

## ***Announcement***

# **VIII. Symposium Analytische Ultrazentrifuge 18.02. - 19.02.1993 Osnabrück**

Since the first symposium on analytical ultracentrifugation 14 years ago, there has been a continued intense interest on the characterization of polymers, biopolymers, polyelectrolytes and dispersions with the analytical ultracentrifuge. In response to the requests of many researchers and the recently developed completely new modern analytical ultracentrifuge from Beckman the above mentioned symposium will be held in Osnabrück, Germany.
