

## Editorial

We are pleased to announce to our subscribers and authors that the frequency of publication of **Polymer** will increase from 18 to 24 issues per year in 1992.

**Polymer** continues to grow, and by the end of the 1992 volume we expect to have published about thirty-five percent more pages than in 1991. However, even though we are publishing many more papers we have insisted on maintaining our high refereeing standards and printing quality. We have an excellent group of Editors and we are grateful to them for their support in helping to keep **Polymer** at the forefront of polymer science publishing.

From the 1992 volume **Polymer Communications** will be bound in as part of **Polymer** journal and will no longer be published separately. This will ensure that both papers and communications are published much more rapidly.

Publishing more papers and more pages means that we have had to ask our subscribers to pay more for their 1992 subscription; however, we believe that **Polymer** continues to represent excellent value. In fact, **Polymer's** price per page is substantially lower than many other polymer science journals.

We are looking forward to another successful year for **Polymer** and I would welcome any comments or suggestions that you might have about the journal.
