SPECIALITY POLYMERS '91 is an international conference sponsored by the journal **POLYMER**. The scientific programme will comprise invited papers, oral contributions and poster papers.

The scope of the meeting is:

- * Synthesis of novel macromolecules to produce supramolecular architectures
- * New and improved methods to organize molecules to supramolecular architectures
- * Methods to assess and quantify supramolecular architectures
- * Design of material properties by supramolecular architectures
- * Special functions of supramolecular architectures, eg, ion conductors, organic magnets
- * Molecular recognition and sensor function in synthetic macromolecules
- * Biomimetic aspects
