Corrigendum

Kathirgamanathan, P. 'Curable electrically conductive resins with polyaniline fillers' *Polymer* 1993, **34**, 2907

Page 2907, RESULTS AND DISCUSSION. There is an error in the last sentence of the first paragraph. The sentence should read:

Polyamine-based hardeners did not cure the epoxy system because of their protonation by the protons from the dopant of polyaniline and they made the system poorly conducting owing to abstraction of protons from the polyaniline, which are important for conduction as polyaniline is a proton conductor⁹.
