

Announcement

Polymer Symposium at MMI

Michigan Molecular Institute (MMI) will sponsor an international symposium on "Transition Metal Catalyzed Polymerizations: Unsolved Problems" to be held in Midland, August 17-21, 1981. The Symposium will consist of invited and contributed papers, which will cover catalyst structure and reaction mechanism, olefin and diene polymerization, catalyst morphology-polymer structure relationships, technology and industrial applications, as well as metathesis polymerization. Persons interested in submitting papers should contact the Symposium Chairman, Dr. Roderic P. Quirk, before May 15, 1981. For further information concerning the meeting, please write to Symposium Secretary, MMI, 1910 West St. Andrews Road, Midland, MI 48640, USA.
