

## **Announcement**

# **CALL FOR PAPERS**

## **MONTREAL II**

### **Second International Symposium on the Metallization of Polymers**

Since the first International Symposium, held in Montréal in September 1989, there has been a continued, intense interest in the subject of polymer metallization, both in industry and in university. In response to the requests of many researchers in the field, a second Symposium, Montréal II, will be held at the École Polytechnique, Montréal, May 30 - June 3, 1993.

The Organizing Committee (Mark Andrews, Chemistry, McGill University; Edward Sacher, Engineering Physics, École Polytechnique; Amine Selmani, Chemical Engineering, École Polytechnique) invite papers on polymer metallization and associated phenomena, particularly in the following areas:

- new analytical techniques, not covered in the first symposium [published as ACS Symposium Series, 440, (1990)];
- surface modification for adhesion improvement;
- interfacial interactions leading to adhesion;
- theories of adhesion;
- mechanisms of adhesion;
- measurement of adhesion;
- metallization of fluoropolymers.

**Deadline for abstracts is October 16, 1992.**
