Get Ready for "Old Man Static"

Equip Your Receiver With The "Perfect" Phone Adapter

Enjoy your radio when the rest of the family are asleep or ill. Use the phones to shut out room noises and identify those faint, far-off signals you can't quite hear on the speaker.

The Adapter positively cannot harm the set or change load or balance. While we can fit any set, a variety of models is necessary. For this reason the Adapter is not sold through dealers.

To Install

Simply remove the power tube or tubes and place the small adapters (shown at A) in the sockets. Now put the tubes in the adapters and leave them there.

To Operate

Insert the tips of phone cords in the small jacks in box (shown at B). The signals will now be picked up by the phones. The speaker may be silenced or not by small toggle-switch.

PRICES

Perfect Phone Adapter	\$ 3.95
Aadapter with 2000-ohm phones	6.70
Adapter with the very best "Featherweight" 24,000-ohm phones	12.00

All prices postpaid

If you live in Ohio, add 3% for State sales tax.

The 2,000-ohm phones will give excellent service. The 24,000-ohm phones are perhaps the very finest made being especially light and extremely sensitive. They were developed especially for the hard of hearing, airplane pilots, short wave work, etc.

In ordering be sure to give make and model of receiver and a list of the tubes used.

The Radex Press, Inc. Conneaut, Ohio

★
★
OUTDISTANCING *All* RIVALS!-

- ★ *Only once* in four long years this breathless climax!—blast of trumpets—thunder of drums—nerve-cracking seconds—a hundred thousand voices proclaiming new champions. National anthems flung to the breeze where float the banners of a hundred nations strong!
- ★ Make sure you hear it all at its best—direct from Reich Sport Field—with the magnificent new 23-tube SCOTT Full Range Hi-Fidelity AllWave.

Travel on—if you're a dyed-in-the wool DXer burning the midnight oil of Aladdin's Lamp! Cross the hemispheres — at a turn of the dial! Australia — Argentine — Indo-China — Japan — Russia — dozens upon dozens of foreign stations! Remote stations you've never heard before — leaping into bright reality with a volume, a cleavage through adjacent stations, a quartz-brilliant clarity not even approached by any other radio in the world!

RADIO'S GLOBE-TROTTER

If you're a dyed-in-the-wool DXer—compare your log with W. F. Stitzinger's—1651 foreign programs in a short seven months—not merely logged but **VERIFIED!**

If you're a dyed-in-the-wool DXer—you'll understand the pride SCOTT owners take in the receiver which carries an unqualified guarantee to outperform any other radio anywhere in the world at any price.

Less than 1 Microvolt Sensitivity—necessary for clear reception on DX stations.

Bullet Direct Variable Selectivity 2 to 16 K. C. — three times the ability of the average receiver to cut away powerful adjacent wave length stations.

Split Point Dial Calibration—on all wave bands, for the first time in radio history.

Foreign Station Locator —tunes in short wave stations instantly.

35 Watts Output—5 times the undistorted output of average receiver.

30 to 16,000 Cycle Hi-Fidelity — twice the overtone range of any other high fidelity receiver—provable in any comparative test.

More Features Vital to Performance than any other receiver—including True Bass Control—True Separate Treble Control—23 Tubes, New High Efficiency Type — Laboratory developments impossible to in-

clude in mass production type receivers.

COMPARE—IN YOUR HOME

Thousands upon thousands of SCOTT owners ask us how such astounding superiority is possible. The answer is that the SCOTT is strictly custombuilt to the highest precision standards known, and fully aged and proved. Nationwide installation service. Five-Year Guarantee of perfect performance. 30-day trial anywhere in U. S. A.

FACTS—YOUR GUARANTEE

Is it worth a stamp and an envelope to hear the most thrilling record of worldwide performance? Send for the fascinating book "PROOF." Clip the coupon below NOW—and mail it.

Send it before another day passes.

When in New York City visit our new permanent Salon at 630 Fifth Ave., Rockefeller Center.

E. H. SCOTT RADIO LABORATORIES, INC.
4424 Ravenswood Avenue,
Dept. 16B6, Chicago, Ill.

Send "94 PROOFS" of the SCOTT'S superior tone and DX performance, and particulars of 30-day home trial anywhere in U.S. A.

Entered as second-class matter April 23, 1931, at the postoffice at Cleveland, Ohio, under the Act of March 3, 1879.

Printed in the U. S. A.

The RADEX Mystery DX Contest

DURING the past few years, many old-timers have been of the opinion that DXing has lost some of its former appeal. Modern methods of mass-scheduling of special courtesy programs seem to have turned this popular winter pastime into a somewhat cut-and-dried affair. Given efficient receiving equipment and a fair location, most any listener will have little difficulty in building up his log to large proportions.

Much of the old thrill of successful "fishing" is lost and, with the possible exception of tuning for foreigners and I.D.A. specials, DXing today consists of the simple formula: *listening plus reporting equals verifications.*

As a possible stimulant to whet the DX appetites, we have planned something new in the way of a DX contest. On the mornings of February 22, 23 and 24, some sixty stations will transmit one-hour programs dedicated to RADEX readers. Present plans call for five stations to be on every hour between 2:00 and 6:00 a.m., EST, on those three mornings.

Unlike all other DX programs, however, *the identities of the participating stations will be kept secret* and listeners will know only the hours which the unknown stations will transmit. In other words, DXers will be obliged to do some old-time fishing and dial-twisting.

Rules—But Only A Few

Like all contests, we have some rules, and a complete list will be found following this article.

It will be noted that the contest is to be judged on a scoring system. Five points will be awarded for each and every participating station which is heard and identified. To *identify* a station, it will be necessary to give a selection or code word, and the time at which it is heard. Just to say that "XYZ was heard broadcasting for RADEX" is not enough; it is necessary

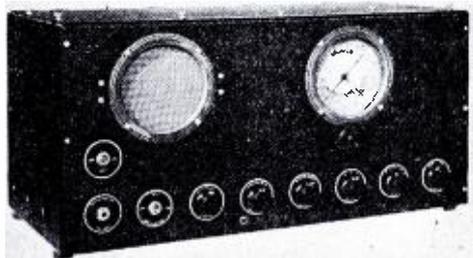

that every contestant *prove* that he heard each broadcaster which he reports. As we have said, five points will be given for each station so identified.

A bonus of fifteen additional points will be awarded for every report which gives complete details of ten consecutive minutes or which lists three successive selections. Thus, while five points will be credited for identifying a station, it is possible to receive 20 points for every report of this length. Sixty stations at 20 points each makes possible a total score of 1200 points—the maximum.

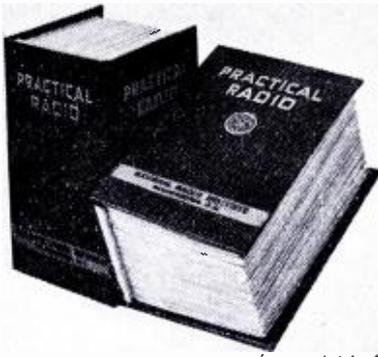

Each contestant will compute his own score on the above basis and list that score on the first page of his report. He will give the number of stations merely "identified" and multiply by five; he will multiply by 20 the number of stations for which he is to receive the maximum number of points. The total of these two products will be the final score upon which each entry will be judged.

Prizes? Most Of A Certainty!

The listener who receives the highest total of points on this basis will be awarded a 23-tube Scott All Wave receiver. DXers who read the report of R.H. Tomlinson on this Scott product in the January issue will know that this is a prize well worth striving for.

A Hallicrafters' Super Seven Receiver is the Second Prize in the Mystery DX Contest.

A complete set of study and reference texts for National Radio Institute courses in Fundamental Radio Principles and Radio Communication, is the fourth prize in the Mystery DX Contest.

Second prize will be a Hallicrafters "Super Seven" receiver, a well-known product of The Hallicrafters, Inc., of Chicago. Third prize will be a complete set of Study and Reference texts for the National Radio Institute Courses in Fundamental Radio Principles and Radio Communications. These are the identical texts furnished NRI students and should be a welcome addition to any library. Fourth prize will be a complete course in code instruction with the Candler System Company, of Asheville, N. C. DXers wishing to decipher the maze of dots and dashes picked up by their receivers will find this a most valuable award.

Additional prizes include a choice of any custom-built Lynch antenna system, a Candler course in touch typing, a set of the famous Trimm headphones, a complete replacement of as many as twelve National Union radio tubes for the receiver of a winner, five copies of the Radio Amateur Call Book Magazine (five prizes), a World Globe, a Perfect Phone Adapter, five annual subscriptions to RADEX (five prizes), and many others.

The complete list of prizes has not been determined as we go to press. Additional awards will be announced in the March issue.

Contestants are requested to list the prizes in order of preference so the

judges will be able to make the most suitable awards.

Insofar as is possible, the awarding of prizes will be governed by the preferences of the winners.

A Model Report

We have worked out a standard system of reporting for the contest and must insist that all entries conform to these specifications. Let us assume that a listener is successful in tuning and identifying 48 stations. Of these, 30 were heard for at least ten consecutive minutes and the remaining 18 were merely *identified* by one selection, code word or announcement. His entry in the contest should be worked out along these lines:

Each station should be reported on a separate sheet of paper—preferably the size of a 3x5 index card. On one side of the paper, there will be the following information: the name and address of the contestant, the call, location and frequency of the station being reported; the date on which the program was heard—February 22, 23 or 24; the details of the transmission, with the time given as *Eastern Standard*; and the number of points to be received for the report in question—5 or 20, depending upon the length.

On the reverse side of the paper, there should be all pertinent information about the reception of the station—signal strength, quality, intensity of fading, receiving equipment used, local weather conditions, etc. When we have checked the reports, they will be sent to the respective stations and we feel confident that the information thus obtained will be of great value to the broadcasters. Certainly the response should be greater than on any similar program in the past.

When all of the stations heard have been reported in this manner, the contestant should use an additional sheet of paper for the complete resume of his entry and give the following information: his own name and address, his total score for the contest and his preference as to the prizes. In the above example, the entrant would com-

pute his score as follows: 30 ten-minute reports at 20 points each—600; 18 identified stations at 5 points each—90; 600 plus 90 equals 690—the total score for the contestant.

This final sheet should be placed on top of the individual station reports and the whole mailed to the RADEX, BOX 59, CONNEAUT, OHIO.

All reports must be postmarked no later than midnight on February 25, 1936 and entries dated after this time will not be considered. Contestants should make sure that sufficient postage has been used to insure delivery to us. Any reports received with postage due will be refused.

Of Particular Importance

As we go to press, nearly two months before the date of the contest, the complete schedule of participating stations has not been completed. While the original plans calls for a total of sixty stations to take part—five every hour between 2:00 and 6:00 a.m., EST,

A set of twelve replacement National Union tubes is one of the major prizes in the Mystery DX Contest.

on the mornings of February 22, 23 and 24—the final arrangements may have to be altered somewhat.

If fewer stations participate, we will curtail the time so that there will be five stations every hour. If more stations come on, the schedule will be lengthened accordingly.

A final announcement about the contest will be distributed to the leading radio clubs for publication in their bulletins during the week of February 9-15.

For readers who do not receive these bulletins, we have decided to issue a special mimeographed sheet of our own, on or about February 14th. This will include the final announcement of the hours during which the unknown stations will broadcast and a complete list of the prizes to be awarded. To receive this bulletin, readers should send a stamped, self-addressed envelope (large size) to RADEX, BOX 59, CONNEAUT, OHIO, to reach us no later than February 10th. While we will be glad to send the bulletin to anyone desiring a copy, it will simplify our work if club members will depend upon their own bulletins for these announcements.

By Way Of Conclusion

We do not pretend that the details of the contest are perfect in every way. The rules which we have drafted may not be entirely clear or they may place some listeners at a disadvantage. If so, we are sorry and will try to do better next time.

If the general reaction to the idea of a Mystery DX Contest seems to be favorable, we will see what can be done to make it an annual feature for our readers.

In lining up the stations which have been invited to participate, we have attempted to effect a thorough distribution across the continent. On the eastern and western coastlines, more powerful stations have been selected; in the central states, many small broadcasters have been chosen. Some transmitters will be "local stuff" to contestants; others may not even be

heard. On the whole, however, we believe that every reader on the North American continent will have an equal chance at the valuable prizes. So, to all of you, Good Luck!

The Contest Rules

1. Reports for each station heard must be submitted on a separate sheet of paper (preferably the size of a 3x5 index card) and shall include the following information: name and address of contestant, call letters, location and frequency of station being reported, details of reception (signal strength, quality, fading, local weather conditions, etc.) and details of program heard, with the times given in *Eastern Standard Time*.

2. Five points will be given for every participating station which is heard and identified. A bonus of fifteen additional points will be awarded for each report which gives full details for ten or more consecutive minutes or three successive selections.

3. Each entrant will compute the number of points to be received for each station reported and will list that number *prominently* on the report sheets for the respective stations.

4. Each entrant will then add up his total score and will give that, together with his full name and address, on an additional sheet of paper which should be placed on top of the individual station reports. On this same sheet of paper, the entrant will also list, in order of preference, the prizes to be awarded in the contest.

5. In case of ties among the winners, the preference for the prizes concerned will be given to the contestant whose report is most complete and accurate. In any event, the decisions of the judges will be final.

6. All entries in the contest shall be postmarked no later than midnight, February 25, 1936, and shall be addressed to RADEX, BOX 59, CONNEAUT, OHIO. Entries which are postmarked later than this time will not be considered.

7. Care should be taken that suf-

ficient postage is used to insure delivery. Entries arriving with postage due will be disqualified, automatically.

England Dances to Orchestras in America

THROUGH the co-operation of the General Electric Co. and their short-wave station W2XAF, Schenectady, members of the Anglo-American Radio & Television Society danced to American orchestras on the evening of August 30th.

Using but a simple three-tube short wave receiver, coupled to an audio amplifier and driving a movie model dynamic speaker, engineers in charge were able to fill a large hall with music more than ample for dancing.

Speaking of the experiment, the president of the society, Leslie W. Orton, fourth from the left in the accompanying picture, said: "The broadcast proved to the British public that good short wave reception is an actuality and not, as many suppose, a chance. The fact that I was able to fix a date a month in advance and say that I was holding a dance with the music furnished by American orchestras is sure proof of the reliability of short wave reception."

The Story of The I. D. A.

••• By CHARLES A. MORRISON, President

THE history of the International DXers Alliance, since its inception in November 1932, is a recording of growth and activity. We are proud of the strides taken by our club and, even though we are but on the thresholds of ever-expanding horizons, we feel that we have accomplished considerable in this short span of existence.

Our start was quite modest. The season of 1931-32 had been a period of unusual activity in the field of foreign DXing on the broadcast band. Records compiled at that time show that it was not at all uncommon for me to log up to twenty Australian and New Zealand stations in a single night at the dials. Despite very simple equipment — a 7-tube Philco TRF receiver and an ordinary inverted L antenna — a number of verifications are sufficient testimony to the excellent broadcast reception during this season. Since then, it has not been possible to duplicate this reception with even the most expensive receivers and elaborate aerial layouts.

It was an unusual thirst for information on foreign DXing on the broadcast band which furnished the incentive for the formation of the I. D. A. I was surprised to discover that data on this subject was practically unknown and that no publication officially recognized the possibilities of such reception. Being reasonably sure that I was not the only enthusiast in this field, I began to wonder if there were not others who craved the same form of knowledge for which I was searching.

I began to question the prominent DXers of the day and soon discovered

that there was an almost unanimous interest in starting a little club for the exchange of ideas and information on our subject.

The First Organ

Thus, on November 1, 1932, the I. D. A. was officially organized with twenty enthusiastic and active charter members. We decided almost immediately that it was advisable to have some sort of a bulletin for exchanging our topics of information. So, on January 1, 1933, the first Globe Circler was distributed. This was a crude, four-page mimeographed affair and 50 copies were printed. It was decided that an annual subscription price would be established, with a fee of \$2.00 for

Chas. A. Morrison, President, I. D. A.

foreign countries. (This was later reduced to \$1.25, or 5/-.)

It is almost unnecessary to state that, despite its crude appearance, the *Globe Circler* bulletin was eagerly received. Other DXers began to join our ranks and it was at about this time that we began to have the first ideas of an international organization of considerable size and importance. Accordingly, plans were laid for a careful and conservative foundation upon which a great organization later might stand.

From the outset, membership in the I. D. A. was limited by certain qualifications to enthusiasts of experience. Despite our highly specialized field, our limited service and our rigid entrance requirements, we slowly but steadily increased in size and began to attract many DXers of established reputations. By the end of our first year, our ranks included many well-known figures in the DXing fraternity. This had a tendency to give stability and strength to our young organization.

In March 1934, we graduated from a mimeographed bulletin into an eight-page lithographed booklet which was the forerunner of our present *Globe Circler*. Its neat appearance and handy size won instant approbation. In August of that year, we issued a 12-page *Globe Circler* and this was immediately followed in September by the first publication of sixteen pages. Coincidental with the appearance of the latter, a front cover was added and, in February 1935, the cover was dressed up in two colors. The *Globe Circler* is not—and we hope never will be—a finished product. Rather, it is a publication constantly changing to meet the needs of an ever-expanding organization.

The time necessary in the compilation of a booklet such as our present *Globe Circler*, containing from

eight to ten thousand words, is not ordinarily appreciated. Hundreds of letters, bulletins and official communications must be read, checked, sorted and dovetailed into a compact and pertinent record. Because of the limited available space, no superfluous words or fancy trimmings are possible. The future size of the *Globe Circler* will be regulated by the revenue received, as stenographic help will be imperative to produce a larger publication.

A Short Wave Division

Although we commenced as a strictly broadcast-band organization, some short wave notes had been included in the *Globe Circler* from the start. As time went on and public interest in this field grew by leaps and bounds, it was necessary to devote more and more space to the short wave section.

Finally, in August of 1934, an important change was made and the International DXers Alliance became an all-wave organization — sharing an equal responsibility for the interests of short wave and BCB DXers alike. A complete short wave list was included in the November, 1934, issue and, because of its accuracy and timeliness, it has become one of our most popular features. No attempt has been made to include all the commercial stations, because of the

Vicomte Jean de la Brosse, Paris, France, French Representative of the IDA.

very obvious lack of space, but we have sincerely attempted to give a complete list of all recognized short wave transmitters operating on a regular schedule.

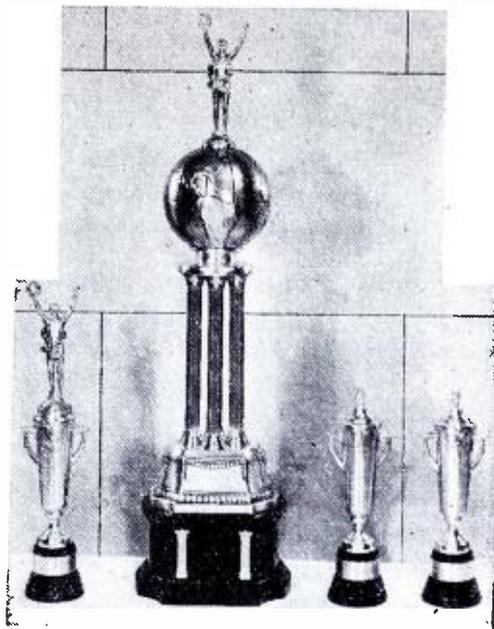

Simultaneously with the change into an all-wave organization, the I. D. A. became one of the world's most popular radio clubs and members from all sections of the globe began to enroll. Certain entrance requirements for short wave listeners were made part of our by-laws.

The Governing Body

The International DXers Alliance is governed by a president, vice-presidents, a board of directors and continental foreign representatives, each having and fulfilling very definite functions. Each director has jurisdiction over a group of states or provinces and, in some instances, they have appointed state and provincial managers to help them govern their districts. Foreign supervision is taken care of by continental representatives, one on each continent, who direct the work of the official representatives for the various foreign countries under their control. The board of foreign representatives is made up of fifty officials in all parts of the world.

In addition to this executive set-up, there is the efficient and justly-famous I. D. A. organization known as the Department of Foreign Affairs. The F. A. D. members are responsible for arranging the dozens of international, good-will programs on both broadcast band and short waves which have made the I. D. A. so popular.

An I. D. A. department which is rapidly growing in importance is under the direction of James T. Spalding, who, with his various assistants, keeps the I. D. A. in the forefront of the news in radio periodicals everywhere. The Publicity Department is doing a good job, and it gives a

The famous Randolph-IDA International DX Trophies.

member a strange feeling of satisfaction to pick up the African Radio Announcer, Egyptian Radio, The Bombay Times, the New Zealand Herald, Radio Cultura or, perhaps, World Radio and find the I. D. A. featured prominently.

Mention must be made of that famous band of old-timers, the Society of Wireless Pioneers, organized by Vice-President Michael Mickelson, of Minneapolis. Since its inception, the S. W. P. has been sponsored by and affiliated with the I. D. A.

From the outset, the International DXers Alliance has been accorded unusual support and co-operation by officials. We believe that this has been due to the fact that the I. D. A. is not *merely* a DX club. To the contrary, it is essentially an organization which is peculiarly adapted for the dissemination of the doctrine of international friendship, co-operation and cordiality, regardless of nation or race. This creed has been our watchword from the start and we

hope that we have done some good along these lines.

Our success in this field depends entirely upon the amount of enthusiasm with which we spread the ideals of the club. As we grow in size, our responsibility in maintaining these ideals increases proportionately. This is not a task to be accepted lightly, but one that we should shoulder with full knowledge of the potential good that could be accomplished under ideal conditions.

Local I. D. A. branch organizations are now taking up the challenge of our activities. In London, Manchester, Malta, Regina, New York, Calgary, Toledo, Lansing, Kalamazoo, Los Angeles, Beverly Hills and other cities, there are groups which serve as a nucleus for a bigger and better I. D. A. coverage in those areas.

The International DXers Alliance is known in almost every civilized country of the world. Over 1200 Globe Circlers go into more than fifty countries and are read from Dawson, Yukon, to Santiago de Chile, from Northern Rhodesia to Western China.

It is with a sense of sincere appreciation that we thank our enthusiastic members for their untiring efforts to provide the necessary impetus for us to carry out the ideals for which we stand.

James T. Spalding, Director of Publicity, IDA.

I. D. A. Publications and Chapters

● ● ● By James T. Spalding

IN ADDITION to the official publication, the *Globe Circler*, there are a number of I. D. A. district bulletins which are issued primarily for the use of the local members. These bulletins act as a complement to the *Globe Circler* and contain personal news and tips from members in the district.

In Europe, where there are more than 100 members, there is the *British Globe Circler*. When its first editor, A. C. Baker, left England to become engineer in charge of the British Exhibit at the Brussels Exhibition, the task of editing the paper was turned over to C. K. McConnan, of Liverpool. Regular features of the bulletin include news of special programs, short wave notes, reports of tests on new receivers, articles by members all over the world and comprehensive reports on DX in England.

In the Second District, Director Bill Ellis keeps Pacific Coast members informed with his own bulletin. In addition, a tip period over KFAC brings news of interest to DXers everywhere.

Up in northeastern Canada and New England, the Seventh District Director, E. L. Peters, has just commenced the editing of the *Northeastern I. D. A. News*. This is a hefty little bulletin, crammed full of the most helpful DX data seen in many a day. "Pete" is no mean DXer either, having several trophies to speak for his ability as a dial twister.

The Fifth District, under the direction of John Shanks and his assistant Joel Armantrout, presents the *Dixie Flash* for the benefit of the "boys in gray."

Robert Weber, Director of Central District No. 4, promises a bulletin in the near future and plans are under way for the formation of a Chicago chapter.

John DeMyer, Director of the Sixth District, teams with R. H. Tomlinson in putting out the bulletin for members in that part of the country.

Unless one has seen the results of the untiring efforts of our directors, it will be difficult to appreciate this unusual and important phase of the I. D. A.

Another important branch of I. D. A. activities cannot be overlooked. Any person with a hobby likes to talk over its particulars with others so interested. We have sponsored local chapters for this purpose, and they play a very essential part in the interest of their members.

Toledo Alpha chapter is sponsoring a Singleton Contest, while New York Beta is very active in a DX contest confined to its members. Lansing Delta is considering the use of special printed report forms by its members. Epsilon Chapter in London, England, has provided prizes for its short wave contest. Los Angeles Eta is getting a permanent club house and has arranged for its chapter news to be printed in the *California Broadcaster*. Radio Fellowship, of Beverly Hills, has acquired a fine home and bids fair to become the largest and best-equipped of all the chapters. They boast such members as Frank Andrews and, it is whispered, a screen star or two.

Our two Canadian chapters, Regina Jubilee and Calgary Foothills, are making rapid strides in membership and activities, as are our two latest additions, Kalamazoo Celery-City and Los Angeles Globe Trotters. DXers desiring information about these chapters are invited to write for details.

Radio in Malta

● ● ● By J. Mercieca

Joseph Mercieca, Sliema, Malta, IDA Representative in that country.

WITH the Maltese wireless enthusiasts, DXing has become almost second nature. Malta is very far from any broadcasting station and is short of one itself. The average listener does not content himself with the nearest powerful stations, but seeks adventure on the other by going after the most distant transmitters.

As early as 1930, when multi-tube sets were beginning to make their appearance in Malta and when short wave sets had nothing in common with the current models, the writer was conducting DX work on the medium-wave bands and was able to log several North American stations. Today, anybody with modern equipment can tune in America and the

other continents on medium waves in the small hours of the day. During the day and in the evening, DX stations can be heard well on the short waves.

The Maltese DXer never before went further than to satisfy himself with the fact that he was able to log distant stations. Asking for verifications was not in vogue and nobody seemed to care about the incredulity of his fellows. However, while the I.D.A. is comparatively young in Malta, being founded in April, 1935, some of the local members have become enthusiastic about asking for QSL's and verifications are now on hand from most of the world's stations.

Among the local listeners, multi-tube sets of the order of eight and more tubes are very popular. This is due apparently to the geographical position of Malta, where very sensitive equipment is necessary for reception of distant transmitters. Many makes of receivers find their way into the homes of local listeners, but American and British sets are in the lead. From information obtained from I.D.A. and W.R.R.L. members, I have arrived at the following figures: American models, 58%; British, 19%; Dutch, 12%; Italian, 5%; German and Japanese, 3% each.

As regards broadcast activities in Malta, the Naval Authorities have always been the sole entertainers. On special occasions, such as the Christmas speeches of H.M. the King, the launching of the "Queen Mary," and the marriage of H.R.H. the Duke of Kent, re-broadcasts of the Daventry short wave stations were effected very successfully. Since September 9, 1935, the Naval Authorities have extended the privilege to the Maltese people in general of hearing the B.B.C.'s news bulletin, which is re-broadcast daily on 230 meters. Then a translation of the news in Maltese takes place. We also have frequent talks on education, farming and public health. Recently we had the first

O. B. consisting of a relay from Valletta of the beating of the retreat by the regiment of the Duke of Wellington.

In the near future, we are going to have broadcast programs relayed on lines to the homes of subscribers. This service is entrusted to good British enterprise—the Broadcast Relay Service (Malta) Ltd.

The people of Malta are becoming more and more radio-conscious, and the time will come when radio sets and relay loudspeakers will be found in every home.

What The I. D. A. Means To Me

● ● ● By John DeMyer,
Director Sixth District

I SUPPOSE every DXer often looks back to the time when he was first bitten by the infectious bug. I know I do. It was way back in the infancy of radio, or even the Wireless Age, that I started DXing, but it was not until recent years that I considered the hobby seriously and started my collection of foreign verifications.

RADEX can take the "blame" for this, for it was there that I first read of trans-oceanic reception on the broadcast band. I must admit, however, that I had my doubts about the possibility of such reception and I started out as a pessimist of the first water.

In due course, my state of pessimism gradually turned to one of optimism. I finally heard a station from across the ocean and this was a thrill long to be remembered. Then, early in 1933, I actually received two foreign verifications.

A little later, I read in the pages of RADEX that a new organization of DXers had been started. The club was called the I. D. A. It ap-

peared to be somewhat exclusive, since a prospective member must possess a foreign verification to be eligible. I immediately decided to join this society, for wasn't I the proud possessor of *two* foreign veries?

I often look back to that time and have never regretted this decision which was the real start of my DX hobby. I have since joined several other fine DX clubs. Many interesting events have occurred during the brief three years of DX activity. With the help of the clubs and my DX correspondents, I have increased my log of foreign verifications — broadcast band and short waves — until they number in hundreds and include some sixty countries on every continent. On the BCB, my best foreign veries are VOAS, St. Johns, Nfd.; HAL, Budapest, Hungary; Radio-Alger, Algiers, Algeria; LRS, Buenos Aires, Argentina; 2HD, Newcastle, Australia; and JQAK, Dairen, Manchuria.

After six months in the I. D. A., I was elected Director of the Sixth District, comprising the East-Central states. The club was very young then and we numbered but about twelve members in the entire district. Since then, the I. D. A. has enrolled hundreds of members and, of course, our district membership has increased quite a bit.

While being most interesting, the job of a Director involves no small amount of work and it is often hard to find the necessary time for all the details, especially when other business activities limit one's spare hours. It is necessary to keep a record of all members in the district, check on their verified logs, make up the honor roll, and report all activities monthly to headquarters. Obviously, this requires considerable correspondence.

Although at times difficult, I have

*John A. Shanks, Russellville, Tenn., IDA
Director of the Fifth District.*

found the work pleasant and can point to many, many fine friendships as a result of the duties. This is the real interest and reward of this hobby.

Often I find a great deal of pleasure going through my file of verifications and re-living the thrills I had when I heard the stations, but the greatest thrill comes when I review the host of DX friends. The verifications are mere scraps of paper when compared to this. These friends are numbered not only in the I. D. A., but in other clubs as well.

In this DX game, I feel that we are fast approaching the era when inter-club relations will be more harmonious. There is no justification for selfishness or jealousy in club relations. It is through organized effort that we reap rich rewards in our DX activities and, for this very reason, every active DXer should be a member of some good

Editorially Speaking

Wm. Ansell, Regina, Sask., Director of the First District of IDA.

club and strive for a better understanding among the societies.

Local organized chapters are a distinct source of enjoyment and should be encouraged wherever possible. We have one here in Lansing and certainly have a good time at our monthly meetings.

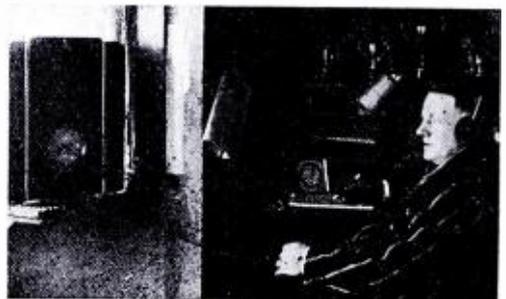

To my fellow I. D. A. members is due a vote of appreciation and sincere thanks for their co-operation in this work. Their efforts have made my work more pleasant and have afforded me the greatest means of relaxation that I have ever found — DX.

The manufacturers of the Raytheon tubes have kindly offered a set of renewal tubes as a prize in the Mystery Contest.

IN THE December issue of this magazine, we published a complete and up-to-the-minute list of the foreign broadcasting stations by frequencies, by locations and by call letters. We mentioned the fact that we had had numerous requests to publish a consolidated list of all stations in the world on the broadcast band including those in North America ordinarily covered in separate indices.

We have now received a considerable number of requests that we do *not* confuse our North American index by including the foreign stations which, after all, only a relatively small number of people can receive. Further than this, we have had demonstrated, in the most convincing way possible, that it is the short wave indices which our readers want. We have noticed that our sales of those issues containing the short wave lists have greatly exceeded the sales of those issues containing the foreign stations on the broadcast band.

The number of those interested in the short waves is being greatly augmented by the purchasers of new receivers many if not most of which

Here we glimpse Jack V. Hull, 16 Chalmers Street, Timaru, N. Z., listening to the overseas stations in America and elsewhere. He writes: "I have been getting RADEX for the last six months and would not do without it as it is a wonderful help to me in my hobby. I cannot understand how I ever managed to do without it." Jack would like to exchange QSL cards with DXers in any part of the world and gives us his guarantee to reply to all who write and send their cards

are all-wave. RADEX wants to serve the greatest number. We have therefore decided that we must publish the short wave indices more often and the foreign broadcasters at greater intervals. In place of the latter list, therefore, we are this month printing only the changes that have been made since the complete list was published in December. We hope this will serve that fortunate group who are able to tune in foreign stations on the broadcast band. When any considerable number of changes have been made, we will publish the complete list again. In the meantime, extra copies of the December issue are available at the usual price.

Station Gossip

From the New Zealand DX Radio Association comes the information that 3MB, Birchip, Victoria, 100 watts, 1470 kcs. has been testing for the past few weeks and is now on regular schedule. That 4YA's 10-kw transmitter has been on the air after 6 a. m. EST during the past month, testing with a power of 7 k. w., later increasing to 10 k. w. The transmitter was put into regular operation on November 17th and was to have been officially opened on December 2nd.

The CRBC writes us that, while CJRC has been granted a change of frequency from 1390 to 580, the change will not actually take place for some time, perhaps six or eight weeks. The station advises us that while it changed temporarily to 580 it is still operating permanently on the 1390 channel.

Two experimental facsimile stations were authorized December 3 by the FCC on application of WOR and the Yankee network. Both stations will use the general experimental ultra-high frequencies. Facsimile reception is much simpler than television and these permits may mark the birth of a new and most intriguing phase of radio.

The FCC is evidently concerned

about the fact that the same program is found on so very many different points on the dial thus reducing the variety available to listeners. The Chief Examiner recently recommended that Clark Standiford, Visalia, Calif., be granted a construction permit for a new full-time 100-watt station on 1310 kcs. "with the understanding that the station is to remain a local station and not engage in chain broadcasting." In many cases new 100-watt stations soon go after power increases which often lead to chain affiliation. The result is that the programs lose their local character and the purpose of granting local stations is defeated.

An examiner of the FCC has recommended to the Commission that KGBZ, York, Neb., be deleted and its time given to KMA. The two stations now share time on the 930 channel.

The control of KUOA, Fayetteville, Ark., has passed to John Brown University with the approval of the FCC.

Transfer of control of WBSO from the Babson Statistical Organization was approved by the FCC on December 3. The new call is WORL and the location Needham, Mass. Efforts are being made to get studios in Boston, probably in the Miles Standish Hotel.

Two on One

Writes Alden P. Bowser, 358 Pleasant St., Brockton, Mass.: "On p. 47 of the January issue you state that KPRC and KTRH using the same transmitter for different frequencies would be a new wrinkle. WAAB and WNAC have been using the same antenna, a vertical single spire some 600 feet high, for broadcasting different programs on different frequencies at the same time from common studios in the same building. This has been very successful as witnessed by their hundreds of foreign reports."

Reports are current that WTIC, Hartford, has been sold to a Providence concern and will move to the Rhode Island capital. This is the

SHORT WAVES — Past, Present and Future

• • • By PAGE TAYLOR

THE Editor spent a few enjoyable hours the other day reading old issues of RADEX. The first shortwave article in this magazine was written by a Mr. Webster in the October, 1927 number, and we believe our readers may enjoy some of Mr. Webster's comments.

"There is little doubt that great discoveries are ahead of the pioneers in this field of shortwaves. One great advantage of these waves is the greater distances over which signals travel. It is possible to build a two-tube set with which we can in the course of an evening actually circumscribe the globe. The new field of shortwaves offers an opportunity to those of an experimental turn of mind to build sets with which they can explore the higher frequencies. With at least three stations broadcasting regularly and undoubtedly more to follow there is already enough to be found in this field to well repay the experimenter."

How much different the shortwave field is today! Thousands of stations exist and it is no longer necessary that one be of an "experimental turn of mind" in order to enjoy s.w. reception.

Eight and a half years have passed since that story was written and in that short length of time shortwaves have improved so much that Westinghouse describes their stations as being "locals" in India, Africa, Australia. . . . and Continental Europe. From The Westinghouse Technical Press Service comes this release:

"After the New Year, acknowledgement of shortwave reception

reports made to station W8XK Pittsburg and W1XK, Boston, will be discontinued, according to a decision made by the company's radio executives. One reason for discontinuing these reports to listeners is due to the fact that many newspapers and magazines in all parts of the world are publishing listings of shortwave transmitters and the time of their programs. Another reason is the increasing volume of mail now being received at the stations.

"Westinghouse, pioneer in the development of shortwave radio operations, has been in contact with the s.w. audience since 1922, the year in which it started its shortwave work. It is believed that the s.w. programs themselves, in future, will serve as a form of blanket acknowledgement to listeners."

A few months ago every radio periodical we know of reported that the German Broadcasting Co. was engaged in the construction of some superpowered shortwave stations to be put into service in 1936. RADEX fell into line and reported the same good news, but, we wrote to Germany at the same time seeking authentic information; the information has come, from the Riech-Rundfunk-Gesellschaft, and reads as follows:

"As to the rumors that the German Broadcasting Station is going to build several new shortwave transmitters, we like to inform you that we are broadcasting on a few new experimental stations which are partly point-to-point transmitters and which will be used for the international exchange of programs only."

Construction of the new Daven-

try transmitters is going right ahead. The British Broadcasting Corporation writes, "It is hoped that the year 1936 will witness still further developments in our short-wave broadcasting service. Contracts have already been let by the BBC for two new shortwave transmitters of high power to be erected at Daventry. When the construction of these transmitters is completed it is hoped that the quality of reception from Daventry will be vastly improved in all parts of the globe."

"Hail Colombia"

There has been some doubt about the call letters of the station known as "La Voz de Pereira," and despite the fact we wrote them for information, we still are in the dark on this question. A card was received from them on which no call letters or frequently were given, the card reading as follows: "Radiodifusora la Voz de Pereira. Propietarios (owners), Cesar y Mario Arango M., Perelra, Caldas, Colombia. Transmissions daily from 0930 to 1100 and 1830 to 2130, EST."

From Cali, Colombia, we learn that station HJ5ABD, "La Voz del Valle," works on a frequency of 6490 kcs. with 100 watts power. 5ABD sends an attractive QSL card printed in red and blue, but the card is of no help in ascertaining their working schedule. It simply states "programas diarios," which means that programs are transmitted every day. Our most recent information on the schedule of this station is that they work daily except Sunday from 1900 to 2200, EST.

"La Voz del Choco, HJ1ABC, is the property of the Direccion de Educacion of the State of Choco," airmails Sr. V. Barrios Ferrer, the Director of Education. "HJ1ABC is a Collins transmitter of 100 watts power in the antenna. This station was installed on the 12th of Octo-

Young Kenny Baker is the new singing-stooge heard with Jack Benny Sunday nights on the NBC. Kenny is 23 and single.

ber, 1935 and has worked with other stations in Ecuador, Venezuela and Colombia. Frequently we receive reports of reception from the United States, Canada, Cuba, Venezuela, etc., most of them giving us complete details of our transmissions and stating that our programs are marvelously received. There is no commercial advertising on this station as it transmits only educational programs. We recommend especially our special programs on Sundays from 3 to 5 pm, and also the instructive programs on Saturdays from 10 to 11 am."

Sr. Angulo, the owner of station HJ5ABC at Cali, announces the inauguration of a powerful new short-wave transmitter. "Our station, La Voz de Colombia, works on 6150 kcs. daily from 11 am until noon and on Monday and Friday

from 1900 to 2200, EST," Sr. Angulo advises us. "The Voice of Colombia broadcasts programs of selected music, songs, conferences, lectures on history, touring, etc. Orchestral entertainments consisting principally of Colombian music are provided in abundance and we have excellent speakers, both in English and Spanish." A brochure soliciting advertising tells us that Colombia consists of 14 states with a population of 8,000,000 persons, 300,000 of whom are shortwave listeners.

We have noted a tendency among many of the South and Central American stations to broadcast travel talks about their countries. These talks, of course, are always interesting, but we believe if the station would devote as much energy toward furthering the completion of the much-talked-about Pan-American Highway in their own respective countries, the touring problem would take care of itself. Thousands of us are awaiting the opportunity to "roll down to Rio" in our own cars and would be glad to spend a little "oro americano" down there if they will give us the roads. Mexico, Venezuela and the United States are the only countries that have done anything about the highway, while the plans as proposed call for a road from Alaska to Buenos Aires.

HJ4ABA, Medellin, Colombia, has a very attractive QSL card in blue and black. Sr. F. Cuartas, the Manager, tells us that HJABA works on 11710 kcs. daily from 1130 to 1300 and from 1830 until 2230, EST, using a 100-watt Collins transmitter. 4ABA is known as "Ecos de la Montana."

"Oh Canada"

Mr. Allison M. Jagoe, Manager of Canadian Station VE9BK in Vancouver, says that this station has been on the air intermittently for a period of possibly seven or eight

years, but as their power was recently increased to 250 watts they are now being heard over a wider area. "We appear to be getting through into the eastern states and Canada with very strong signals, and consistently," he continues. "No doubt within a reasonably short time we will have regular programs for the public arranged, but for the moment this station is being used to keep regular schedules in some cases with our Branch Office and for experimental purposes only. Our present schedule is, Monday, Wednesday, and Friday, 1130-1145; 1500-1515; 1930-1945 and 2000-2015, EST. Tuesdays and Thursdays, 1130-1145; 1500-1515 and 2000-2015. Saturdays, 1130-1145; 1500-1515 and 1930-1945. On Sundays we work irregularly." VE9BK is owned by Radio Sales Service, Ltd., 780 Beatty St. Vancouver, B. C.

A highly interesting shortwave flash comes from the New Zealand DX Radio Association about a new station in the South Pacific. This is "Radio Oceanic," Papeete, Tahiti, broadcasting programs of recordings and native music on 7100 megs. on Wednesdays and Saturdays from midnight until 1 am.

VUC in Calcutta, India, is reported to have shifted to 6300 megs.

ZEB at Bulawayo and ZEC at Salisbury, Southern Rhodesia, broadcast simultaneously on Tuesdays from 2 to 3:15 pm, and on Fridays from 10:15 to 11:30 am. ZEB is on 6.147 megs. and ZEC is on 6.000 megs.

Two of the telephone stations at Drummondville, P. Q., heretofore licensed for A1 (CW) operation only, apparently have had a modification of their licenses to use A3 (voice) transmission as well. Ronald Crane, 5536 Dorchester Ave., Chicago, Ill., reports hearing CGA5,

9091 kcs., and CGA8, 4905 kcs., working in parallel with GCB at Rugby, England.

The new point-to-point telephone station in San Juan, Puerto Rico, has been given the call sign WCT. This station is owned by the Radio Corporation of Puerto Rico, and will work with WNC at Hialeah, Fla.

"They'll Never Believe Me."

Two thousand stations on a one-tube radio set is a record of which Elmer Wall, R.F.D. 1, Box 116, Mountain Lake, Minn. boasts. "I have two 1-tube radios," he writes. "One is a b.c.b. only and the other is an all-wave Air Scout. Although it seems almost unbelievable, I have a log of 2001 stations. Thirteen hundred and ninety-four of these are amateurs, 477 on the b.c.b., 62 are shortwave, 55 are police and 13 are airways stations. My best s.w. stations are VUB, RKI, HVJ, JVT, VK2ME, VK3LR and KKH. The Daventrys and EAQ are heard practically every evening. These two sets operate on two dry cells and one or two "B" batteries. They cost about a penny to operate for ten hours. I use two outside aerials, one 330 feet long and the other 56 feet long. I would like to correspond with other users of midget radios."

"I am very glad to report to you that I have received my QSL card from HI1A," J. Herbert Hyde, Box 82, Elmwood, Conn., replies to our request in last month's RADEX. "I heard from them in record-breaking time, about one month. Yesterday I received a verification from XEBT in Mexico City, but the real thing of interest is the fact that this QSL verifies my report of December 11, 1934, just a little over a year ago. I have just learned that patience is a necessity in S. W., both in tuning and in waiting for answers.

"VP3MR, at Georgetown, British

Guiana, was heard here one evening at about 8:10 pm, EST, on 42.4 meters, according to their announce. This station is owned by the British Guiana Broadcasting Co."

From Iceland

From Verdun, Quebec. J. Russell Graham, 1005 Allard Ave., writes, "TFJ in Reykjavik, Iceland, on 12235 kcs. is broadcasting on Sunday from 1340 to 1400, EST, coming in with an R7 signal. A lady does the announcing. I have heard the following stations testing: TI5HH at San Ramon, Costa Rica, on 5500 kcs. near 0030 EST; DIQ at Nauen, Germany on 10290 near 1500; DJJ at Zeesen on 10042 kcs. was heard broadcasting from 1400 to 1600 on a Sunday and DJI, also at Zeesen, was heard on 9675 kcs. from 1700 to 1900." Mr. Graham would like to correspond with other DXers.

"How is this for a list of stations reported?" asks Eric Butcher, Cokeville, Wyo. "The War Department Station in Colombia HKV, HJ3ABD, CEC, YV1ORSC, HC2CW, YV8RB, HH2W, W1OXFH, and a dozen or more foreign hams. If less than 50% of these stations verify, here is one DXer who is going to satisfy himself in future with simply hearing the stations, and quit buying Reply Coupons." Mr. Butcher wishes to exchange SWL cards with other DXers.

"Why not slip a few code stations in your list, such as DIS-DFH or DIH-DIO?" asks Howard O'Day, 3814 Hillsdale Road, Baltimore, Md. "Those stations send press and it would be a big help to us old-timers to calibrate our receivers. I heard WOO talking to the S. S. Transylvania, GLKZ, evidently a new station. The S. S. Albert Ballin has been re-named the S. S. Hansa, and the Belgenland is now under American registry with the new name of Columbia.

The call letters of the Ile de France are FNTQ. The other day WNC at Hialeah was working a new station, VRR4 in Jamaica."

A home-made receiver that works well is the prized possession of H. J. Arbic, Acton, Ont. "With this receiver I have heard EAQ, DJA, B, C, D, GSA, B, C, D, E, F, G, 2RO, PHI, PCV, CT1AA, PRADO and YV3RC, as well as lots of South and Central Americans, Mexicans, etc. All these stations were heard with good volume at times."

"In 1931 I quit tuning the broadcast band and went 100% shortwave," recalls H. R. Keller, Franklin St., Schenectady, N. Y. "At the present time my s.w. log includes 212 stations, all continents being represented, including Little America." Mr. Keller's letter continues with comments on interference from South American stations, and asks for a solution to this trouble. Most of the better stations, like Zeesen and Daventry, are trying to avoid the 49-meter band as much as possible, and await the next International Shortwave Congress, when it is hoped some kind of agreement can be reached on this subject.

"School Days"

"'We no speak da English,' seems to be the attitude of many of the foreign stations," is the familiar introduction to many letters we receive. This one is from Irving Johnson, 1926 Argyle St. Chicago, Ill. "It seems that to enjoy most of these foreign programs one must return to school and learn all the various languages. I wonder why these stations cannot have a multilingual recording made of their announcements and play the recording at least every half hour. Meanwhile, I am going back to my Spanish lesson in preparation for my battle tonight on the 49-meter front. Following are some Timely Tips for Tireless Tuners: HRP1 at

San Pedro Sula, Honduras, has moved over to about 6350 megs. and has an R9 signal when it is on the air. DJI is a new German on 6750 megs. The Hungarian stations HAS3 and HAT4 are good Sunday catches. HAS3 comes in well between 9 and 10 am and HAT4 between 1800 and 1900, EST. These stations are easily identified as the lady announcer speaks perfect English."

"I am not doing much verifying but I note that the Aussies, 3ME, 3LR and 2ME, and JVT, JVN, JVM, are still coming in 'good,'" reports Lyle Stannard, 817 King St., Three Rivers, Mich. Mr. Stannard uses a Scott All-Wave 15.

Altan Magary, College Place, Wash., would like to hear from users of 18-tube Midwest sets. He has had his set only a short while but has already heard GSE and Pontoise between 9 and 11 am, PST, loud enough to hear all over his home. HRN, YV2RC and several other So. American stations are also included in his log.

Who Has Africa?

Like many other DXers, Henry Green, 3424 W. 67St., Chicago, Ill., has heard every continent except Africa. "I would appreciate it very much if any of your readers who have any dope on the Afrikanders would correspond with me, and I will answer all letters," promises Mr. Green. "Incidentally, I would like to exchange QSL cards as I have just had a new bunch printed. My s.w. log stands at a meager 105 stations, excluding police and amateurs. I have heard 44 countries, but still no African. My best catches are JVN, VPD, 2ME, 3LR, HAS3, HAT4, all the Daventrys and Zeesens, HVJ and a few others." The Editor thinks this is a pretty fine log, even if Africa is missing. There are a few good stations in Africa and one of these will come through some day; the Egyptian

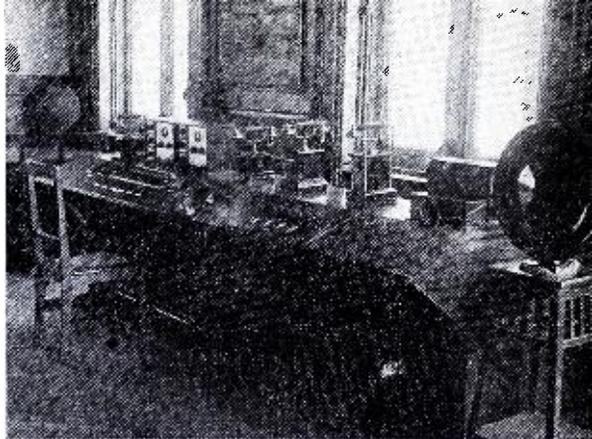

phones are about the best ones at the present time.

"The outstanding s.w. catch at this listening post was ETB at Addis Ababa on 11960 kcs," submits Nicholas Hock, 20 Burnet St., Newark, N. J. "This station broadcasts every Wednesday from 1645 to 1715, EST, and produces a very good signal here, considering the comparatively low power used. Another new station is H11S, Puerto Plata, Dominican Republic, on 6420 kcs., 'La Voz de la Espanola.' They use three chimes as an identification signal."

Ray English, 360 Lafayette Ave., Passaic, N. J., tells us that the Mexican Government station XECR on 7380 kcs. has changed its schedule to Sundays, 1900 to 2000, EST. He also reports that the Japanese are now using JVT for their morning broadcasts and that reception of this station promises to be as reliable this winter as it was last. "They are supposed to broadcast daily from 4 to 7:45 am, EST," he adds. "JVT is on 6750 kcs. They sign off with a short English talk, but the announcer talks too fast to understand him."

In December Ray English suggested we give the times at which the various stations speak in English. Fred Baines of Sydney Mines, Cape Breton, N. S., believes this is a good idea, and adds the following to Mr. English's list: Pontoise, France reads news items in English at 8:30 am each day. PCJ, COCO, COCD, XECR and PHI use English frequently and HJ4ABE in Medellin, Colombia, devotes the final half hour of their daily program to a travel talk in English.

"Shortwave stations heard recently include GSA, TIRCC, XECR, HCJB, YNVA, CO9JQ, and quite a few amateurs. My log of standard broadcast stations on the shortwaves now stands at 74," reports Manuel Alberto Cadilla, Box 337,

Control Room of HSP-1. Radio Bangkok, 2500 watts.

San Juan, Porto Rico. Mr. Cadilla discusses at some length the question of shortwaves vs. broadcast band; he says that during the summer there is nothing to do but cling to the s.w. on account of the heavy static on other bands. In the winter, however, he prefers the BCB.

Some Short Wave Shorts

"On the s.w. I have heard about 170 stations with about 60 verifications," submits Walter L. Damkoehler, 150 S. 73rd St., Milwaukee, Wis. "The best stations in my list are W1OXFH, VIZ3, and the usual run of Europeans as ORK, GBC, HBP, and I have a letter out to SPW in Poland. I would like to hear from any DXers in Milwaukee or nearby."

An un-named correspondent who resides at 315 S. Riverside, Medford, Ore., sends us a newspaper clipping about some radio stations situated at Crater Lake National Park. The Crater Lake station, KNLH, works near 3235 kcs. Another station known as PF153 is situated on the summit of Mt. Hood and works on 3385 kcs. with station KBAA at Portland daily.

"Here are a few tips for you," offers Bill Bundlie, 614 N. 6th St., Grand Forks, N. Dak. "CEC at Santiago, Chile, on 10670 kcs. is on

(Continued on page 32)

FIRST AID for Ailing Sets

• • • By the TECHNICAL EDITOR

FROM Warren Hyser, of Holland, Mich., comes this query: "What replacement tubes do you recommend for my General Electric, model K 80, receiver? Also, when my RCA double-doublet is disconnected and a short antenna used instead, the results seem better. Did my serviceman install the antenna correctly? If I use a preselector with this set will it improve DX reception?"

All tubes are made according to established specifications. Perhaps some makers use better material and more care in the construction. Any nationally advertised tube is good. You should employ the same kinds of tubes as were originally in the receiver when it came from the factory, as it is likely the set was built about the characteristics of those tubes.

In the RCA double-doublet antenna the yellow lead is the ground wire, and it is connected to the chassis of the set. The antenna coil is also grounded. Try ungrounding the antenna coil and bring a lead from it to one of the doublet leads. The other doublet should connect to the black antenna lead. If this does not remedy the trouble, have the installation checked again by your service man.

We feel certain that a good preselector will provide some noticeable improvement in DX reception.

Metal Tubes Again

The subject of metal tubes distracts many of our readers. So, A. W. Stowell, a resident of New Castle, Pa., asks: "Can I change my Philco 1935, model 16B, so as to use the new metal tubes? A lot of my friends

will change to metal tubes also if you so advise."

Metal tubes, in our estimation, offer no real advantage over glass tubes. Even if complications did not arise, we now doubt very much if the results would be as satisfactory in a rebuilt receiver. We also feel that a change-over would be very detrimental, due to heating of parts and a consequent change in their electrical values caused by the high heat radiation factor of metal tubes. Our experience to date favors glass tubes when revamping old circuits. Therefore a change also to the "G" or glass-counterpart tubes would show no improvement in your set.

Short-Wave Troubles

Loren W. Camp, of Keokuk, Iowa, writes about his troubles on the short waves. Says Mr. Camp: "We have 25-cycle current here for my Baird a-c and d-c set and short-wave converter. I have no good dead spot on the receiver as it is alive with police calls. They drive me out of the top of the dial and have made operation of the converter impossible. Also, what can I do about the 25-cycle ripple in my receiver?"

A re-alignment of your receiver would probably enable you to obtain a better dead spot for the converter. Now if you are not experienced in this work we earnestly suggest that you call in a good service man. Should re-alignment fail, a wave trap might give you the desired dead spot at some portion of the broadcast band. A doublet antenna will improve your short-wave reception. Under no circumstances use a shielded lead-in for short-wave work.

The use of a heavier filter choke—

perhaps about 50 henrys—and a doubling of the filter condenser capacity, should remove most of the 25-cycle hum. It is more difficult to filter out low-frequency hum; the units that handle 60 cycles very nicely will have little effect on 25 cycles. Radio sets that operate on 25 cycles are built with different filter units than those that operate on 60 cycles.

Automatic Volume Control

Old sets that do not use automatic volume control often give the owners a problem to think about. It is with this in mind that Vernon Parker, of Grand Chain, Ill., asks: "How can I put automatic volume control on my Radiola R-7 receiver? Also, this set has some noise in it which sounds like a loose connection. It appears mostly when using that part of the dial from 800 to 1500 kcs."

We consider it inadvisable to attempt the installation of a.v.c. on this set. If you wish to experiment, however, we shall be glad to prepare a diagram. It is one thing to give you a circuit on paper, and quite another to have it work out nicely after you have attempted the change. It would be rather expensive, and the present selectivity and sensitivity of the set might be changed.

For the other trouble we suggest you try a new 47 tube and check the values of the two resistors shunting the speaker field. We are also inclined to suspect trouble in the voltage-divider resistance and in the secondary of the input push-pull transformer. Check the radio-frequency by-pass condensers as the set may be oscillating at times.

Make sure the plates of the tuning condensers are not rubbing, and check the connections between the rotors of the tuning condensers and the chassis.

Hisses and boos always sound a raucous note in any broadcast, but

when a radio receiver starts hissing, it is too much. At least this is what William Baehrle, writing from Hamburg, Pa., thinks when he wails: "I have a Midwest 10 receiver that went back to the factory for repairs, then a serviceman tried to fix it, but all to no avail. It commences a boiling hiss that grows loud enough to blot out the loudest broadcast, then with a click the noise stops, but volume of sound of broadcast is reduced. If I break ground connection or switch the set on and off it sometimes peeps the set up, but soon the hiss and trouble starts again. This set has a slight electrical leakage through the ground terminal. The resulting spark when breaking the ground wire circuit aids me in getting the set to playing again."

We think that the by-pass condensers or resistors can be blamed for the trouble. In the case of your condensers, we believe that they become opened. They may be checked by substitution with others of approximately the same size. A 0.1 mfd. condenser will prove satisfactory for this test. In the case of the resistors it would be necessary to have the same value. In view of the fact that it would be expensive to purchase all of these resistors, we suggest that you call in a competent service man. Although it is possible, we doubt that the defect will be found in the power unit. Your description sounds as though the receiver breaks into some form of oscillation.

The sparking at the ground wire is caused by a condenser connected from the ungrounded side of the power line to the chassis. Reversal of the line plug will bring about this sparking action. It sometimes is due merely to capacity action, but often a hot soldering iron applied to the various joints long enough to make the solder flow, will clear up the trouble you are experiencing.

All Stations Fade

From the town of Mt. Ayr, Iowa,

Mr. George H. Rains writes as follows: "I have a Philco No. 86 which fades on all stations. I took it to our local service man and had new tubes installed; also a new power transformer and condenser block. All this to no avail as we have evidently failed to locate the trouble. Can you give us some further advice?"

This trouble is a form of intermittent reception, and is about the most difficult thing to cure, and much patience and radio knowledge are required. In your particular set, we would inspect the connections in the trimmer condenser operated from the front panel. Turn the chassis up-side-down. Then make sure that the panel light leads are not being shorted by the tuning condenser.

Next remove the coils from the cans and examine them, looking for broken wires or loose connections. If you will draw a picture diagram before you remove them you will know how to re-install the coils. The speaker plug should also be checked for good contact.

Poor Selectivity

A complaint that seems to be rather universal comes from Joseph Stempel, of Bridgeport, Conn. "My RCA-Victor all-wave model 128 receiver," writes Mr. Stempel. "has very poor selectivity and tone quality. I have checked up on the voltages and get results much less than the socket voltages specified for this set. (From a table submitted by this writer it appears that the voltages are about 25% less than normal). I also notice that the interstation noise usually present is weak."

From the voltages indicated as now prevailing on the tube plates we suggest that you try a new type 6D6 intermediate-frequency tube, regardless of how the present one tests. Also try a new 80 tube. In view however of the total plate current realized, we think your measurements of the 80 plate current must be wrong.

If necessary, try new tubes throughout, particularly the radio-frequency, detector-oscillator and second detector. A re-alignment of this set could help considerably. Do not neglect to check the voltage of the three resistors in the voltage divider. The one that is connected to the high-voltage side is 10,000 ohms and the next two, 5,000 ohms each. There might be an open by-pass condenser. Try shunting the various by-pass condensers with others of approximately the same value. If the trouble clears up when you shunt across one of the condensers that one must be replaced.

Discarding 15-Volt Tubes

"I have a model 30, 9-tube Sonora receiver employing the 15-volt tubes," writes Mr. C. H. Johnson, from Berkeley, Calif., "and I desire to revamp this set so as to take the low-priced standard tubes. I have not been able to secure this information. I also have a 1936 model R-136 Stewart-Warner set and wish to use headphones. Can you tell me how to do this?"

If you wish to go to some trouble and expense you can rewire the Sonora to take modern tubes. The cheapest and best thing to do is to stick to these old tubes or get a new set. The use of new tubes would require a new power transformer, new sockets, new r-f transformers (which you might not be able to get to match the present tuning condenser), and perhaps new resistors. The 15-volt tubes are still available at some mail-order houses.

The headphone adapter advertised in this magazine is the easiest scheme for using head telephones. Otherwise, you can connect the phones across the primary of the output transformer, in series with a 1.0 mfd. condenser. The output tube is the 6F6 in your Stewart-Warner set. The primary leads of the power transformer connect to the plate and

screen grid of the tube. Remove the tube and look down upon the socket. The third terminal to the left of the aligning hole is the plate, while the fourth is the screen. If in doubt, follow the leads from these points to the primary of the output transformer, which you should find mounted on the loud speaker.

A.V.C. Troubles

Mr. S. L. Peters, of Westport, N. S., Canada, is having a lot of trouble. Part of his letter follows. "I had my Victor R-54 set overhauled, but recently when I happened to touch my finger to the base of the antenna coil, red wire, and chassis, the signals were much stronger. There are two other places that, when grounded also, give great increase in volume output. I have placed a make-shift connection to the chassis at this point. I feel sure the trouble is in the A.V.C. circuit as the volume control is not working properly. There is no inter-station noise. The tubes all test satisfactory. It seems that I am not getting all the output I should, and as the serviceman is puzzled I hope RADEX can help me out."

By grounding the red wire, you are cutting out the automatic-volume-control action. In the grid circuit of the A.V.C. tube there are two resistors having a value of 2 megohms and 100,000 ohms. Replace both of these. Check the volume control device, which is a potentiometer of 50,000 ohms. Try a new set of 58 tubes, all at the same time. In the control-grid returns of these tubes there are .05 mfd. condensers—try new ones as an experiment. Originally, the antenna coil was not grounded—if you have better results in the future by doing so, ground it securely. Slightly reducing the filament voltage of the A.V.C. tube might help. A small resistor in its filament circuit will serve. We suggest that you pass these ideas on to your

serviceman. Insist on trying the new tubes mentioned, for tube testers do not always tell the entire story.

Have this service man pay particular attention to those condensers associated with the A.V.C. tubes, particularly to the one connected in the cathode of the tube—it is the one in the condenser block—brown with a red tracer color.

Westinghouse Volume Troubles

From Walter F. Reynolds, of Brockton, Mass., your editor received a trouble complaint about an old model receiver, as follows: "I have a Westinghouse type RA receiver. By running the antenna wire through the coil of this set I can increase the volume considerably. The tuner consists of a vario-coupler and condenser connected together for single tuning. There is a 'tickler' connected to the coupler. What was the original purpose of this tuner?"

The tuner you have was originally for a small three-tube battery receiver. This set was regenerative, the tapped coil being in the plate circuit of the detector and the other in the grid circuit of the same tube. We think that placing the variometer and condensers in series with your antenna will give best results. However, you should experiment until you find the connection best suited to your receiver input and particular antenna. The action you are obtaining is quite similar to the antenna tuner you have described—you are tuning your antenna to the desired frequency.

Philco 16B Slips On S-W

"The short waves do not stay when they are tuned in," advises Mr. Eugene E. Hibshman, of Altoona, Pa., "and it is necessary to get up and turn the tuning knob a bit to get the station back again. This set is a Philco 16-B, 1933 model. The condenser shaft is not loose, and the local dis-

(Continued on page 31)

This and That in the DX WORLD

• • • By CARLETON LORD

PROBABLY the greatest thrill DXing can offer a devotee today is the reception and verification of a foreign station on the broadcast band. To hear and identify a transmitter in some far-away land more than makes up for weary hours at the dials, lost sleep and a barrage of static and noise.

Insinuations of doubting-Thomases to the contrary, foreign reception today is not only possible, but very probable under favorable conditions in most sections of the country.

The history of such reception as we know it today coincides almost precisely with the story of the International DXers Alliance, and much of the credit for current conditions can be given to Charles A. Morrison, founder and president of the I.D.A.

While we can hardly say that the I.D.A. picks up signals from foreign broadcasters and deposits them on the aerials of our collective receivers, few DXers will deny that the reception of these stations has been strongly enhanced by the work of this organization.

Commencing at a time when very little was known about tuning for transmitters from across the oceans, the I.D.A. has been active in distributing information on how and when and where to tune. For the DXers who desired to verify their foreign catches, the I.D.A. did true missionary work among broadcasting officials. Authoritative data on changes in the broadcast spectrum and new stations in distant lands, special programs from hard-to-get transmitters and other important activities have been included in the work of I.D.A. officers and representatives.

Following upon a tribute to the Newark News Radio Club, the pioneer

DX club, we are pleased to dedicate this issue of RADEX to the International DXers Alliance, and to extend our compliments upon the work which they have accomplished. An article by the president, Mr. Morrison, tells an inside-story of how the society was organized and traces its work down to the present. John DeMeyer, Director of the Sixth District, gives an account of his activities in behalf of the club. James T. Spalding, Publicity Director, explains the part which local chapters and supplementary bulletins play in the general scheme. Two prominent foreign members, J. Mercieca and J. L. Sullivan, tell about radio conditions in their respective countries.

Publication Deadlines

Judging from a number of recent communications, some of our readers are not familiar with the times at which each issue of RADEX goes to press. Too often we receive last-minute tips and information which arrive too late to be published in the proper issue.

To simplify, let us assume that we are making up the March issue. For proper consideration and classification, letters and news items for the attention of the Short Wave and DX Editors should reach us not later than January 20th, although last-minute tips may be included in the respective departments if received as late as the 25th. Copy goes to the printer on January 30th, by which date a few items may be squeezed in. Final data about DX specials and station changes may be included up to February 8th, when galley proofs are made up into pages. After then, any information whatsoever will be too late for inclusion in the March issue. These dates may be used in

checking the press deadlines of all other issues.

Attention to this schedule will eliminate the necessity of leaving out many valuable bits of information, as has been the case in the past.

When Readers Write

Periodically, we receive comments from DXers to the effect that the quotations from letters do not contain sufficient information for listeners at large, that readers are not particularly interested to learn that someone has "a verified log of 444 BCB stations, of which PDQ, FOB, COD and XYZ are the best," and why don't we do something about it?

In defense, Your Honor, it is necessary to point out that this particular section of RADEX is dependent entirely upon the contributions of our readers. If we receive a lot of tips on tuning, we print them; if letters merely contain resumes of logs, we print that. It is all pretty much up to the readers themselves, and a possible solution would be for every DXer to write in the type of letter he likes to read. Then there would be something to please everybody.

What we started out to do, however, was to call attention to a letter which seems to be "right down the alley" of the information-seeking commentators. The writer is James L. Black, 2252 Bellfield Ave., Cleveland, Ohio.

"New transmitters for the BCB," he pens, "will be erected at Tananarive, Madagascar; Constantine, Algeria; and Stara Zagora, Bulgaria. The latter will be a relay station, while Constantine will have high power. The new 120-KW PTT transmitter at Marseilles, France, has been heard testing on 749 kcys. Sottens, Switzerland, has been testing their new 100-KW station on 677 kcys, while OKR, Bratislava, Czechoslovakia, 1004 kcys, will jump power from 13.5 KW to 120 KW.

"A new station should now be on the air at Jerusalem, Palestine. They

are scheduled to use 868 kcys with 20 KW and announcements will be made in English, Hebrew and Arabic. A number of new transmitters are scheduled to begin operation shortly in India: VUD, Delhi, 882 kcys, 20 KW is a brand-new station, while new equipment will be installed at VUB, Bombay; VUC, Calcutta; and VUM, Madras.

"A number of unidentified stations are reported: a French-speaking broadcaster on 1020 kcys at 0200 EST; another French-speaking station on 1380 kcys; and a South American on 1055 kcys. Is the former Frenchman Rennes, and is the second one in Indo-China or Shanghai? Still another mystery station was first reported in November by Joe Enz, of Brooklyn, on 700 or 705 kcys. On December 9th, I heard this station QSA5, R7, from 0201 to 0203 EST. After a band recording of "The Star Spangled Banner," they went off the air without any announcement whatsoever.

"Several changes have taken place in the Antipodes: 7NT, Kelso, Tasmania, 7000 watts, has changed from 750 to 710; 3AR, Melbourne, 4500 watts, has changed from 630 to 580; 5CL, Adelaide, 730 kcys, will soon increase its power from 2000 to 7500 watts; and 4YA, Dunedin, has been heard testing its new 10-KW transmitter on 790 kcys.

"WJAY, Cleveland, Ohio, a 500-watt daytime station on 610 kcys, claims to be the first American BCB transmitter of such power to be heard in Africa. Recently they verified a report from the southeast corner of the dark continent."

How about it, Radexers? Is that the kind of reports you want? If so, send them in!

"When A Man Bites A Dog . . ."

"If I heard a South American on the BCB," proclaims Walter C. Birch, 22 Oneida St., East Lynn, Mass., "that is not news. If the SA verifies

my reception, it is a bit of news. But when the SA station verifies my report, states that return postage is not necessary and *returns* my IRC, I think that is news to pass along. LR1, Radio El Mundo, is the station. Reports are most welcome and DXers are requested NOT to send return postage."

"I wrote you last summer," admits Robert Hyland, 216 E. Grand Ave., Springfield, Ohio, "and since then I have heard so much DX that I thought I would write again. So far this season, I have logged 96 stations to bring my total to 658 stations heard and 300 verified. Some of the better catches include LS2, LR3, LR4, LR6, PRB9, HJ3ABH, 2BL, 4QG, JOAK1, Radio Normandie, Bordeaux and several others. While my five-tube Gloritone, Model 26, has rather poor selectivity, it is very sensitive and I can get rather remarkable results in my location. If it were not for natural static, I could boast of a perfect situation for DX. I would like to correspond with anyone using a Gloritone like mine."

"This year has been the worst of the five during which I have been DXing," complains Donald S. Voorhies, 1717 East 19th St., Brooklyn, N. Y. "Static seems to predominate at all times and my verifications so far include but CKCV, CFRC, CKNX, KSAC, WELI, WTMV, KABR and a few others. The 1934-35 season was the best encountered, when I verified 2BL, 3DB, Poste Parisien, Radio Normandie, CP4, CPX, CX26, CFCT, CKOV and quite a few 100-watters on the Coast."

"A new Peruvian station went on the air September 27th," announces Miguel A. Rivera, P.O. Box 480, Hong Kong. "It is OAX4M, Radio Sucre, 1450 keys, and belongs to Luis Suares y Hno., Calle Manuel Candamo, Lima, Peru. For those who are successful in tuning some of the South Americans, here are the addresses of a few stations in Chile: CE94, Radio Chilena Consolidada,

Casilla 627, Santiago; CE81, 840 keys Radio Chilena Consolidada, Casilla 2043, Valparaiso; CE109, 1170 keys, Radio Zenith, Casilla 4059, Valparaiso; CE105, 1050 keys, Radio Valparaiso, Prat 773, Valparaiso; CE120, 1200 keys, Diario "La Union," Casilla 2043, Valparaiso; and CE125, 1250 keys, Radio Wallace, Esmeralda 1111, Valparaiso. Addresses of a few Chinese stations are as follows: XQHB, 274 Rue Maresca, Shanghai; XQHE, No. 9, Route Doumer, Shanghai; XMHC. Radio Sales and Service, 1729 Avenue Road, Shanghai; XQHA, Radio Shanghai, 80 Love Lane, Shanghai; XMHA, 445 Race Course, Shanghai; XHHA, 128 Museum Road, Shanghai; FFZ, Alliance Francais, 193 Avenue Joffre, Shanghai; and XGOW, Hankow Municipal Government, Hankow, China."

From A Shut-In

"Will you please put me in touch with a reliable radio club?" requests Dan Wood, 760 Adams St., Apt. 22, Memphis, Tenn. "As a result of an auto accident, I am in bed most of the time and I have lots of time to write. I would like to correspond with other DXers and will guarantee to answer all letters received. I would especially like to hear from any foreign country, as I have visited many of them in my wanderings. Come on now and give a bed-ridden DXer a break!" All right, Radexers, let's get together and swamp Dan with letters!

"Here is the most ridiculous situation in the realm of radio," offers Jack McLaren, 515 Rathgar Ave., Winnipeg, Man. "Station XEAW is interfering with our local CKY to such an extent as to make reception of CKY positively annoying these nights. Local rumors have it that XEAW has a 500,000 watt transmitter which, as yet, is not using its full power. Anyhow, CKY claims to have been refused permission to change frequency and there you are."

"Pulling in the T.A.'s has been great fun for me so far this season," preambles Donald W. Reynolds, 9 Hudson View Terrace, Newburgh, N. Y. "The results of all of my lost sleep can be summarized as, 'A Week With The Europeans.' On Sunday, November 24th, Radio Budapest was heard between 5:00 and 6:00 p.m., EST. Although one of the most powerful transmitters in Europe, this station has a very weak signal in proportion to the others. Incidentally, DXers trying for HAL should do so in the evening, as reception of the early morning transmissions is almost impossible. Cologne is next on the trip up the dials and is best between 1:00 and 2:00 a.m. Careful tuning brings in Rome on 713 kcys, and reception is possible both in the early evening and morning. At 2:15, EAJ1 comes in on 795 kcys and, providing KGO doesn't over-lap too much, has a good signal for about a half hour. From here, we skip to Berlin on 840, but find that the new XERA makes reception of this station out of the question. At 3:00, Radio Toulouse puts over a weak signal with excess fading.

"The following morning, the old alarm clock goes off at 2:00 and the radio warms up just in time to hear the familiar fanfare of Poste Parisien when they sign on at 2:10. Rennes is heard on 1040 at 2:18, to be followed by Bordeaux at 2:24. On the way up to catch Radio Normandie, a faint signal on 1104 proves to be Naples, Italy.

"Signals are at a peak on November 27th. Frankfurt is heard signing on at 1:00 a.m. on 1195 with an R8 wallop. The program consists of musical selections and makes it easy to obtain data for a report. This seems to be the best of the German stations in the morning.

"Through various sleepless nights, I have sent reports to Budapest. Lyons la Doua, Berlin, Horby, Turin, and Bordeaux. Veries back include Normandie, EAJ1, Poste Parisien,

West Regional, Brussels and Leipzig."

Quantity Versus Quality

In the December issue, we commented upon what seems to be a yearly race between the Courtesy Programs Committees of the various clubs. We suggested that the idea of attempting to schedule the greatest number of specials would work a double hardship on DXer and station alike. The response to this point seems to be entirely one-sided.

"Many of us old-time DXers read your CPC write-up with grins of delight," avers Henry T. Tyndall, Jr., 285 North St., Burlington, Vt. "We are pretty well fed up on the number of useless specials that flood the channels. Just as you say, it seems to be a race for totals with little regard for quality."

"It certainly would be fine for the DXer," states Randolph Hunt, P. O. Box 275, Encinitas, Cal., "if the clubs would agree to cut the number of DXes for next season in half. Also, they might refrain from asking for a special from a station which is on the monthly frequency check schedule, other than asking that the check be dedicated to them.

"The clubs to which I belong have so many DXes that I am bowled over when the lists arrive. I can't decide which programs to listen in on, with the result that I let a majority of them go unreported. I believe that a very small percentage of members can do justice to all of the clubs to which they belong. If a club would limit itself to about 200 special programs a year, it would still be a live-wire organization and members would be able to give proper support to the club as well as the stations."

"In my opinion, the whole field of arranging DX broadcasts will have to be re-organized," asserts Charles A. Morrison, president of the International DXers Alliance, Blooming-

ton, Ill. "The idea of any club arranging several hundred broadcasts and expecting their members to support each and every one is not only futile, but nonsensical. Better have a few broadcasts that will be outstanding and which will be carefully prepared from start to finish. Then, they could be widely publicized and supported in a deserving manner by a majority of club members."

"I am of your opinion that this scheduling of DX programs isn't very exciting to members of our club," writes the president of a prominent club. "In fact, the only specials that interest the BCB boys are the I.D.A. foreign specials."

From Joel H. Armantrout, "The South Georgia Sun-Dodger," 602 E. Magnolia St., Fitzgerald, Ga., comes the following pertinent news items: "T.P.'s far below their 1934 strength, but may pick up later. XEAW now signs off at 2:00 a.m., while XERA is another addition to the list of all-nighters. Others include WNEW, except Mondays, and KFOX, on until 4:00 a.m. XEMO has the best signal here of any of the Mexicans. WKEU advises that they will not verify at all. WHEF is audible here until 8:00 p.m. WWC has never been erected; permit was granted to Wolford Collegé, but has never been acted upon."

Doctor Brinkley Again

"Referring to Dr. Brinkley's letter to Eric Butcher, as quoted in the December issue," greets Robert D. Wade, 3704 Tyler St., Amarillo, Texas, "I do not intend to slam XERA or any individual at any time. However, when any station takes a public-be-damned attitude and relates a story as written to Mr. Butcher, you know where they can go. Any person may send thirty-five cents for some pamphlet or a dollar for a fortune-teller, and the Mexican government won't confiscate the money. About the time KOA comes on with an intelligent news report, they are

covered with QRM from XERA and 'read all about it in my little book for 35c.' The same is true of WWL, whose fine musical programs are blotted out. I think it is about time to find out if reception of WWL and KOA in the South is to be ruined in such a manner."

According to the NNRC bulletin of December 23rd, the manager of XERA has informed CPC Chairman Louis Hahn that the present power of 300,000 watts will be jumped to a million! If conditions are bad now, what will reception be like then?

While XERA and Dr. Brinkley refuse to verify reports, they are perfectly willing to accept technical data from listeners. In fact, they request it. As soon as we heard the station, we wrote to the Doctor, requested a verification and asked for information to be used in our station lists. His reply is interesting:

"The station will not verify programs. We receive between 2000 and 3000 requests a week for verification. This would require quite an extensive department to handle, added expense to us, simply to satisfy a lot of curiosity. If you have time to listen to XERA sometime during the evening, I would appreciate your telling me how its signal compares with WLW, the distance of course being considered."

In other words, we'll take all you will give us, but try and get us to do something for you.

In Puerto Rico

"If anybody figures that my southern position makes reception easy from South America," proclaims Manuel A. Cadilla, P. O. Box 337, San Juan, P. R., "they are entirely wrong. As a matter of fact, the only S. A.'s heard down here regularly are YV6RV, YV1RC, YV3RC, and YV7RMO. Only the strongest Mexicans are heard and but five Cubans come in during the evening. The

dials are populated for the most part by the strong U.S.A. stations, with an occasional signal from CKAC for the only Canadian. If anybody can tell me why I cannot hear any S.A.'s with the exception of the Venezuela stations, even during test programs, I'd appreciate it."

Program Worth Tuning

"I have just completed (successfully) the annual battle for a DX program," greets H. J. McAllister, Announcer, Radio Station KVI, Tacoma, Wash., "and would appreciate a little item in RADEX. The program will run from midnight to 8:00 a.m., PST, on February 26th. This means that we will be on the air continuously for 42 hours. The program will feature dance orchestras in and around Tacoma, an organ recital from the Music Box Theater, and studio talent. A special feature will be the rebroadcasting of any exceptional long-distance telephone calls received. It is possible that the program will be re-broadcast by KGMB and that there will be interstation clowning between KVI and KIRO at Seattle, although this is not definite. As usual, verifications of correct reports will be sent out for return postage."

A program of this nature is certainly worthy of the support and response of DXers everywhere. One outstanding broadcast like this is worth a hundred weekly programs featuring canned music.

Questions and Answers

(Continued from page 25)

tributor tells me there is nothing to be done except turn it in and get a new set. Is there anything that can be done to overcome this difficulty?"

The trouble described is likely due to the heating of the oscillator coils and condensers by some part near them—probably a high wattage resistor. Changing the position of parts is a very difficult task, not to be at-

tempted by any one not fully experienced in such service work. It is not a mechanical slipping of the dial parts.

It is possible that your trouble could be solved by use of a new oscillator tube, new oscillator coils, new oscillator fixed padding and trimmer condensers and new resistors, all associated with the oscillator circuit. Of course, this will cost considerable and perhaps the distributor does not care to do such experimental work. If you take the matter up with the engineering department of the Philco Company, Ontario and C Streets, Philadelphia, Pa., you may easily get permission to return the set to them for repairs. We have not heard of such troubles in the 16-B, and feel sure it is an individual falling on the short-wave bands.

The Short Waves

(Continued from page 21)

nearly every evening with a strong signal from about 1815 to 1845 CST, playing music and calling other stations. JVN is heard well at 11 pm, 2300 CST, on the Overseas Broadcast. I have heard WTR at Albrook Field, Canal Zone, and IS3 at Bolling Field, Va."

"I receive the D-stations the year around on my two-year old Stewart-Warner radio," reports Carl Goulet, Box 195, Dalhousie, N. B. "I wonder if any readers have heard the 100 kw. Paris station yet." Mr. Goulet plans to own a radio broadcasting station and would like to correspond with someone in broadcasting.

A large part of our mail includes

letters from readers who inquire why they fail to receive verifications from certain stations while others have no difficulty getting a QSL from the same station. We quote here a part of a typical letter, and although the writer probably did not realize it, the answer to his problem is included with his own question.

"Some stations that have failed to verify after two to three months are TIEP, CT1AA, HC1FG, LU5CZ, YVQ, HIZ, DJC, and many others. VP2CD, an amateur, refused my CARD and returned it." All these stations are very good at answering listeners' correct reports so the trouble must be the fact that they do not like to read postal cards.

With the Editor

(Continued from page 15)

Cherry & Webb department store which already operates WPRO.

Continental Radio Co., owned by the Scripps-Howard Newspapers, has applied for the assignment of the license of WNOX, Knoxville, Tenn. The station was purchased recently for around \$75,000.

Carl Sylvester, Box 213, Yale, Mich., writes that all of our readers should try to tune in CFCO, Chatham, Ont., on their regular Sunday morning DX broadcasts from 10:15 to 10:45 EST. Items from RADEX are read and discussed. Carl reports that it is a fine program.

A Few "Ifs"

If two stations are on the same frequency and both are strong enough to be received, no set can separate them.

If a station fades badly, noise will rise and fall, even though automatic volume control keeps the level up.

If electrical noise at the antenna is as strong as the signal, no radio can eliminate it.

The First Prize

The winner of the Mystery Contest will be an exceedingly lucky man. The Scott Radio Laboratories have offered to the Grand Winner of this Contest, one of their famous radio receivers.

The Scott set was described in these pages by Mr. Dashiell in the October, 1935, issue. In the last number, January, 1936, R. H. Tomlinson of Port

Chester, New York, described the results he had achieved with his new Scott High Fidelity.

Anyone who reads these two articles will go after this wonderful first prize with might and main.

As we go to press, word comes from the manufacturers of Raytheon tubes that they will award a full replacement set of these famous tubes to one of the contestants.

Change in Frequency Check Schedule

A SWEEPING revision of the monthly frequency check schedule has been announced by the Federal Communications Commission. Advancing the regular series of monitoring tests to the SECOND WEEK of each month, the F. C. C. has also eliminated all Sunday check programs. Of particular interest to DXers is the consolidation of test broadcasts into a more compact schedule, with the result that western stations which formerly transmitted between 6:00 and 8:00 a.m., EST, may now be heard before sunrise in the eastern states.

RADEX is indebted to the NNRC and NRC for the following complete schedule, and it is suggested that readers keep this list for future reference.

Monday Mornings			
February 10			
2:00-2:20	WLNH 1310	Laconia, N. H.	
	WJBO 1420	Baton Rouge, La.	
2:10-2:30	WBRB 1210	Red Bank, N. J.	
	WHBB 1500	Selma, Alabama	
2:20-2:40	WMAS 1420	Springfield, Mass.	
	WIOD 1300	Miami, Fla.	
2:30-2:50	WWRL 1500	Woodside, N. Y.	
	WJBW 1200	New Orleans, La.	
2:40-3:00	WOKO 1430	Albany, N. Y.	
	WMBR 1370	Jacksonville, Fla.	
2:50-3:10	WCAX 1200	Burlington, Vt.	
	WOPI 1500	Bristol, Tenn.	
3:00-3:20	KTRH 1290	Houston, Texas	
	WMBO 1310	Auburn, N. Y.	
	WNRA 1420	Sheffield, Ala.	
3:10-3:30	WOC 1370	Davenport, Ia.	
	WCAD 1220	Canton, N. Y.	
	WMFN 1210	Clarksdale, Miss.	
3:20-3:40	KWLC 1270	Decorah, Iowa	
	WMBQ 1500	Brooklyn, N. Y.	
	KNBR 1430	Memphis, Tenn.	
3:30-3:50	WFPV 1210	Fort Smith, Ark.	
	WMFF 1310	Plattsburg, N. Y.	
	WDBO 580	Orlando, Fla.	

3:40-4:00	KABC 1420	San Antonio, Tex.
	WQDM 1370	St. Albans, Vt.
	WSMB 1320	New Orleans, La.
3:50-5:10	KADA 1200	Ada, Okla.
	WHEF 1500	Kosciusko, Miss.
4:00-4:20	KFDM 560	Beaumont, Tex.
	WCAP 1280	Asbury Park, N. J.
	KLS 1440	Oakland, Cal.
	WAGF 1370	Dothan, Ala.
4:10-4:30	WHDL 1420	Olean, N. Y.
	KCRJ 1310	Jerome, Ariz.
	KMLB 1200	Monroe, La.
4:20-4:40	KLUF 1370	Galveston, Tex.
	WDEF 550	Waterbury, Vt.
	KGDM 1100	Stockton, Calif.
	WDNC 1500	Durham, N. C.
4:30-4:50	KROC 1310	Rochester, Minn.
	WFAS 1210	White Plains, N. Y.
	KGAR 1370	Tucson, Ariz.
	KALB 1420	Alexandria, La.
4:40-5:00	KGMB 1320	Honolulu, T. H.
	WBNO 1200	New Orleans, La.
	KRE 1370	Berkeley, Calif.
4:50-5:10	WJBR 1420	Gastonia, N. C.
	KIEM 1450	Eureka, Calif.
	WGCM 1120	Gulfport, Miss.
5:10-5:30	KDON 1210	Del Monte, Calif.
	WTAL 1310	Tallahassee, Fla.
5:20-5:40	KUMA 1420	Yuma, Ariz.
5:30-5:50	KWG 1200	Stockton, Calif.

Tuesday Mornings February 11

2:00-2:20	WBAX 1210	Wilkes-Barre, Pa.
2:10-2:30	WDAS 1370	Philadelphia, Pa.
2:20-2:40	WBBL 1210	Richmond, Va.
2:30-2:50	WFBG 1310	Altoona, Pa.
2:40-3:00	WMBG 1210	Richmond, Va.

	WFDF	1310	Flint, Mich.	5:50-6:10	KXRO	1310	Aberdeen, Wash.
				6:00-6:20	KGY	1210	Olympia, Wash.
					KINY	1310	Juneau, Alaska

The February DX Calendar

Special programs arranged by the stations for the benefit of distant listeners. The list of F. C. C. frequency check programs in detail may be found in the December issue. All times are in Eastern Standard in order that the programs may be arranged chronologically.

Sunday Mornings

February 2			
2:00- 3:00	CJLS	1310	Yarmouth, N.S. NNRC
2:00- 4:00	CHAB	1200	Moose Jaw, Sask. NNRC
2:00- 4:00	WMMN	890	Fairmont, W. Va.
3:00- 4:00	CHSJ	1120	St. John, N.B. NRC
3:00- 4:00	XEFL	1150	Tijuana, L.C. URDXC
3:00- 6:00	FCC		Frequency Check

February 9

1:00- 2:00	CMKC	1250	Santiago, Cuba URDXC
1:00- 2:00	KGGC	1420	San Francisco, Cal.
2:00- 3:00	KIUN	1420	Pecos, Texas
2:30- 4:30	KID	1320	Idaho Falls, Idaho NNRC
3:00- 4:00	KFRO	1370	Longview, Texas NNRC
3:00- 5:00	CFFT	1450	Victoria, B.C. CDXR
3:00- 5:00	WEEU	830	Reading, Pa.
4:00- 5:00	CFJC	880	Kamloops, B. C. NNRC
4:00- 6:00	KVOL	1310	Lafayette, La. CDXR
4:00- 6:00	WTRC	1310	Elkhart, Ind.

February 16

1:00- 1:30	WICC	600	Bridgeport, Conn. CDXR
1:00- 2:00	WHAZ	1300	Troy, N. Y. UDXC
1:00- 5:00	CMBX	1380	Havana, Cuba UDXC
2:00- 3:00	WPFB	1370	Hattiesburg, Miss. NNRC
2:30- 3:30	KFRO	1370	Longview, Texas CDXR
3:00- 4:00	KGW	620	Portland, Ore. CDXR
3:00 on	KVI	570	Tacoma, Wash.
4:00- 5:00	CHML	1010	Hamilton, Ont. CDXR
4:00- 5:00	WGBF	630	Evansville, Ind. CDXR
4:00- 6:00	WTRC	1310	Elkhart, Ind.

February 23

WHAT'S ON THE AIR TONIGHT

Fill in calls and dial numbers for those stations through which you best receive the three chains. You can then turn quickly to the one that has the feature you want.

COLUMBIA (C)	
Call	Dial

NATIONAL, Red (R)	
Call	Dial

NATIONAL, Blue (B)	
Call	Dial

TIME: E Eastern; C Central; M Mountain; P Pacific

RADEX is the only publication listing stations in alphabetical order for your convenience.

While these programs are correct at the time of going to press, changes are made from time to time.

KEY TO SYMBOLS

As Shown In the Index by
Frequencies and Dial Numbers

Frequency is given in kilocycles; wavelengths in meters. Night power is shown in watts in third column. Daytime power is shown in parenthesis in fourth column in kilowatts, thus (.25) indicating 250 watts. Some stations outside the United States use a "split frequency." Their exact frequency is shown in fourth column.

- Second Column Symbols**
- a Verifies reception for return postage.
 - b Verifies only occasionally.
 - c Does not verify.
 - d Verification 10c; letter 25c.
 - e Sends Ekko stamp for 10c.
 - f Sends Ekko stamp for 5c.
 - g Sends Ekko stamp for postage.
 - h Sends own station stamp for 10c.
 - Sends own station stamp for 5c.
 - Sends own station stamp for postage.

- k Has no stamps.
- m Verifies for 5c.
- n Weather or time only.
- z No information available.

- Fourth Column Symbols**
- B National "Blue" network.
 - C Columbia network.
 - D Day time only.
 - Dn Day time with occasional evening hours.
 - F Canadian Radio Brdstg. Commission.
 - N National "Red" and "Blue"

- networks.
 - P Has construction permit only.
 - R National "Red" network.
 - S Sunday only.
 - Sy Synchronized.
 - X Has permit to increase power.
 - Y Has permit to change location.
 - Z Has permit to change frequency.
- a-b-c. Small letters show stations using same transmitter.
1-2-3. Figures denote stations sharing time.
..... No information.

Time on the Air

The time is given in accordance with the "24-hour clock." Noon is always 12:00, but midnight may be either 0:00 or 24:00. To change to time of your own clock, subtract twelve. Thus, 18:00-24:00 is 6:00 p. m. to midnight. 23:00-0:30 is 11:00 p. m. to 12:30 a. m. A signifies Atlantic Standard Time (AST). E is Eastern Standard Time (EST). C is Central Standard Time (CST). P is Pacific Standard Time (PST). L is Local Standard Time (LST).

NORTH AMERICAN B. C. STATIONS BY LOCATIONS

Frequency in kilocycles in second column. Night power in watts in third column. Net work affiliations in fourth column: C Columbia, R National Red, B National Blue, N National Red and Blue. F Canadian.

An up-to-the-minute list of South American stations has just been received. There are many changes in the broadcasters of Chile, Argentina and Brazil. Our March issue will therefore contain new indices of the foreign stations on the broadcast band.

If you desire to tune in foreign stations you must be able to convert their time into your own quickly. Here is a device that does it for you without pencil and paper or mental effort.

RADEX RADIO MAP of the WORLD

Showing all Countries and their Principal Cities
with Call Letters and Time Zones of each Country

RADEX
TIME CONVERTER

Designed and Published
by
THE RADEX PRESS
3005 Euclid Avenue
Cleveland, Ohio
Printed in the U. S. A.

PRICE
25¢

DIRECTIONS—Turn the dial here, either A.M. or P.M., in the sector marked "TODAY" opposite your own zone, and the correct time in all other zones in the world will be shown. It will also be indicated which of the other zones are "Yesterday" and which are "Tomorrow." The position of twilight, darkness and dawn is graphically shown. Or, if you desire to tune in a New Zealand program, turn the hour of the program (say 9:00 a.m.) to the New Zealand sector and you will find that it is 4:30 A.M. same day in Eastern Standard Zone or 11 P.M. yesterday in Hawaii.

Copyright 1952
© THE C. BURR

Just turn the dial to the time in your zone and—Presto: Change—there is the time for every other place in the world.

No adding; no subtracting; no trying to figure which is yesterday, today or tomorrow. The dial does it all.

Big map of the world showing all principal cities and their time zones.

Only a Quarter Postpaid to any country.

Write Name Plainly

Street and Number

City and State

Sometimes I think there ought to be a law to make everyone do a little studying every week. I didn't think that a year ago because it looked like all the cards were stacked against me. But I am surely making good money now. Maybe my story will show you the way to larger earnings also.

I THOUGHT RADIO WAS A PLAYTHING

But Now My Eyes Are Opened, and I'm Making Over \$40.00 a Week!

\$40 a week! Man alive, a year ago I thought anyone making so much was just plain lucky.

Twelve months ago I was just barely getting by. It was the same old story—a little job; a salary as small as the job.

If you had told me that twelve months later I would be making \$40 a week in my own Radio business—I'd thought you were crazy.

But I am getting ahead of my story—let me tell you how it all started. I was hard up a year ago because I had been kidding myself—that's all—not because I had to be. I thought a fellow either had to be lucky or have a string of college degrees to make good money.

One day I picked up a magazine and an ad attracted me because it seemed to fit my case. It said "I will show you how to start a spare time or full time Radio service business of your own WITHOUT CAPITAL."

"They're trying to kid somebody," I thought, "but I'll find out what it's all about."

I wrote in and within a few days received a 64-page book telling about the opportunities in Radio, how I could prepare right at home in my spare time, and how they would show me how to start making money in my neighborhood selling and repairing Radio sets. It would have sounded too good to be true if the promises had not been backed up by nearly 100 letters from fellows who had taken their course and were very enthusiastic about it.

What has happened since seems almost like a dream. I started to take their course and soon I was ready to start making money in my neighborhood—as much as \$5 and \$15 a week. It wasn't long until I had saved enough money to start a little business of my own.

That business has since grown to the point where I am clearing an average of \$40 a week. All this took place under the watchful guidance of my friends at the National Radio Institute. They also offered to train me for other lines. Broadcasting Stations, Radio Manufacturers, Operating on Board Ship, Servicing Sets, Aviation Radio, Television, Short Wave, Automobile and Police Radio, Loud Speaker Systems are other fields their training covers. And to think, until the day I wrote for that book, I'd been wailing, "I never had a chance and will never have one because I have no pull or a good education!"

Friend—you may not be as bad off as I was—

but think it over—are you satisfied? Are you making as much money as you need? Would you sign a contract to stay where you are for the next ten years at the same salary? Those are the things you have to think about—because no one is going to make it his business to push you ahead—you must make it your own business.

Take my tip—write for their book, "Rich Rewards in Radio." It won't cost you anything except a postage stamp. It shows you a lot of things which I don't believe you know now about Radio—a lot of facts and figures on the opportunities in this new, fast-growing field. Where the jobs are, what they pay, how to get ready for them. Beginners as well as experienced men are making as much as \$500 to \$1,500 a year more as a result of N.R.I. training. And at the same time they send the book "Rich Rewards in Radio" they'll send you, without any cost or obligation, a Free Lesson to prove that their training is easy, practical, fascinating. The lesson they send "Radio Receiving Troubles—The Cause and Remedy" is valuable. And when you see how simple this lesson is to understand you'll know why many fellows with less than a grammar school education have mastered N.R.I. training and are now making good money as Radio Experts.

You are not placing yourself under any obligation by writing for this material as they will gladly send it to anyone who is ambitious and wants to get ahead. Mail the coupon in an envelope or paste it on a 1c postcard. Just address Mr. J. E. Smith, President, National Radio Institute, Dept. 6B0, Washington, D. C.

J. E. SMITH, President,
National Radio Institute
Dept. 6B0, Washington, D. C.

Dear Mr. Smith:

Without obligation, send me the sample lesson and your free book about spare time and full time Radio opportunities, and how I can train for them at home in spare time. (Please print plainly)

Again... MIDWEST RADIO

Proves Its Leadership!

with a
MARVELOUS NEW

14-Tube

**FIVE WAVE BAND,
WORLD WIDE SET
9 TO 2400
METERS**

**DEAL DIRECT WITH LABORATORIES
SAVE UP TO 50%**

ONCE again, Midwest demonstrates its leadership by offering the world's most powerful Super DeLuxe 14-METAL Tube 5-band radio. It is a master achievement... today's most highly perfected, precisely built, laboratory adjusted set. It is a radio-musical instrument that will thrill you with its marvelous super performance... glorious new acousti-tone... crystal-clear "concert" realism... and magnificent foreign reception. Before you buy any radio, write for FREE 40-page 1936 catalog. Learn about the successful Midwest Laboratory-To-You policy that saves you 30% to 50%... that gives you 30 days FREE trial. This super radio will out-perform \$100 and \$200 sets on a side by side test. It is so powerful, so amazingly selective, so delicately sensitive that it brings in distant foreign stations with full loud speaker volume, on channels adjacent to powerful locals. The 14 tubes permit of advanced circuits, make it possible to use the tremendous reserve power, and to exert the sustained maximum output of the powerful new tubes.

50 SENSATIONAL ADVANCEMENTS

Scores of marvelous Midwest features, many of them exclusive, explain Midwest glorious tone realism, super performance and thrilling world-wide 5-band reception. They prove why nationally known orchestra leaders like Fred Waring, George Olsen, Jack Denny, etc., use a Midwest in preference to more costly makes. Five tuning ranges make it easy to parade the nations of the world before you. You can switch instantly from American programs... to Canadian, police, amateur, commercial, airplane and ship broadcasts... to the finest and most fascinating programs from Europe, Africa, Asia, Australia South America... 12,000 miles away.

Acousti-Tone V-Spread Design (U. S. Design Patent No. 96750)

The V-Front Dispersing Vanes established a new radio style overnight. They spread the beautiful lace-work of the "high" throughout the room in a scientific manner... directing the High Fidelity waves uniformly to the ear. Get complete range of audible frequencies... achieving glorious new acousti-tone... assuring life-like crystal-clear "concert" realism. No middlemen's profits to pay. You buy at wholesale prices, direct from Laboratories... saving 30% to 50%. You can order your 1936 Midwest radio from the new 40-page catalog with as much certainty of satisfaction as if you were to come yourself to our great laboratories. You save 30% to 50%... you get 30 days' FREE trial... as little as \$5.00 down puts a Midwest radio in your home. Your are triply protected with a One-Year Guarantee, Foreign Reception Guarantee, Money-back Guarantee.

Ted Weems Enthusias Over Foreign Reception

"After comparing many radios, I can truthfully say that my Midwest out-performs other sets costing almost twice as much. In all my experience, I have never heard such life-like reproduction. My Midwest surpasses all my expectations, and in my opinion, is the finest radio receiver obtainable." **Ted Weems.**

Send for FREE 40-page four-color catalog. It pictures the complete line of beautiful 1936 Midwest Acousti-Tone V-Spread consoles and chassis... in their natural colors.
