Classified contents

- Acrylic acid**
Copolymerization of acrylic acid with sulphur dioxide, 253
- Adhesion**
Dialometric investigation of deformation mechanisms in polystyrene–polyethylene block copolymer blends: correlation between Poisson ratio and adhesion, 103
Effect of carriers on the performance of aluminium alloy joints bonded with an epoxide–polyamide adhesive, 344
Further studies on the effect of carriers on the performance of aluminium alloy joints bonded with an epoxide polyamide adhesive, 1477
The interaction of water with some epoxide adhesives, 357
- Adsorption**
Adsorption of poly(dimethyl siloxanes) from solution on silica: 1., 533
- Aldehydes**
Haloaldehyde polymers: 20. Thermodynamics of polymerization, 525
Polymerization of higher aldehydes, 1433
- Amines**
A simple, rapid, microgasometric method for determination of primary aliphatic amine groups in polymers, 1167
4-Amino-4''-carboxy-p-terphenyl
Solid state polymerization of 4-amino-4''-carboxy-p-terphenyl, 1065
- Amylose**
Structure of potassium bromide–amylose determined by accurate X-ray diffraction intensities, 483
- Antioxidant**
Mechanisms of antioxidant action – behaviour of hindered piperidines during the photooxidation of polypropylene, 252
- Annealing**
Low temperature annealing of isotactic polypropylene by differential scanning calorimetry, 35
- Association behaviour**
Association behaviour of poly(4-vinylbiphenyllithium) and substituted polydiethylolithiums in n-hexane, 119
- Aziridines**
Electroinitiated polymerization of aziridines, 230
- Azobisisobutyronitrile**
Efficiency of initiation by azobisisobutyronitrile in the emulsion polymerization of styrene, 429
Photoinitiated polymerization of *N* vinyl carbazole in the presence of azobisisobutyronitrile, 832
- Azo chromophores**
Isomerization of aromatic azo chromophores in poly(ethyl acrylate) networks and photomechanical effects, 1175
- Azo polymers**
Photoresponsive effects in azo polymers, 1195
- Benzoin**
Benzoin derivatives as photo-initiators for vinyl polymerization in micellar systems, 1363
- Bicyclo[6.1.0]nonene-4**
Stereoselectivity of the ring opening polymerization of bicyclo[6.1.0]nonene-4, 1112
- Bisphenol A**
Kinetic data on the polycondensation of tetrachlorobisphenol A with bis(2,3-dichloropropyl) phosphorochloridite, 89
Relations between structure and properties in bisphenol A polyester carbonates, 1448
Thermal degradation of bisphenol A polycarbonate, 936
- Blends**
Binary and ternary blends for poly(vinyl chloride) segmented poly(ether ester) and chlorosulphonated polyethylene, 469
- Borax**
Binding of borax to poly(vinyl alcohol) in aqueous solution, 485
- Butyl isocyanate**
Electropolymerization of butyl isocyanate: 1. Initiation, 805; 2. Polymerization kinetics, 812
- Butyl methacrylate**
Polymerization of butyl methacrylate by light scattering and the formation of regions of local inhomogeneity, 1247
- Calorimetry**
Calorimetric and neutron scattering studies of mixtures of polystyrene with poly(2,6-dimethyl-1,4-phenylene oxide) and its brominated derivatives, 133
- Catalysts**
¹³C n.m.r. spectra of polymers made by ring opening polymerization of (±) and (+)-exo-5-methylbicyclo[2.2.1]hept-2-ene using metathesis catalysts, 436
Double bond shift reactions in polymers made by ring-opening polymerization of cycloalkenes initiated by metathesis catalysts, 367
- Mechanism of solid–liquid phase transfer catalysis by polymer-supported linear polyethers, 791
Studies on highly active coordination catalysts for polymerization of α -olefins: 1. X-ray diffractometric investigations of the catalyst supports, 1037
Synthesis and catalytic activity of optically active polymers containing oxime groups, 541
Triphase catalysis of a nucleophilic substitution reaction by crosslinked polycations prepared from 4-vinyl pyridine and α , ω -dibromoalkanes, 861
- Cellulose**
New aspects of graft copolymerization of styrene onto cellulose induced by gamma rays, 309
Preparation and water sorption properties of cellulose–poly(propylene glycol) block copolymers 648
- Chain characteristics**
Long chain branching in low density polyethylene: 1. Molecular structure, 1087; 2. Rheological behaviour of the whole polymer, 1092
Concentration dependence of chain dimensions and its role in gel chromatography, 798
Polymer chain dimensions and the dependence of viscoelastic properties on concentration, molecular weight and solvent power, 258
Unperturbed dimensions of poly(phenyl acrylate), 413
Chain extension from neutron scattering in high modulus oriented polyethylene, 479
Chain fluctuations in the amorphous regions of polyethylene as indicated in proton relaxation spectroscopy, 1001
Study of amorphous–crystal interfaces in polymers using the weicket model: estimate of bounds on degree of adjacent re-entry, 1379
Three statistical mechanical arguments that favour chain folding in polymer systems of lamellar morphology, 733
Chain motion in amorphous regions of polyethylene: interpretation of deuteron n.m.r. line shapes, 757
X-ray measurement of chain orientation in non-crystalline polymers, 1017
Free radicals and new end-groups resulting from chain scission: 1. γ -Irradiation of polyethylene, 941
Chain trajectory in solution grown polyethylene crystals: correlation between infra-red spectroscopy and small-angle neutron scattering, 1121

- Chain transfer induced by molecular hydrogen in the living polymerization of propene with soluble $V(acac)_3Al(C_2H_5)_2Cl$, 1352
- Characterization**
- A simple, rapid, microgasimetric method for determination of primary aliphatic amine groups in polymers, 1167
- Characterization of oligo-poly(dimethyl siloxanes) and their solutions in toluene, 651

- Deformation of doubly oriented polyethylene, nylon-6,6 and polyethylene terephthalate, 992
- Dynamic mechanical properties of polystyrene/low density polyethylene blends, 1469
- Effect of radiation on the crystals of polyethylene and the paraffins: 1. Formation of the hexagonal lattice and the destruction of crystallinity in polyethylene, 1273; 2. Phase separation in γ -irradiated paraffins, 1278; 3. Irradiation in the electron microscope, 1284
- Energetics analysis of polyethylene crystallization: single crystal growth surfaces, 153
- Free radicals and new end groups resulting from chain scission: 1. γ -Irradiation of polyethylene, 941
- Hot drawing of porous high molecular weight polyethylene, 3
- Long chain branching in low density polyethylene: 1. Molecular structure, 1087; 2. Rheological behaviour of the whole polymer, 1092
- Molecular association complex of urea with polyethylene: 2. New preparation methods and morphological study, 968
- Molecular fluctuations in polyethylene melts. Dependence of the longitudinal and transverse proton relaxation on the chain length, 1009
- Morphology of crosslinked polyethylene, 723
- Possible models for the polyethylene hexagonal phase, 973
- Relaxation processes and mobility of spin-labelled polyethylene, 1304
- Relaxation spectrometry of polyethylene in urea-polyethylene complex by *BL* n.m.r. and e.s.r. measurements, 1116
- Rheo-optical studies on the deformation mechanism of semicrystalline polymers: 9. Dynamic birefringence behaviour of a high density polyethylene film having row nucleated crystalline texture of *c*-axis orientation, 1205
- Time dependent failure in poly(methyl methacrylate) and polyethylene, 213
- Ultra-high strength polyethylene filaments by solution spinning/drawing: 3. Influence of drawing temperature, 1341
- Poly(ethylene oxide)*
Dynamic structure of swollen crosslinked poly(ethylene oxide) gels from n.m.r. lineshape analysis and magic angle rotation n.m.r., 1185
- Kinetic theory of polymer crystal growth applied to melt crystallization of low molecular weight poly(ethylene oxide), 444
- Study of poly(ethylene oxide)-resorcinol molecular complex, 403
- Thermal behaviour of poly(ethylene oxide) revealed by differential scanning calorimetry, 352
- Poly(ethylene terephthalate)*
Characterization of biaxial orientation in poly(ethylene terephthalate) by means of refractive index measurements and Raman and infra-red spectroscopies, 41
- Deformation of doubly oriented polyethylene, nylon-6,6 and poly(ethylene terephthalate), 992
- Effect of chain composition of PET on small-angle X-ray scattering, 373
- Infra-red measurements on one-way

- drawn poly(ethylene terephthalate) films subjected to constant strain, 55
- Surface modification of poly(ethylene terephthalate) by electrical discharge treatment, 895
- Poly(glycolic acid)*
Differential scanning calorimetric study of the crystallization kinetics of poly(glycolic acid) at high undercooling, 1480
- Poly(hydroxyethers)*
Investigation of the elementary reactions in the synthesis of poly(hydroxyethers) in dipolar, aprotic solvents, 1069
- Poly[N-(2-hydroxyethyl) carbazolyl methacrylate-co-picryl methacrylate]*
Intramolecular charge transfer complexes: 1. Poly[N-(2-hydroxyethyl) carbazolyl methacrylate-co-picryl methacrylate], 417
- Poly(isobutylene)*
Ultrasonic relaxation studies of poly(isobutylene) in *m*-xylene, 772
- Polyisocyanates*
Rigid backbone polymers: 6. Ternary phase relationships of polyisocyanates, 21
- Polymethacrylates*
Compatibility of polyacrylates and polymethacrylates with poly(vinyl chloride): 1. Compatibility and temperature variation, 1330; 2. Measurement of interaction parameters, 1335
- Poly(methacrylic acid)*
Conformations in partly ionized poly(methacrylic acid): 1. Ionic hydrogen bonds in syndiotactic chains, 287; 2. Unperturbed dimensions of syndiotactic chains, 293
- Poly(1,2-bis(p-methoxybenzenesulphonyl-oxymethyl)-1-buten-3-ynylene)*
Crystal structure of poly 1,2-bis(p-methoxybenzene-sulphonyloxy-methyl)-1-buten-3-ynylene, 1269
- Poly(methyl methacrylate)*
A ¹H nuclear magnetic relaxation study of the mechanism and solvent dependence of the motion of predominantly syndiotactic poly(methyl methacrylate) in dilute solution, 381
- Computerized infra-red study of the interaction of poly(vinylidene fluoride) with stereoregular poly(methyl methacrylate), 509
- Electron resists prepared from colloidal dispersions of poly(methyl methacrylate) in nonsolvents, 1356
- Time dependent failure in poly(methyl methacrylate) and polyethylene, 213
- Poly(methylphenyl siloxane)*
Dynamic Kerr effect and dielectric relaxation studies of a poly(methylphenyl siloxane), 279
- Polyoxymethylene*
Correlation between microvoid properties and mechanical properties of polyoxymethylene strained beyond yield, 553
- Morphology of nascent polyoxymethylene obtained by polymerization of trioxane in nitrobenzene solution, 66
- Poly(phenyl acrylate)*
Unperturbed dimensions of poly(phenyl acrylate), 413
- Poly(p-phenylene terephthalamide)*
Tensile deformation of poly(*p*-phenylene terephthalamide) fibres, an experimental and theoretical analysis, 1199
- Polypropylene*
Characterization of deformation phenomena in polymers by rapid-scanning Fourier transform infrared (FT i.r.) spectroscopy and mechanical measurements: 1. Orientation of isotactic polypropylene during uniaxial deformation, 235
- Elongational viscosity at a constant elongational strain rate of polypropylene melt, 164
- Elongational viscosity in the isothermal melt spinning of polypropylene, 691
- Low temperature annealing of isotactic polypropylene by differential scanning calorimetry, 35
- Mechanisms of antioxidant action—behaviour of hindered piperidines during photo-oxidation of polypropylene, 252
- Retraction of polypropylene tape, 1259
- Vibrational spectrum of syndiotactic polypropylene. Raman tacticity bands and local structures of iso- and syndiotactic polypropylenes, 143
- Poly(propylene glycol)*
Creep, creep recovery and dynamic mechanical measurements of a poly(propylene glycol) oligomer, 837
- Molecular motion in melt samples of poly(propylene glycol) studied using dielectric and Kerr effect relaxation techniques, 13
- Preparation and water sorption properties of cellulose–poly(propylene glycol) block copolymers, 648
- Poly(propylene terephthalate)*
Unsaturated polyesters based on terephthalic acid: 3. Characterization of poly(propylene terephthalate) prepolymer by gel permeation chromatography, 632
- Polypyromellitimides*
Symmetry and stability of polypyromellitimides, 1052
- Polystyrene*
A corresponding states interpretation of the temperature dependence of the intrinsic viscosity of polystyrene in isopropyl acetate, 715
- Correlation of impact strength and rubber phase volume fraction in impact polystyrene, 1234
- Dynamic mechanical properties of polystyrene/low density polyethylene blends, 1469
- Effect of branching on the sedimentation behaviour of moderately concentrated polystyrene solutions, 183
- Effect of dicumyl peroxide on photo-oxidation of polystyrene films: 2., 545
- Effect of injection pressure and crazing on internal stresses in injection-moulded polystyrene, 338
- Effect of rubber phase volume fraction in impact polystyrene on mechanical behaviour, 466
- Extrusion and injection moulding of a glass-filled polystyrene, 1360
- Non-aqueous polymer dispersions: dimensions of adsorbed AB block copolymers of polystyrene and poly(dimethyl siloxane) by small-angle neutron scattering, 627
- Preparation and characterization of spin-labelled polystyrene, 232
- Self diffusion of short chain polystyrenes in deuteriochloroform solution, 1479
- Solubility behaviour of polystyrene: thermodynamic studies using gas chromatography, 1041
- Ultrasonic relaxation in dilute polymer solutions: 1. Normal mode and conformational processes, 764
- Ultrasonic studies of dilute polystyrene solutions: 2. The kilohertz frequency region, 769
- Poly(styryl diphenylphosphine dibromide)*
Preparation and application of functional polymers. Preparation of carbodiimides, ketenimines and imidoyl bromides using a poly(styryl diphenylphosphine dibromide), 255
- Poly(styryl-1,8-naphthyridine)*
Preparation of poly(styryl-1,8-naphthyridine) and some of its metal complexes, 597
- Polytetrafluoroethylene*
Order–disorder transitions in polytetrafluoroethylene, 325
- Thermal degradation of PTFE studied by ultraviolet photoelectron spectroscopy, 1309
- Poly(1,2,5-trimethyl-) and (2,5-dimethyl-4-ethynilpyrrolid-4 hydrochlorides)*
Hydrodynamic properties of poly-1,2,5-trimethyl- and 2,5-dimethyl-4-ethynilpyrrolid-4 hydrochlorides in solution, 787

- Poly(tetramethylene terephthalate)*
Dynamic mechanical behaviour of oriented poly(tetramethylene terephthalate) as a function of static extension, 221
- Polyurethane*
Morphological characterization of reaction injection moulded (*RIM*) polyester-based polyurethanes, 393
- Polyurethane*
Morphology of crystalline polyurethane hard segment domains and spherulites, 388
- Poly(vinyl alcohol)*
Binding of borax to poly(vinyl alcohol) in aqueous solution, 485
Reference samples of poly(vinyl alcohol) for molar mass measurement in aqueous solution, 891
- Poly(4-vinylbiphenyllithium)*
Association behaviour of poly(4-vinylbiphenyllithium) and substituted polydienyllithiums, 119
- Poly(vinyl carbazole)*
E.s.r. study of free radicals in poly(vinyl carbazole), 1062
- Poly(vinyl chloride)*
Binary and ternary blends for poly(vinyl chloride), segmented poly(ether ester) and chlorosulphonated polyethylene, 469
Compatibility of polyacrylates and polymethacrylates with poly(vinyl chloride): 1. Compatibility and temperature variation, 1330; 2. Measurement of interaction parameters, 1335
Crystallinity in poly(vinyl chloride), 985
Structural order in oriented PVC moulding, 109
Studies on the photodegradation of poly(vinyl chloride) accelerated by α -hydroperoxytetrahydrofuran, 226
Surface crazing in PVC and other polymers, 684
Thermal stabilization of poly(vinyl chloride) treated with organoaluminium compounds: 2. Effect of solvents, 1463
Thermally stimulated discharge in poly(vinyl chloride) thermoelectrets, 925
- Poly(vinyl imidazole)*
Role of ionic competition in the binding of a dye to poly(vinyl imidazole), 908
- Poly(4-vinyl pyridine)*
Hydrophobic polyelectrolytes and polysoaps. Ionization of weakly basic groups and conformation in aqueous solution of some derivatives of poly(4-vinyl pyridine), 1457
- Poly(vinyl pyrrolidinone)*
Conformation of adsorbed poly(vinyl pyrrolidinone) studied by infra-red spectrometry, 408
- Poly(vinylidene fluoride)*
Computerized infra-red study of the interaction of poly(vinylidene fluoride) with stereoregular poly(methyl methacrylate), 509
Crystalline transformations in spherulites of poly(vinylidene fluoride), 1317
High effective draw as a route to increased stiffness and electrical response in poly(vinylidene fluoride), 855
LCST behaviour in blends of poly(vinylidene fluoride) and isotactic poly(ethyl methacrylate), 1161
Studies on syntheses and permeabilities of special polymer membranes: 24. Permeation characteristics of poly(vinylidene fluoride) membranes, 1047
The I–II crystal transformation of poly(vinylidene fluoride) under tensile and compressional stresses, 1391
-
- Polysoaps*
Hydrophobic polyelectrolytes and polysoaps. Ionization of weakly basic groups and conformation in aqueous solution of some derivatives of poly(4-vinyl pyridine), 1457
- Powders*
Pressures transmitted through polymeric powders subjected to solid phase compaction, 138
- Propene*
Chain transfer induced by molecular hydrogen in the 'living' polymerization of propene with soluble $V(\text{acac})_3/\text{Al}(\text{C}_2\text{H}_5)_2\text{Cl}$, 1352
- Propylene sulphide*
Kinetics of ring opening of propylene sulphide: 1. Alkali metal and cryptated alkali metal carbazyl salts, 77
- Radial distribution functions*
Interpretation of radial distribution functions for non-crystalline polymers, 990
- Raman spectroscopy*
Characterization of biaxial orientation in poly(ethylene terephthalate) by means of refractive index measurements and Raman and infra-red spectroscopies, 41
Raman study of oxygen induced isomerization in $(\text{CH})_x$ films, 1235
Vibrational spectrum of syndiotactic polypropylene. Raman tacticity bands and local structures of iso- and syndiotactic polypropylenes, 143
- Reaction injection moulding*
Morphological characterization of reaction injection moulded (*RIM*) polyester-based polyurethanes, 393
- Refractive index measurements*
Characterization of biaxial orientation in poly(ethylene terephthalate) by means of refractive index measurements and Raman and infra-red spectroscopies, 41
- Relaxation processes*
Chain fluctuations in the amorphous regions of polyethylene as indicated in proton relaxation spectroscopy, 1001
Dielectric relaxation of poly(chlorostyrenes) and their copolymers in the primary transition region, 488
Influence of oxygen content in the atmosphere on chemical stress relaxation of natural rubber vulcanizates: 1. Relaxation mechanisms of sulphur cured systems, 1398
Influences of paramagnetic impurities on the proton spin–lattice relaxation time T_1 of siloxane polymers, 829
Molecular fluctuations in polyethylene melts. Dependence of the longitudinal and transverse proton relaxation on the chain length, 1009
Molecular motion in melt samples of poly(propylene glycol) studied using dielectric and Kerr effect relaxation techniques, 13
Relaxation processes and mobility of spin-labelled polyethylene, 1304
Relaxation spectrometry of polyethylene in urea–polyethylene complex by *BL* n.m.r. and e.s.r. measurements, 1116
- Resorcinol*
Study of poly(ethylene oxide)–resorcinol molecular complex, 403
- Retraction*
Retraction of polypropylene tape, 1259
- Rheo-optical studies*
Rheo-optical studies on the deformation mechanism of semicrystalline polymers: 9. Dynamic birefringence behaviour of a high density polyethylene film having row nucleated crystalline texture of *c*-axis orientation, 1205
- Ring-opening*
Kinetics of ring-opening of propylene sulphide: 1. Alkali metal and cryptated alkali metal carbazyl salts, 77
- Rubber phase volume fraction*
Correlation of impact strength and rubber phase volume fraction in impact polystyrene, 1234
Effect of rubber phase volume fraction in impact polystyrene on mechanical behaviour, 466
- Ruthenium tetroxide*
Ruthenium tetroxide as a staining agent for unsaturated and saturated polymers, 1220

Scherrer parameters

An empirical estimation of Scherrer parameters for the evaluation of true crystallite size in fibrous polymers, 929

Sedimentation

Effect of branching on the sedimentation behaviour in moderately concentrated polystyrene solutions, 183

Selenium

Crystallization during polymerization of selenium from the vapour phase, 521

Sequence distribution

Irregular sequence distribution statistics in poly(*p*-chlorophenyl glycidyl ethers), 1102

Siloxanes

Influence of paramagnetic impurities on the proton spin–lattice relaxation time T_1 of siloxane polymers, 829

Synthesis of novel siloxane block copolymers for use in photophysical studies, 369

Solubility

Dissolution of poly(ethersulphone) in dichloromethane, 659

Solubility behaviour of polystyrene: thermodynamic studies using gas chromatography, 1041

Solution spinning

Ultra-high strength polyethylene filaments by solution spinning/drawing: 3. Influence of drawing temperature, 1341

Solutions

Interpretation of dynamic scattering from polymer solutions, 866

Sorption

Cracking in a glassy epoxy resin induced by water absorption, 713

Preparation and water sorption properties of cellulose–poly(propylene glycol) block copolymers, 648

Solvent sorption and swelling in poly(ethersulphone), 901

Spin trapping

Comparison of local molecular motions at the chain ends and inside the polymer chain by use of the spin trapping method, 1299

Preparation and characterization of spin labelled polystyrene, 232

Stabilization

Thermal stabilization of poly(vinyl chloride) treated with organoaluminium compounds: 2. Effect of solvents, 1463

Staining agent

Ruthenium tetroxide as a staining agent for unsaturated and saturated polymers, 1220

Structure

Crystal structure of poly 1,2-bis(*p*-methoxybenzenesulphonyloxy-

methyl)-1-buten-3-ynylene, 1269

Evidence for structural transformations in polymer melts, 620

Relations between structure and properties in bisphenol A polyester carbonate, 1448

Static and dynamic structure factors calculated for flexible ring macromolecules, 745

Structure of potassium bromide–amylose determined by accurate X-ray diffraction intensities, 483

Temperature dependence of the lamellar structure of a styrene–isoprene two-block copolymer, 845

Styrene

Dilute gelling systems: copolymers of styrene and glycol dimethacrylates, 825

Efficiency of initiation by azobisisobutyronitrile in the emulsion polymerization of styrene, 429

New aspects of graft copolymerization of styrene onto cellulose induced by gamma rays, 309

Temperature dependence of the lamellar structure of a styrene–isoprene two-block copolymer, 845

Sulphur dioxide

Copolymerization of acrylic acid with sulphur dioxide, 253

Surface properties

Surface modification of poly(ethylene terephthalate) by electrical discharge treatment, 895

Synthesis

A poly(acryloylmorpholine)-based bead matrix of improved versatility for solid (gel) phase peptide synthesis, 481

Molecular association complex of urea with polyethylene: 2. New preparation methods and morphological study, 968

Terephthalic acid

Unsaturated polyesters based on terephthalic acid: 3. Characterization of poly(propylene terephthalate) prepolymer by gel permeation chromatography, 632

Termination

Chain length dependence of termination rate constant: computer experiment of effects on the kinetics of radical polymerization of styrene, 1423

Thermal properties

Studies of the thermal properties of poly(2,3-dibromo-but-2-ene-1,4-diol adipate), 668

Thermally stimulated discharge

Thermally stimulated discharge in poly(vinyl chloride) thermoelectrets, 925

Thermochemistry

Application of a thermochemical method for studying a low temperature polycondensation process, 1190

Thermodynamics

Haloaldehyde polymers: 20. Thermodynamics of polymerization, 525

Thermodynamic and ^{13}C n.m.r. data on the protonation of polymeric bases whose repeating units behave independently toward protonation, 81

Thermoplastics

Orientation effects during the flow of short-fibre reinforced thermoplastics, 1252

Transfer constants

Determination of the transfer constant for copolymerization in the presence of a reactive substrate, 458

Ultrasonic studies

Ultrasonic relaxation in dilute polymer solutions: 1. Normal mode and conformational processes, 764

Ultrasonic relaxation studies of poly(isobutylene) in *m*-xylene, 772

Ultrasonic studies of dilute polystyrene solutions: 2. The kilohertz frequency region, 769

Ultra-violet spectroscopy

Characterization of polyazomethines in dilute solution. Correlation between the light scattering parameters and the u.v.–visible absorption spectrum, 632

Urea

Molecular association complex of urea with polyethylene: 2. New preparation methods and morphological study, 968

Relaxation spectrometry of polyethylene in urea–polyethylene complex by *BL* n.m.r. and e.s.r. measurements, 1116

Vibrational spectra

Vibrational spectrum of syndiotactic polypropylene. Raman tacticity bands and local structures of iso- and syndiotactic polypropylenes, 143

Vinyl carbazole

Photoinitiated polymerization of *N*-vinyl carbazole in the presence of azobisisobutyronitrile, 832

Vinyl pyridines

Chiroptical and fluorescence properties of copolymers of (–)-menthyl acrylate and (–)-menthyl methacrylate with 1-vinyl pyridine, 931

Triphase catalysis of a nucleophilic substitution reaction by crosslinked polycations prepared from 4-vinyl pyridine and α,ω -dibromoalkanes, 861

Vinyl systems

Benzoin derivatives as photo-initiators for vinyl polymerization in micellar systems, 1363

Cyclization in vinyl-divinyl copolymerization, 750

Viscoelasticity

Compressive large deformation viscoelastic behaviour of a polycarbonate, 461

Polymer chain dimensions and the dependence of viscoelastic properties on concentration, molecular weight and solvent power, 258

Viscosity

A corresponding states interpretation of the temperature dependence of the intrinsic viscosity of polystyrene in isopropyl acetate, 715

Electrophoretic and viscometric properties of poly(dicarboxylic acids), 177

Elongational viscosity at a constant elongational strain rate of polypropylene melt, 164

Elongational viscosity in the isothermal melt spinning of polypropylene, 691

Linear representation of viscosity data as a function of molecular weight: 2. Extension in the domain of high expansion coefficients, 355

Rigid backbone polymers, XVII: solution viscosity of polydisperse systems, 1413

Studies of cyclic and linear poly(dimethyl siloxanes): 4. Bulk viscosities, 663

The dilute solution properties of maleic anhydride and maleic acid copolymers: 1. Light scattering, osmotic pressure and viscosity measurements, 1427

Viscosity studies of crown ether containing polymers in solutions of alkali salts. Intra-*versus* intermolecular crown-cation complexes, 188

Water treeing

Water treeing as an osmotic phenomenon, 863

X-ray scattering

Effect of chain composition of PET on small-angle X-ray scattering, 373

X-ray studies

Structure of potassium bromide-amylose determined by accurate X-ray diffraction intensities, 483

Studies on highly active coordination catalysts for polymerization of α -olefins: 1. X-ray diffractometric investigations of the catalyst supports, 1037

X-ray data for poly(aryl ether ketones), 577

X-ray diffraction study of fibrous polymers: 1. Degree of paracrystallinity - a new parameter for characterizing fibrous polymers, 1403

X-ray measurement of chain orientation in non-crystalline polymers, 1017
