organizations in

# DART

The Directory of  
American Research  
and Technology

**R.R. BOWKER**  
THE INFORMATION COMPANY

PO Box 55, Broomfield, Essex, SS16 5LH  
KINGFISHER HOUSE, 100, GERRARD ST  
LONDON, W1P 9PH

## DART

is the most comprehensive R&D directory available. In 750-plus pages it lists over 11000 American organizations undertaking research ranging from Aerospace Science to Vehicular Engineering.

## DART

includes the most complete information to be found in any directory of its kind. The main body of the work comprises an alphabetical listing of organizations, giving full contact information, including key administrators and research personnel, laboratory addresses, staff size and make-up, and a description of the research undertaken.

## DART

includes three indexes to help you find the information you need with maximum haste. A Personnel Index lists alphabetically all administrative executives and researchers; a Classification Index organizes all R&D activities undertaken by the entrants into subjects; and a Geographic Index arranges the entrants alphabetically by state and then by city.

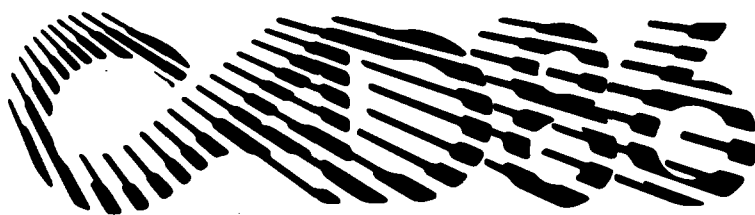

## DART

is the most cost-effective means of establishing contact with the key personnel and organizations undertaking R&D in the USA, costing only £165.00. *You can pay much more for much less.*
