

Announcement

The 17th Annual Meeting of the Adhesion Society Announcement and Call for Papers

The 17th annual meeting of the Adhesion Society will be held at the Clarion Plaza Hotel in Orlando, Florida, February 21-23, 1994. Papers on all aspects of Adhesion Science are invited for presentation. Topics to be emphasized in the technical sessions include, but are not limited to, the following:

Fiber/Matrix Adhesion and Composite Properties.

Spectroscopic and mechanical characterization of fiber/matrix interfaces, fiber/matrix debonding, relation to overall composite behavior, novel chemistry, processing and characterization techniques.

Fundamentals of Particle Adhesion.

Fundamental aspects, surface morphologies, charging effects, electrostatic and aerosol deposition, humidity effects, mechanics considerations.

Mechanics of Interfacial Fracture.

Synthesis of atomistic and continuum descriptions of interfaces, interfacial fracture mechanisms and associated modeling, new test methods.

Nondestructive Evaluation of Adhesively Bonded Joints.

Advances in ultrasonic, optical, infrared, NMR techniques. Applications to structural joints, coatings, multilayered components, etc.

General

All aspects of adhesion science and technology including experiments, analysis, modeling, thin films, pressure sensitive adhesives and sealants.

Authors may request to present papers in either oral or poster sessions. However, because of space and time limitations, some authors may be asked to change formats. In no case will the requested format of a paper be changed without notification of the author.

Authors wishing to present a paper should submit a one-page abstract to the program chairman by **August 1, 1993**. The desired format (oral or poster) should be indicated in the upper right hand corner of the abstract or in a cover letter. Those authors whose abstracts are accepted will be notified on or about **September 1, 1993** and will be requested to submit a short (3-4 pages) paper in camera-ready form for archival publication by **December 1, 1993**.

Abstracts will be reviewed by the Program Committee. In order to assist the committee in its deliberations, the abstracts should contain the following:

- statement of problem
- approach
- summary of results
- brief interpretation

Abstracts should be submitted to the program chairman:
