## European Physical Society

EPS - '94

**STRUCTURE DEVELOPMENT DURING POLYMER PROCESSING**

Eindhoven, The Netherlands, 4-7 July 1994

Organised under the auspices of the European Physical Society - Macromolecular Board

### About the programme

Polymer Science and Technology is the paradigm of an integrated discipline in which chemistry, physics, processing, design etc constitute a 'chain of knowledge.' In order to exploit the intrinsic potential properties of macromolecules into engineered constructions, the various elements in this chain of knowledge should ideally be equally strong and integrated. In this respect, processing and processability are often overlooked and underestimated.

The aim of the meeting is to stimulate discussions between academic and industrial scientists and engineers. Experts are invited to review selected topics and to initiate discussions relating to future trends and developments focusing on processing for enhanced properties.

The following scientists have agreed to present a key-note lecture:

Babayevsky (Moscow), Baltá Calleja (Madrid), Bastiaansen (DSM), Berghmans (Leuven), Bevis (Uxbridge), Brabander (DSM), Bras (Daresbury), Capaccio (BP), Coates (Bradford), Gedde (Stockholm), Janeschitz-Kriegl (Linz), Keller (Bristol), Lambla (Strasbourg), Lommerts (AKZO), Lorentz (Rhone Poulenc), Mackley (Cambridge), Manson (Lausanne), McGrail (ICI Wilton), McLeish (Leeds), Möller (Ulm), Myasnikova (St. Petersburg), Österholm (Helsinki), Partridge (Bedford), Pertsev (St. Petersburg), Smith (Santa Barbara), Tervoort (Eindhoven), Tomka (Zürich), Ward (Leeds), Winter (UMASS).
