International Symposium on Macromolecules

Florence, 7–13 September 1980

This International Symposium on Macromolecules with the overall theme 'Structural Order in Polymers' will be held on the occasion of the 25th Anniversary of stereospecific polymerization. Professor G. Natta is Honorary Chairman. Chairman of the Organizing Committee, Professor G. Mazzanti; Chairman of the Scientific Committee, Professor P. Pino; General Secretaries, Professor F. Ciardelli and Professor P. Guisti.

The programme consists of a special session devoted to the present state of stereospecific polymerization of olefins and diolefins, based on invited lectures, and the following two topics for which invited lectures and communications are planned.

Part 1: Constitutional and Configurational Order in Synthetic Polymers and Biopolymers, including synthetic aspects, determination of molecular structure, and structure-properties relationships

Part 2: Polymers Tailored to Specific Purposes, including biomedical applications, photochemical applications, polymers as catalysts and polymers as aids in solving ecological problems.

The first Circular giving information is being distributed and can be
