

Publications, J.E. Mark

1963

- [1] Stress-Temperature Coefficients for Isotactic and Atactic Poly-(Butene-1), J. E. Mark and P. J. Flory, *J. Phys. Chem.*, **67**, 1396 (1963).

1964

- [2] Configuration of the Poly-(Dimethylsiloxane) Chain. I. The Temperature Coefficient of the Unperturbed Extension, J. E. Mark and P. J. Flory, *J. Am. Chem. Soc.*, **86**, 138 (1964).
[3] Configuration of the Poly-(Dimethylsiloxane) Chain. III. Correlation of Theory and Experiment, P. J. Flory, V. Crescenzi and J. E. Mark, *J. Am. Chem. Soc.*, **86**, 146 (1964).
[4] The Configuration of the Polyoxymethylene Chain, P. J. Flory and J. E. Mark, *Makromol. Chemie*, **75**, 11 (1964).
[5] The Temperature Coefficient of the Polydimethylsiloxane Chain Configuration from Swelling Equilibrium Measurements, J. E. Mark, *J. Phys. Chem.*, **68**, 1092 (1964).

1965

- [6] The Configuration of the Polyoxyethylene Chain, J. E. Mark and P. J. Flory, *J. Am. Chem. Soc.*, **87**, 1415 (1965).
[7] The Configuration of Vinyl Polymers. Experimental. J. E. Mark and P. J. Flory, *J. Am. Chem. Soc.*, **87**, 1423 (1965).
[8] Stereoregularity and Unperturbed Dimensions of Isotactic Poly- α -Olefins, P. J. Flory, J. E. Mark, and A. Abe, *J. Polym. Sci.*, **B3**, 973 (1965).

1966

- [9] Random Coil Configurations of Vinyl Polymers, P. J. Flory, J. E. Mark, and A. Abe, *J. Am. Chem. Soc.*, **88**, 639 (1966).
[10] Stereoregularity in Poly-(Isopropyl Acrylate). I. Chain Dimensions by Viscometry and Osmometry, J. E. Mark, R. A. Wessling, and R. E. Hughes, *J. Phys. Chem.*, **70**, 1895 (1966).
[11] Stereoregularity in Poly-(Isopropyl Acrylate). II. Light Scattering Results and Intrinsic Viscosity-Molecular Weight Relationships at High Chain Extension, R. A. Wessling, J. E. Mark, E. Hamori, and R. E. Hughes, *J. Phys. Chem.*, **70**, 1903 (1966).
[12] Stereoregularity in Poly-(Isopropyl Acrylate). III. Phase Equilibrium Results, R. A. Wessling, J. E. Mark, and R. E. Hughes, *J. Phys. Chem.*, **70**, 1909 (1966).
[13] Dipole Moments of Chain Molecules. I. Oligomers and Polymers of Oxyethylene, J. E. Mark and P. J. Flory, *J. Am. Chem. Soc.*, **88**, 3702 (1966).
[14] Dipole Moments of Chain Molecules. II. Poly-(Tetramethylene Oxide), J. E. Mark, *J. Am. Chem. Soc.*, **88**, 3708 (1966).
[15] Random-Coil Configurations of *cis*-1,4-Polybutadiene and *cis*-1,4-Polyisoprene. Theoretical Interpretation, J. E. Mark, *J. Am. Chem. Soc.*, **88**, 4354 (1966).

- [16] Chain Dimensions and Dipole Moments of Poly-(Trimethylene Oxide), J. E. Mark, *J. Polym. Sci.*, **B4**, 825 (1966).
[17] The Temperature Coefficient of the Unperturbed Dimensions of Polyisobutylene, J. E. Mark and G. B. Thomas, *J. Phys. Chem.*, **70**, 3588 (1966).
[18] Stress-Strain Isotherms for Poly-(Dimethylsiloxane) Networks, J. E. Mark and P. J. Flory, *J. Appl. Phys.*, **37**, 4635 (1966).

1967

- [19] Conformational Aspects of Polypeptides, XXI. Helical Poly-N-Methyl-L-alanine. Theoretical Results, J. E. Mark and M. Goodman, *J. Am. Chem. Soc.*, **89**, 1267 (1967).
[20] Configurational Properties of Poly-(Ethylene Oxide) and Poly-(Tetramethylene Oxide), K. Bak, G. Elefante, and J. E. Mark, *J. Phys. Chem.*, **71**, 4007 (1967).
[21] Conformational Aspects of Polypeptides. XXIV. Conformational Energies of Poly-N-methyl-L-alanine Chains, J. E. Mark and M. Goodman, *Biopolymers*, **5**, 809 (1967).
[22] Interpretation of Random-Coil Configurations of *trans*-1,4-Polybutadiene and *trans*-1,4-Polyisoprene, J. E. Mark, *J. Am. Chem. Soc.*, **89**, 6829 (1967).

1968

- [23] A Thermochemical Test of Interatomic Potential Functions for Hydrocarbons, J. E. Mark, *J. Phys. Chem.*, **72**, 2941 (1968).
[24] Conformations of Polypeptides with Ionized Side Chains of Equal Length, S. Krimm and J. E. Mark, *Proc. Natl. Acad. Sci. U.S.A.*, **60**, 1122 (1968).
[25] Dipole Moments of Dimethylsiloxane Chains, J. E. Mark, *J. Chem. Phys.*, **49**, 1398 (1968).

1969

- [26] Low Energy Conformations of Isotactic Vinyl Chains Having Charged Side Chains of Equal Length, J. E. Mark and S. Krimm, *Macromolecules*, **2**, 175 (1969).
[27] Influence of Counterions on the Helical Conformations of Charged Polypeptide Chains, S. Krimm, J. E. Mark, and M. Lois Tiffany, *Biopolymers*, **8**, 695 (1969).

1970

- [28] An Experimental Comparison of the Theories of Elasticity of Polymer Networks, J. E. Mark, *J. Am. Chem. Soc.*, **92**, 7252 (1970).
[29] The Volume Dependence of the C_2 Correction in the Mooney-Rivlin Elastic Equation of State, J. E. Mark, *J. Polym. Sci., Part C*, **31**, 97 (1970).

1971

- [30] Dipole Moments of Dimethylsiloxane Oligomers and Poly

(Dimethylsiloxane), C. Sutton and J. E. Mark, *J. Chem. Phys.*, **54**, 5011 (1971).

1972

- [31] Random-Coil Dimensions and Dipole Moments of Vinyl Chloride Chains, J. E. Mark, *J. Chem. Phys.*, **56**, 451 (1972).
- [32] Random-Coil Dimensions and Dipole Moments of *p*-Chlorostyrene Chains, J. E. Mark, *J. Chem. Phys.*, **56**, 458 (1972).
- [33] The Properties of Poly(Dimethylsiloxane) Networks Prepared in Solution, and Their Use in Evaluating the Theories of Rubberlike Elasticity, R. M. Johnson and J. E. Mark, *Macromolecules*, **5**, 41 (1972).
- [34] Dipole Moments and Conformational Energies of the Chloroethanes, J. E. Mark and C. Sutton, *J. Am. Chem. Soc.*, **94**, 1083 (1972).
- [35] The Use of Dipole Moments to Characterize Chemical Sequence Distributions in Vinyl Copolymers, J. E. Mark, *J. Am. Chem. Soc.*, **94**, 6645 (1972).
- [36] On the Configurational Statistics of Ethylene-Propylene Copolymers, J. E. Mark, *J. Chem. Phys.*, **57**, 2541 (1972).

1973

- [37] The Temperature Coefficient of the Unperturbed Dimensions of Polyoxyethylene, J. E. Mark and P. J. Flory, *Macromolecules*, **6**, 300 (1973).
- [38] Thermoelastic Properties of Rubberlike Networks and Their Thermodynamic and Molecular Interpretation, J. E. Mark, *Rubber Chem. Technol.*, **46**, 593 (1973).
- [39] Random-Coil Dimensions and Dipole Moments of Propylene-Vinyl Chloride Copolymers, J. E. Mark, *J. Polym. Sci., Polym. Phys. Ed.*, **11**, 1375 (1973).
- [40] Stress-Strain Isotherms and Stress-Temperature Coefficients of Poly(Dimethylsiloxane) Networks in Compression, R. Y. S. Chen, C. U. Yu, and J. E. Mark, *Macromolecules*, **6**, 746 (1973).
- [41] Evaluation of the Theories of Rubberlike Elasticity Using Swollen Networks Cross-linked at Different Degrees of Dilution, C. U. Yu and J. E. Mark, *Macromolecules*, **6**, 751 (1973).
- [42] "Polymer Chemistry", An ACS Short Course Textbook, J. K. Stille and J. E. Mark, American Chemical Society Publication Office, Washington, D.C., 1973.
- [43] The Effect of Excluded Volume on the Dipole Moments of Chain Molecules, S. C. Liao and J. E. Mark, *J. Chem. Phys.*, **59**, 3825 (1973).
- [44] Configurational Characteristics of Ethylene-Vinyl Chloride Copolymers, J. E. Mark, *Polymer*, **14**, 553 (1973).

1974

- [45] Specific Solvent Effects in Swollen Polymer Networks, C. U. Yu and J. E. Mark, *Macromolecules*, **7**, 229 (1974).
- [46] The Thermoelastic Properties of Chemical Copolymers, J. E. Mark, *J. Polym. Sci., Polym. Phys. Ed.*, **12**, 1207 (1974).
- [47] The Use of Dipole Moments to Characterize Configurations of Chain Molecules, J. E. Mark, *Acc. Chem. Res.*, **7**, 218 (1974).
- [48] The Interpretation of Viscosity-Temperature Coefficients for Polyoxyethylene Chains in a Thermodynamically Good Solvent, S. Bluestone, J. E. Mark, and P. J. Flory, *Macromolecules*, **7**, 325 (1974).
- [49] The Unperturbed Dimensions of *Trans*-1,4-Polybutadiene, G. B. Thomas and J. E. Mark, *J. Polym. Sci., Polym. Phys. Ed.*, **12**, 2393 (1974).

1975

- [50] The Use of Compression Measurements to Study Stress-Strain Relationships and the Volume Dependence of the Elastic Free Energy of a Polymer Network, C. U. Yu and J. E. Mark, *Polymer J.*, **7**, 101 (1975).
- [51] Stress-Strain Isotherms and the Thermoelastic Properties of Cross-Linked Amorphous Polyoxyethylene in Compression, C. U. Yu and J. E. Mark, *Polymer*, **16**, 326 (1975).
- [52] Thermoelastic Studies of Diene Polymers in Elongation and Compression, R. H. Becker, C. U. Yu, and J. E. Mark, *Polymer J.*, **7**, 234 (1975).
- [53] Statistical Properties of Chain Molecules, J. E. Mark, in "Characterization of Materials in Research; Ceramics and Polymers", ed. by J. J. Burke and V. Weiss, Syracuse University Press, Syracuse, N.Y., 1975.
- [54] The Constants $2C_1$ and $2C_2$ in Phenomenological Elasticity Theory and Their Dependence on Experimental Variables, J. E. Mark, *Rubber Chem. Technol.*, **48**, 495 (1975).
- [55] Random-Coil Dimensions of Poly(methylphenylsiloxane) and Their Dependence on Stereochemical Structure, J. E. Mark and J. H. Ko, *J. Polym. Sci., Polym. Phys. Ed.*, **13**, 2221 (1975).
- [56] Configuration-Dependent Properties of Poly(dimethylsiloxane) Chains. I. Experimental Results, J. H. Ko and J. E. Mark, *Macromolecules*, **8**, 869 (1975).
- [57] Configurational-Dependent Properties of Poly(dimethylsiloxane) Chains. II. Correlation of Theory and Experiment, J. E. Mark and J. H. Ko, *Macromolecules*, **8**, 874 (1975).

1976

- [58] The Effect of Temperature on the Stress-Strain Isotherms of Polyisobutylene at High Elongation, M. Kato and J. E. Mark, *Rubber Chem. Technol.*, **49**, 85 (1976).
- [59] Configurational Characteristics of *trans*-1,4-Polychloroprene. Experimental Results on the Unperturbed Dimensions and Their Temperature Coefficient, K. Sato, F. R. Eirich, and J. E. Mark, *J. Polym. Sci., Polym. Phys. Ed.*, **14**, 619 (1976).
- [60] Random-Coil Dimensions of Poly(trimethylene oxide), An Unusually Compact Chain Molecule, Y. Takahashi and J. E. Mark, *J. Am. Chem. Soc.*, **98**, 3756 (1976).
- [61] Dimensions of Poly(trimethylene oxide) Chains in a Theta-Solvent, D. S. Chiu, Y. Takahashi, and J. E. Mark, *Polymer*, **17**, 670 (1976).
- [62] The Dependence of the Swelling of Elastin on Elongation, and its Importance in Fluorescence Probe Analysis, J. E. Mark, *Biopolymers*, **15**, 1853 (1976).
- [63] Conformational Energies, and the Random-Coil Dimensions and Dipole Moments of the Polyoxides $\text{CH}_3\text{O}[(\text{CH}_2)_y\text{O}]_x\text{CH}_3$, A. Abe and J. E. Mark, *J. Am. Chem. Soc.*, **98**, 6468 (1976).
- [64] Thermoelastic Results on Rubberlike Networks and Their Bearing on the Foundations of Elasticity Theory, J. E. Mark, *Macromol. Rev.*, **11**, 135 (1976).
- [65] Configuration-Dependent Properties of Chain Molecules, J. E. Mark, *J. Polym. Sci., Part C*, **54**, 91 (1976).
- [66] Stress-Strain Isotherms for Non-Crystallizable Networks at High Elongation, J. E. Mark, M. Kato, and J. H. Ko, *J. Polym. Sci., Part C*, **54**, 217 (1976).

1977

- [67] Model Networks of End-Linked Polydimethylsiloxane Chains. I. Comparisons Between Experimental and Theoretical Values of the Elastic Modulus and the Equilibrium Degree of Swelling, J. E. Mark and J. L. Sullivan, *J. Chem. Phys.*, **66**, 1006 (1977).

- [68] The Effect of Strain-Induced Crystallization on the Elastomeric Properties of *Cis*-1,4-Polybutadiene Networks, T.-K. Su and J. E. Mark, *Macromolecules*, **10**, 120 (1977).
- [69] Some Elastic and Thermoelastic Properties of Two Organophosphazene Polymers, J. E. Mark and C. U. Yu, *J. Polym. Sci., Polym. Phys. Ed.*, **15**, 371 (1977).
- [70] Dipole Moments of Poly(trimethylene oxide) Chains, J. E. Mark and D. S. Chiu, *J. Chem. Phys.*, **66**, 1901 (1977).
- [71] Viscoelastic Properties of Polydimethylsiloxane Networks Prepared by Cross-Linking the Chains in Solution, R. E. Cohen, S. D. Severson, C. U. Yu, and J. E. Mark, *Macromolecules*, **10**, 663 (1977).
- [72] The Effect of Swelling on the Stress-Strain Isotherms and Ultimate Properties of Polydimethylsiloxane Networks in Elongation, D. S. Chiu and J. E. Mark, *Coll. Polym. Sci.*, **225**, 644 (1977).
- [73] Configurational Partition Functions and Entropies for Polyoxide Chains Having the Repeat Unit $[(\text{CH}_2)_y\text{-O}]$, J. E. Mark, *J. Chem. Phys.*, **67**, 3300 (1977).
- [74] Dipole Moments of Poly(*p*-Chlorostyrene Chains, E. Saiz, J. E. Mark, and P. J. Flory, *Macromolecules*, **10**, 967 (1977).
- [75] The Effect of Diluent on the Stress-Strain Isotherms and Ultimate Properties of a Crystallizable Polymer Network, D. S. Chiu, T.-K. Su, and J. E. Mark, *Macromolecules*, **10**, 1110 (1977).
- 1978**
- [76] Model Networks of End-linked Polydimethylsiloxane Chains. II. Viscoelastic Losses, J. L. Sullivan, J. E. Mark, P. G. Hampton, Jr., and R. E. Cohen, *J. Chem. Phys.*, **68**, 2010 (1978).
- [77] The Ultimate Properties of Unswollen Polydimethylsiloxane Networks, and Their Dependence on the Degree of Cross-linking and the Amount of Diluent Present During the Cross-linking Process, R. R. Rahalkar, C. U. Yu, and J. E. Mark, *Rubber Chem. Technol.*, **51**, 45 (1978).
- [78] Random-Coil Dimensions of Poly(Diethylsiloxane), J. E. Mark, D. S. Chiu, and T.-K. Su, *Polymer*, **19**, 407 (1978).
- [79] Dipole Moments of Polydiethylsiloxane Chains $[\text{Si}(\text{CH}_2\text{CH}_3)_2\text{-O}]_x$, R. R. Rahalkar, D. S. Chiu, and J. E. Mark, *J. Chem. Phys.*, **69**, 938 (1978).
- [80] Conformations and Spatial Configurations of Inorganic Polymers, J. E. Mark, *Macromolecules*, **11**, 627 (1978).
- [81] Random-Coil Configurations of the Polyformals $[\text{CH}_2\text{-O-(CH}_2)_y\text{-O}]$. I. Dipole Moments of Poly(1,3-dioxolane) $[\text{CH}_2\text{-O-(CH}_2)_2\text{-O}]$, E. Riande and J. E. Mark, *Macromolecules*, **11**, 956 (1978).
- 1979**
- [82] Interpretation of Polymer Properties in Terms of Chain Conformations and Spatial Configurations, J. E. Mark, *Acc. Chem. Res.*, **12**, 49 (1979).
- [83] Stress-Strain Isotherms for Polymer Networks at Very High Elongations, J. E. Mark, *Polym. Eng. Sci.*, **19**, 254 (1979).
- [84] The Effect of Swelling on the Elasticity of Polyisobutylene Networks at High Elongation, R. R. Rahalkar and J. E. Mark, *Polymer J.*, **11**, 133 (1979).
- [85] Model Networks of End-linked Polydimethylsiloxane Chains. III. Effect of the Functionality of the Cross-Links, J. E. Mark, R. R. Rahalkar, and J. L. Sullivan, *J. Chem. Phys.*, **70**, 1794 (1979).
- [86] The Effect of Strain-Induced Crystallization on the Ultimate Properties of an Elastomeric Polymer Network, J. E. Mark, *Polym. Eng. Sci.*, **19**, 409 (1979).
- [87] Model Elastomeric Networks Prepared by Selectively Cross-linking Polydimethylsiloxane Chains Having Known Amounts of Reactive Side Chains, J. R. Falender, G. S. Y. Yeh, and J. E. Mark, *J. Chem. Phys.*, **70**, 5324 (1979).
- [88] Model Networks of End-Linked Polydimethylsiloxane Chains. IV. Elastomeric Properties of the Tetrafunctional Networks Prepared at Different Degrees of Dilution, M. A. Llorente and J. E. Mark, *J. Chem. Phys.*, **71**, 682 (1979).
- [89] An Experimental Study of the Dipole Moments of Isotactic and Atactic Poly(propylene sulfide), E. Riande, S. Boileau, P. Hemery, and J. E. Mark, *Macromolecules*, **12**, 702 (1979).
- [90] Random-Coil Configurations of the Polyformals $[\text{CH}_2\text{-O-(CH}_2)_y\text{-O}]$. II. Dipole Moments of Poly(1,3-dioxepane) $[\text{CH}_2\text{-O-(CH}_2)_4\text{-O}]$, E. Riande and J. E. Mark, *J. Polym. Sci., Polym. Phys. Ed.*, **17**, 2013 (1979).
- [91] Random-Coil Configurations of the Polyformals $[\text{CH}_2\text{O(CH}_2)_y\text{O}]$. III. The Temperature Coefficient of the Unperturbed Dimensions of Poly(1,3-dioxolane), R. R. Rahalkar, J. E. Mark, and E. Riande, *Macromolecules*, **12**, 795 (1979).
- [92] Viscosity-Temperature Coefficients for Poly(propylene sulfide) Chains in an Athermal Solvent, R. R. Rahalkar, J. E. Mark, S. Boileau, P. Hemery, and E. Riande, *J. Polym. Sci., Polym. Phys. Ed.*, **17**, 1623 (1979).
- [93] Random-Coil Configurations of the Polyformals $[\text{CH}_2\text{O(CH}_2)_y\text{O}]$. IV. Dipole Moments of Poly(1,3-dioxocane) ($y = 5$) and Poly(1,3-dioxonane) ($y = 6$), E. Riande, and J. E. Mark, *Polymer*, **20**, 1188 (1979).
- [94] Recent Studies of Rubberlike Elasticity, J. E. Mark, *Makromol. Chemie, Suppl.*, **2**, 87 (1979).
- [95] Dipole Moments of Poly(propylene sulfide) Chains, E. Riande, S. Boileau, P. Hemery, and J. E. Mark, *J. Chem. Phys.*, **71**, 4206 (1979).
- [96] The Effect of Chain Length Distribution on Elastomeric Properties. I. Comparisons Between Random and Highly Non-Random Networks, J. R. Falender, G. S. Y. Yeh, and J. E. Mark, *J. Am. Chem. Soc.*, **101**, 7353 (1979).
- [97] The Effect of Chain Length Distribution on Elastomeric Properties. II. Comparisons Among Networks of Varying Degrees of Randomness, J. R. Falender, G. S. Y. Yeh and J. E. Mark, *Macromolecules*, **12**, 1207 (1979).
- 1980**
- [98] Model Networks of End-Linked Polydimethylsiloxane Chains. V. Dependence of the Elastomeric Properties on the Functionality of the Network Junctions, J. E. Mark and M. A. Llorente, *J. Am. Chem. Soc.*, **102**, 632 (1980).
- [99] Model Networks of End-Linked Polydimethylsiloxane Chains. VI. Stress-Strain Isotherms for the Swollen Networks, M. A. Llorente and J. E. Mark, *J. Polym. Sci., Polym. Phys. Ed.*, **18**, 181 (1980).
- [100] Thermodynamics of Fusion in Poly(diphenylsiloxane) Chains, J. R. Falender, G. S. Y. Yeh, D. S. Chiu, and J. E. Mark, *J. Polym. Sci., Polym. Phys. Ed.*, **18**, 389 (1980).
- [101] Model Networks of End-Linked Polydimethylsiloxane Chains. VII. Networks Designed to Demonstrate Non-Gaussian Effects Related to Limited Chain Extensibility, A. L. Andradý, M. A. Llorente and J. E. Mark, *J. Chem. Phys.*, **72**, 2282 (1980).
- [102] Random-Coil Configurations of the Polyformals $[\text{CH}_2\text{O(CH}_2)_y\text{O}]$. V. Dipole Moments, Unperturbed Dimensions, Optical Anisotropies, and Molar Kerr Constants for 1,3-Dioxolane Polymers Containing Structural Irregularities, E. Riande, E. Saiz, and J. E. Mark, *Macromolecules*, **13**, 448 (1980).

PAPERS IN PRESS*

In-Situ Generation of Polyaniline in Poly(dimethylsiloxane) Networks, S. Murugesan, G. S. Sur, G. Beaucage, and J. E. Mark, *Silicon Chem.*, **00**, 000 (2004).

Status and Trends in the Area of Elastomers and Rubberlike Elasticity J. E. Mark, *Molec. Cryst. Liq. Cryst.* (Bucharest Meeting), **00**, 000 (2004).

Drying Biodegradable Poly(hydroxybutyrate-co-hydroxyvalerate) Gels in the Elongated State to Improve their Mechanical Properties, R. Venkitachalam, J. E. Mark, and I. Noda, *J. Appl. Polym. Sci.*, **00**, 000 (2004).

Microcellular Foams from Some High-Performance Thermoplastics and Their Composites, H. Sun, J. E. Mark, S. C. Tan, N. Venkatasubramanian, M. D. Houtz, F. E. Arnold, and C. Y-C Lee, *Non-Linear Opt., Quant. Opt.* (Bucharest Meeting), **00**, 000 (2004).

Preparation and Characterization of *Trans*-1,4-Polybutadiene Nanocomposites Containing *in-situ* Generated Silica, D. Zhou and J. E. Mark, *J. Macromol. Sci. Pure Appl. Sci.*, **41**, 000 (2004).

Rubber, J. E. Mark, in *Grolier New Book of Knowledge*, Scholastic Library Publishing, Danbury, CT, 2005.

Some Interesting Things About Polysiloxanes, J. E. Mark, *Acct. Chem. Res.*, **38**, 000 (2005).

"Inorganic Polymers", 2nd Edition, J. E. Mark, H. R. Allcock, and R. West, Oxford University Press, New York, NY, 2005.

"Science and Technology of Rubber", 3rd Ed., ed. by J. E. Mark and B. Erman, Elsevier, Amsterdam.

The Molecular Basis of Rubberlike Elasticity, B. Erman and J. E. Mark, in "Science and Technology of Rubber", 3rd Ed., ed. by J. E. Mark and B. Erman, Elsevier, Amsterdam, 2005.

* Preprints are available.

SUBMITTED PAPERS*

Neutron Scattering from Equilibrium Swollen Networks, G. Beaucage, S. Sukumaran, and J. E. Mark, and B. Viers, submitted to *Eur. Phys. J.*

Filler-Induced Deformations of Amorphous Polyethylene Chains, Corresponding Reinforcement Effects, and Comparisons with Experiment, M. A. Sharaf, A. Kloczkowski, K. I. Jacob, and J. E. Mark, submitted to *Polymer*.

In-Situ Catalyst Generation and Controlled Hydrolysis in the Sol-Gel Precipitation of Zirconia and Titania Particles in Poly(dimethylsiloxane), S. Murugesan, G. S. Sur, J. E. Mark, and G. Beaucage, submitted to *J. Inorg. Organomet. Polym.*

Improvement in the Mechanical Properties of Poly(3-hydroxybutyrate-co-3-hydroxyhexanoate) (Nodax) by Pre-Oriented, M. K. Hassan, S. A. Abdel-Latif, O. M. El-Roudi, M. A. Sharaf, I. Noda, and J. E. Mark, submitted to *J. Appl. Polym. Sci.*

Preparation and Properties of Some Hybrid Poly(acrylonitrile)Silica Nanocomposites, S. Sh. Rashidova, O. N. Ruzimuradov, S.V. Zalyalieva, O. A. Shpigun, B. D. Kabulov, and J. E. Mark, submitted to *J. Sol-Gel Sci. Technol.*

Poly(Dimethylsiloxane) Coatings for Controlled Drug Release. III. Drug Release Profiles and Swelling Properties of the Free-Standing Films, Z. Gao, J. Schulze Nahrup, J. E. Mark, and A. Sakr, submitted to *J. Appl. Polym. Sci.*

In-situ Synthesis of Polyaniline in Poly(dimethylsiloxane) Networks using

an Inverse Emulsion Route, D. Zhou, S. Subramaniam, and J. E. Mark, submitted to *J. Macromol. Sci. Pure Appl. Sci.*

Microcellular Foams from Some High-Performance Composites, H. Sun, J. E. Mark, S. C. Tan, N. Venkatasubramanian, M. D. Houtz, F. E. Arnold, and C. Y-C Lee, submitted to *Polymer* (Paris MACRO 2004 Meeting).

* Preprints are available.
