

polymer

volume 20 number 1 january 1979
POLMAG 20(1) 1-136

the international journal for the science and technology of polymers

- 3 Immobilization of enzymes by radiation-induced polymerization of glass-forming monomers:
1. Immobilization of some enzymes by poly(2-hydroxyethyl methacrylate)
Masaru Yoshida, Minoru Kumakura and Isao Kaetsu
- 9 Immobilization of enzymes by radiation-induced polymerization of glass-forming monomers:
2. Effects of cooling rate and solvent on porosity and activity of immobilized enzymes
Masaru Yoshida, Minoru Kumakura and Isao Kaetsu
- 13 Structure of the hard segments in polyurethane elastomers
John Blackwell and Kennecorwin H. Gardner
- 18 Kinetics and polydispersity changes during acid hydrolysis of *streptococcus salivarius* levan
S. S. Stivala, M. D. Lauren and S. K. Garg
- 23 Conformation and packing analysis of polysaccharides and derivatives: 6. Detailed refinement of tri-*O*-ethylamylose-solvent complexes TEA1-C1 and TEA1-DCM1
T. L. Bluhm and P. Zugenmaier
- 31 Raman spectroscopy of Kevlar 49 fibre
Lynn Penn and Fred Milanovich
- 37 Morphological study on the effect of elastomeric impact modifiers in polypropylene systems
J. Karger-Kocsis, A. Kalló, A. Szafner, G. Bodor and Zs. Sényei
- 44 Effect of temperature and solvent composition on the unperturbed dimensions of polystyrene
A. Bazuaye and M. B. Huglin
- 51 Effect of structural variation on the low temperature relaxation of aromatic polyesters
F. Uralil, W. Sederel, J. M. Anderson and A. Hiltner
- 55 Photodegradation of chloromethyl vinyl ketone polymer and copolymers with styrene and α -methylstyrene
Takayuki Otsu, Hitoshi Tanaka and Hiroaki Wasaki
- 59 Association of stereoregular poly(methyl methacrylates): 4. Further study on the composition of the stereocomplex
E. J. Vorenkamp, F. Bosscher and G. Challa
- 65 Tetrahydrofuran-propylene oxide copolymers: 1. End-group analysis by ^{13}C n.m.r. and the mechanistic inferences
V. D. Mochel, T. W. Bethea and S. Futamura
- 71 Thermal motion of α -helical molecules in highly crystalline poly(γ -methyl L-glutamate) films
S. Sasaki, Y. Takiguchi, M. Kamata and I. Uematsu
- 76 Polyelectrolyte behaviour of acrylonitrile methallylsulphonate copolymers in dimethylformamide
Cyrille Rochas, Alain Domard and Marguerite Rinaudo
- 81 Use of the rotating ring disc electrode for electrochemically-induced redox initiation of aqueous polymerization
B. Lionel Funt and Li-Chien Hsu
