

Announcements

CNRS - IUPAC - GFP
5th INTERNATIONAL SYMPOSIUM
ON RING-OPENING POLYMERIZATION
Blois, France
22 - 26 June 1986

Scientific Programme

The Symposium will deal with various aspects of ring-opening polymerizations and with the corresponding polymers.

The following topics have been selected:

- 1^o Polymerization of Heterocycles and Cycloolefins: Kinetics and Mechanisms.
- 2^o New Polymers: Tailor-made Polymers and Copolymers.
- 3^o Industrial Polymers, Biomedical Polymers and Pharmaceutical Materials: Syntheses and Applications.
- 4^o Structure and Physical Properties of the Polymers.

Preregistration

Intending participants and other interested in further information are requested to complete and return the attached form before 1st October 1985. This carries no obligation but will ensure receipt of the 2nd circular which will give complete details on the Symposium.

Please apply to:
