### SCOPE OF THE FORUM

---

The "SOCIETE FRANCAISE DE CHIMIE" organizes a 'FORUM' on the subject of chemical specialties and their physicochemical properties, characterization and formulation. This event, called "FORMULA" will take place at NICE (French Riviera), from the 4th to the 6th of February 1987.

This forum is aimed at promoting contacts and we hope, cooperative research projects between academic and industrial specialists having common interests in the field of chemical specialties (coatings, drugs and cosmetics, lubricants, pesticides, detergents, foods, etc ...) There will be plenary lectures of broad interest, invited technical lectures on specialized subjects, contributed communications that will be poster-presented, "round-tables" during which open discussions will take place.

Poster-sessions will be devoted to the presentation of recent research results, either of fundamental or applied character, and of pedagogical experiments on the general themes of the forum : examples of relevant subjects are emulsions, micro-emulsions, micellar solutions, gels, sols, flocs, suspensions, polymers, as well as liquid/solid, liquid/liquid and liquid gas interfaces.
