

Announcement

"2nd International Scientific Workshop on Biodegradable Polymers and Plastics"

Montpellier , France

November 25 - 27, 1991

OUTLINES

Theoretical aspects of polymer degradation in biological environments
How to trigger degradation of biodegradable polymers
How to complete polymer degradation
Structural effects in polymer degradation
Models of biological media
Elaboration of consensual achievements

The scientific programme will consist of invited and contributed papers and posters initiating a very broad discussion on polymer biodegradation problems. An exposition room will be available to companies for the presentation of equipment and of technical information on commercial compounds. Application forms are available from the Workshop Secretariat.
