A GLOBE FOR \$4.00!

A BIG GLOBE

AT

A LITTLE PRICE!

This is a full 12 inch globe, beautifully made, and as up-to-date as the Worlds Fair! The new streamlined semi-meridian is made of hammered-metal, and the base is a Duncan Phyfe of walnut finished wood.

Orders are filled on the day of receipt, and we pay the shipping charges.

RADEX

362 Cedar Lane Teaneck, N. J.

THE CLOCK THAT CAN BE SET AT ANY OF THE WORLD'S 24 TIME ZONES

Tells time like an ordinary clock and automatically shows authentic time in every other zone around the world.

Actual size is 5 1/4 inches high by 4 3/4 inches wide.

Modernistic Design of Brushed Brass

Just plug it in and set it for the correct time. No further adjustment nor calculation is required.

For AC 110-120 volts, 60 cycles.
Also available in same style case in spring-driven model at \$4.95. We pay the postage.

\$5.95

What DXers' Have Always
Wished For!
THE ELECTRIC WORLD-
TIME CLOCK

RADEX, 362 Cedar Lane, Teaneck, N. J.

INDIA, Land of Mystery and Land of Paradoxes! A country half as big as the United States but with three times as many people. A country with 222 languages but not one common language. A country where cattle are sacred but which is the cruellest country in the world to its cattle. The country of the richest people and the poorest people, but where even the poorest people own precious metals. A country where untold treasures are buried and hidden and even the poorest man borrows money rather than use his hidden silver. Gold and silver and valuable gems find their way into India, but rarely out of it. A strange and interesting country, full of thrills and surprises for the world traveller, whether the traveller goes in person or by way of his radio set.

British India consists of fifteen provinces, and the rest of the country, 39 per cent. of it, is governed by native princes. Radio is a government monopoly under the direction of All-India Radio, with principal offices at Delhi, the capital of the country.

There are eleven stations on the broadcast band, in the cities of Allahabad, Bombay, Calcutta, Dacca, Delhi, Lahore, Lucknow, Madras, Peshawar and Trichinopoly. In the cities of Bombay, Calcutta, Delhi and Madras there are six shortwave stations.

Reception of India's broadcast band stations is irregularly reported on our south Pacific Coast, but the shortwave stations have a world-wide audience. Programs consist of Indian and European music, and talks and news in English as well as in some of the Indian dialects.

NEXT MONTH—A complete description of the Andrea Television Kit and how to build it, will appear in the October RADEX.

ALASKA HO!

Alfred H. Bacon of New Westminster, British Columbia, took a trip this summer to Alaska, which he summarizes, very briefly, as follows: "Indians, esquimaux, gold mines, glaciers, mountains, salmon, halibut, whales and fisheries."

Mr. Bacon was invited to speak at two radio stations in the north, KINY in Juneau and KGBU in Ketchikan. He talked for about twenty minutes at each station, about the recent visit of the King and Queen to British Columbia, about his reception of the Pitcairn Island radio station VR6AY, and about RADEX. His talks were well-received by his listeners, and he had numerous telephone calls from local listeners before leaving the stations.

"The stations are splendid," Mr. Bacon writes. "KGBU uses a vertical steel radiator, 327 feet high, lighted by a neon sign showing the call letters on it. KGBU is on 900 kcs., using 500 watts, transmitting from 10 am to 7 pm and from 10 pm to 3 am, PST. Their frequency check is on the second Saturday of each month, from 6:05 to 6:20 am PST. The Manager is James A. Britton, of the Alaska Radio & Service Co., Inc., 107-111 Front St. They have a construction permit to use 1000 watts power.

"KINY in Juneau has built new studios since a fire swept away the big block that they were formerly situated in. Their new aerial, of about 225 feet, is built on one of the slag heaps in Gastineau Channel, in front of the Juneau Gold Mine. Working on 1430 kcs. with 250 watts power, KINY is owned by Edwin A. Kraft, in the Goldstein Bldg. The manager is Mr. C. B. Arnold and the Chief Engineer, Mr. Heister. They have a permit to use 1000 watts power. KINY broadcasts daily from

PIGEONS AND FACSIMILE

The oldest and newest forms of communications were combined one Saturday last April when Crosley's facsimile station W8XUJ used carrier pigeons to speed pictures of the Cincinnati Red-Pittsburgh Pirates baseball game to the studio for immediate transmission.

"Black Comet," world-record racing bird on whose back was strapped the official harness of the United States Signal Corps, flew the negatives from the park to the Crosley plant, a distance of about four and a half miles, in three minutes, and the photos were developed and on the air twenty minutes after being taken. Six birds were used in carrying the thirty-two pictures snapped on the playing field.

This "stunt" demonstrated, incidentally, that radio does not interfere with the ability of pigeons to fly to their destinations, as the birds delivered the pictures at a loft atop the Crosley plant.

According to Wilfred Guenther, Crosley coordinator of facsimile and television, pigeons may become regular members of the WLW-W8XUJ staff to increase the speed of picture service.

John Brill, radio facsimile engineer of WLW-W8XUJ, observes the facsimile transmission of the pictures and story.

Jack Vogle, W8XUJ facsimile editor, prepares pictures and captions for transmission over the air

Homer Weimer of Cincinnati, who raises and trains pigeons, strapping the harness on "Black Comet," at the baseball park.

NEXT MONTH—A complete list of the broadcasting and shortwave stations in the Dominican Republic will appear in "Across The Editor's Desk."

DXer's Appointment Calendar

The time shown in this Calendar is EST. For CST, subtract 1 hour; for MST, subtract 2 hours; for PST, subtract 3 hours; for GMT, add 5 hours.

Sept. 3, 1-3:30 am, TGWA, 9685 kcs.
Special DX Concert.

Sept. 10, 12:01-12:10 am, YL2CD, 14040 kcs. Send reports, with IRC, to A. Vitoliuss, Miera-iela 52-5, Riga, Latvia. (Arranged by J. E. Gardner for Cleveland Radio Club).

Sept. 11, 3:30-3:45 am, WQDM, 1390 kcs., St. Albans, Vt. Talks on ham radio.

Sept. 17, 12:01-12:10 am, YL2CD, 14040 kcs. Send reports, with IRC, to A. Vitoliuss, Miera-iela 52-5, Riga, Latvia. (Arranged by J. E. Gardner, Cleveland Radio Club).

Sept. 17, 1-3:30 am, TGWA, 9685 kcs., Guatemala City, Guat. Special DX Concert.

Sept. 24, 12:01-12:10 am, YL2CD, 14040 kcs. Send reports, with IRC, to A. Vitoliuss, Miera-iela 52-5, Riga, Latvia. (Arranged by J. E. Gardner for CRC).

Oct. 2, 8 pm, meeting of the Irvington Chapter, The Radex Club, 870 Sanford Ave., Irvington, N. J.

Oct. 6, Card party sponsored by The Irvington Chapter.

Oct. 8, 1-3:30 am, TGWA, 9685 kcs., Guatemala City. Special DX Concert.

Oct. 9, 3:30-3:45 am, WQDM, 1390 kcs., St. Albans, Vt. Talks on ham radio.

Oct. 15, at 1 am, YN3DG. Program tentatively arranged by Prof. Carlo Spatari.

Oct. 22, 1-3:30 am, TGWA, 9685 kcs., Guatemala City. Special DX Concert.

Oct. 29, 1-2 am, TG1 on 1310 kcs. and TG2 on 6190 kcs., "Radio Morse," Guatemala City. Program for The Radex Club, arranged by Prof. Carlo Spatari and Col. Eduardo

Perez F. No postage required for veries.

Oct. 31, 3-5 am, LS11, La Plata, Argentina, 30 kw., 1310 kcs. Send IRC for veries to Radio Provincia de (Arranged by Wm. Cunningham for URDXC).

Nov. 6, 8 pm, meeting of the Irvington Chapter of The Radex Club, at 870 Sanford Ave., Irvington, N. J.

Nov. 12, 10-10:10 am, YL2CD, 28080 kcs. Send reports to A. Vitoliuss, Miera-iela, 52-5, Riga, Latvia. (Arranged by J. E. Gardner, for CRC).

Nov. 13, 3:30-3:45 am, WQDM, 1390 kcs., St. Albans, Vt. Talks on ham radio.

Nov. 15, 4-6 am, ZP15 on 700 kcs. and ZP14 on 11721 kcs., Villarrica, Paraguay. Arranged by Wm. Cunningham for URDXC.

Nov. 19, 10-10:10 am, YL2CD, 28080 kcs. Send reports with IRC A. Vitoliuss, Miera-iela, 52-5, Riga, Latvia. Arranged by J. E. Gardner for CRC.

Plans for the National Radio Club Convention to be held in Erie, Pa., on Sept. 2, 3 and 4 are about completed, and as this is being written, a couple weeks prior to the convention, it appears that the convention will be a big success. At least fifty members are expected to attend, coming from points as far away as Decorah, Iowa, Brooklyn, Chicago and New York City.

(Continued from page 1)

9 am to midnight, PST.

"While in Alaska I learned that Alaska packs more canned salmon than any other place in the world, producing about one and a half million cans annually. At Ketchikan there are 3400 licensed fishing vessels employing some 5000 persons."

ON THE WEST COAST

• • • By ANTHONY C. TARR

IT has long been recognized that DXers in widely separated parts of this country must operate under entirely different conditions. With an expanse of nearly three thousand miles of land lying between the Atlantic and Pacific Oceans, and a difference of three hours in time, the listener on the West Coast often finds the reception reports of those on the East Coast to be of little use to him. For many years the major radio magazines and club bulletins have favored the Eastern DXer to a very great extent; the schedules are almost invariably published in Eastern Standard Time and nearly all the "DX editors" and columnists have been located in the East and have, perhaps unintentionally, conducted their columns from the viewpoint of their own locale.

This season RADEX introduces a column written exclusively for DXers on the Pacific Coast and in the far Western states, conducted by a DXer in their own vicinity, and which will contain reports from Western readers only, with the schedules in Pacific Standard Time.

An exception to our usual policy is being made in this instance, in that reception reports will be sent directly to the editor of this department and not through the editorial offices of RADEX. This column will also be unique in that it will contain DX reports on all bands—Broadcast, Amateur, Shortwave Broadcast, and the Ultra-High Frequencies—which, of course, will be divided into sections for greater convenience.

So without further ado, except to ask that the success of this initial column be assured by all readers in the MST and PST zones sending

their reports directly to the editor, we go into this month's data, again reminding you that all times are Pacific Standard.

Ultra-High

Interest in the ultra-high frequencies is steadily increasing, but is still not as keen as it should be, considering the fact that here is an opportunity for DXers to really contribute toward the advancement of science, while at the same time enjoying some listening experiences not to be found on any other band. New licenses are continually being granted stations to operate on the hitherto little-explored wavelengths below twelve meters, and these stations readily admit that listeners' reports on their transmissions are of considerable aid to them in determining their coverage during this experimental stage. How much better it is for us to send our reports where they are really appreciated, rather than wasting postage

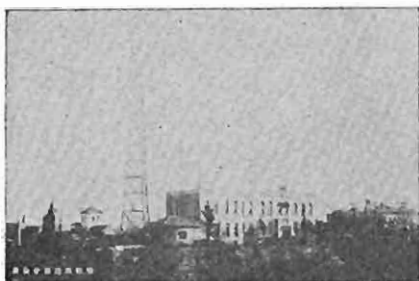

sending them to Cubans or Mexicans who cannot stay on one frequency for two consecutive nights and care little what their coverage may be beyond their commercial range. Listeners here in the West are particularly well situated to help the ultra-high broadcasters, for we are the most distant in the country from their transmitters, the majority of which are in the East. Some nice verification cards, too, will result from your reports. Let us know what you are able to pull in on these bands!

Broadcast Band

At this writing it is too early to do more than guess what the coming season will hold in store for us. Our situation here on the Pacific Coast is very favorable for the reception of

Reporters in the Mountain Standard and Pacific Standard Time Zones may send their reports direct to

**Anthony C. Tarr,
909 W. Lee St., Seattle, Wash.**

This veri card, signed by K. Mizutani, comes from JODK2, 970 kcs. broadcasting station at Keijo, Chosen (Korea). This 10 kilowatt Asiatic station is heard on our Pacific Coast, but with less regularity than some of the other Japanese stations.

stations across the water in Japan, Australia, and New Zealand. Our records show that two years ago, in 1937, the Japanese stations were coming in very well as early as the seventh of September, the best among these being JOAK-1, 590 kc., JOHK, 770 kc., JOIK, 810 kc., JOFK, 830 kc., JBCK, 850 kc., JOCK-1, 730 kc., and JOAK-2, 870 kc., all of them powered at 10 kw. Even some of the 500-watters put in sporadic appearances, among them being JOPK, 780 kc., JOQK, 920 kc., JOXK, 980 kc., and JOIG, 1060 kc.

In the season of 1938, however, Japanese reception was far below par, and but few new Australians were added to our log. What lies before us in 1939? Only time will tell, so we refrain from making any predictions. Those who have newly joined the ranks of DXers (and there will be many such embryo listeners here on the Coast), need not hesitate to try their hand at these trans-Pacific stations. The undefinable thrill attained from pulling in your very first Aussie or Zedder is worth many a sleepless night, and is something you will not soon forget! When the evenings begin to get cool, and the sum-

mer static removes its ugly presence, sit down at your radio about 1:30 or two o'clock some morning and see what you can hear on one or more of the channels occupied by the "old stand-bys". We need hardly remind you that patience is the most desirable asset, for the prolonged fading of these distant stations renders them inaudible for many minutes at a time.

In the Antipodes, the listener would do well to concentrate on the following listed stations, not only because they are the most likely to be heard, but also because they will in all probability have clear channels and hence will not be confused with any domestic broadcasters:

The Big Ten

570 kc.	2YA	Wellington, N. Z.
620 kc.	3AR	Melbourne, Aust.
650 kc.	1YA	Auckland, N. Z.
700 kc.	2NR	Grafton, Aust.
710 kc.	7NT	Kelso, Aust.
720 kc.	3YA	Christchurch, N. Z.
790 kc.	4YA	Dunedin, N. Z.
800 kc.	4QG	Brisbane, Aust.
830 kc.	3GI	Longford, Aust.
840 kc.	2YC	Wellington, N. Z.

We will be particularly interested in hearing from new listeners as to their experiences and results in tuning for the TP's. Later on, we will give you some of the more difficult catches to try for, based of course on our own findings as the season rolls along.

Shortwaves

The writer wishes to express his particular appreciation to Herman Orlaw, Vancouver, B.C., for much of the information contained in this section relative to Asiatic stations. It will be noted that, in order to compile a respectable log of Asiatics, most of one's listening must be done in the early morning hours between three and seven o'clock. At first glance, the stations listed in this section may look to some of our new readers like extremely difficult catches, to be attempted only after a great deal of experience. This, however, is not the

case. In many instances signals from these stations are very good in this part of the country, requiring but little skill to intercept them. By following the schedules and frequencies below listed, and a basic knowledge of shortwave tuning in general, practically anyone can soon boast of some excellent verifications.

Australia

VK9MI, abroad the M. V. "Kanimbla", may be heard signing off at 4:15 am or shortly thereafter on 6053 kcs. Their final theme is "God Save the King". Reports should be addressed in care of McIlwraith & McEacharn, Ltd., Melbourne, Australia. Their card bears a picture of the ship.

China

XPSA, Kweiyang, Kweichow, puts in a fair signal on 7010 kcs. after 3 am.

XGOY, Chungking, announces 11900 kcs. but is somewhat unstable, possibly 5 kcs. either way. The English news broadcast frequently concludes at 2:30 am with call and frequency announced in English, followed by talks and music of the Chinese type. The signal is particularly strong. Reports addressed to the Central Broadcasting Station in Chungking should reach them.

XMHA, Shanghai, is another unstable Chinese on about 11857 kcs. Like XPSA, the signal is but fair, and can be heard after 3 am.

XGOK, Canton, was lately heard on 11810 kcs., also unstable in frequency, with an R6 signal.

A station believed to be XTA, Peiping, was heard by Herman Orlaw with a good signal at 5 am on irregular days.

Fiji Islands

VPD2, Suva, still holds sway on 9538 kcs. and a very strong signal is heard between 2:30 and 4 am.

French Indo-China

"Radio Saigon" begins their transmissions daily on 6116 kcs. with an English announcement at 3 am. They

will verify by letter. It is also reported that their 11780 kcs. transmitter is now very irregular or possibly off the air entirely.

"Radio Hanoi" now uses their No. 2 transmitter exclusively, the frequency being 11900 kcs., the station on 9510 kcs. having been discontinued on January 1 due to a newly imposed copyright tax on musical compositions, according to official information. At this writing, however, Hanoi II had not been heard for some time, due possibly to reception conditions.

"Radio Boy-Landry" puts in a weak and irregular signal on 6210 kcs. near 4 am.

Hong Kong

ZBW3 comes on the air at 2 am, using their regular frequency of 9525 kcs. Little trouble should be encountered while logging them.

India

VUD, Delhi, on 9590 kcs. still presents a very fine signal here in the West. Tune for them at 5 am.

A new Indian station appeared on 6093 kcs. during the summer, with a woman announcer, but the signal has not thus far been good enough to catch the call. Information will be welcome. They are heard at 6:30 am.

A verification card from the Japanese shortwave stations. (Courtesy of Jerry Hahn).

Japan

JFAK, Taihoku, Taiwan, a station with many satellites, signs on at 1 am on 9630 kcs. The signal is very strong. Relaying this program is JFO on 9692 kcs., who signs on at 6 am, and an unidentified station on 6125 kcs., signing on at 1 am.

The following is a complete list of Japanese stations which was received directly from the Nippon Hoso Kyo-kai, who assure us it is correct as of the beginning of this year. We are indebted to Harry Honda, Los Angeles, California, for this list:

6015	JLR	15135	JLU3
6095	JZH	15160	JZK
6190	JLT	15225	JLT2
9505	JLG2	15235	JVW4
9525	JLU2	15325	JLP2
9535	JZI	17785	JZL
9605	JLP	17795	JLU4
9645	JLT2	17825	JVW5
9655	JLS	17835	JLP3
9675	JVW2	17845	JLS2
11705	JLG3	21520	JZM
11725	JVW3	21560	JLP4
11800	JZJ	21610	JLT4
15105	JLG4	21620	JLS3
15115	JLR2		

Java

YDB, Soerabaya, signs on at 1:30 am on 9650 kcs. and YDA is audible on 6040 kcs. at 3 am. Other Javanese to put in good signals are PMN, Bandoeng, 10220 kcs., and PLP, 11000 kcs., which is reported to be the best of the lot.

YDC, 15150 kcs., also located in Bandoeng, may be heard on 15150 kcs. when the 19-meter band is active, but conditions on this frequency render it unreliable.

New Zealand

A station announcing as 2ZB is reported by Herman Orlaw to be heard irregularly on 6965 kcs. calling "Hello, Dubbo". Our lists show 2ZB to be the call of a broadcasting station in Wellington, while Dubbo is the name of a town in New South Wales, Australia.

Philippines

KZRM operates on 9570 kcs., and they have lately inaugurated a new station on 6140 kcs. with different programs. Both stations commence broadcasting at 1:30 am, and both can be easily heard. Their verification card is an orange one with large red call letters. Reports may be addressed to "Radio Manila", Manila, P. I.

KZIB, 9500 kcs., is reported to completely cover VK3ME at 3 am and later.

Sumatra

YDX, Medan, is bothered by CW interference, but you can try for this station at about 4 am on 7220 kcs. If the amateur brass pounders are not too active, reception should be fair.

U.S.S.R.

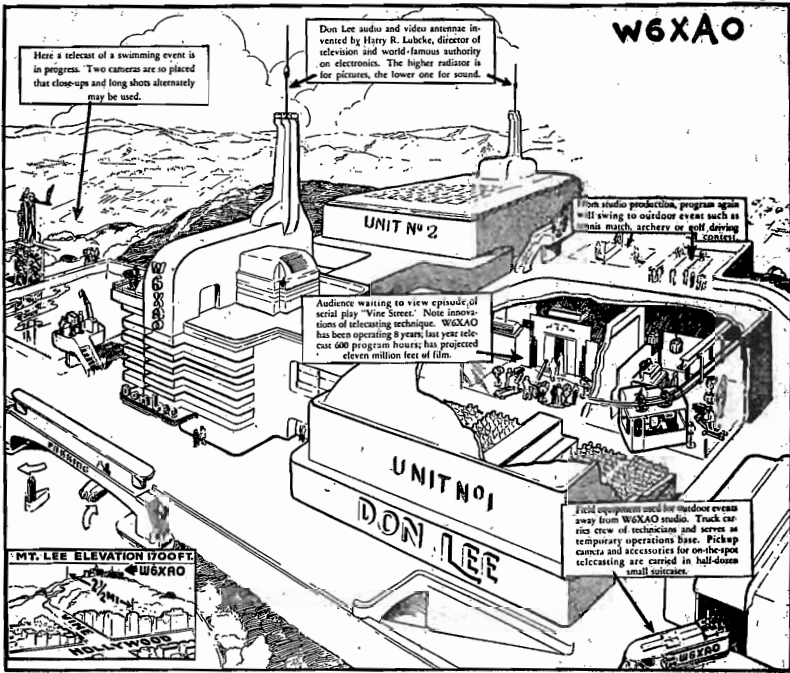

RV96 is the call of the new station on 11825 kcs., affirms Herman Orlaw after several weeks of intent listening. A powerful signal may be heard from them beginning at 3 or 3:30 am. The programs consist of French, Russian and Chinese talks, and some Oriental music, with most announcements made by a woman. They are located in Moscow. A verification of your report is very improbable, as this is apparently a special program for far-Eastern parts of their country.

Queries

An unidentified station on 10690 kcs. plays German marches between 3-4 am irregularly, being bothered by heavy CW interference.

Thus we conclude our initial efforts at presenting a DX column exclusively for listeners out here in the wide open spaces of the West. We trust it will meet with your favor, and its future success will depend on your cooperation by sending in your reports on all bands to us, that we may pass them along to others in the MST and PST zones. Thanks and good luck!

VIDEO VARIETIES

HOLLYWOOD will have the first station in the world built exclusively for television. The City Planning Commission of Los Angeles has approved the request of the Don Lee Broadcasting System to move its television experimental station W6XAO from downtown Los Angeles, to a site on top of Mt. Lee, the highest mountain accessible by road in the Hollywood range.

The twenty acre site selected is on the Mack Sennett estate at the eastern boundary of Griffith Park. The property is reached by driving up the Western Avenue Extension, and is situated directly behind the giant Hollywoodland sign. Mount Lee, named in memory of the late Don Lee, is 1700 feet high. Only inaccessible Cahuenga Peak exceeds it in height in the area.

Station W6XAO, the only television station west of Kansas City, employs the 45 megacycle television channel, broadcasting on a regular five day a week schedule.

Queries

Following are some of the questions asked about television on the Pacific Coast, and the answers are by Thomas S. Lee, of W6XAO:

Q. When will Hollywood have television?

A. It has it now, and has had for nearly eight years. The Don Lee transmitter went on the air December 23, 1931. Since that time more than 11,000,000 feet of film have been telecast, and live-talent shows are presented five times a week.

Q. Where can I see television?

A. The Hollywood Television Society has weekly meetings, on Tues-

day nights at 7 o'clock, at 7377 Santa Monica Blvd., and members demonstrate their sets at 7:30 p.m. The live talent shows were off the air temporarily while the studio equipment was being switched from 300 to 441 lines, but no doubt they will be resumed before this magazine reaches its readers.

Stations

The Director of the Radio Broadcasting Service of France writes, in response to our request for information on television in his country; that ordinarily, excellent reception of the Paris station is enjoyed within a radius of 50 kilometres, "and," he continues, "some satisfactory reception has been reported in a radius of 110 km. Overseas, the British Post Office has advised us that their receivers located on the coast of South England have received the television transmissions from the Eiffel Tower station."

The Parisian station transmits visual programs on 45985 kcs. with 25 kilowatts power, and the accompanying sound is broadcast on 41990 kcs. This station is operated by the Republic of France, Ministere des Postes, Telegraphes et Telephones, 107 rue de Grenelle.

The Kalorama Laboratories of Irvington, N. J., operators of W2XWC, have been granted a construction permit to move their station to Carlstadt, N. J., and to continue operation on 2000-2100 kcs. with a power of 500 w., from midnight to 6 am, EST.

The RCA Mfg. Co. of Camden, N. J., station W3XAD, have been granted a modification of their license to change frequency from 124000-130000 to 321000-327000 kcs.

Stepping up their transmitting as well as their production activities, the Allen B. DuMont Laboratories of Passaic, N. J. have filed applications for additional television transmitting licenses. One application covers a

The Stewart-Warner radio and television combination, Model T-1210. This 26-tube receiver is designed for the standard broadcast band and one police band, and seven television bands.

portable mobile transmitter to be carried on a motor truck for picking up outside events and flashing them to the main transmitter for retransmission. Another application is for a one kilowatt station to be on the top floor of 515 Madison Ave., New York City. The third application is for a similar television station to be installed in the National Press Bldg., Washington, D. C.

Arrangements for the installation of a television picture system for demonstrating television have been made by KSTP, St. Paul. This equipment is similar to that at the world's fairs in New York and San Francisco, consisting of an electronic camera which picks up the images and carries them by cable to a number of standard home television receivers.

Francisco Gonzales, 702 South Edison Street, Tampa, Fla., reads Radex

Radexing With The Radexers

By Ray La Rocque

TO start the new season in the right manner, RADEX offers you this new standard broadcast section with the hope of giving you more news in a tabulated style. As you will note, the broadcast news this month is divided into sections, so that by merely glancing at the sub-titles, you may **turn immediately** to any type of news in which you may be interested.

THIS 'N' DATA

What is the status of KWTN? G. B. Leech of R. R. 3, Salmon Arm, British Columbia says he found them listed in December frequency check list, but not in the log. They were heard by Radexer Leech in December, but never before or since. (KWTN was deleted by the FCC on June 3, 1938, and given an extension to July 4, 1938. The station asked for a rehearing of their case, and the issues are still pending in the Court of Appeals.—Ed.) D. C. Morrison of Berkely, California is kind enough to reveal the sign-on time of a few stations for the benefit of the early risers among us. KORE, KLBM and KIEM come on the air at 10 a.m.; KGFL, KWEW, KFJI, KEHE and KGHL sign on the air at 9 a.m.; while KGVO was heard signing on at 8:50 a.m. KVNU and KDON sign on at 9:30 a.m.; and KFRO and KOCY at 7:45 a.m. The following open at 7 a.m.: KAND, KWTO, KGKO, WNAX, KVOO, WGAR and KGNC. On at 6 a.m. are WBNS and WWVA. KRIC, KID and KFEL start up at 8 a.m. CKMO signs on at 11 a.m. and KINY at noon. CKLW starts up at 6:30 a.m., while KEEN doesn't start till 3 p.m.

Information on small networks is very much desired by Gerald Harris, 724 Armstrong, Kansas City, Kansas. Having written to member stations, Radexer Harris has received the following list of networks and their affiliated stations. "Texas Quality

Network" has WBAP, WFAA, KPRC and WOAI. The "Z" Network has KGIR, KRBM, and KFPA. The Wisconsin Radio Network is comprised of KFIZ, WIBU, and WHBY. The Oklahoma Network has KTOK, KBIX, KGFF, KOME, KCRC, and KADA. The Don Lee Network embraces a larger group in KTOK, KFRC, KGB, KDB, KPMC, KVOE, KDON, KXO, KQW, KFXM, KTKC, KIEM, KVEC, KHSL, KVCV, KRNR, KALE, KSLM, KORE, KOOS, KMO, KIT, KPQ, KVO, KXRO, KOL, KGA, KGY, KELA, KRKO, and KWLK. The Kansas Network has but WIBW and KCKN.

P. O. BOX R9

BERKELEY, CALIFORNIA— from D. C. Morrison, 2427 Ellsworth St.: "KJBS has been signing on at 10 p.m. P.S.T., lately, with the announcement that they give 20¾ hours of continuous operation (therefore signing off at 6:45 p.m.) KRKD appears to be the station on 1120 kcs. after midnight though KFSG has been heard on this frequency occasionally. KIRO and KMPC both use 710 kcs. till 5 a.m. P.S.T., and both interfere badly with each other. Before midnight KALE is heard through KFAC, while after midnight, KALE covers the band."

EAST COULEE, ALBERTA— from John F. Potts, Box 46: "Contrary to the belief that cold weather brings the best radio results, I have had the best reception and most distance in July and August between 1 and 3 a.m."

CHESTER, VERMONT — from Donald M. Wright, South Main Street: "Will you please tell me what an EKKO stamp is? I have one from WAWZ, but would like to know its significance." (Originally, an EKKO stamp was issued by the

station in lieu of a verification card or letter. They were mounted by DXers in albums and kept as veries, just as cards are today. Eventually, they got into the hands of persons who took too many liberties in exchanging them with other DXers for stamps they didn't have in their own collections. Thus their value as a verification, today, is practically worthless.)

CHICAGO, ILLINOIS—Richard Wright, 5762 Harper Avenue: "I now have four RADEX plaques. My off continent log now stands as follows: Europe—1, Oceania—3, and South America—4, which includes 13 countries."

GREENSPOND, NEWFOUNDLAND—Rev. J. L. Quinton, St. Stephen's Rectory: "In the months from October to January I picked up most big trans-Atlantic stations, but I have heard none since. Cuba's little stations sometimes pour in, and at present I get some good South Americans. LR-1, Buenos Aires on 1070 kcs. is generally good at midnight. VAS, Glace Bay and CBA, Sackville are good in the daytime and I have a daylight veri from both. One night after local VONF on 640 kcs. signed, a station announced San Francisco on the same frequency and signed off owing to troubles with transmitter. I did not get call letters. I have been interested in Radio for quite a few years. At home, we started early with the old timers—the sets that squealed when you looked at them, huge horns, etc. I expect, someday, to be on the air with a home made transmitter."

SILVER SPRINGS, MARYLAND—Elwood B. Cole (R998), 9002 Midwood Road: "I have been DXing since February 1, 1939, and since then I have logged 235 stations on the broadcast band, and have verified 113 of them. Also, I have verified 18 stations on the shortwaves, not counting amateurs. I have heard

every state but nine and have heard Canada, Puerto Rico, Mexico, Guatemala, Cuba, Bahamas, Hawaii, and Costa Rica."

COVERING THE CONTINENTS Domestic Dialings

By Domestic, we mean all stations located in the United States and Canada, as well as all the smaller countries and islands which are near those two countries.

FORECAST: September, for most parts of this country and Canada, marks the beginning of good reception on the broadcast band. Stations will gradually begin to come in stronger and static will lessen in intensity. There will be exceptions, when summer static will show up as in July, but a good DXer's motto is, "Start logging them early."

Way Out West Where the K's Transmit: KGIR has been coming in real well lately. Ordinarily it is not easily heard. CJRM is the best Canadian outlet. The Mexican border stations spoil nearly all of the more powerful Canadians. (Thomas C. Roberts, R1139, Wyo. 4, Caspar, Wyo.)

KVNU on 1200 kcs. in Logan, Utah is heard on the second Thursday of each month on FCC monitoring check at 6:09 a.m. . . . KMMJ on 740 kcs. at Clay Center, Nebr. heard at

4 p.m. carrying the "Man on the Street" program. . . . KOWH is the new call for WAAW in Omaha on 660 kcs. They are owned by Omaha World-Herald. (Martin J. Olthoff, Independence, Kansas).

KGHL in Billings, Montana has verified with a very nice card showing a photo of their station. They were heard twice, both occasions being the first Saturday of the month from 4:20-4:40 a.m. . . . KFOX and KVOA are often heard transmitting programs in Spanish at various hours of the morning and night. Both of these stations have been mistaken for foreign catches several times. . . . KGLU and KAND have both been verified from the March and April FCC tests. KGLU seemed glad to get a reception report and sent a very cordial letter. KAND sent a printed card. . . . KGAR is now KTUC as noticed on last FCC test. . . . KFBI, according to KSL Spatari broadcast, conducts a test program the 10th of each month from 6-6:15 a.m. . . . KTKC on 1190 kcs. in Visalia, Calif. was heard on FCC schedule on the second Monday from 5:55-6:05 a.m. (D. C. Morrison, Berkeley, Calif.)

With the W's in the East: WING is the new call for WSMK at Dayton which still operates with 200 watts (250 authorized). General Manager is now Ronald Woodyard. The NBC supplies WING with recordings of NBC artists which leads radio fans in this territory to believe that WING will become a member of that network, although no indications have been made other than the record set-up. (Robert W. Wertz, Dayton, Ohio).

WRAL in Raleigh, N. C. is now on the air and has been for about two months. WRAL operates between the hours of 6 a.m. and 1 a.m. the following morning. The station is associated with the Mutual Broad-

casting System. (Arthur Lee Poole, Raleigh, N. C.)

WGAN carries CBS programs and should, I believe, be listed as a member of that network. (Donald M. Wheatley, R1003, Chester, Vt.)

WWNC on 570 kcs. is now a CBS outlet. . . . WRVA on 1110 kcs. at Richmond, Va., is now using 50 kw. . . . WHK on 1390 kcs. is using 2500 watts, daytime. . . . WDNC on 1500 kcs. is using 250 watts daytime. . . . WRAL on 1210 kcs. is now on the air. (Herbert Patterson, R449-N.C.2, Durham, N. C.)

WGN's new 750 ft. tower, the tallest man made structure in the Central West was recently put into operation and has improved reception over the station's entire service area as well as boosting its strength 40%. (W. J. Wood, Oak Park, Ill.)

WMBF, an affiliate of WIOD, and WSYU, which is another call for WSYR are other hard-to-get stations not mentioned in "P. O. Box R9" section. I wonder if any Radexer has these verified? . . . W8XO is more or less regularly heard as WLW's test call. . . . W9XC is a newcomer and an affiliate of WHO on 1000 kcs. with the same power, 1000 watts. (Desmond Callan, R987, Readville, Mass.)

WIND, in a letter, state that they are surprised that they received an R9 report from a listener in this vicinity as the station uses a directional antenna which limits the power transmitted toward Waterloo to about one-tenth of that radiated in the maximum direction. (Ray Schaffar, R1092, Waterloo, Iowa.)

WRVA on 1110 kcs. operates from 6:30-1 a.m. except Sunday when they come on at 8 a.m. . . . WRNL on 880 ks. has just had a permit granted to boost power to 1000 watts and use directional antenna with unlimited time. . . . WRTD on 1500 kcs. with 100 watts operates from 7 a.m. to midnight with transmissions beginning at 8 a.m. on Sunday. . .

WMBG on 1350 kcs., operates from 7 a.m. till midnight daily signing on Sundays at 8 a.m. WBBL on 1210 kcs. operates Sunday from 11 a.m. to 12:45 p.m. and 7:45-9:15 p.m. (James R. L. Fitzgerald, Jr., Richmond, Va.)

WDEV, in a letter, state that they no longer have frequency checks, and that they are on from 7 a.m. to local sunset. (Elwood B. Cole, Jr., R998, Silver Spring, Md.)

Canada: CFQC changed from 840 to 600 kcs. around the middle of last February. Reception is much better on the new frequency. . . . CJOC is now on 1210 kcs. The change was made between March 30 and April 2. . . . CJRM is now on 950 kcs. instead of 540 kcs. as before. The change was made at the same time as CJOC's. CJRM is so weak now that they hardly can be heard, whereas I could pick them up at any time on the old channel. (John F. Potts, R1136, East Coulee, Alberta.)

Puerto Rico: WKAQ will carry programs of sustaining nature received from the international broadcast stations W2XE and W3XAU.

Bahama Islands: ZNS is on 790 kcs. located at Nassau using 1000 watts on a schedule which starts daily at 1:30-2 p.m. and from 8-9 p.m. Complete address is: Telecommunications Dept., East St., Nassau, N.P., Bahama Islands. (Wm. W. Flynn, Dummer, Sask.)

St. Pierre: FQN is on Saturday nights only from 6:30-8 p.m. with a signal not too strong here in Newfoundland. They open and close with "La Marseillaise." (Rev. J. L. Quinton, Greenspond, Nfld. — R1142, Nfld.3.)

Alaska: KINY is the only Alaskan that has been received clearly here. KGBU has never been heard and KFQD was just barely detected. I have tried for KGBU during the March and April FCC tests and though it should have been in the clear at this time, no signal was detected. KINY was fair most of the

time. As they were signing off on the test period, the announcer mentioned that they would resume transmission at 8 a.m. Alaskan time. (D. C. Morrison, Berkeley, Calif.)

Newfoundland: "VONF on 640 kcs. and VOGY on 840 kcs., operate in parallel along with short-waver VONG on the following schedule: 8:30 a.m. to 12:30 p.m. and 4:30-9:30 p.m. . . . VOCM on 1040 kcs., now instead of 1000 kcs. as listed. . . . VOWR on 700 kcs. now instead of 681 kcs. . . . VOMA on 655 kcs. at Battle Harbour, Labrador, using very low power and operated by the Marconi Company come on the air at 3 p.m. daily except Sunday with a mouth organ selection followed by a resume of the day's news and sign off about 7-10 minutes after coming on the air. Not much chance for any DX except for those in the North Maine woods or in Eastern Canada. (Rev. J. L. Quinton, R1142, Nfld.3, Greenspond, Nfld.)

VOAR on 950 kcs. in St. Johns is a 25 watter listed by the Dept. of Commerce in their bulletin, but evidently is not broadcasting as Rev. Quinton made no mention of it in his list of stations now operating in Newfoundland.

Looking Into Latin America

In this section, each month, will be found reports from stations located in all countries of South and Central America as well as Islands of the West Indies.

FORECAST: Reception from the South is good all winter and increases with the coming of midwinter with the exception of signals emanating from central and southern parts of South America. These signals seem to be best in the Autumn and Spring months, though the more powerful stations are heard throughout the DX season.

Brazil: PRF-3 stated that they received but one report on last January's broadcast from the state of

Iowa, as per May RADEX. That report must have been that of yours truly as I certainly reported them. (Ray Schaffar, R1092, Waterloo, Iowa).

VERTI - FLEX

A self-supporting highly efficient

Vertical Aerial

that eliminates all overhead wires and insulators.

The ideal aerial for apartment houses or wherever space is at a premium. Can be attached to the vent pipe which protrudes through the roof, in which case no ground wire is necessary. Can be attached to a corner or a flat surface if preferred.

Putting it up is no problem at all, and paying for it is even easier, as the price is

ONLY \$1.00

VERTI-FLEX
2138 N. Racine Ave.
Chicago, Ill.

Guatemala: TG-1 using 200 watts conduct a special concert in Spatari on Sunday mornings from 2-2:30 a.m. with announcements in Spatari and English. This was heard over the KSL Spatari program and the announcer said TG-1 reports are welcomed and will be verified promptly. (D. C. Morrison, 2427 Ellsworth St., Berkely, Calif.)

Costa Rica: Information on broadcasting stations of this country is easily available—but correct information is very much at a premium. For some unknown reason every list of stations coming out of Costa Rica disagrees almost completely with any previous list. Changes which have occurred since the listing in the indices of Midsummer RADEX according to the Dept. of Commerce bulletin amount to ten unlisted stations: TIGPH—605 kcs., 1000 watts; TING—750 kcs., 375 watts; TIEMC—860 kcs., 250 watts; TIAFB—900 kcs., 600 watts; TIOS—940 kcs., 500 watts; TI-3MG—1030 kcs., 500 watts; TINBC—1070 kcs., 5000 watts; TIRCC—1200 kcs., 500 watts;

TIGPH-2 on 1225 kcs., 1000 watts; and TI-4NRH—725 kcs., 750 watts.

(See also the list of Costa Rican stations appearing in this month's "Across The Editor's Desk").

Cuba: CMHI on 830 kcs. testing in the mornings. They were heard at 2:05 a.m. No English was used, but it was mentioned in Spanish that they were using 1000 watts down there in Santa Clara—and the signal sounded like more! (Ray Schaffar, R1092, Waterloo, Iowa).

CMOA on 660 kcs. now instead of 910 kcs. . . . CMBG on 1140 kcs. now instead of 690 kcs. . . . CMBQ on 910 kcs. instead of 1320 kcs. now. . . . CMBC on 690 kcs. instead of 1140 as before. . . . CMCR on 1320 kcs., having moved from 660 kcs. (George Burnham).

Mexico: XELO heard on 730 kcs. at 5 a.m. Reception was poor and has been for some time. (John F. Potts, R1136, East Coulee, Alta.)

XEAU (New) in Tijuana, Mexico was heard here during the April FCC testing period on the second Monday just after KARM signed off. They were heard from 1:15 a.m. to 1:25 a.m. on 1310 kcs. This station was reported now on the air from a KSL Spatari program in which the announcer said that they announced as the "Voice of Southern California" and that their mailing address was P. O. Box 24, San Diego, Calif. The program heard was announced as a test program in English. Reception—good! . . . XELO has been heard often on 730 kcs. and XERB on 1090 kcs. These stations have not been identified on any other frequencies, and no other Mexican has been heard on either of these frequencies. Both have been heard very well at times. (D. C. Morrison, Berkeley, Calif.)

XEL with its 250 watts is surely a very funny station. In the early morning, when it's plenty dark and reception is coming in, they're hardly audible—yet, at sunrise, when XENT

and others begin to fade, they roar in R7-8! They're almost as strong as the much nearer and higher powered XENT. (Desmond Callan, R987, Readville, Mass.)

Tuning the TA's

All reception of stations in Europe and Northern and Eastern Africa (if any) will be reported in this section each month.

FORECAST: We predict nothing this month for fans who are seeking TA's. Not until late October are signals due from this part of the universe. Although some of the better equipped DXers favored with a good location may hear TA's this month, we wouldn't advise the average fan to lose any sleep trying for Europeans this month.

Tunisia: The French PTT station at Tunis on 868 kcs. will use 20 kilowatts this season and operate on approximately the same schedule as Marseille, France. Which means that they will be coming on the air early enough to be heard here when conditions permit. Marseille opened their broadcasting day at 2:00 a.m. last season.

French Morocco: "Radio-Maroc" at Rabat on 601 kcs. is the only broadcasting station permitted to operate in this country. They use a power of 25000 watts. (Dept. of Commerce).

Trans-Pacific Topics

All reports of stations in New Zealand, Australia, other Oceanic islands, and in Asia will be included in this section each month.

FORECAST: "Down under" stations (those in Oceania) will be heard very well during the next few months. They should reach their peak of the Autumn season in October. It is not too early to begin shooting at a few of the higher powered New Zealand or Australian stations. Asia is not to be heard generally until later in the season. In fact midwinter is the ideal time

100 BRITISH COLONIES 10c

Here's a packet that we want every collector who is interested in getting his money's worth to have. In all the years we've been in business we've never had a packet to compare with this one. Containing 100 fine British Colonies stamps, all picked copies in fine condition with light cancellations, it surpasses anything of its kind on the market. Many of the newest issues, such as **Burma**, **Irish Constitution**, **Ceylon Rubber Tapping**, **Malaya King George VIth heads**, **New Zealand**, **India**, **Canada**, **Australia new King and Queen heads**, **Australia Sidney Cove Commemoratives**, etc. **Nineteenth century classical Egypt**, **Newfoundland Coronation**, **Perak**, **Malay Tigers**, **Guiana ship**, **Rajah's Char Minar**, etc. A most wonderful collection! 100 fine British Colonies stamps, exactly as described above, only 10c to serious new approval applicants. (An ordinary packet of 100 British Colonies sells for 30c). So RUSH your order.

HARRISON STAMP CO.

Dept. Q-4

Harrison, New York

Look for your name

Your name may be hidden somewhere in this issue of RADEX! Look for it! If you find it (*followed by the words, "reads RADEX"*) you will receive a free Verti-Flex Aerial, by writing to us within one month after your name appears.

Any reader interested may have his name, or his friends' names, put into our Chance Box from which the lucky names will be drawn at random. There is no charge. Just write the names and addresses on a postal card and send to us.

Watch the Next Issue of Radex.

You May Be One of the

LUCKY PRIZE WINNERS

for Asiatics on the broadcast band, though west coast fans may find it possible to log them much earlier in the season. Of course you know that just before sunrise is the usual time TP's are heard!

Hawaii: KGU usually can be picked up before their sign off time, with a weak, but steady, signal. . . . KHBC is heard less often with about the same reception at times, but usually weaker. KGMB is by far the best of the TH stations—even though lesser powered than KGU. All three were heard on the FCC tests. (D. C. Morrison, Berkeley, Calif.)

KGU and KHBC have been heard several times, but I have never been able to hear KGU as loud as KHBC! (John F. Potts, R1136, East Coulee, Alta.)

Japan: JOIG at Toyama verified with a yellow and white card. Call letters are in yellow. The card also shows a pagoda and nearby mountains. (A. V. Deterly, R662, La.3, Baton Rouge, La.)

Comes now the time to say that we have enjoyed writing this new department for you. We hope every Radexer receives the same genuine pleasure while reading these jottings of ours. Without the help of those who contributed, they would not have been possible, of course. To all who helped—many sincere thanks and please write again, often!

Please keep in mind that your criticisms and suggestions are as welcome, if not more so, as your compliments. We have tried to present the news to you in a manner which is intended to please. If improvements can be made, and we know there is room for some, we will make them immediately upon receiving the suggestion. So, Radexers, let this be your department. If you contribute generously with news, you will have a bigger department; and if you criticize wisely, you will

have a better department. We await your command. So long until next month.

George A. Lee, 2920 Sheridan Blvd., Lincoln, Nebraska, reads Radex.

QUESTIONS—ANSWERS

C. M. R., Louisville, Ky.: I used to get Holland on my Philco 38-5, but I never hear it any longer. Does the set need balancing?

Answer. Reception from Holland on a 7-tube set is doing pretty well. However, providing the set and antenna have not changed, and all parts are good and the current supply is perfect, it might be a good idea to check over the 6A8G oscillator or mixer tube and replace if it seems to be weakening. Sometimes a new 6K7G in place of the original 6U7G has been known to improve reception.

I. S. Woodside, N. Y.: My General Electric 6-tube set receives programs a few points off on each frequency.

Answer. The set either is out of alignment or the dial has slipped. If the amount the tuning is off is the same over all extremes of the dial the whole unit should be reset on the tuning condenser shaft. If the set is out of alignment, it is a simple job for a good serviceman, but not the novice.

G. W. W., Saxton, Pa.: My Sky Rover model 778 set has a frying or sizzling noise which often stops when the set warms up, but then a steady hum appears after that. Why is this?

Answer. We suspect that one of the filter condensers in the power pack is defective and that the noise comes from within while the set is getting warm, and that the hum is due to the same cause. However, one of the small resistors and bypass condensers someplace in the circuit, if defective, gives similar symptoms. A careful check by a good serviceman is your best bet.

R. E. Carrington, 1108 Neches St., Austin, Texas, reads Radex.

High Frequency Globe Trotting

By RAY LA ROCQUE

Report-O-Meter

M. F. Williams	100%
A. W. Jollin	60%
Robert Skyten	56%
John J. Oskay	48%
Desmond Callan	46%

"Matty" Williams of Newark, New Jersey starts the season in the right manner by capturing the top spot in the "Report-o-Meter." Besides those listed above, honorable mention is awarded to M. J. Olthoff, and John D. Long, who came close, but did not register.

For the newer readers who are not familiar with our "Report-o-Meter", a little explanation may be in order. Each month, the Meter lists the five best reporters of the month. The scores are based on the reports used in our Shortwaves in Review, Ultra High, and Not-so-Short Waves sections. There is no definite system of points, as your Chief Globe Trotter is the sole judge on the merit of each report. However, the items in which we are mostly interested are: New stations, changes in frequency, location, schedule, station addresses, identification signals, types of programs broadcast, and whether or not they use male announcers. If you will endeavor to include as many of the above particulars in your reports as possible, you will be assured someday, sooner or later, of reaching the select group that comprises our monthly "Report-o-Meter".

ASK US ANOTHER

"In May Radex, C. R. Wilson, asks some details about stations ZNC-ZNF on 5900 kcs. These stations are located in Bechuanaland, Africa. ZNC is located at Naun, while ZNF is in Ghanzi. There is a ZND, too, on the same frequency on Tsaben. Each station has a power of 40 watts

and are operated, I believe, by the Public Works. These stations were not believed to be heard in America." The above from Pierre Langevin, Laprairie, Quebec. . . "I would like to know about the verification policy of a few stations," is the query of George C. Starry, 210 N. Ligonier St., Latrobe, Penna. "The stations are: XEBR, CB960, Radio Sociedad Nacional de Agricultura, OAX5C, Radio Requete, YN-11P, W6XBE, EA7BA, VP6LN, NY4AB."

In answer to Tony Tarr's query, Joseph Schwartz (R1109) of New York City relates that WQKW is the station of the Ohio Police and operates on 33.1 mc. with 50 watts. WRBH on the same frequency is a mobile station of the Cleveland Police and uses 15 watts. . . . Roland Schweitzer of 145-11 34th Ave., Flushing, N. Y. would like Alfred Bacon to know that he reported OZF on July 18th and received a verification on Sept. 22. The report was for a 55 minute period. . . . More information on the Spanish speaking

This Hungarian veri card, in red, green and black, features a variety of photographs pasted in the red square. Thus every HAS3 and HAT4 card is different. This one, showing the Szepmuvesxeta Museum, is reproduced by courtesy of Peter Straton, James Hodgden and Jerry Hahn.

station on about 16200 kcs. is sought by William Scott (R626-Tenn.3), 313 Holston Ave., Johnson City, Tenn.

A. M. Hankins, 1006 Ligonier, Latrobe, Penna. asks about a strange station on approximately 9110 kcs., heard on Sunday at 8:15 p.m. speaking Spanish and seeming to greet various cities in the United States, Canada, and South America. "I heard him say Yugoslavia twice, then a band played a slow march. This was followed by the familiar tone beats which characterize the German stations. It was not DJL as the German station comes in a little lower on the dial." . . . A station heard on 7440 kcs. on a set schedule from 9-10:45 p.m. whose opening identification was two short, one long buzz has not been heard for three weeks. This from A. W. Jollin, 44 Benefit St., Worcester, Mass. . . . Friend Jollin also comes forth with the information that the station heard by Gil Harris on 7000 kcs. (actually 7002) is EA9AH at Tetuan, Spanish Morocco. Typical Moroccan music heard on some programs may be easily mistaken for Oriental music.

Alfred Bacon, 928 Thirteenth St., New Westminster, B. C. asks: "What Cuban is heard on 16340 kcs. in the evening?" . . . "What Spanish speaking station is in the middle of the 40 meter ham band?" is the query of Bob Wilson, 69 Grant St., Portland, Me. . . . William W. Flynn (R937), Wagner School, Dummer, Sask. asks about W9XEI, heard talking to W-10XJF on or near 8500 kcs. The person talking at W-10 was a Mr. Donnelly who reported they were bound for San Antonio. "Can you supply the QRA or QTH of the W9 or W-10 in RADEX," is the query of R937! . . . M. F. Williams, Newark, N. J. asks identification of station in Dominican Republic coming on the air on 5880 kcs. at 7 p.m. and signing at 10 p.m.

A few of the puzzlers offered by

John J. Oskay, R.F.D. #1, Box 179, New Brunswick, N. J. are: A YV or HJ on 4924 kcs. at 8:30 p.m.; China (?) on 11720 kcs., around six a.m. with oriental type music; Station on 4908 kcs., at 7:05 p.m. probably YV1RY; another on 4887 kcs. QRM'ing HJ4DAP and YV1RX; others on 4900 and 4940 kcs., which may be YV6RT and YV5RO respectively; HJ1ABP not heard on 9618 kcs., may be the station being heard on 4924 kcs. . . . "I get a station on approximately 12000 kcs. in Matanzas, Cuba and another a few kilocycles higher which is also Spanish speaking, at noon. Can you tell me who they are and addresses?" This from R. Causse (R1117), Lester, Penna. (The Matanzas station is undoubtedly COGF—RL). . . . Here comes an answer: "Please inform Alfred Bacon," says Harold Satterthwaite, 3345 Oakhurst Ave., Palms, Los Angeles, Calif. "that OZF does verify. I have a card from them on July 28, 1938. They give two addresses. Transmission address: Postog Telegrafvaesenet, Radioingenioertjenesten, Bernstorffsgade 32, 1, Copenhagen V., Denmark. Alternate address: Danmarks, Kortboelgesender OZF, Statmarks, Kortboelgesender OZF, Statsradiofonien, Heibergsgade 7, Koebenhavn, Danmark."

QUOTE AND UNQUOTE

William W. Flynn, Dummer, Saskatchewan: "Why not have a list of QSL signers from S. W. stations as well as for broadcast QSL's? Here are some I have: CFVP—E. Marshal, CFRX—Harry Sedgwick, CHNX—Wm. Barrett, ZNS—K. P. Brown, RV96—I. Petrov, Paris—Jean Fraysse, Lima—G. Cabrera, W6XBE—Buck Harris."

H. Taylor, Hollis, Long Island: "In March I got myself a new Crosley Super-11 and to date I have logged over 110 stations, with veries from 50, such as, Canada, England, France, Mexico, and Guatamala. When I

went for a book listing all stations at the newsdealer, he showed me RADEX and I liked it so well I hope I will be able to get every copy that comes out."

Art Child (R986), San Francisco, California: "Greetings from the Golden Gate Exposition. Hope to see more articles on portable sets and DX on same receivers."

Rev. J. L. Quinton (R1142, Nfld.3), Greenspond, Newfoundland: "I am using a 10 tube Airline with movie dial. The set is battery operated. I am using a 180 ft. single wire inverted "L" pointed Northwest by North. This antenna has been increased in length since last winter. I find that the longer aerial increases DXing, but tends to run the stations together on S. W. It is a great improvement on the broadcast band. Last winter was a bit better in general than 1938, but still left much to be desired in the way of reception. Some nights they roared in, then other nights there was no reception at all. Of course, this effect was due mostly to our old friend, Aurora Borealis. Northern Lights are the order of the night here during fine weather in Fall, Winter, and Spring, and it's useless to try to operate when they are around. I keep a log of countries only and during the past Winter, picked up all the South American countries, most of the Central and West Indies including Martinique, etc.; practically all the big U.S.A. stations. However, the Canadian S.W. stations are not heard except Sydney and Halifax on the 49 meter band. From Europe, England, France, Rome, Berlin, Vatican, Holland, and Lisbon, all come in R9. Many other European countries such as Russia, Poland, Czechoslovakia, Austria, Hungary, Ireland, Switzerland, and Spain have been heard. I used to hear Australia until March, but not since then. Addis Ababa and ZRL represent Africa."

ULTRA HIGH

W3XO on 43200 kcs. has been

granted extension of special temporary authority to operate on that channel. (RX)

W9XH on 26050 kcs. at South Bend, Indiana is on the air week days only, from 1:30-5:30 p.m. They relay the programs of WSBT and WFAM of the same city. (Mais—R572, Ind.)

W9XTA on 26500 kcs. with 500 watts at Harrisburg, Ill. carries the program Ham Forum—probably the oldest radio program now on the air devoted to radio amateurs. Program is heard every Saturday at 2:15 p.m. and consists of amateur news, technical information, editorial comment, and ham gossip. (A. James Ebel, Ch. Engr., W9XTA)

W8XNU on 25950 kcs. with 1000 watts broadcasts daily from 7 a.m. to 1 a.m. and on Sunday programs commence an hour later. They are anxious for reports. (Sawado—R592,

A. E. Trapp, Box 158, Grass Range, Mont., reads Radex.

SHORTWAVES IN REVIEW

Angola

CR6CC on 11740 kcs. in Luanda is heard when CS2WD signs off at 2:30 p.m. with a very weak signal and badly hampered by the side bands of W1XAL. (Williams—R552, N.J.)

Brazil

PSH on 10220 kcs., PSE on 14935 kcs., and PSA on 21080 kcs., offer the following schedule of programs in different languages:

- Portugese: PSH—Daily except Sunday from 6-7 p.m.
- English: PSH—Mondays from: 8-8:30 p.m.
- Spanish: PSH—Fridays from 7-7:30 p.m.
- German: PSE—Wed ne sd ay s from 4-4:10 p.m.

Italian: PSE—Thursdays from 3-3:30 p.m.

PSA—1st Thursday of mo. from 11:18 a.m. to noon.

French: PSE—Saturdays from 3-3:30 p.m.

(Skyten—R786, Mass.; and Olthoff—Kans.)

PPH on 11930 kcs. heard at 5:30 a.m. with a program directed to Japan. (Oskay—N.J.)

British Honduras

ZIK-3 on 5300 kcs. is the call for the Belize station on this frequency. The previous schedule remains as 8:30-8:50 p.m. They are not as strong as formerly on 10600 kcs. (Williams—R552, N.J.; and Oskay—N.J.)

Burma

XYZ (That's right, the three last letters in the alphabet) on 6007 kcs., with 1500 watts and XZZ on 3488 kcs., with 50 watts at Rangoon, Burma, broadcasts daily from 8:20-10:30 p.m. and from 5:30-9 a.m. Sundays from 8:30-10:30 p.m. Slogan: "This is Government Experimental Broadcast Station, Rangoon, Burma, transmitting simultaneously on 6007 and 3488 kcs." Reception reports will be verified for an IRC if addressed to W. J. Byrnes, Officer in Charge, Burma Independent Wireless Sub-Division, Rangoon. (RX via Gardner—Ohio)

Canada

CFRX on 6070 kcs. at Toronto verify with a card on which a picture of Ontario's Parliament Building appears in blue and gray. They report very few cards come from Saskatchewan. (Flynn—R937, Sask.)

CFVP on 6030 kcs. located at Calgary, Alberta is heard with a good signal between 9 a.m. and 1 a.m. on Thursday and noon to midnight on Sundays. (Williams—R552, N.J.)

Chile

CB1180 on about 11970 kcs. and CD1190 on 11900 kcs. heard broad-

casting simultaneously at 6 p.m. (Jollin—R1018, Mass.)

China

XPSA on 7140 kcs. is located at Kweiyang, Kweichow Province, in China and not at Chungking. (RX)

XGOX on 17800 kcs. is heard with program beamed to N. America daily from 9:30-11:30 p.m. (RX)

XGOY on 11900 kcs. beamed to Eastern Europe from 4-6:30 p.m., to Russia, East and North China from 5:30-7:15 a.m., to Japan from 7:15-8 a.m., to South China and Philippines from 8-10:30 a.m., to Soviet Russia from 11-11:30 a.m. From the beginning of Autumn, until Spring, XGOX will operate on 15200 kcs., and XGOY on 9500 kcs., on the same schedule as present. (RX)

XGOY on 11900 kcs. (occasionally on 11880) has been reported in this country on almost all of the above transmissions. News in English is heard at 9 a.m. and 6 p.m. During English announcements the call XGOX XGOY is repeated several times. (Williams—R552, N.J.; Olthoff—Kans.; Oskay—N.J.; Skyten—R786, Mass.)

XTC on 9295 kcs., located at Shanghai operates between 8-9 a.m., and are heard with a strong signal. (Williams—R552, N.J.)

ZBW-3 at Hongkong logged here one morning with R6 signal. They were just about snowed under by an R5 noise level. (Scott—R626, Tenn.3)

Colombia

HKF on 9710 kcs. "La Voz de Bogota", Apartado 312, Bogota, is heard nightly after 9 p.m. with a strong signal. (Williams—R552, N.J.)

Costa Rica

TIPG on 9610 kcs. now (formerly 9695) from 7 a.m. till 11:30 p.m. with English hour every Wednesday and Saturday from 9-10 p.m. (Jewell—R834, Ala.; Olthoff—Kans.; Williams—R552, N.J.)

Cuba

COBC on 9960 kcs. in Havana seem to be much higher in frequency than

From easy-to-hear stations CMQ or COCQ comes this pretty QSL card which all DXers ought to have. (Courtesy of A. D. Jordan).

listed. They are actually close to 10000 kcs. (Hankins—R7, Pa.1)

COCE on 12230 kcs., "La Voz del Transporte", Prado 18, Havana, has been heard relaying CMC daily from 8 a.m. to midnight. (Williams—R552, N.J.)

COCQ on 8850 kcs., seem to have settled on this frequency as they have been sticking to it lately. (We have our fingers crossed as we write, though!—RL) (Oskay—N.J.)

Czechoslovakia

OLR4A on 11840 kcs. heard signing off the air at 9:26 p.m. with carillon of beautiful chimes. Very loud and clear. No English used. (Williams—R552, N.J.; and Hankins—R7, Pa.1)

OLR5A on 15230 kcs. sends the Prague programs in the evenings now instead of OLR4A. Schedule is from 6:55 to at least 8:15 p.m. Contrary to report in last RADEX they do announce the full call as O-E1-Air-Feer-Ah—OLR5A! (Callan—R987, Mass.)

Dominican Republic

HIN on 6243 kcs., of Trujillo City announces now as HIN and HI-1N, not H-1N. Incidentally, they are one of the best signals on the 49 meter band. (Skyten—R786, Mass.) They have a program in Arabic twice weekly. On Thursday from 8:45-10 p.m. and on Sunday from 6:45-8 p.m. (Nahas—N.Y.)

HI-3X on 17400 kcs. heard at 9:10 p.m. on this frequency. (Oskay—N.J.)

Ecuador

HCJB on 12450 kcs. is putting in a good signal around 10 p.m. nightly on the Friendship Hour. They gave their address as Post Office Box 691, Quito, Ecuador. (Long—Ga.)

HC1GQ on 9163 kcs. at Quito is on the air daily between 8:30 and 11 p.m. (Williams—R552, N.J.)

HC2CW on 9125 kcs. now, having recently made another change in frequency. (Williams, N.J.)

Ethiopia

IABA on 9650 kcs. at Addis Ababa is heard Sundays between 3:30 and 3:55 a.m. (Williams—R552, N.J.)

France

TPA-3 on 11885 kcs. heard at 4:30 p.m. with a good signal from R7-8. (Nahas—N.Y.)

TPA-4 on 11720 kcs. heard at 6:30 p.m. with R7 Signal (Nahas—N.Y.)

TPB-7 on 11885 kcs. and TPB-6 on 11718 kcs., come on the air simultaneously with the North American program at 8:30 p.m. TPB-7 is the better of the two. (Skyten—R786, Mass.; Grant—R1159, Tex.)

Germany

DZH on 14460 kcs. heard at 12:43 p.m. playing band music, and at 1 p.m. relaying a program to "Radio Uruguay" of Montevideo. Also heard with program in Spanish from 7:45-8:20 p.m. nightly. (Skyten—R786, Mass.; and Callan—R987, Mass.)

Great Britain

GRX on 9690 kcs. is the newest of the BBC transmitters—X is for Extra. (Callan—R987, Mass.)

GRY on 9600 kcs. (Y for York) is being used along with GRX on the latter part of transmission four from Daventry. The latter station is used for European transmission. (Stratton—R718, Bahama Island; and Oskay, N.J.)

GSO on 15180 kcs. is on in the evenings now. They landed right underneath the 100 kw. RV96 in Mos-

cow and reception of both is ruined. (Callan—R987, Mass.)

Guadeloupe

FG8AH on 7435 kcs. is the correct call and frequency of the station known as "Radio Guadeloupe." Announcement is made in English at intervals and at close of programs. Schedule is nightly from 6-7:30 p.m. It is heard in the east with good signal, and is a cinch for a new country for the log. The station verifies with a card showing a globe in blue and red. The address: Andre Haan, P. O. Box 125, Pointe-a-Pitre, Guadeloupe, French W. Indies. (Kennally, N.Y.; and Harris—Mass.)

Guatemala

TGX-1 on 6132 kcs. at Guatemala City is heard here at 5:35 a.m. on Sunday. The station also has a special DX program late Saturday night until after 1 a.m. Sunday. (Williams—R552, N.J.; Oskay—N.J.)

TGWA, TGW, TGWB, and TGWC are all broadcasting a listeners program every Monday, Tuesday, Thursday and Saturday from 10-11:30 p.m. They read listeners' letters and play request numbers on the marimba. (Jewell—R834, Ala.)

Haiti

HH2S on 6000 kcs. at Port-au-Prince verified by letter stating that they broadcast every Wednesday at 8:30 p.m. "The Jamaica Magazine" in English. A prize of \$10 is awarded to listeners for letters to the station on the program. (Bacon—R119, B.C.2)

Iraq

HMF on 9690 kcs. Qasr-El-Lahoor Broadcast Station, Bagdad, heard on new frequency after 3 p.m. (Williams—R552, N.J.)

Ireland

"Irish S.W. Station" on 17840 kcs. and 9595 kcs., is often heard with excellent signals especially on 17840 kcs. Schedule is 7:30-9 a.m. on 17 megacycles and 11:30 a.m. to anytime between 4 and 6 on alternate fre-

quencies. (Callan—R987, Mass.; Williams—R552, N.J.)

Irish Shortwave Station on 6810 kcs. heard between 7-8 p.m. Station was not definitely identified, but Ireland was mentioned frequently during the program which was in English. The announcer spoke with a distinctive Irish accent. This may help others who may hear this station. (Jollin—R1018, Mass.)

India

VUD-4 on 15290 kcs. "All India Radio" heard at 9 p.m. broadcasting Oriental music. (Skyten—R786, Mass.)

Italy

IQA on 14795 kcs. is heard mornings at 4:50 a.m. (Oskay—N.J.)

IQY on 11670 kcs., and I2RO-9 on 9670 kcs. also carry the American Hour, though they announce only 2RO-3-4-6 and IRF! (Callan—R987, Mass.)

IRF on 9835 kcs. can be heard in the afternoons working Cairo with a good signal. (Williams—R552, N.J.)

Complete schedule of Rome Shortwave Stations is as follows:

I2RO-3 on 9630 kcs., I2RO-4 on 11810 kcs., and I2RO-6 on 15300 kcs. operate from 6 p.m. to 7:35 p.m. for South America and from 7:30 p.m. to 9 p.m. for North America.

I2RO-6 on 15300 kcs., and I2RO-9 on 9670 kcs. operate from 3-6 p.m. with a program relayed from standard broadcast stations at Rome.

I2RO-8 on 17820 kcs., operates from 5-8:45 p.m. for the Far East and Italian people abroad. (RX)

Japan

JLT-2 on 9645 kcs., and JLG-3 on 11705 kcs. operate for the eastern districts of North America daily from 8-8:30 p.m. (Gardner—Ohio)

JZJ verified with a card showing a Japanese pagoda and cherry blossoms in the lower left hand corner while in the upper right is a picture of the new Government Building at Tokyo. (Deterly—R622, La.3)

JZK on 15160 kcs. heard on the

morning program from 7-7:30 a.m. Programs usually consist of recordings and news in Japanese. (Williams—R552, N.J.; Skyten—R786, Mass.)

New address for Tokyo stations is: 2-Chome, Uchisaiwaicho, Kojimachiku, Tokyo, Japan. (RX)

Lithuania

LYZ-4 on 15130 kcs. has been heard Sunday afternoons after the sign off of W1XAL at 1 p.m. (Williams—R552, N.J.)

Martinique

Radio Martinique on at 8 p.m. broadcasting classical music with identification at 8:05 p.m. Program for Canadian DXers. English identification always at sign off time. Station requires an IRC for verification card. (Blanchard—R485, N.Y.)

Mexico

XEWQ on 6080 kcs. is the correct call of the station relaying the programs of XEQ. (Daneker—R1122, Pa.)

XEXA on 6132 kcs. at Mexico City verified a report with two very attractive booklets on Mexico. The verification was signed by the mayor. (Daneker—R1122, Pa.)

XEYU on 9600 kcs. in Mexico City is heard regularly between 9-11 p.m. (Williams—R552, N.J.)

Mozambique

CR7AA on 6137 kcs., CR7AB on 3490 kcs., CR7BD on 15240 kcs., and CR7BH on 11718 kcs., operate daily from midnight to 1 a.m., 4:30-6:30 a.m., 9:30-11 a.m. and noon to 2 p.m. Sunday programs from 5-7 a.m. and 10 a.m. to 2 p.m. Address is Box 594, Radio Club de Mocambique, Lourenzo Marques, Mozambique. (Jacobs—R519, Ohio).

Netherlands

PCJ (Peace, Cheer, Joy) on 9590 kcs., comes in with a good signal on Tuesday and Friday nights at 9:45 p.m. till about 10:15 p.m. The program is entirely in English. They have a program of outdoor life before they close down; that is, the an-

nouncer, Edward Startz, carries the microphone to the window of the studio, where the cries of the birds and the frogs are heard very clearly. (Long—Ga.; Hankins—R7, Pa.1; and Skyten—R786, Mass.)

Newfoundland

VONG on 5980 kcs. at St. Johns is the new experimental shortwave station up here in the North country operating from 8:30 a.m. to 12:30 p.m. and from 4:30 p.m. to 9:30 p.m. (Quinton—R1142, Nfld.)

Nicaragua

YN3DG on 13900 kcs. at Leon, Nicaragua will broadcast announcements in Spatari every Saturday at 10 p.m. Reports on YN3DG will be verified for 10c. (Anna Muzio—N.Y.) YN3DG heard after 10 p.m. on Sunday evenings. (Williams—R552, N.J.)

Norway

LKQ on 11735 kcs. in Lamberster is heard between 11 a.m. and 2 p.m. daily. The old Oslo station on 8025 kcs. is heard experimenting on this frequency and re-broadcasting LLG between 3-6, and 11 p.m. to midnight. (Williams—R552, N.J.)

Paraguay

ZP-14 on 11720 kcs. is heard between 8-9 p.m. with a fair signal. (Williams—R552, N.J.)

Peru

OAX4T on 9560 kcs. in Lima is heard daily between 7-8 a.m. (Williams—R552, N.J.)

Philippine Islands

KZIB on 9490 kcs. at P. O. Box 440, Manila is heard with a fairly strong signal. (Williams—R552, N.J.)

Poland

SPD, SP25, SP19 relay the 6-9 p.m. program for North America. SPW is now off the air due to transmitter troubles. (Callan—R987, Mass.)

Portugal

CSW-5 on 11040 kcs. can be heard during the a.m. on Sunday. (Williams—R552, N.J.)

Romania

"Radio Bucharest" on 15410 kcs.

heard with news in Romanian at 10 p.m. They broadcast from 9-10:15 p.m. They begin with National Anthem by a chorus. No English announcements have been heard. The station uses 50000 watts. (Olthoff, Kans.)

Spain

With the end of the Civil War, several stations (mostly loyalist stations) have shut down and no longer can they be heard. Among those which have been discontinued are the following former loyalist stations:

Radio A. Z., Radio Valencia, Radio Norte EA-4R, Radio Espana, EAR, Valencia (6880 kcs.), EA2BH.

Radio Nacional in Madrid is a new station operating on 7310 kcs. with an irregular schedule.

FET-8 in Spanish Morocco is a new station operating on 7260 kcs. Schedule is from 5-7 p.m.

EA9BJ on 7100 kcs. "Radio ?" in Spanish Morocco recently identified, though they were heard many times previously but never discerned.

EA9ME on 7135 kcs. in Spanish Morocco is another old timer not identified until recently. Schedule is from 4-4:15 p.m.

EA8AE on 7150 kcs. at Las Palmas, Canary Islands is another newly identified station and operates from 4-5:15 p.m.

EA8AS on 7270 kcs. at Teneriffe now relaying EAJ43 Wednesdays from 4-5 p.m. (All the above by Jollin—R1018, Mass.)

EAQ on 9850 kcs. at Madrid heard with R7-8 signal. The Madrid station is heard nightly after 7 p.m. They operate till 7:30 p.m. at which time their carrier is silent for 15 minutes. At 7:45 a bugle and drum march is heard and three gongs sounded, after which the announcer speaks English: "Hello North America, Hello United States, Hello Canada. This is Radio Station EAQ, Madrid with its special broadcast for North America in English." The station uses both male and female

announcers. (Long—Ga.; Skyten—R786, Mass.; Williams—R552, N.J.; Oskay—N.J.; Callan—R987, Mass.)

Straits Settlements

ZHP on 9690 kcs., Singapore, verified by a very beautiful card showing a black, and orange tropical sunset with large black letters BMBC. Verified in two months. (Jewell—R834, Ala.)

Switzerland

Swarzenburg on 9535 kcs., broadcasts for North America between 8-9 p.m. This station does not sign any call letters. (Williams—R552, N.J.)

Swarzenburg on 11867 kcs. heard on first program to North America (partly in English) on a Wednesday from 7-8:30 p.m. They are heard every Wednesday at this hour. (Callan—Mass.)

HBO on 11402 kcs. heard on Sunday evening at 7 p.m. with talk on on labor. They identified themselves with some kind of bells for about three minutes before 7 p.m. The program lasted twenty minutes before signing off. (Long—Ga.)

Thailand

Siam is now officially known as Thailand (pronounced tie-land) and all mail to that country should be addressed as such.

Turkey

"Radio Ankara" announced that they would inaugurate a program of information and news about Turkey, commencing on May 6, following the mail bag program around 3:30 p.m.—to be heard Saturdays. (Skyten—R786, Mass.)

Union of South Africa

ZRL on 9606 kcs. at Capetown is now heard signing on the air at 11:45 p.m. with a much weaker signal than heretofore. (Olthoff, Kansas)

U.S.A.

W2XE on 17830 kcs. is now on the following schedule: 6:30 a.m. to 9 a.m. and noon to 5 p.m. daily. Sunday from 7-11 a.m., 11:30 a.m. to 5 p.m. (For Europe)

On 15270 kcs. from 5:30-7:30 p.m. daily. (For South America)

On 11830 kcs. from 8-10:30 p.m. (For South America)

On 6170 kcs. from 11 p.m. to midnight (For South America)

W3XAU latest schedule:

21520 kcs.: 12:30 p.m. to 1:30 p.m.

15270 kcs.: 10:45-11:45 a.m., 2-6 p.m.

6060 kcs.: 6:30-10 p.m. and 11 p.m. to midnight.

W3XAL on 9670 kcs., in Bound-Brook, N. J. is now putting a more powerful signal into Argentina than any other North American station on that band. This is due to the new directional antenna recently put into use by the station. A similar antenna is being made ready for 21630 kcs. for daytime broadcasting to South America. (RX)

W4XB on 6040 kcs. at Miami send a different card from that illustrated in April RADEX. Miami's skyline in the background as seen under palm leaves in the foreground. Card is black and gray. (Flynn—R937, Sask.)

W6XBE on 9530 kcs. is on the air daily from 3-9 a.m. on this channel. (Sawado—R592, Calif.)

W6XBE on 15330 kcs. heard from 5-8 a.m. and 4:30-8 p.m. daily. They have no card yet. (Kerr—Alberta.)

U.S.S.R.

RAN on 15040 kcs. heard at 7:35 p.m. in parallel with RW96 on 15180 kcs., and RAL on 9600 kcs. (Oskey—N.J.)

RV96 on 15160 kcs. heard at 7:30 p.m. but they were very weak. However, at the same time the program was heard on two other frequencies, evidently working in parallel. Both of these, 15000 kcs., and 15190 kcs., were R9. Frequencies are not exact as they were not checked on a well calibrated receiver. (Hankins—R7, Pa.1)

Moscow on 9520 kcs. is heard with program in English at 5 p.m. on Saturday only simultaneously with RNE and RV-59. (Skyten—R786, Mass.)

Two new Russians are still coming

in strong. The one on 9520 kcs. relays Radio Center from 2:15-6 p.m. irregularly. The other, by far the stronger, is on about 9380 kcs. and broadcasts at the time of this writing from 5-5:45 p.m. These two stations combined with RNE, RAN, either RFN or RV59 on 6030 kcs., RKI, and RV96, can all be heard around 5:30 and 6 p.m. daily. (Jollin—R1018, Mass.)

Venezuela

YVA on 5225 kcs. at Caracas can be heard during the early evening playing phonograph records. (Williams—R552, N.J.; and Oskey—N.J.)

YV3GG on 13990 kcs. seems to be a new Venezuelan heard on an announced schedule of Saturday from 10-10:30 p.m. with both English and Spanish announcements. (Scott—R626, Tenn.3)

YV4RO on 4950 kcs. at Valencia heard at 7:58 p.m. announcing as "La Voz de Carabobo." (Olthoff—Kans.)

YV5RM on 5010 kcs. at Caracas heard at 9:52 p.m. with violin music. They relay YV5RV and use 10000 watts. (Olthoff—Kans.)

Yugoslavia

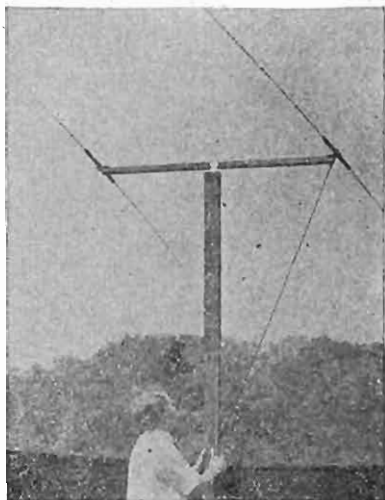

YUA on 6100 kcs. can be heard coming on the air at 12:43 a.m. Programs begin with the National Anthem. (Williams—R552, N.J.)

NEWS OF WHAT'S NEW

A television antenna (illustrated) with universal joint mounting, permitting adjustments in all directions, is now offered by Technical Appliance Corp., 17 E. 16th St., New York City. This di-pole antenna is constructed of heavy duraluminum rods held together with a center insulator. Precision adjustments are possible in both the horizontal and vertical planes, simply by loosening a nut and then tightening it. A reflector is also available wherever needed.

Hallicrafters' most recent model, known as the Skyrider "Defiant," (illustrated), tunes from 540 to 43500 kilocycles, in four bands. The frequencies covered by each band are as follows: Band 1, 540-1730 kcs. Band 2, 1700-5100 kcs. Band 3, 5000-15700 kcs. Band 4, 15200-43500 kcs. Thus, every band overlaps, and no "in-between" stations are lost. Nine tubes are used; the controls include an R.F. Gain Control, the band switch, a selectivity-A.V.C. switch, a crystal phasing control, band spread, an automatic noise limiter, a pitch control, and "send-receive," "Phone-Xtal," and a Phone Jack into which may be plug-

ged any type of high impedance fones, crystal or magnetic.

This model, known as the SX24, operates on 10-125 volts 50-60 cycles, drawing 70 watts at 115 volts. A universal model for 25-60 cycle operation is also available. The antenna input circuit allows the use of either a doublet or inverted L antenna.

The band spread dial of the SX24 is calibrated so that the operator may determine quite closely the frequency of signals on the 10 to 80 meter amateur bands. The outer edge of the dial is marked off in 100 divisions for additional ease in logging.

A television receiver offering seven television bands has been announced by Stewart-Warner. Their Television and Radio Combination, Model T-1210, is a 26-tube console, with 17 high frequency tuned circuits in the television unit, and 8 tuned circuits in the superheterodyne circuit. Among its many features are Magic Keyboard Automatic Tuning for television and broadcast reception, a four-position tone control, automatic volume control, a built-in wave trap, and brightness, contrast and definition controls for maximum image detail. This beautiful receiver is illustrated in this issue of RADEX.

The most ambitious and comprehensive merchandising program in General Electric's radio history was launched in Bridgeport, Connecticut. With television pushed dramatically into the spotlight, and with highly important developments under way in the new frequency-modulation sys-

tem of static-free radio, G-E's new radio and television department began what appears to be the most important year in the radio industry.

In the new G-E line there are 12 table models, 4 consoles, and 3 combinations. A new wired record player unit, a new wireless record player, four battery-type "carryabout" sets, a battery table model, and an auto radio complete the array of sets.

A super "beam-a-scope" has been extended to most of the new sets, eliminating aerial and ground connections and reducing local static. Other features include "feathertouch" tuning, a three-dimension "visualux" dial and an improved tone monitor circuit and tone selector. The receivers also have drift-proof station setting and IF transformer adjustment which eliminates creeping or drifting caused by changes in temperature or humidity.

Three television receiving antennas have been announced for sale to television amateurs and experimenters by RCA. Each of the three antennas is designed to bring in television signals with maximum efficiency under different conditions of reception. Following are descriptions of the aeri-als:

Double Di-Pole, the finest antenna where reflection or distortion are not problems. It provides reception on five channels, 44-50, 50-56, 66-72, 78-84 and 84-90 megacycles, giving fine signal strength and noise reduction. The list price is \$7.50.

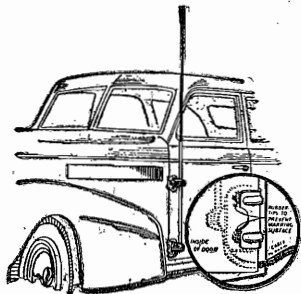

Double Di-Pole with Reflector. This system consists of the previously mentioned antenna, plus a double di-pole reflector. It is used in locations where television signals travel two paths in arriving at the receiver as a result of reflection, thus causing double images and blurring. It gives improved reception from one direction, with rejection of signals from the opposite direction in the ratio of three to one on the 44-50 and 50-56 meg. bands. The list price of the reflector is \$13.50.

The third of the antennas is the Double "V" wire television antenna, designed for installation where signals are good and reflection problems are not encountered. Packed completely assembled, it needs only supports at the ends for installation. This antenna receives on the 44-50 and 50-56 meg. bands. By changing the length of the wires, reception on other channels may be obtained. Ninety feet of transmission line is included with the antenna. The list price is \$4.00.

To assist amateur television enthusiasts and experimenters in furthering television development, RCA has made available a number of parts used in deflecting circuits in receivers employing RCA Kinescopes. Mounting interest in television among amateurs has brought many requests that the parts be placed on the market.

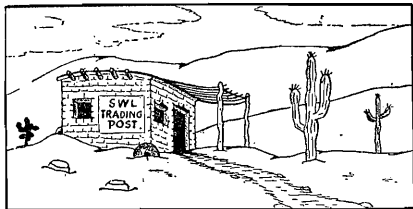

Power transformers, and vertical and horizontal oscillation (feedback) transformers have been made available for use with either the 5-inch, the 9-inch or the 12-inch Kinescope.

Typical deflection and power supply circuit diagrams for all three tube sizes are available from RCA parts distributors, through whom the parts may be obtained.

The outstanding feature of the new ICA Auto Antenna is the fact that it requires no drilling of holes and that they fit all cars. They carry a life lifetime guarantee against rusting as they are made of brass tube, triple chromium plated, and stainless steel rod. A screw-driver is all that is needed to install the aerial. An 8-page illustrated catalog may be had by writing direct to Insuline Corp., 25 Park Place, New York City.

Printed in blue and gold, this card from W6USA is very attractive. The station is located at the Golden Gate International Exposition in San Francisco. (Courtesy of Weston Richards).

NEW BRITISH STATIONS

Two new stations have appeared in Great Britain, known respectively as Start Point and Clevedon. The first of these replaces the West of England Regional at Washford, and the second replaces the Bournemouth and Plymouth stations. Start Point and Clevedon were inaugurated on June 14.

Start Point is located on the coast of South Devon, about a mile from Start Point Lighthouse. The station will serve southern Cornwall, Dorset, the southern parts of Devon, Somerset, Hampshire and Wiltshire, and part of the south coast. The population of this area is roughly 2,000,000. The building, on a 21-acre site, is similar in design to the other high powered BBC stations, but one innovation is a revolving door in the main entrance to avoid the difficulty of handling swinging doors in the face of an Atlantic gale. The aerial consists of two 450 foot towers, 350 feet apart.

Start Point transmits on 1050 kcs. with 100 kilowatts power.

Replacing Bournemouth and Plymouth, the new Clevedon station is now broadcasting on 1474 kcs. with 20 kilowatts. A vertical radiator is used at Clevedon, being 375 feet in height.

HAM HOUNDING . . .

● ● ● By HUGH HUNTEM
(Owen Callin).

PRINCE EDWARD ISLAND, that small but delightful province of Canada, is becoming increasingly known on the amateur band through the operation of three well-known stations there.

VE1HI (One Happy Indian), a brass pounder since 1907, but on 20 meter phone since January of this year, is making his province very well known to those who listen in on 20, through his descriptions of the attractions, resources and industries of the Island. The station is owned by Keith S. Rogers, 84 Hillsboro St., Charlottetown.

VE1BZ, also in Charlottetown, is very well known among amateurs in the United States, the British Isles and the British West Indies, where the operator and his XYL both have many friends and acquaintances. 1BZ's address is Box 249.

Ten years a DXer, five years an amateur, is the boast of Anthony Arsenault, VE1FR, Box 444, Summerside. He tells us that he is working now on 3660 kcs., and that he will QSL 100%.

The Fair Station

The amateur radio exhibit at the San Francisco Fair is probably the busiest ham station in the world these days. Since the Exposition opened, 25 zones on phone and 25 on CW have been worked; 60 countries on phone and 65 on CW. These include a total of 4000 contacts. In addition to these contacts, about 25 reports a day are received from SWL's, all of which are answered. The staff operators at W6USA are Bob Hanson, W6MPC, and John Woerner, W6ONQ.

If you like RADEX why not tell your friends? When an article in this magazine strikes you as being unusually good, please tell your friends to get a copy at the newsstand, and read it.

William Wagner of K7AZS in Anchorage, Alaska, sent us some very interesting information about this northern territory. Anchorage is on Cook's Inlet, Bill tells us, but the tides are so great and the harbor so poor that this city is not considered a seaport, being almost entirely served by the Alaska Railroad, operating from Seward to Fairbanks. The climate there is not bad. Although the temperature occasionally gets down to 30 or 40 degrees below zero in the winter, the summer is nice. There is plenty of hunting and fishing, and there are several hundred miles of good gravel roads, kept open throughout the winter. The population of Anchorage is about 2500. Most of the homes are modern, with heating plants, electricity, city water, telephone and sewers. There is a first class talkie theater, good schools, modern stores and business houses. Bill is chief engineer at KFQD, the farthest north broadcasting station in North America.

Ham Notes by Readers

Weston Richards of Winthrop Harbor, Ill. received a verification from CT2BP in about a month's time. It was a QSL card and a travel folder about the Azores. His address is Florencio Terra, Jr., Horta-Fayal Airport, Horta-Fayal, Azores. Travel folders from Southern Australia were received along with a QSL card from VK5RN in Mount Lofty, South Australia. A veri was received from VP6YB in three weeks, and one from HP1A in twelve days. One of the most famous of all amateur cards, from K6OJI, pictures an Hawaiian girl. SWL's should send a dime when requesting OJI's card. According to the Irish QSL Manager, E1IA is an outlaw station.

Harold Satterthwaite of Los Angeles tells us that Chinese XU8RB has a very unique QSL card, one

Motor truck trailer and two supply trucks which, together with a sedan, will be used in the Thaw Asiatic Expedition. All are equipped with General Electric communication-type radio transmitters and receivers.

worth having. Reports to XU8RB should be sent direct, to R. J. Broadley, House 6, Lane 159, Seymour Road, Shanghai.

The Cleveland Radio Club, through its capable publicity director, Jack Gardner, has arranged for special transmissions from Latvian amateur YL2CD. On September 10, 17 and 24, YL2CD will transmit on 14040 kcs. during the first ten minutes of the day, from 12:00 to 12:10 am, EST. In November, on the 12th and the 19th, he will transmit on 28080 kcs. from 10 until 10:10 am, EST. YL2CD is owned by A. Vitolius, Miera-iela 52-5, Riga, Latvia.

The Trans-Asian Expedition

The four mobile units in the Lawrence Thaw trans-Asiatic Expedition will be able to maintain contact with

Radio Amateur Call Book

LATEST EDITION

Lists over 40,000 amateurs in every country in the world, and complete lists of all the high frequency commercial stations. Every listener interested in amateur stations should have one. 292 pages.

We pay the postage.

RADEX
362 Cedar Lane,
TEANECK, N. J.

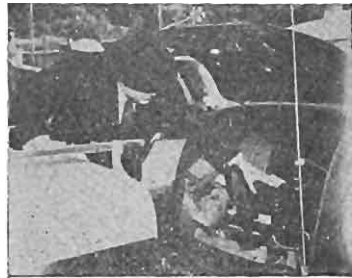

\$1.25

each other even when separated by distances as great as 200 miles, it was found in making final tests of the equipment as the caravan headed east from Detroit.

The radio equipment for this expedition, designed and built by General Electric, will permit short distance transmission and reception between each of the two trucks, the trailer and the cruiser sedan, by the use of ultra-high frequency transmitters and communication-type receivers. The system is similar to that used in two-way police radio.

Two medium-wave transmitters and receivers have also been installed in the sedan and trailer. This equipment is powered by standard car batteries. Antennas for the UHF sets, those that will be used while the cars are in transit, are of the one-quarter wave fishpole type, while a 128-foot strand of wire strung from the transmitter to a collapsible 30-foot pole will act as antenna for each of the two medium frequently stations.

Lawrence Thaw inspecting the transmitter in one of the automobiles he will use in crossing Asia.

The expedition left New York on June 21 aboard the "President Roosevelt," and will go to Paris, where the 14,000 mile tour will begin. The trip will include Budapest, Istanbul, Damascus, Baghdad, Herat, the Khyber Pass, Delhi, Calcutta, and finally, Bombay, which will be reached sometime in the spring of 1940.

The deluxe trailer might well be called a travelling hotel for all its refinements and appointments. Air conditioned throughout, it includes a tiled bath, indirect lighting, a lounge, sleeping compartments with mattresses of sponge rubber, a vacuum cleaner, washer, ironer, toaster, and many other electrical devices.

Mrs. Thaw, a veteran traveler, will accompany her husband on this trip, as well as a photographer and an engineer.

The radio stations, according to the FCC, are licensed to the Trans-Asia, Inc., call letters W10XJP, XJQ, XJR and XJS. Using 15 watts, the frequencies will be 3492.5 and 31140 kilocycles.

Amateur Calls Heard

The names and addresses of persons reporting stations shown in this list are indicated by small letters following the call signs. Key to the small letters is given at the end of the column. On 20 meters, only calls heard by more than one person are listed.

DXer's Picture Gallery

JOHN DE ROSA

"Strictly a sw DXer," John styles himself. He has all continents verified, but considers his card from JDY as his best catch. He does most of his listening on 20 meters, using a Howard 450-A communications receiver with a 20-meter vertical antenna. He is an ardent SWL card and photo exchanger, possessing over a thousand cards from SWL's in all 48 states and about 40 countries. He also swaps sback photos. He is Vice-President and a member of the Board of Directors of the NRC, and a member of the Brooklyn Chapter of The Radex Club.

SANFORD MORRIS

This Metuchen, N. J. DXer has been tuning since 1927, listening to the shortwaves as well as the broadcast band. On the broadcast band he has heard 753 stations, of which 167

are verified, and on the shortwaves his log totals 2180 stations (amateurs, police, commercials, etc.). He is using a Philco 16X at the present time. His clubs are The Radex Club (R86) and the NNRC.

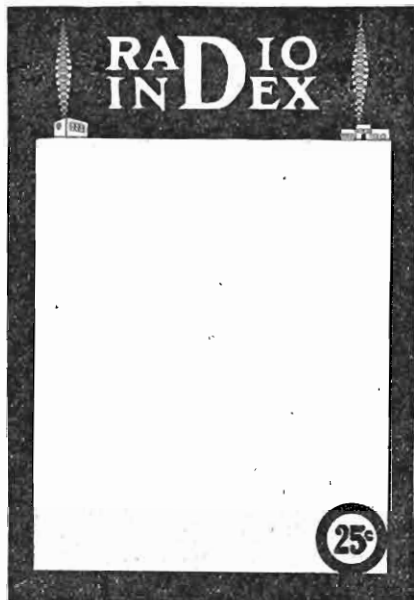

Mac
Elwyn
Van

The KSL programs for DXers are prepared and announced by this listener and member of The Radex Club. He has been DXing for two years.

Sergio Gonzales L. of Cardenas, Cuba.

ACROSS THE EDITOR'S DESK

A NEW COVER NEXT MONTH

NEXT month you will find your copy of RADEX in a new dress. The familiar Radio Index indicia will be flanked by radio towers, and the cover girl will be gone, to make room for the table of contents. The new cover is illustrated on this page.

With the contents on the cover, we shall have an extra page in the magazine for reading matter. Revision of our North American indices by locations and by call letters makes it possible to put both these lists in the space formerly occupied only by the call letter list. Thus ten extra pages have been gained, providing room for a column specially written for our west coast readers, and for a complete listing of the world's radio stations from 500 kcs. to 500,000 kcs., which will run in serial form, commencing with this issue. We plan to devote at least six pages to this list each month.

MOST important news of the month is the appointment of Anthony C. Tarr, well-known Seattle DXer, as our West Coast Editor. Appointment of Mr. Tarr to this post fills a long-felt need for representation in RADEX of our many western readers. With three thousand miles separating our two coasts, reception on the west coast is naturally vastly different from east coast reception, and can be most adequately described only by a writer living there. Mr. Tarr is one of the country's most successful tuners, having had remarkable success on both the broadcast band and shortwave bands, and is a radio writer with wide experience. Mr. Tarr's columns, the first of which appears in this issue, will cover the activities of listeners in the Mountain and Pacific Standard Time zones.

PRIZES

A three-year subscription to RADEX and a Verti-Flex aerial will be given to the person who writes the best short article for RADEX on the topic

FISHING WITH YOUR RADIO

Fishing for fish and fishing for DX are so nearly similar that our fisherman-readers should find it easy to write an article on this subject. Whether one's activities are piscatorial or radio, one seldom knows what he is going to get until he gets it, and, having gotten it, his friends seldom believe him unless he has proof, in the form of a fish or a verification.

Sale of KEHE

Official word has finally been received that the long-awaited sale of KEHE (Los Angeles) to Earle C. Anthony Inc. has been approved by the FCC. The application for transfer of ownership of the station was filed on April 7, 1938. The Anthony Corporation will continue to operate the station under its call letters

KEHE, and the Anthony offices will be moved to 141 North Vermont Ave.

Possession of KEHE gives the Anthony Corporation three stations in Los Angeles. One of their stations, however, KECA, was sold on April 12, 1938, to Warren B. Worcester, of San Diego, and we believe that now, with the approval of the sale of KEHE, that the KECA sale will also be approved, and this station moved to San Diego.

Special Programs

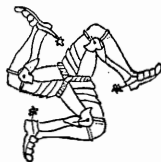

Jack Gardner of Cleveland, Ohio, advises us that the Turkish shortwave station TAP broadcast a program on July 29 which was dedicated to the readers of this magazine and three of the nation's leading radio clubs. This same reader also advises that a program from HCJB, Quito, Ecuador, was broadcast for several radio clubs on July 25, on the new frequency of 12460 kcs.

Professor Carlo Spatari, the founder of the Spatari Language Foundation, has arranged for a special broadcast from TG2, Guatemala City, to be dedicated to RADEX on Sunday morning, October 29, from 1 to 2 am, EST. A letter from Col. Eduardo Perez F. of TG2 concerning this program states that TG1 on 1310 kcs., and TG2 on 6190 kcs. will both be used. All listeners are urged to report on these programs. Return postage will not be necessary for verifications, as their cards are sent out "absolutely free." The new card used by this station is printed in the Spatari International Language. They are very attractive, in three colors with a superimposed view of a Guatemalan highway. Reports to TG2 should be addressed to Col. Perez, Director General of Communications for the Republic of Guatemala.

Prof. Spatari has also made tentative arrangements for a special program from YN3D on October 15. Full details on this program will be published as soon as available.

When writing for verifications, radio fans should always send return postage, unless specifically requested not to do so. Return postage to foreign countries can be sent in the form of International Reply Coupons, available at any post office for nine cents each. In some countries, however, Reply Coupons are not honored (Costa Rica, Dominican Republic, Germany, U.S.S.R. and Italy) so the Return Postage Bureau has been formed for the purpose of supplying DX fans with unused postage stamps from most of the countries of the world. These stamps are cheaper than Reply Coupons. Readers who wish to avail themselves of the opportunity of obtaining unused stamps, always acceptable in the country of their origin, at reasonable prices, should write to the Return Postage Bureau, 85 Francisco Ave., Rutherford, N. J. for their latest price list.

*Some
New
Stations*

The first information we have had on the construction of a new radio station comes from Fred T. Corrin of Bisbee, Ariz., and along with the information comes a unique offer of a unique prize.

Mr. Corrin reports that construction is well along, of a station at Creg-na-Baa, near Douglas, Isle of Man. According to the Isle of Man "Times", this station will employ three frequencies, at the present time unknown.

Readers of this magazine will find it worth-while to keep a sharp look-out for this station, because Mr. Corrin has offered to donate a pair of Arizona brass plaques to the first DXer who reports reception of this station. The plaques will bear the Manx coat of arms, the "Legs of Man." Reports

should be sent to RADEX and we will give Mr. Corrin the name of the first reporter.

The new Canadian Prairie Station, CBK, was opened on July 29, with ceremonies heard over the National Network from 10 to 10:30 pm, EDST. The ceremonies at Watrous were under the direction of John Kannawin, Master of Ceremonies, and others participating were the Hon. C. D. Howe, Federal Minister of Transport, Leonard W. Brockington, K. C., who spoke from London, England, and William S. Paley, president of the Columbia Broadcasting System, who spoke from New York. The Premiers of the three prairie provinces also took part—Hon. W. J. Patterson for Saskatchewan, Hon. John Bracken for Manitoba and Hon. William Aberhart for Alberta.

CBK transmits on 540 kcs. with 50 kilowatts power. The final letter "K" of the call sign commemorates Henry Kelsey, doughty explorer and fur trader, who fought the great d'Iberville for the mastery of Hudson's Bay toward the close of the XVIIth Century. Kelsey was the first white man to see the Prairies.

The Department of Transport advises that a new Canadian station is CKLN, owned by F. F. Payne of Nelson, B. C. The frequency is 1420 kcs., and the power, 100 watts.

Two more countries have sent official lists of their radio stations, both of them coming a little too late to incorporate in our regular indices.

The Ministerio del Trabajo y de Comunicaciones of the United States of Venezuela (S. Alegrett, Director) advises us, as of July 15, that the following stations are in use in Venezuela:

Shortwaves

- YV1RJ—"Radio Falcon," Coro, 4975 kcs.
- YV1RL—"Radio Popular," Maracaibo, 4860 kcs.
- YV1RO—"Radio Trujillo," Trujillo, 4780 kcs.
- YV1RU—"Radiodifusora Maracaibo," Maracaibo, 4810 kcs.
- YV1RV—"Ecos del Zulia," Maracaibo, 4800 kcs.
- YV1RX—"Ondas del Lago," Maracaibo, 4890 kcs.
- YV1RY—"Radio Coro," Coro, 4910 kcs.
- YV1RZ—"Radio Valera," Trujillo, 4850 kcs.
- YV2RN—"La Voz del Tachira," San Cristobal, 4870 kcs.
- YV3RN—"Radio Barquisimeto," Barquisimeto, 4820 kcs.
- YV3RX—"La Voz de Lara," Barquisimeto, 4990 kcs.
- YV4RO—"La Voz de Carabobo," Valencia, 4950 kcs.
- YV4RP—"Radio Valencia," Valencia, 4930 kcs.
- YV4RQ—"Radio Puerto Cabello," Pto. Cabello, 5020 kcs.
- YV4RX—"Radio Maracay," Maracay, 4840 kcs.
- YV5RH—"Ondas Populares," Caracas, 4830 kcs.
- YV5RK—Caracas, 5000 kcs.
- YV5RM—"Radiodifusora Venezuela," Caracas, 5010 kcs.
- YV5RN—"Radio Caracas," Caracas, 5040 kcs.
- YV5RO—"La Voz de Venezuela," Caracas, 4940 kcs.
- YV5RS—"Radio Libertador," Caracas, 4960 kcs.
- YV5RT—Caracas, 4980 kcs.
- YV5RU—"Estudios Universo," Caracas, 4920 kcs.
- YV5RY—"La Voz de la Esfera," Caracas, 4790 kcs.
- YV6RT—"Radio Bolívar," Ciudad Bolívar, 4900 kcs.
- YV6RU—"Ecos del Orinoco," Cdad. Bolívar, 4880 kcs.
- YV3RF—"La Voz del Llano," Acarigua, 3480 kcs.
- YV5RV—"Emisora Vargas," La Guaira, 3500 kcs.
- YV5RW—"Radio Turmerito," Caracas, 3400 kcs.
- YV6RC—Barcelona, 3450 kcs.

YV1RT—"La Voz de la Fe," Maracaibo, 4770 kcs.		The Government Radio Inspector of Costa Rica, Sr. Luis H. Andres, sends us a list, correct as of June 16, of the Costa Rican stations. This list follows:
Broadcast Band		
YV1RA—"Ecos del Zulia," Maracaibo, 1500 kcs.		575 TI5CV—"Ecos del Poas," Alajuela.
YV1RC—"La Voz de la Fe," Maracaibo, 1400 kcs.		605 TIGPH—"Alma Tica," San Jose.
YV1RD—"Radiodifusora Maracaibo," Maracaibo, 1153 kcs.		625 TIPG—"La Voz de La Victor," San Jose.
YV1RF—"Ondas del Lago," Maracaibo, 1120 kcs.		650 TIGPH—Under Construction.
YV1RK—"Radio Popular," Maracaibo, 1250 kcs.		690 TIGH—"America Latina," San Jose.
YV2RB—"La Voz del Tachira," San Cristobal, 980 kcs.		725 TI4NRH—"La Voz del Comercio," Heredia.
YV3RC—"La Voz de Lara," Barquisimeto, 1270 kcs.		750 TING—"Reina del Espacio," San Jose.
YV3RE—"Radio Barquisimeto," Barquisimeto, 1475 kcs.		775 TILJ—"San Jose," San Jose.
YV4RA—"La Voz de Carabobo," Valencia, 1350 kcs.		800 TIXD—"Voz de la Republica," San Jose.
YV4RE—"Radio Valencia," Valencia, 1400 kcs.		830 TIEP—"La Voz del Tropico," San Jose.
YV4RG—"Radio Maracay," Maracay, 1153 kcs.		860 TIEMC—"Radio el Mundo," San Jose.
YV4RI—Valencia, 1450 kcs.		880 TILS—"Para Ti," San Jose.
YV4RL—Maracay, 1430 kcs.		990 TIAFB—San Jose.
YV5RA—"Radio Caracas," Caracas, 960 kcs.		925 TIRS—"Athenia," San Jose.
YV5RB—"Radiodifusora Venezuela," Caracas, 1200 kcs.		940 TIOS—"Titania," San Jose.
YV5RE—"La Voz de Venezuela," Caracas, 1110 kcs.	1000	TIFA—"La Voz de Italia," San Jose.
YV5RG—"Ondas Populares," Caracas, 1010 kcs.	1030	TISMG—"Radio Costa Rica," San Jose.
YV5RI—"La Voz de la Esfera," Caracas, 1370 kcs.	1070	TINBC—Under Construction.
YV5RL—"Radio Turmerito," El Valle, 1160 kcs.	1200	TIRCC—"Accion Catolica," San Jose.
YV5RQ—"Radio Libertador," Caracas, 882 kcs.	1225	TIGPH2—"Nueva Alma Tica," San Jose.
YV5RR—"Estudios Universo," Caracas, 1330 kcs.	5824	TIGPH—"Alma Tica," San Jose.
YV5RZ—"Emisora Vargas," La Guaira, 1050 kcs.	6035	TI7VM—"La Voz del Guanacasto," Las Juntas.
YV6RA—"Ecos del Orinoco," Ciudad Bolivar, 1400 kcs.	6150	TIEMC—"Radio el Mundo," San Jose.
YV6RD—"Radio Bolivar," Cdad. Bolivar, 1450 kcs.	6165	TILS—"Para Ti," San Jose.
YV6RE—"Ondas del Neveri," Barcelona, 1080 kcs.	6550	TIRCC—"Accion Catolica," San Jose.
YV4RR—"Radio Pto. Cabello," Puerto Cabello, 1490 kcs.	6700	TIEP—"La Voz del Tropico," San Jose.
	9615	TIPG—"La Voz de la Victor," San Jose.
	9622	TI4NRH—"La Voz de Costa Rica," Heredia.

QUESTIONS—ANSWERS

M. G., Evanston, Ill., complains: "My Zenith 6S321 whistles on either of two local Chicago stations. It has always acted this way. Why is it?"

Answer. This high-fidelity receiver has an intermediate frequency of 455 kilocycles. The difference between the two interfering stations is 400 kilocycles, which is very close to the i. f. of your set. Since the receiver is tuned broadly to high-fidelity, the beat note of 400 kilocycles created by the two waves from the local stations is enabled partially to pass through the i. f. transformers. As a result you hear a heterodyne note or whistle interference. Reducing the high fidelity arrangement of the receiver will help, but it will also impair the full tone on all notes. This, of course, is better than the interference. The tuning system must be made more selective, either through the replacement of the i. f. transformers or the addition of a stage of pre-selection. The latter is possible, but perhaps a simple wave-trap will serve to tune out the unwanted station of the pair when the other is being received.

E. B. C., of Silver Spring, Md., asks: "What is wrong with my RCA model 143 when nothing comes from 140 to 190 kilocycles on that band?"

Answer: The long-wave band, especially devoted to aviation and weather broadcasts, is not as sensitive as the shorter waves; however, you should get fairly good response. The contacts on the band switch must be cleaned and tightened, tubes checked, and the long-wave coil examined for defects. If this band remains dead, provided there are stations operating within it, a good serviceman is your answer. He will check the padding condenser and its series condenser on the rear wall of the chassis for shorts or broken connections.

From Seattle, Wash., A. C. T., writes: "A serviceman claims that its impossible to align my Pierson-DeLane set because after the tuning condenser is fully enmeshed it begins coming out again before the end of the dial is reached and movement stopped. Is this so?"

Answer: Of course, tuning condensers should stop entirely when they are fully meshed with the stationary plates. A small stop should be part of the unit for this purpose. However, even if the condenser does move on again a short distance and the frequency increases slightly, this should not interfere with an aligning operation. The serviceman should determine when the condenser is fully tuned and make his frequency adjustments accordingly. But this is a little more work than he may want to perform. Why don't you rearrange the stop to prevent this passage beyond the maximum capacity position or make a little lock? It should be a simple thing for you.

Away up in Newfoundland, M. P., wants to know: "I am building a set to use two-volt tubes. Is it possible to build a power pack so that the set can be operated from a six-volt storage battery?"

Answer: You can not build a power pack for this purpose, unless you first use a vibrator to break the direct current into 60 pulsations a second; then step it up to high "B" voltage with a transformer; filter it smoothly for use on the plates and speaker. We suggest that you use a resistance to reduce the 6 volts to 2 volts, and procure "B" batteries for the rest of the circuit if such is practicable in your region. You can purchase, however, from some of the larger mail order radio houses.

Alexander D. Hart, 309 East Green Street, Gallup, New Mexico, reads Radex.

Forestry Radio In British Columbia

By Robert V. Mauris

THE inauguration of a Forest Radio System for British Columbia, Canada's heavily-timbered western province, dates back to the year 1928, at which time three or four experimental stations were in operation by the Department of Lands, with a view towards coordinating forest intelligence throughout the province. Some idea of the success attendant on early efforts may be gathered with the realization that today, with a network comprising some forty-eight field stations, eight radio-equipped patrol launches and numerous portable transceivers, the British Columbia Forest Service claims virtually complete coverage of all Forest Districts throughout the province.

Departmental field organization being extremely flexible, the use of short-wave radio appears at its best. A number of separate entities known as Ranger Districts are under the general direction of a Supervisor, assisted by Forest Rangers, Assistant Rangers, patrolmen and dispatchers. Radio, used extensively on look-out and patrol duty, has proved of tremendous value in fire-prevention work with the aid of portable transceivers. These light-weight units, combining transmitter and super-heterodyne receiver, average less than twenty-five pounds and have a carrier power of two watts. Their range, normally limited to thirty miles, often exceeds one hundred or more under most favourable atmospheric conditions. Complete with nine tubes, 'phone or c.w., such a transmitter includes a special 144-volt "stick-type" "B" battery and a 3-volt "A" battery, operating from a one-hundred-foot inverted "L" antenna. Permanent or semi-permanent use of such a set requires 180-volts "B" supply with filament voltage from three dry-cells.

Portable BCFS set on top of Mt. Lavina (8000 ft.) near Kaslo, B. C.
With "built-in" speaker for "standby" operation, these units are unusually efficient, and have a conservative rating of six hours continuous transmission, or up to sixty-five hours with long-life batteries.

Directly coordinating the network in the coastal area is the one-hundred-watt installation at Campbell River, which works in conjunction with a twenty-five-watt transmitter at Thurston Bay, site of the launch repair shops. Forestry boats, reporting three times daily, are directed and controlled from these stations.

At this point it is interesting to note that all permanent field sets, while portable from a purely physical standpoint, are classed as "fixed" stations by the licensing authoring. The Radio Division of the Department of Transport, on authorizing Forest Radio, issues licenses to the Department of Lands covering all permanent and portable stations. To the operators of any such stations who are not possessed of a Certificate of Proficiency, the Department grants 'phone privileges if approved by the Minister of Lands. It is seen that by this means, individual operators' licenses are unnecessary for transceiver operation, the responsibility resting on the Forest Branch for proper operation of their stations. All trans-

mitters work at present on "spot" frequencies of 3430, 1630 and 1688 kilocycles, 3430 being popularly favoured for field sets, launches using the wave most suitable to effect consistent schedules in the territory concerned. Certain defined areas in British Columbia are "NG" so far as radio is concerned, as witness that portion of the coast in the vicinity of Seymour Narrows. Conditions here appear so erratic as to make consistent communication somewhat irregular. Much experiment has been necessary to perfect a reliable system for transmission in such localities.

The question of 'phone vs. c.w. arises in Forest Radio as in nearly all branches of radio communication. In British Columbia, radiophone is used almost exclusively for shore-to-ship traffic. However, of a total of eight launches, five use code. The reason for this is partly the difficulty of "getting through" with 'phone under adverse conditions; also because much greater power is necessary for this type of service, and space is at a premium on board a forty-foot launch. Field stations, on the contrary, use 'phone extensively. The look-outs report fires, order supplies, etc. by this means, a receiver being left "open" in times of hazardous condition of the forest cover. Transceivers, especially, are more adapted to 'phone; c.w. is never used with these portables, voice communication being found entirely satisfactory.

Rare indeed is that radio station, which, although licensed and designed for its own particular correspondence, has seldom, if ever, been placed in a position to render a notable public service. Forestry transmitters are no exception to this rule, the British Columbia net having several instances on record of engaging in other than routine communication. On the coast, personal and emergency mes-

sages are occasionally received, delivery being effected without charge. To cite one instance—at Lardeau, in south-eastern British Columbia, a field operator radioed ahead to Kaslo for hospitalization of an elderly rancher badly mangled by a bear. A Forestry launch transported him down Kootenay Lake to a waiting ambulance, the timely aid being credited with saving his life.

While, of course, forecasts of short-wave development seem premature in the face of rapid progress of the art, one may at least say that, in the light of present trends, Forestry Radio in British Columbia is here to stay.

The fixed stations which are licensed to the Honorable the Minister of Lands for British Columbia, are listed below:

Baldy Mountain, CY6S
Campbell River, CJD
Dome Creek, CY7E
Duck Lake, CY7B
Eutsuk Lake, CY5H
Nanaimo, CY7A
Nanaimo, CY7C
Penticton, CY6R
Powell River, CY7D
Prince George, CY2F
Tahtsa Lake, CY5F
Thurston Bay, CJG

The launches are:
"Cottonwood," VGLP
"Eunice B," VGYR

(Please turn to page 88)

Lookout tent, with masts for radio, on Bainbridge Mountain, (4000 ft.) near Port Alberni, B. C.

The SHORTWAVE STATIONS

● The shortwave list, arranged by frequencies in kilocycles, gives the schedules of the shortwave broadcasting stations. When requesting verifications from radio stations, return postage should always be sent. Return postage to foreign countries can be sent in the form of an International Reply Coupon, available at any post office at 9c each. Unused postage stamps from many foreign countries, which can be sent instead of Reply Coupons, are available from the Return Postage Bureau, 85 Francisco Ave., Rutherford, N. J.

Time is Eastern Standard. Add 1 hour for Eastern Daylight. Subtract 1 hour for Central, 2 hours for Mountain and 3 hours for Pacific.

2320 TGWC	Guatemala City, Guat. 1 kw. See TGWA. Sun, 10:30 am-5:15 pm; 7 pm-midnight. Other days, 7:45-9 am; 12-45-3:45 pm; 7:30 pm-12:15 am.	HJ6FAL	Ibague, Colombia. 501 w. "Ecos del Combeima."

The Addresses were given in the Midsummer RADEX, and will be printed again in October.

The WORLD'S Radio Stations

A complete listing of the radio stations of
the world, from 500 kcs to 500,000 kcs.

Effective March 4, 1940, many European stations will change frequencies. The frequencies to be used after that date are shown in parentheses in the last column.

The addresses and broadcasting schedules of the shortwave broadcasting stations are not shown in this list. Readers are referred to The Shortwave Broadcasting Station List for this information.

Explanation of the Third Column Symbols:

A—Aircraft.
B—Broadcast.
C—Commercial Telegraph.
F—Forestry.
G—Geophysical.
P—Police.
S—Ship.
T—Radio Telephone.
FA—Aeronautical (ground).
RC—Circular radiobeacon.
RD—Directional radiobeacon.
RG—Direction finding station.
RR—Radio range station.
MP—Municipal police.
SP—State police.
ZP—Zone police.

EM—Emergency.
SEM—Special emergency.
MF—Marine fire.
PR—Press relay.
RB—Relay broadcast.
FAC—Facsimile.
TV—Television video.
TA—Television audio.
NCE—Non-commercial educational.
CH—Coastal harbor.
CHC—Coastal harbor telegraph.
CHT—Coastal harbor telephone.

Stations Using Special Frequencies

Call	City	Assigned	Using
KIRO	Seattle	650	715
KTHS	Hot Springs	1040	1060
KWKH	Shreveport	850	1100
WESG	Elmira	1040	855
WTIC	Hartford	1060	1040

NORTH AMERICAN B. C. STATIONS BY FREQUENCIES WITH POSTAL ADDRESSES

KEY TO SYMBOLS

As shown in the Index by Frequencies

Frequencies are given in kilocycles per second, and wavelengths in meters. Night power is shown in watts in third column any daytime power is shown in parentheses in kilowatts. Thus: (25) indicates 250 watts. Exact frequencies, when not multiples of ten are shown in the second column.

Second Column Symbols

- A—Status in doubt.
 B—National "Blue" Network.
 C—Columbia Network.
 D—Daytime only.
 F—Canadian Network.
 H—Assigned another frequency using this one under Special Authorization.
 J—Assigned lower power but using this power under Special Authorization.
 K—Licensed for facsimile.
 L—Limited time.
 M—Mutual Network.

- N—National "Red" and "Blue" Networks.
 P—Has Construction Permit only.
 Q—Station not in use.
 R—National "Red" Network.
 S—Sundays only.
 Sy—Synchronized.
 X—Has Permit to change power.
 Y—Has Permit to change location.
 Z—Has Permit to change frequency.

- a-b-c—Small letters show stations using same transmitter.
 1-2-3—Figures denote stations sharing time.
 ?—Reported but not officially confirmed.
—No information.
Fourth Column Symbols
 a—verifies for return postage.
 b—Verifies only occasionally.
 d—Verifies for government postal card.
 f—Verifies for 10 cents.
 g—Card for postage; veri stamp for 10c.
 z—No information available.

**THE IMPROVED RADEX
 WILL HELP YOUR FRIENDS
 TOO!**

**WILL YOU PLEASE HELP BY
 TELLING THEM ABOUT IT?**

—The Editor

The Augmented Call Letter Index

The supplementary call letter index of North American Broadcasting Stations, which started in our September, 1938 issue, has been incorporated with our regular list of broadcasting stations. The supplementary index would require about two years to complete, while the same information can be given in our regular lists in a few months. In the current issue of RADEX, the mailing addresses of all the stations are given. Next month we shall show the names of the licensees and in subsequent issues we shall show the locations of the transmitters, the aerial data and the names of the verification signers.

Walter R. Brown, 54 Main Street, Westport, Conn., reads Radex.

NORTH AMERICAN B. C. STATIONS BY CALL LETTERS

TIME CONVERTER

The RADEX Map of the World with Time Converting Dial is the most useful accessory any radio fan could have around. Just a twirl of the dial shows the correct time at any location in the world. No calculation is necessary; the dial does all the work. The price is only

25c

You Can't Get Along Without It.

.. If you like RADEX why not tell your friends? When an article in this magazine strikes you as being unusually good, please tell your friends to get a copy at the newsstand, and read it.

THE RADEX CLUB

The map shown at the head of this column each month shows the states, in solid black, in which we have at least five members enrolled. Just as we go to press, too late to change the map, the states of Wyoming and New Mexico have entered their fifth members. Total membership in The Radex Club is 1207, which includes members in all the states except Nevada, and in eighteen different countries.

Membership in The Radex Club is available to anyone who is interested in DXing. There is no charge, and no obligation. Whether you are a subscriber or a newsstand reader, you can become a member of this club simply by making application on a postal card.

The Irvington Chapter of The Radex Club enjoyed a picnic at Stokes State Forest, in New Jersey near the Pennsylvania and New York state lines. The members of the chapter, with their friends, numbered twenty-three persons. Highlight of the affair was the baseball game, which was won by Warren Carpenter's group, the score being 18 runs, 20 hits and many errors, against 9 runs, about 20 hits and innumerable errors for their opponents, lead by Mr. Bosset.

The Irvington Chapter meets regularly on the first Monday of each month, at 870 Sanford Avenue, Irvington, N. J. The next meeting will be on October 2. All DXers in the Newark-Irvington area are invited to

attend. We assure all interested persons that the DXing ability of this group is much superior to their ability on the diamond.

The Brooklyn-Metropolitan Chapter of The Radex Club will hold its first Fall meeting on September 29 at 8:30 pm EST. The meeting will be at 6637 Ovington Court, Brooklyn, which is on the corner of 67th St. between 16th and 17th Avenues. All amateurs, DXers and readers of RADEX living in the metropolitan area are invited to attend this meeting, at which a demonstration of a communications receiver will be featured, and refreshments served.

Two new Chapters of the Club are being formed, and all radio fans in the vicinities of Yonkers, N. Y., or Chariton, Iowa, can aid in the formation of these Chapters by writing Louis Zettler, Jr., 33 Summit Avenue, Bronxville, N. Y., or LeRoy B. Swanson, 217 North 15th St., Chariton, Iowa.

THE GOLD AND SILVER CORONATION SET

of Persia is one of the most beautiful issues of stamps in the world. Printed in actual gold and silver, the stamps show the glories of mystic Persia. We'll send the COMPLETE set of 17 varieties, all unused, at the special price of only 25c to approval applicants.

THE FIRST ONE HUNDRED ANSWERS RECEIVED FROM THIS AD WILL BE SENT AS A GIFT, THE ONE PESETA GOYA NUDE STAMP, WHICH ALONE USUALLY SELLS AT 15c.

FRASEK COMPANY

Dept. 528 White Plains, N. Y.

You'll Want These Issues

About the Art of Tuning and Hearing Foreign Broadcast Band Stations, written by Count De Veries, Oct., Nov. and Dec., 1938.

This Hobby Called DXing in Jan. 1939.

When Radio Sets See Spots, and what to do about, March, 1939.

When Radios Get The Jitters, and their cure, June 1939.

Television is Here, in June, 1939.

Moon Studies

For a great many years, some DXers have felt that the various phases of the moon had some effect on radio reception, but not until this summer has this theory had any scientific confirmation. Dr. Harlan T. Stetson of the Massachusetts Institute of Technology, from studies of radio signals, has found that the moon's phases do influence broadcasting. His investigations disclose that radio signals are at their peak three days before the full moon.

PHONE ADAPTERS for QUIET RADIO

Do you listen in late at night while others are sleeping? Does your town require you to turn your radio down at a certain hour? If you are an apartment dweller, or a DXer, or if there is more than one radio in your home, equip your set with headphones and win the gratitude of your family and your neighbors.

We offer two phone adapters which will permit the use of headphones with your radio. They can be used with any radio set, regardless of make, and are fully guaranteed. They are easily installed. When ordering, be sure to give a list of the tubes used in your receiver.

TRIMM

Quiet Radio Attachment

This kit, including adapter and headphones, is made by the makers of the famous "Trimm" headphones. Headset and loudspeaker may be used separately or together.

Adapter with Trimm Feather-weight Headphones—

\$13.50

Adapter with Trimm Dependable Headphones—

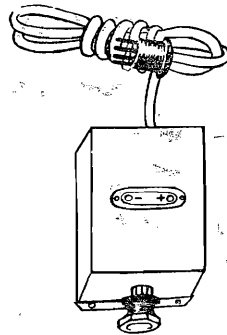

\$5.95

Adapter with Acme DeLuxe Headphones—

\$4.40

THE PERFECT PHONE ADAPTER

Makes it easy to attach headphones to any radio set. Easily installed, without tools, in just a minute. The loudspeaker can be silenced while 'phones are being used. Ideal for the hard-of-hearing. The price is only \$3.95, without headphones.

As these adapters are made to order, about two weeks should be allowed for delivery.

We pay the postage.

I WILL TRAIN YOU TO START A SPARE TIME OR FULL TIME RADIO SERVICE BUSINESS WITHOUT CAPITAL

Picked up
\$1800 while
Learning

"I picked up \$1800 while studying and I call that easy money—the time I gave my Radio work did not interfere with my other business." OTIS DENTON, 14106 Lorain Ave., Cleveland, Ohio

Own Business
Pays \$300 a
Month

"I now have my own Radio business which shows three hundred dollars a month profit — thanks to the National Radio."—FRANK T. REESE, 39 N. Felton St., Philadelphia, Penna.

Get My LESSON on Radio
Servicing TIPS FREE

I want to prove my Training is just what you need to master Radio. My sample lesson text, "Radio Receiver Troubles—Their Cause and Remedy" covers a long list of Radio receiver troubles in A.C., D.C. battery, universal, auto, T.R.F., super-heterodyne, all-wave, and other types of sets, cross-indexed for quick reference. Special section on receiver checkup, alignment, balancing, neutralizing, testing. Get this lesson Free. Mail the Coupon.

The world-wide use of Radio has made many opportunities for you to have a spare time or full time Radio service business of your own. Four out of every five homes in the United States have Radio sets which regularly need repairs, new tubes, etc. Servicemen can earn good commissions selling new sets to owners of old models. Even if you have no knowledge of Radio or electricity, I will train you at home in your spare time to sell, install, fix, all types of Radio sets to start your own Radio business and build it up on money you make in your spare time while learning. Mail coupon for my 64-page book. It's Free—it shows what I have done for others—what I am ready to do for you.

Many Make \$5, \$10, \$15 a Week Extra
in Spare Time While Learning

The day you enroll I start sending Extra Money Job Sheets; show you how to do radio repair jobs. Throughout your training I send plans and directions that made good spare time money—\$200 to \$500—for hundreds, while learning. I send you special Radio equipment to conduct experiments and build circuits. This 50-50 method of training makes learning at home interesting, fascinating, practical. I ALSO GIVE YOU A MODERN PROFESSIONAL ALL-WAVE, ALL-PURPOSE RADIO SET SERVICING INSTRUMENT to help you make good money fixing Radios while learning and equip you for full time jobs after graduation.

Get Ready Now for Your Own Radio
Business and for Jobs Like These

Radio broadcasting stations employ engineers, operators, station managers and

pay up to \$5,000 a year. Fixing Radio sets in spare time pays many \$200 to \$500 a year—full time jobs with Radio Jobbers, manufacturers and dealers as much as \$30, \$50, \$75 a week. Many Radio Experts open full or part time Radio sales and repair businesses. Radio manufacturers and jobbers employ testers, inspectors, foremen, engineers, servicemen, and pay up to \$6,000 a year. Automobile, police, aviation, commercial Radio, loud speaker systems are newer fields offering good opportunities now and for the future. Television promises to open many good jobs soon. Men I trained have good jobs in these branches of Radio. Read how they got their jobs. Mail Coupon.

Find Out What Radio Offers You

Act Today. Mail the coupon now for Sample Lesson and 64 page book. They're free to any fellow over 16 years old. They point out Radio's spare time and full time opportunities and those coming in Television; tell about my training in Radio and Television; show you letters from men I trained, telling what they are doing and earning. Find out what Radio offers YOU! MAIL COUPON in an envelope, or paste on a postcard—NOW!
