, a surface energy analysis, 475
- Biodegradation of poly(3-methoxy-4-hydroxy styrene), 759
- Block polymers from poly(ethylene oxide) and styrene, 286
- Butadiene-styrene copolymers,  $^{13}\text{C}$  n.m.r. studies. A revised assignment, 310
- Case II transport of methanol in thin sheets of PMMA, discontinuous shape changes associated, 1195
- Catalytic activity of metal compounds in the thermal decomposition of ethylene dibenzoate, 1295
- Cellulose, the solution and regeneration of using novel solvent systems, 203
- Cellulosic pulps, derived from Egyptian cotton and bagasse, cold alkali refining, 315
- Chain branching in high pressure polymerized polyethylene, 1005
- Chain extension, a possible mechanism of in nylon-6 during crystallization under pressure, 63
- Chain flexibility of poly(phenyl thiolethacrylate), 639
- Chain length and branching, effect of on the interaction energies of polymer molecules, 201
- Characterization of helical sense by infrared measurement, 1288
- Chromium coordinated polyamides, structural memory in, 564
- Cinnamylideneacetic acid and its derivatives, a study on phenoxy-resin esters of, 81
- Circular dichroism of poly( $\beta$ -benzyl-L-aspartate) films in the  $\alpha$ ,  $\beta$ , and  $\omega$  conformations, 111
- Composite membrane system, unusual thermal energy transduction by means of, 206
- Composites, carbon fibre, bonding of with an epoxide-isoprene copolymer, 76
- Concentration and temperature effect on the partial specific volume of a polystyrene sample in *trans*-decalin, 1289
- Conductivities of poly(*N*-vinyl carbazoles) containing cation-radicals, 781
- Collagen gels, modulus jump and degradation: dependence on concentration and pH, 467
- Collagen molecule, axial arrangement of  $\alpha$ -chains: intramolecular polar and apolar interactions, 1091
- Collagen, tensile forces induced in by means of electromechanochemical transductive coupling, 435
- Condensation polymerization, rate of for monomers having reactivities different from their polymers, 851
- Conjugates, soluble polymer-protein: 1. Reactive *N*-(sym-trinitroaryl) polyacrylamide/acrylhydrazide copolymers and derived carbonic anhydrase conjugates, 319
- Copolymer, ABC triblock, styrene/butadiene/2-vinylpyridine and its hydrochloride salt, some optical and mechanical properties, 859
- Copolymer ( $\beta$ -benzyl D- and L-aspartate), infra-red spectra obtained by the polymerization of the *N*-carboxylic anhydride, 95
- Copolymer, divinyl ether-maleic anhydride 1: 2, a quantitative evaluation of the structure and properties of the methyl ester, 452
- Copolymer, epoxide-isoprene, bonding of carbon fibre composites with, 76
- Copolymer, methyl methacrylate-acrylonitrile (MA1), dilute solution properties, 878
- Copolymer, polystyrene-polybutadiene block, of high polystyrene content, oriented macrolattice in, 960
- Copolymer styrene-methyl methacrylate, temperature influence on the excess interaction parameter, 32
- Copolymers, ABA poly(styrene-*b*-butadiene), effect of casting solvents on certain physical properties, 49
- Copolymers, ABA poly(styrene-*b*-isoprene) block, adhesive properties of, 587
- Copolymers, alternating styrene/acrylonitrile, 1157
- Copolymers, alternating of styrene and *N*-substituted maleimides, n.m.r. relaxation studies of molecular motion in, 786
- Copolymers, block, prepared by an anion to free radical transformation process: 1. Kinetics and efficiency of initiation of polyisoprene-lead trimethyl, 1292
- Copolymers, butadiene-isoprene, monomer units distribution, 1196
- Copolymers, isotactic propylene/butene-1, properties of solution grown crystals, 42
- Copolymer, cellulose tricarbaniolate-polystyrene, produced by radiation grafting, examination, 521
- Copolymers cellulose tricarbaniolate-polystyrene graft, an investigation of the thermal properties, 531
- Copolymers, ethylene-butadiene, annealing of solution-grown single crystals, 887
- Copolymers, isotactic propylene/butene-1, effect of thermal treatment on solution-grown crystals, 891
- Copolymers, Monte Carlo simulation of copolymerization and compositional inhomogeneity: comparison to experimental data, 705
- Copolymers, new block, structural and mechanical properties of biomedical use, 387
- Copolymers, polystyrene-poly(ethylene oxide) graft, synthesis and characterization, 1253
- Copolymers, poly(tetramethyl-*p*-silphenylenesiloxane) and (tetramethyl-*p*-silphenylenesiloxane)-(dimethyl siloxane), crystallinity, 1152
- Copolymers, SAN, molecular weight: values of the constants for viscometric determination, 959
- Copolymers, styrene-butadiene block, ultrasonic studies of solutions, 577
- Copolymer systems, thermodynamics of melting of pseudoeutectic linear, 685
- Copolymerization of benzonitrile and propylene oxide initiated by *n*-butyllithium, 308
- Copolymerization, kinetics of: 1. Dilatometric investigation of the copolymerizations of benzyl methacrylate, styrene and methyl methacrylate, 963
- Crack propagation, stability of in epoxy resins, 1075
- Craze shape and fracture, temperature dependence of in poly(methyl methacrylate), 87
- Critical chain length for the formation of the  $\alpha$ -helix in the solid state: synthesis and conformation of sequential oligopeptides and polypeptide having L-leucyl-L-leucylglycine sequence, 755
- Crosslinking of polypeptides, *in situ*, 449
- Crystalline structures, published, of poly(tetramethylene terephthalate), a comparison, 825
- Crystallinity and fusion of low molecular weight poly(ethylene oxide): effect of end-group, 852
- Crystallinity of poly(tetramethyl-*p*-silphenylenesiloxane) and (tetramethyl-*p*-silphenylenesiloxane)-(dimethyl siloxane) copolymers, 1152

- Crystallization of  $\alpha,\omega$ -ethoxy-poly(ethylene oxide), 93
- Crystallization kinetics of poly(ethylene oxide) diluted with xylene, 1095
- Crystallization kinetics of poly(hexamethylene oxide), effect of molecular weight, 1100
- Crystallization kinetics of poly(vinylidene fluoride), 1240
- Crystallization, oriented overgrowth, on needle shaped polyoxymethylene single crystals from molten polymers, 265
- Crystallization phenomena in some polyester-urethanes, 155
- Crystallization in poly(dimethyl siloxane) networks formed by  $\gamma$ -irradiation, 97
- Crystallization of running filament in melt spinning of polypropylene, 913
- Crystals, polymer, mosaic blocks in—the concept of paracrystallinity, 743
- Crystals, solution grown of isotactic propylene/butene-1 copolymers, properties, 42
- Cure temperature, effect of on urethane networks, 777
- Deformation of linear flexible chain fluid polymers, ultimate regimes, 1275
- Degradation, mechanical, of polymers: the limiting degree of polymerization, 741
- Degradation methods, determination of epoxy groups in natural rubber, 607
- Degradation of poly(methyl methacrylate) by flash irradiation, 1063
- Degradation, thermal, of bridged polyaromatic sulphides investigated by direct pyrolysis in the mass spectrometer, 1149
- Dielectric and dynamic Kerr effect studies of poly(*n*-butyl isocyanate) and poly(*n*-octyl isocyanate) in solution, 540
- Diffusion and nuclear magnetic relaxation in concentrated polystyrene solutions, 255
- Diffusion of polystyrene in tetrahydrofuran, 835
- Diffusion and relaxation in glassy polymer powders: 1. Fickian diffusion of vinyl chloride in poly(vinyl chloride), 697
- Discontinuous shape changes associated with Case II transport of methanol in thin sheets of PMMA, 1195
- Dissolution of polypropylene in organic solvents: 3. Effect of molecular weight of polymer, 547
- DRDF study of liquid crystalline poly(ethylene terephthalate) and *p*-hydroxybenzoic acid copolyester, 1085
- Dynamics of polymer molecules: a comparison of strongly coupled correlated (internal viscosity) and non-correlated (local mode) models for molecular weight independent conformational relaxation, 505
- Elastomers, thermoplastic polyurethane, based on aliphatic diisocyanates: thermal transitions, 197
- Electric birefringence of sodium poly(L-glutamate) in water/organic solvent mixtures, 969
- Electric conductivity, changes in during the process of methyl methacrylate polymerization, 409
- Electric field birefringence cell, simple, 554
- Electrochemical initiation in methyl methacrylate—natural rubber latex systems, 100
- Electromechanochemical transductive coupling, tensile forces induced in collagen by means of, 435
- E.p.r. and i.r. techniques, a comparison adsorption of polymers at the solid—liquid interface, 500
- E.s.r. studies of peroxy radicals in polyethylene: 1. Temperature dependence of spectra and molecular motion of radical sites, 567. 2. Peroxy radicals in urea—polyethylene complexes, 1143
- E.s.r. studies on oxidation processes in irradiated polyethylene: 1. Diffusion of oxygen into amorphous part at low temperatures, 151
- E.s.r. studies of spin-labelled synthetic polymers: 13. Lithiation of copolymers of chloro- and bromostyrenes, 930
- Electro-optic decays, relation between the initial slope and the moments of the distribution of size, 1235
- Emulsion polymerization, gel permeation chromatography of crosslinked particles prepared by, 526
- Enthalpy relaxation in amorphous polymers, 413
- Excluded volume theories: fifth-power type equations, 275
- F.i.r. absorption frequencies of polyethylene, calculation of using a proved semi-empirical potential function, 341
- Fibrillar structure of ultra-oriented polyethylene, 967
- Flash method, thermal diffusivity of polymers, 129
- Fluorescence and photooxidation of commercial polypropylene, 968
- Fourier transform infra-red study of polypropylene, 1169
- Fracture morphology in notched tension, influence of the molecular weight of poly(methyl methacrylate), 391
- Free radicals trapped in polyethylene matrix: 1. Location of the alkyl radicals in irradiated polyethylene, 19. 2. Decay in single crystals and diffusion, 25
- Gel permeation chromatography of cross-linked particles prepared by emulsion polymerization, 526
- G.p.c., high performance, with crosslinked polystyrene gels: influence of particle size distribution, 1179
- Gel permeation chromatography of polymers, estimation of thermodynamic quality of the solvent from the concentration effect, 897
- Gel permeation chromatography, preferential solvation of solvent (1)/polymer (2)/polymer (3) ternary systems by, 1296
- Gelation properties of partial benzoylated isotactic polystyrene and its implications to the gel structure of isotactic polystyrene, 883
- Glass fibre reinforced polypropylene, injection moulded discs. Structure and mechanical properties, 1269
- Glass transition and cold crystallization in 'even' and 'odd'  $\omega$ -amino-acid polyamides, 551
- Glass transition temperatures of ionic polymers, role of electrostatic forces, 817
- Glass transition temperature of nylon-6, variation with changing water content, 742
- Glassy polymer powders, diffusion and relaxation in: 1. Fickian diffusion of vinyl chloride in poly(vinyl chloride), 697
- Glassy polystyrene microspheres, effect of prior sample history on *n*-hexane sorption in glassy polystyrene microspheres, 1105
- Haloaldehyde polymers: 11. Polybromal, 1051
- Helical sense, characterization of by infra-red measurement, 1280
- Heterophase systems: styrene—butadiene—styrene, acoustic studies, 919
- n*-Hexane sorption in glassy polystyrene microspheres, effect of particle size on the mechanism controlling, 793
- Infra-red analysis of poly(vinylidene fluoride) thermoelectrets, 278
- Infra-red and Raman spectra of poly(*m*-methylene terephthalate) polymers, 327
- Infra-red spectra of the copolymer ( $\beta$ -benzyl D- and L-aspartate) obtained by the polymerization of the *N*-carboxylic anhydride, 95
- Injection moulded discs of glass fibre reinforced polypropylene, structure and mechanical properties, 1269
- Injection moulding pressures, high, influence of on the engineering properties of linear polyethylene, 1068
- Inner salt polymers, preparation of from vinylimidazolium sulphobetaines, 1058
- Interaction energy parameter determination, comparative studies on the use of gas chromatographic and vapour pressure techniques, 810
- Intramolecular changes during polymorphic transformations of amylose, 489
- Intrinsic viscosity and friction coefficient of polymers in solution, 636
- Ionic polymers, role of electrostatic forces, in the glass transition temperatures, 817
- Isomeric structures in polyisoprenes, distribution, 580
- Kinetics of copolymerization: 1. Dilatometric investigation of the copolymerizations of benzyl methacrylate, styrene and methyl methacrylate, 963
- Kinetics of the thermal oxidation of poly(4-methyl-1-pentene) from volatile products using thermogravimetric analysis, 807
- Laser-Raman spectrum of helical syndiotactic polypropylene, 681
- Macromolecular complexes, simulation and display, 431
- Melting behaviour and crystalline, intermediate and amorphous phase in poly(ethylene terephthalate) fibres, 856
- Melting behaviour of stress crystallized high density polyethylene, 204
- Membranes consisting of hydrophilic domains in a hydrophobic matrix, porosity, 831
- Membranes, shell, of the domesticated fowl (*Gallus gallus* (L.)), a dynamic characterization via relaxation techniques, 1213
- Methyl- $\alpha$ -cyanoacrylate, polymerization: 3. Study of radical polymerization by differential scanning calorimetry, 73
- Methyl methacrylate—natural rubber latex systems, electrochemical initiation, 100
- Methyl methacrylate polymerization, changes in electric conductivity during the process, 409
- Microcalorimetry, flow, on dilute polymer solutions, 55
- Miscibility, partial, in the system poly(*para*-chlorostyrene-co-*ortho*-chlorostyrene)/poly(2,6-dimethyl-1,4-phenylene oxide), 1022

## Classified Contents

- Modulus jump and degradation of collagen gels: dependence on concentration and pH, 467
- Molecular clustering in mixtures of polyethylene and deuterated polyethylene, small-angle neutron scattering studies, 1111
- Molecular motion in polymer melts: 1. Description by components and n.m.r. relaxation behaviour, 233. 2. Interpretation of relaxation data of poly(ethylene oxide), 239
- Molecular weight characterization of poly(vinyl chloride): reference materials and universal calibration, 408
- Molecular weight, distribution of polymers, correlations, 750
- Molecular weight of SAN copolymers: values of the constants for viscometric determination, 959
- Monomer units distribution in butadiene-isoprene copolymers, 1196
- Monte Carlo simulation of copolymerization and compositional inhomogeneity of copolymers: comparison to experimental data, 705
- Monte Carlo simulation of terpolymerization, 925
- Morphology and stress-strain properties of the three block copolymers, correlation between: 2. The hardening effect of the second deformation, 191
- Morphology studies of one-way drawn poly(ethylene terephthalate) films by X-ray diffraction, 1219
- Mosaic blocks in polymer crystals—the concept of paracrystallinity, 743
- Mucopolysaccharides with chymotrypsin, interaction, 483
- Natural rubber, determination of epoxy groups by degradation methods, 607
- Natural rubber vulcanizates, effect of vulcanization temperature and vulcanization systems on the structure and properties, 1243
- Network of  $\gamma$ -irradiated poly(vinyl alcohol) beads, 1227
- Network polymers, heterogeneous: 7. Cholesteric liquid crystal structure of poly(glutamic acid) fixed by crosslinking, 1041
- Network properties: 3. A pulsed n.m.r. study of molecular motions in some AB-crosslinked polymers, 244
- Networks, poly(dimethyl siloxane) formed by  $\gamma$ -irradiation, crystallization, 97
- Networks, semicrystalline polymeric, tear propagation resistance, 403
- Networks, urethane, effect of cure temperature on, 777
- N.m.r., broadline, a study of molecular motion in polycarbonate by, 557
- N.m.r.,  $^{13}\text{C}$ , determination of units formed by irregular addition in polyisoprene, 871
- N.m.r.,  $^{13}\text{C}$ - $^1\text{H}$ , determination of the microstructure of poly(butene-1), 1193
- N.m.r.,  $^{13}\text{C}$ , spectroscopy, characterization of urea-formaldehyde adducts and resins, 971
- N.m.r. spectroscopy,  $^{13}\text{C}$ , detection of end-groups and estimation of molecular weights of polyiminoalkenes, 345
- N.m.r.,  $^{13}\text{C}$ , studies of butadiene-styrene copolymers. A revised assignment, 310
- N.m.r.,  $^1\text{H}$ , measurements on aqueous solutions of poly(methacrylic acid), 1185
- N.m.r. relaxation studies of molecular motion in alternating copolymers of styrene and *N*-substituted maleimides, 786
- Nucleic acids, vinyl polymer analogues, 425
- Nucleophilic substitution onto poly(methyl methacrylate): 3. Compositional homogeneity of the substituted polymethacrylates, 937
- Nylon-6, a possible mechanism of chain extension in during crystallization under pressure, 63
- Nylon-6, variation of the glass transition temperature of with changing water content, 742
- Oligomers, cyclic, from ethylene glycol-adipic acid polycondensation, 305
- Oligomers, ethylene oxide and propylene oxide mixing: 1. Enthalpy and volume changes, 164. 2. Phase separation, 171
- Oligopeptide antibiotic distamycin A and its interactions with duplex DNA, 495
- Orientation behaviour, molecular, of uniaxially stretched poly(vinyl chloride) film: 1. Birefringence: effect of plasticizers and draw ratio above and below  $T_g$ , 137. 2. The fourth moment of molecular orientation measured by the polarized fluorescence method, 143. 3. Effect of molecular orientation on anisotropy of Young's modulus in uniaxially stretched poly(vinyl chloride) film, 801
- Orientation effects on a high *cis*-1,4-polybutadiene induced by shear rate in a capillary rheometer, 92
- Orientation, thermodynamically controlled crystal, in stressed polymers: 1. Effects of strain energy of crystals embedded in an uncrosslinked amorphous matrix and hydrodynamic potential, 1015
- Oriented macrolattice in a polystyrene-polybutadiene block copolymer of high polystyrene content, 960
- Oxidative polymerization of 1-naphthol using  $\text{Cu}^{\text{I}}$ -pyridine catalyst, effect of reaction variable, 1081
- Partial chain coupling of anionically prepared polymers by air termination, 306
- Particle dimensions in polystyrene/polyethylene blends as a function of their melt viscosity and of the concentration of added graft copolymer, 69
- Pentaerythritol tetracinnamate, structure and solid state photopolymerization, 161
- Peptide mixtures, *cis/trans*, the existence of in poly(*N*-methylglycine), 107
- Phase separation of the poly(ethylene glycol)-water-salt systems, 1027
- Phenoxy-resin esters of cinnamylideneacetic acid and its derivatives, a study, 81
- Phosphonitrilic chloride: 36. Electrical conductivity of dichlorocyclophosphazene trimer and dichlorophosphazene polymer, 351. 37. Reaction of 1,1-diamino-3,3,5,5-tetrakis(2,2,2-trifluoroethoxy) cyclotriphosphazene with organosilanes, 1045
- Photoactive polymers containing vanadium: 1. Preparation, characterization and photoreactions, 375. 2. Kinetics of photodecomposition, 381
- Photoconduction of aliphatic polyrhodanines, 601
- Photodegradation, effect of on the rate of spherulitic growth of poly(ethylene glycol adipate), 198
- Photolysis, flash, investigation on primary processes of the sensitized polymerization of vinyl monomers: 2. Experiments with benzoin derivatives, 1163
- Photon correlation spectroscopy, measurement of the intramolecular fluctuations of random coil polymers, 10
- Photo-oxidation of polypropylene, nature of the initiation process, 98
- Plastic fracture of polystyrene, 745
- Poly(acryloyl morpholine)/carbonic anhydrase conjugates, expanded, with catalytic activity in aqueous-organic media, synthesis and properties, 1203
- Poly(*N*-acryloyl-L-propyl morphine): a g.p.c. packing exhibiting novel temperature dependence in solute distribution coefficients, 1208
- Poly(*S*-alkyl-L-cysteines) containing long aliphatic side chains, 854
- Poly(alkyl itaconates): 4. Glass and sub-glass transitions in the di-alkyl ester series, methyl to hexyl, 612
- Poly(alkyl methacrylates), ultrasonic studies, 324
- Polyamides aromatic, characterization and conformation of poly(1,4-phenylene terephthalamide) and poly(*p*-benzamide) in sulphuric acid, 591
- Polyamides chromium coordinated, structural memory in, 564
- Polyamides, crystallization of under elevated pressure: 3. The morphology and structure of pressure-crystallized nylon-6 (polycapramide), 647. 4. Annealing of nylon-6 (polycapramide) under pressure, 654. 5. Pressure-induced crystallization from the melt and annealing of folded-chain crystals of nylon-11, poly(aminoudecaneamide) under pressure, 660. 6. Pressure-induced crystallization from the melt and annealing of folded-chain crystals of nylon-12, polylaurolactam under pressure, 667
- Polyamides dissolved in mixed solvents (cosolvents), viscosity studies, 121
- Poly{2,2 bis[4(*p*-aminophenoxy) phenyl] propane-terephthalic acid}, synthesis, 411
- Polyanions, related, a comparative study of antitumour and toxicologic properties, 461
- Polyaromatic sulphides, bridged, thermal degradation investigated by direct pyrolysis in the mass spectrometer, 1149
- Poly(arylene ether sulphones) by polyetherification: 1. Synthesis of halogenophenols, 354. 2. Polycondensations, 359. 3. Molecular weight, molecular weight distribution and the possibility of chain branching, 365. 4. Physical properties in relation to molecular structure, 369
- Poly( $\beta$ -benzyl-L-aspartate) films in the  $\alpha$ ,  $\beta$  and  $\omega$  conformations, circular dichroism, 111
- Poly(benzyl methacrylate), dilute solution properties of, 114
- cis*-1,4-Polybutadiene, high, orientation effects induced by shear rate in a capillary rheometer, 92
- Poly(butene-1),  $^{13}\text{C}$ - $^1\text{H}$  n.m.r. determination of the microstructure, 1193
- Poly(*N*-*t*-butyl acrylamide) and absorbed heavy water, H $\rightarrow$ D exchange between, 185
- Polycarbonate, a study of molecular motion in by broad line nuclear magnetic resonance, 557
- Poly(2-chlorophenyl methacrylate), solution properties and chain flexibility, 200

- Polychlorotrifluoroethylene, tensile deformation of in He, N<sub>2</sub>, Ar, O<sub>2</sub> and CO<sub>2</sub> environments, 298
- Polycondensation of *N*-acetyl-D-glucosamine and structure of poly(*N*-acetyl-D-glucosamine), 291
- Poly(L-β-3,4-dihydroxyphenyl-L-alanine), synthesis and conformational study, 979
- Poly(dimethyl siloxane), chemically cross-linked, effect of γ-irradiation, 1191
- Poly(dimethyl siloxane), multiple hyper-sonic relaxations and the α-transition, 862
- Poly(dimethyl siloxanes), studies of cyclic and linear: 1. Limiting viscosity number-molecular weight relationship, 1265
- Polyesteramide 6NT6: polycondensation kinetics, d.s.c. and n.m.r. studies of thermally treated samples, 269
- Polyethers and polythioethers, longitudinal acoustic vibrations in, 573
- Polyethylene, calculation of the f.i.r. absorption frequencies of using a proved semiempirical potential function, 341
- Polyethylene, crystalline, swollen by oligomers of various molecular weights, Raman scattering from the longitudinal acoustic mode, 1190
- Polyethylene crystallized at high pressure, small-angle neutron scattering studies, 259
- Polyethylene, e.s.r. studies of peroxy radicals in: 1. Temperature dependence of spectra and molecular motion of radical sites, 567. 2. Peroxy radicals in urea-polyethylene complexes, 1143
- Polyethylene, high pressure polymerized, chain branching in, 1005
- Polyethylene, influence of high injection moulding pressures on the engineering properties, 1068
- Polyethylene, irradiated, e.s.r. studies on oxidation processes: 1. Diffusion of oxygen into amorphous part at low temperatures, 151
- Polyethylene, low density, nature of the side chain branches: volatile products from gamma radiolysis, 1032
- Polyethylene matrix free radicals trapped in: 1. Location of the alkyl radicals in irradiated polyethylene, 19. 2. Decay in single crystals and diffusion, 25
- Polyethylene, melting behaviour of stress crystallized high density, 204
- Polyethylene, structural transitions in, 414
- Polyethylene, ultra-oriented, fibrillar structure, 967
- Poly(ethylene glycol adipate), effect of photodegradation on the rate of spherulitic growth, 198
- Poly(ethylene oxide) diluted with xylene, crystallization kinetics, 1095
- Poly(ethylene oxide), low molecular weight, crystallinity and fusion: effect of end-groups, 852
- Poly(ethylene oxide), sorption of solutes: 3. Partial molar entropy and enthalpy in poly(ethylene oxide) solution with benzene, 1009
- Poly(ethylene terephthalate) crystallized by annealing in the highly oriented state, structure and properties: 2. Melting behaviour and the mosaic block structure of the crystalline layers, 1121
- Poly(ethylene terephthalate) fibres, melting behaviour and crystalline, intermediate and amorphous phase, 856
- Poly(ethylene terephthalate) film, corona treated, surface modification: adsorption and wettability studies, 675
- Poly(ethylene terephthalate), one-way drawn films, morphology studies by X-ray diffraction, 1219
- Poly(ethylene terephthalate), studies on the formation: 9. Thermal decomposition of ethylene dibenzoate as a model compound of poly(ethylene terephthalate), 295
- Polyglutamates, L-helical, <sup>13</sup>C spin-lattice relaxation study of molecular motions of side chains, 857
- Poly(L-glutamic acid) α-helix, effect of organic solvents on the stability, 1082
- Poly(hexamethylene oxide), effect of molecular weight on the crystallization kinetics, 1100
- Poly(2-hydroxyethyl methacrylate) gel, thermoelasticity, 712
- Polyiminoalkenes, detection of end-groups and estimation of molecular weights by <sup>13</sup>C n.m.r. spectroscopy, 345
- Polyisoprene, <sup>13</sup>C n.m.r. determination of units formed by irregular addition in, 871
- Polyisoprenes, distribution of isomeric structures in, 580
- Polymer supported reagents, apparatus for the manipulation, 1291
- Polymers, amorphous, temperature dependence of the steady recoverable compliance, 15
- Polymers, glassy, visual evidence of clustering of water in, 958
- Polymers, individual bead contribution to intrinsic viscosity, 747
- Polymers in mixed solvents: application of the new representation of viscosity data as a function of molecular weight, 1250
- Polymers, semicrystalline, thermal conductivity—a model, 769
- Polymers in solution, intrinsic viscosity and friction coefficient of, 636
- Polymerization and copolymerization of vinylferrocene in the presence of lithium and *n*-butyllithium, 1286
- Polymerization of propylene by the Ziegler catalysts systems α-TiCl<sub>3</sub>/Al(C<sub>2</sub>H<sub>5</sub>)<sub>3</sub> and supported TiCl<sub>4</sub>(Al(C<sub>2</sub>H<sub>5</sub>)<sub>3</sub>), 179
- Polymerization, reaction to effect the transformation of anionic into cationic: 1. Synthesis and reactivities of anionically generated bromine terminated polymers, 719. 2. Synthesis and reactivities of anionically generated xylylene bromide-terminated polymers, 726. 3. Analysis of block copolymer formation by gel permeation chromatography, 733
- Polymerizations, free radical vinyl, radiochemical studies: 7. Polymerization of methyl acrylate, 840
- Poly(methacrylic acid), <sup>1</sup>H n.m.r. measurements on aqueous solutions, 1185
- Poly(3-methoxy-4-hydroxy styrene), biodegradation, 759
- Poly(*N*-methylglycine), the existence of *cis/trans* peptide mixtures, 107
- Poly(methyl methacrylate), degradation by flash irradiation, 1063
- Poly(methyl methacrylate), influence of the molecular weight of on fracture morphology in notched tension, 391
- Poly(methyl methacrylate), nucleophilic substitution onto: 3. Compositional homogeneity of the substituted polymethacrylates, 937
- Poly(methyl methacrylate), temperature dependence of craze shape and fracture, 87
- Poly(methyl methacrylate), ultrasonic degradation, 822
- Poly(4-methyl-1-pentene), kinetics of the thermal oxidation of, from volatile products using thermogravimetric analysis, 807
- Poly(methyl vinyl ketone), structure and polymerization conditions, 1173
- Poly(*m*-methylene terephthalate) polymers, infra-red and Raman spectra, 327
- Polymorphic transformations of amylose, intramolecular changes during 489
- Polypeptides, collagen-like sequential, structural studies, 420
- Polypeptides, *in situ* crosslinking, 449
- Poly(phenyl thiolmethacrylate), chain flexibility, 639
- Polypropylene, commercial, fluorescence and photooxidation, 968
- Polypropylene, crystallization of running filament in melt spinning, 913
- Polypropylene, dissolution of in organic solvents: 3. Effect of molecular weight of polymer, 547
- Polypropylene, helical syndiotactic, laser-Raman spectrum, 681
- Polypropylene, nature of the initiation process in the photo-oxidation, 98
- Polyoxymethylene single crystals from molten polymers, needle shaped, oriented overgrowth crystallization, 265
- Polyrhodanines, aliphatic, photoconduction, 601
- Polysiloxanes, studies of the chemical degradation of by hydrofluoric acid: 2. Poly(tetramethyl-*p*-silphenylene siloxane-dimethyl siloxane) block copolymers, 845
- Polystyrene, blends of atactic and isotactic, residual solvent removal and *n*-hexane sorption, 1130
- Polystyrene, determination of the specific heat of by d.s.c., 281
- Polystyrene, diffusion of in tetrahydrofuran, 835
- Polystyrene gels, crosslinked, high performance g.p.c.: influence of particle size distribution, 1179
- Polystyrene melts, specific volumes of anionic effects of chain ends and molecular weight, 124
- Polystyrene microspheres, glassy, effect of particle size on the mechanism controlling *n*-hexane sorption, 793
- Polystyrene, plastic fracture, 745
- Polystyrene/polyethylene blends, particle dimensions in as a function of their melt viscosity and of the concentration of added graft copolymer, 69
- Polystyrene, refractive index of at 5461 Å in the temperature range 30 to 260K, 308
- Polystyrene sample in *trans*-decalin, effect of concentration and temperature on the partial specific volume, 1289
- Polystyrene sheets, characterization and effects of *n*-alkane swelling, 1137
- Polystyrene solutions, concentrated, diffusion and nuclear magnetic relaxation, 255
- Polystyrene, volumetric properties: influence of temperature, molecular weight and thermal treatment, 3
- Polystyrenes, Raman, infra-red and neutron studies of low frequency vibrations in some substituted, 905
- Polytetrafluoroethylene copolymers and oligomers, longitudinal acoustic modes, 1258
- Polytetrafluoroethylene, vibrational assignment problem: 1. The far infra-red spectrum, 37
- Poly(tetramethylene terephthalate), a comparison of published crystalline structures, 825

## Classified Contents

- Poly(vinyl acetate) in solution, proton spin-lattice relaxation in, 637
- Poly(vinyl alcohol) beads, irradiated, network, 1227
- Poly(*N*-vinyl carbazoles) containing cation-radicals, conductivities, 781
- Poly(vinyl chloride) film, uniaxially stretched, molecular orientation behaviour: 1. Birefringence: effect of plasticizers and draw ratio above and below  $T_g$ , 137. 2. The fourth moment of molecular orientation measured by the polarized fluorescence method, 143. 3. Effect of molecular orientation on anisotropy of Young's modulus in uniaxially stretched poly(vinyl chloride) film, 801
- Poly(vinyl chloride), molecular weight characterization: reference materials and universal calibration, 408
- Poly(*N*-vinylsuccinimide), molecular motions, 175
- Poly(vinylidene chloride-ethyl acrylate), transport of hydrogen in, 599
- Poly(vinylidene fluoride), crystallization kinetics, 1240
- Poly(vinylidene fluoride)-poly(methyl methacrylate) blends, 1175
- Poly(vinylidene fluoride) thermoelectrets, infra-red analysis, 278
- Proteins, spectrin, actin and other mammalian, van der Waals parameters, refractive indices and dispersion equations, 867
- Proton spin-lattice relaxation in poly(vinyl acetate) in solution, 637
- Radiation grafting, examination of a cellulose tricarbonylate-polystyrene copolymer produced by, 521
- Radiochemical studies of free-radical vinyl polymerizations: 7. Polymerization of methyl acrylate, 840
- Raman, infra-red and neutron studies of low frequency vibrations in some substituted polystyrenes, 905
- Raman scattering from the longitudinal acoustic mode of crystalline polyethylene swollen by oligomers of various molecular weights,
- Raman scattering from mixtures of poly(ethylene oxide) 2000 with poly(ethylene oxide) 200, 336
- Random coil polymers, measurement of the intramolecular fluctuations by photon correlation spectroscopy, 10
- Reduction of the ferri-protoporphyrin IX dimethyl ester by the 1,2-dihydropyridine type redox resin, 955
- Refractive index increments, specific, of Guayule rubber in several solvents, 922
- Refractive index of polystyrene at 5461 Å in the temperature range 30 to 260K, 308
- Relaxation, proton spin-lattice in vinyl polymers, 225
- Relaxation techniques, a dynamic characterization of the shell membranes of the domesticated fowl (*Gallus gallus*(L)), 1213
- Relaxations, multiple, in small-molecule solids, 1231
- Resins, epoxy, stability of crack propagation, 1075
- Rubber, Guayule, specific refractive index increments in several solvents, 922
- Screw extrusion, steady, of polymers, developments in the analysis, 617
- Semicrystalline polyethylene, small-angle neutron scattering by, 509
- Shear rate in a capillary rheometer, orientation effects on a high *cis*-1,4 polybutadiene induced by, 92
- Silk, physical properties and structure: 4. Spherulites grown from aqueous solutions of silk fibroin, 643
- Simulation and display of macromolecular complexes, 431
- Small-angle light scattering from rabbit cornea, effect of transcorneal pressure on, 444
- Small-angle neutron scattering by semicrystalline polyethylene, 509
- Small-angle neutron scattering studies of molecular clustering in mixtures of polyethylene and deuterated polyethylene, 1111
- Small-angle neutron scattering studies of polyethylene crystallized at high pressure, 259
- Small-angle X-ray scattering study on polymer chain dimensions in concentrated solutions in a  $\theta$ -solvent, 638
- Sodium poly(L-glutamate) in water/organic solvent mixtures, electric birefringence, 969
- Solution, preferential, of solvent (1)/polymer (2)/polymer (3) ternary systems by gel permeation chromatography, 1296
- Sorption of solutes by poly(ethylene oxide): 3. Partial molar entropy and enthalpy in poly(ethylene oxide) solution with benzene, 1009
- Stress relaxation, non-linear, a simple model, 251
- Structure and mechanical properties in injection moulded discs of glass fibre reinforced polypropylene, 1269
- Structural and mechanical properties of new block copolymers designed for biomedical use, 387
