RAIN COWERS IN DEFEAT

Performance. For many companies, it's just a word. At Peachtree, it's our sole mission. For the past eighteen months, we've revitalized every part of our organization. New technologies. New manufacturing facilities. And new designs. These changes haven't just improved the quality of our products, they've helped unleash a new level of customization – from entry doors to windows to patio doors. Performance? That's a mandatory. The possibilities for you and your customers? Endless.

ALUMINUM-CLAD DOOR FRAMES.

No primer. No paint. No hassles. With aluminum clad door frames, you're providing your customers with a virtually maintenance free future.

COMPREHENSIVE WARRANTY.

Unlike many of our competitors, each of our entry door systems comes with one warranty from one manufacturer. Peachtree. No confusion, no excuses.

HIGH-PERFORMANCE SILL.

Every entry door we make comes with our new high-performance sill. Because at Peachtree, high performance isn't an upgrade – it comes standard in everything we do.

Then find these firms in the alphabetical **Manufacturer Index** for constant information. Companies listed in bold in the Buyers' Guide are *Professional Builder* Advertisers.

Treat the wood. Save the day.

Finally, there's a better way to pretreat for termites. Bora-Care[®]. And if your pest company doesn't use it, hire one that does. Bora-Care is a highly effective termiticide, insecticide and fungicide applied directly to the wood. No more need to coordinate with the pest company and cement company. No more need to leave the job site. No more need to waste valuable time. In fact, some builders are saving an entire day on cycle time on each home they build. Bora-Care. Because less time wasted is time well spent.

WE'VE CLEARED THE AIR ON VOCs.

WITH GREENGUARD™ CERTIFICATION, KNAUF WAS THE FIRST TO MEET THE TOUGHEST INDOOR AIR STANDARDS IN THE INDUSTRY.

Relax and take a deep breath. Knauf's full line of building insulation was the first to earn certification from the GREENGUARD Environmental Institute.™ This third-party certification and monitoring of Knauf's batt, blanket and blowing insulation products gives you the assurance that Knauf meets the most stringent appropriate indoor air quality standards for volatile organic compounds (VOCs), including formaldehyde.

GREENGUARD's Certification standards are the most comprehensive in the industry. They are based on criteria used by the U.S. EPA, OSHA, the State of Washington, the World Health Organization and the U.S. Green Buildings Council's LEED-CI program. So you can breathe easy knowing that all of Knauf's building insulation ensures high quality indoor environments for you and your customers. For more information contact Knauf Insulation at (800) 825-4434 ext. 8212 or visit our Web site at www.KnaufUSA.com.

Is your team **working out?**

As a builder, you need a *skilled*, dependable supply of labor and reliable delivery of quality materials. And you need to stay on schedule. If what you're doing isn't "working out" it's costing you time, money, employee loyalty — and customer satisfaction. The solution lies in establishing highly productive relationships with your suppliers and trades. *But where do you go to learn how to deal with the issues?*

ALLIANCE, the TrueNorth Executive Conference on Productive Builder, Supplier & Trade Relationships, will bring together the best people from both inside and outside the homebuilding industry to help you focus on one thing: building productive and profitable relationships among builders, suppliers, trades, distributors and manufacturers. Finally, a conference focused on what matters most.

LP® SmartSide® Engineered Wood Siding cannot be expected to snap, chip or crumble in the same manner as fiber cement. Strength testing has shown LP SmartSide to be about 2X stronger than fiber cement. However, fiber cement is a lot tougher to carry, to cut and to work with in general.

The oldest and most respected list of the nation's
400 largest builders is moving online!

Deadline February 16, 2006

BOISE ENGINEERED WOOD FRAMES THE HOMES.

BOISE VALUE-ADDED PAYS THE BONUSES.

We're eliminating product shortages by building the world's largest I-joist plants, then doubling their size and assuring a continuous raw material supply.

We're introducing advanced cutting systems to give our dealers faster, safer, accurate processing and virtually no waste.

We're helping builders improve home design and construction, cutting waste and cycle time.

Our people are experienced, full-time engineered wood experts, not generalists dealing with other building products. They stand behind our customers.

At Boise, we're adding tangible value-added services for a smoother supply chain and increased profit and success at our channel partners and Boise. To learn how you'll benefit, call us at 800-232-0788.

ARMS SO BIG, YOU MIGHT WANT TO CHECK IT FOR STEROIDS.

At over 29 lbs. apiece, the massive radius arms on the Ford F-450/F-550 Super Duty will tackle even the roughest terrains. Over 39" long, 11" tall and 3.5" thick, they assist in providing better control, while at the same time helping to reduce wheel hop.

And the front axle and suspension offer a maximum FGAWR of 7,000 lbs. So bring on the big, bad roads. We've got the big, bad arms to handle them.

No wonder the Ford F-Series is the best-selling truck 28 years running, as well as the number one chassis cab for customer satisfaction with vehicle quality.*
