

Announcement

FORUM DE LA CONNAISSANCE 1996

November 26-27, 1996

**at the "auditorium de la Tour ELF" at Paris-la-Défense,
France**

HIGH PERFORMANCE WATERBORNE COATINGS

Waterborne Coatings share an increasing part in high performance coating market segments like architectural and industrial paints, anti-corrosion, coil coating, car finishing and aerospace. The technological developments are constantly progressing, but the requirements are stringent and the objectives difficult to meet. The "Forum de la Connaissance 1996" will review the chemistry of waterborne resins, new formulations, properties and performances of coatings, new techniques for evaluation of their characteristics and their environmental impact.

This event is a joint organisation of **AFTPVA** and **CoRI**, with the support of **ELF ATOCHEM**.
