
EDUCATIONAL RADIO A PUBLIC SERVICE

By

J. KENNETH JONES

Director of Information

Federal Radio Education Committee

A SMALL coin—suppose we say a penny—held close enough to the eye, will obscure the noblest works of God and man.

Pennies need perspective.

Similarly, a considerable amount of perspective would seem to be necessary in the matter of achieving education through radio in the United States.

On all sides of this question we see exhibited the tendency to allow the trees to obscure the forest. Broadcasters here and there, making time available for what is euphemistically known as “educational programs,” are likely to feel that, judged by entertainment values, designed to intrigue and hold listeners, the quality of the productions sponsored by educational groups is extremely low. Certainly under these circumstances, we can understand if the broadcaster concludes that the actual achievement of education through radio is a questionable quantity. His approach is purely pragmatic. He points out that he has made the time and the facilities of his station available for educational purposes, but he sincerely questions the actual achievement of any important degree of education because of the low quality of many programs from a show business angle. He is, basically, a showman, and his values are those of show business.

The educator, on the other hand, has an entirely different approach to this question. First, he points out, the broadcaster is not interested in education, and certainly the majority of the programs which he airs cannot be considered educational. For the life of him he cannot understand why the average radio listener should not be interested in the gems of enlightenment and culture which he is all too ready to impart. He does his best, he points out, to present listenable programs, but his resources are limited.

If the foregoing is the bird’s eye view which we get when we look at radio in the United States today, then certainly we need perspective.

It is true that there is a certain super-

ficial conflict of interests between broadcasters and educators, but this conflict is, let it be repeated, superficial. Under the surface there is a basic philosophy within which there can be no conflict between broadcasters and educators. As a matter of fact, these two groups will be working together through the year 1940 as never before in a cooperative effort through which, we dare to hope, there will be evolved the American system of education through radio.

Let us examine briefly the basic philosophy which underlies the American system of broadcasting. The American way is to encourage the individual toward the fullest self-expression, and one of the major responsibilities of American education is to guide that self-expression into constructive channels.

Broadcasters are members of that small group of our national community which has found self-expression through the administration of radio. Further, our national philosophy is dedicated to the principle that many natural resources need not and should not become Governmental monopolies, but that they may and should be administered privately and for legitimate profit, so long as that administration remains in the public interest, convenience, and necessity.

Broadcasters then, enjoy the privilege of administering the great natural resource of radio, but as an accompanying condition they are obliged to accept the responsibility of insuring that their administration remains at all times in the public interest.

Translated into more concrete terms this means that a certain number of their broadcast periods should be devoted to what may be designated as “public service” broadcasting. The need for these safeguards is intrinsic in radio in that it touches all of the people, and we hardly need explore the point further.

Now certainly programs which are designed to achieve or which do achieve public enlightenment along constructive and desirable lines may be considered as serving a public need, and hence, in airing them, the broadcasters are conducting

their operations in the public interest, convenience and necessity.

Broadcasters sometimes overlook the fact, however, that educators are constantly rendering them a vital service. As U. S. Commissioner of Education John W. Studebaker has pointed out in a year's end report to the Federal Communications Commission:

"In the kindergarten, the elementary school, the secondary school, the college, the university—from the rostrum, the forum platform, and at the table around which a discussion group may gather, educators are today, and for years have been upholding and inculcating an appreciation of the American way of life and especially of the basic necessity of freedom to learn. In doing so they have increased the understanding of the need for a system of broadcasting free from the compulsion of censorship."

It is quite apparent therefore that broadcasters and educators have mutual and vital interests. Through his activity the educator is perpetuating the American system, within which the broadcasters enjoy the privilege of administering their property with a minimum of Governmental interference or control. On

the other hand, the broadcaster offers the educator a powerful instrument for achieving the education which is designed to maintain and strengthen the entire American system—a fundamental aim of American education. That there is a mutual recognition of these facts is evident in the program of the Federal Radio Education Committee. This Committee, jointly composed of broadcasters and educators, and appointed by the Federal Communications Commission, is now in the midst of a program aimed at bringing about effective cooperation between broadcasters and educators.

It is carrying forward a series of thirteen exhaustive studies, upon the findings of which sound steps may be planned. Meanwhile, it is promoting the development of sound technics through a Service Division. Finally it seeks to interpret this evolution in American radio to the American people so that it may have their understanding and support.

The eventual result of this cooperative effort may be the emergence of the American plan for education through radio which will be an integral and an accepted part of the American system of broadcasting.

Non-Commercial Educational Broadcast Stations

(As of January 1, 1940)

The term "non-commercial educational broadcast station" means a station licensed to an organized non-profit educational agency for the advancement of its educational work and for the transmission of educational and entertainment programs to the general public. Such stations operate on not less than 100 watts and not greater than 1000 watts unless a definite need for greater power is shown and such stations must furnish a non-profit and non-commercial broadcast with no sponsored or commercial programs.

Licensee and Location	Call Letters	Frequency (Kc)	Power
Board of Education, City of New York, Brooklyn, N. Y.	WNYE	41100	500 w
Cleveland City Board of Education, (Charles H. Lake, Superintendent) Cleveland, Ohio	WBOE	41500	500 w
Pending Application			
Board of Education of San Francisco Unified School District, Civic Auditorium Bldg., 22nd & Bartlett Sts., San Francisco, Calif.	not assigned	41300	1000 w
Pacific States University, 1117 Venice Blvd., Los Angeles, Calif.	not assigned	41300	1000 w
San Mateo Junior College District, San Mateo, Calif.	not assigned	41060	100 w
University of Kentucky, Lexington, Ky., (Transmitter: High School Bldg., Beattyville, Ky.)	not assigned	41900	100 w

F. C. C. Regulations Regarding Non-Commercial Educational Broadcast Stations

The term "non-commercial educational broadcast station" means a station licensed to an organized non-profit educational agency for the advancement of its educational work and for the transmission of educational and entertainment programs to the general public.

Operation and Service

The operation of, and the service furnished by, non-commercial educational broadcast stations shall be governed by the following regulations:

(a) A non-commercial educational broadcast station will be licensed only to an organized non-profit educational agency and upon a showing that the station will be used for the advancement of the agency's educational program particularly with regard to use in an educational system consisting of several units.

(b) Each station may transmit programs directed to specific schools in the system for use in connection with the regular courses as well as routine and administrative material pertaining to the school system and may transmit educational and entertainment programs to the general public.

(c) Each station shall furnish a non-profit and non-commercial broadcast service. No sponsored or commercial program shall be transmitted nor shall commercial announcements of any character be made. A station shall not transmit the programs of other classes of broadcast stations unless all commercial announcements and commercial references in the continuity are eliminated.

Power Requirements

The operating power of non-commercial educational broadcast stations shall be not less than 100 watts or greater than 1000 watts unless a definite need for greater power is shown.

The transmitter of each non-commercial educational broadcast station shall be equipped with automatic frequency

control apparatus so designed and constructed that it is capable of maintaining the operating frequency within plus or minus 0.01 percent of the assigned frequency.

Non-commercial educational broadcast stations are not required to operate on any definite schedule or minimum hours.

The transmitting equipment, installation, and operation as well as the location of the transmitter shall be in conformity with the requirements of good engineering practice as released from time to time by the Commission.

Frequencies Allotted

The following frequencies are allotted for assignment to non-commercial educational broadcast stations:

41,020 kc	41,060 kc	41,100 kc	41,140 kc
41,180	41,220	41,260	41,300
41,340	41,380	41,420	41,460
41,500	41,540	41,580	41,620
41,660	41,700	41,740	41,780
41,820	41,860	41,900	41,940
41,980			

Stations serving the same area will not be assigned frequencies separated less than 160 kilocycles.

Amplitude modulation shall be employed exclusively unless it can be shown that frequency modulation will better serve the purpose of the station in which case such modulation may be authorized provided sufficient frequencies can be grouped so as to obtain the required band width without causing interference to established stations or preventing the full expansion of the service.

Only one frequency will be assigned to a station.

COLLEGES AND UNIVERSITIES IN THE UNITED STATES OFFERING COURSES IN RADIO BROADCASTING

As of January 1st, 1940

With Names of Instructors and Credit Hours

*Compiled by the Director of Research, Federal Radio Education
Committee, U. S. Office of Education, Federal Security Agency,
Washington, D. C.*

On September 30, 1938, the Educational Radio Script Exchange, of the Office of Education, mailed a questionnaire to the 1,686 colleges and universities in the United States asking for information regarding specialized courses in the field of radio. Replies were received from 916 institutions. A total of 310 institutions reported at least one regular course in radio. In August 1939, the 916 institutions which responded to the first questionnaire were asked to re-check and correct their previous information concerning radio courses. The list that follows is the result of the rechecking survey. The following code should be used to interpret the listings in this survey, the courses being indicated by letters as follows: (A) General Course in Radio, (B) Radio Program Planning and Production, (C) Education by Radio, (D) Radio Script Writing, (E) Radio Announcing (F) Radio Speech, (G) Radio Dramatics, (H) Radio Music, (I) Radio Station Management, (J) Radio Advertising, (K) Technical Courses in Radio, (L) Television, and (M) Radio Law.

Whenever credit hours were reported for any course, the number of hours will be found bracketed with the identifying letter of that particular course. For example, (D-2) (E) indicates a course in Radio Script Writing for which 2 credit hours are given and a course in Radio Announcing for which no credit hours were reported. The symbol (F and G-4) signifies that a course involving both Radio Speech and Radio Dramatics is offered with 4 hours of credit given. The symbol (K-varies) means that technical courses in radio are available for which credit hours vary. Included with each listing will be found the name of an instructor who is in charge of radio instruction. These persons should be consulted for further information. The asterisk before the name of the institution indicates that the school has its own broadcasting station and equipment.

College	In Charge of Radio
Abilene Christian College, Abilene, Tex. (D & F-3)	Mrs. A. B. Morris
Akron, University of, Akron, Ohio. (F-3)	O. A. Hitchcock
Alabama University of, University, Ala. (A) (D) (E) (F) (K)	Clyde B. Crawley
Alabama College, Montevallo, Ala. (A-2)	Nora Landmark
Alabama Polytechnic Institute, Auburn, Ala. (A-2) (K-varies)	Woodrow Darling
Alliance Technical Institute, Cambridge Springs, Pa. (A-3)	F. Kowalko

Antioch College, Yellow Springs, Ohio. (K-6).....	C. D. Barbulesco
Arizona, University of, Tucson, Ariz. (K-3).....	R. G. Picard
Arkansas, University of, Fayetteville, Ark. (K-3).....	C. W. Janes
Armour Institute, 3300 Federal Street, Chicago, Ill. (K-4) (L-4).....	A. W. Sear
Asheville Normal and Teachers College, Asheville, N. C. (A).....	Hazel Gebbany
Augustana College, Rock Island, Ill. (A-3) (G).....	Theodor Le Vander & Ruth Robinson
Augustana College, Sioux Falls, S. Dak. (F) (G) (E) (H).....	Hugo A. Carlson
Aurora College, Aurora, Ill. (B-2).....	J. Floyd Morris
Bard College, Annandale-on-Hudson, N. Y. (K & L-8) (A-8).....	Harold Hughes
Baylor University, Waco, Tex. (A-3 1/3).....	Sara Lowrey
Berry College, Mt. Berry, Ga. (K-2).....	L. E. McAllister
Birmingham Southern College, Birmingham, Ala. (A-3).....	Dr. M. F. Evans
Blue Ridge College, New Windsor, Md. (G).....	Mme. Barry-Orlova
Bob Jones College, Cleveland, Tenn. (B-2).....	Elizabeth Adams
Boston College, Chestnut Hill, Mass. (K-8).....	Rev. John A. Tobin
Boston University College of Business Administration, Boston, Mass., (B-2) (D-2) (F-2) (G-2) (J-2).....	Ralph L. Rogers
Bradley Polytechnic Institute, Peoria, Ill. (A-2) (F-2) (K-3).....	F. E. Duce
Branch Agricultural College, Cedar City, Utah. (E-5).....	R. L. Halverson
Brigham Young University, Provo, Utah. (A-2) (D-2) (G) (H) (I) (J).....	Dr. T. Earl Pardoe
Bucknell University, Lewisburg, Pa. (K-3).....	George A. Irland
Butler University, Indianapolis, Ind. (F-3) (K-6).....	L. Gray Burdin
California, University of, Extension Division, Los Angeles, Calif. (B) (D) (G).....	Margaret Wotten
California, Institute of Technology, Pasadena, Calif. (K-18).....	S. S. Mackeown
California Polytechnic Junior College, San Luis Obispo, Calif. (A-3) (H-2) (K-6).....	B. G. Eaton
Canisius College, Buffalo, N. Y. (A-2) (D-2).....	Charles E. Brady
Capital University, Columbus, Ohio. (B-3).....	Prof. W. C. Craig
Carnegie Institute of Technology, Pittsburgh, Pa. (K).....	Charles Williamson
Carroll College, Waukesha, Wis. (F-2) (K).....	V. P. Batha
Carson Newman College, Jefferson City, Tenn. (A-3).....	Alex Chavis
Case School of Applied Science, Cleveland, Ohio. (K-12).....	J. R. Martin
Catholic University, Washington, D. C. (D-2) (E-2) (G-2).....	Rev. G. V. Hartke
C. C. N. Y. School of Technology, New York, N. Y. (A-3) (K-3).....	Alexander H. Wing, Jr.
Centenary Junior College, Hackettstown, N. J. (A-1).....	Ellen C. Crouch
Chicago, University of, Chicago, Ill. (A-3 1/3) (D-7) (F-3 1/3).....	Charles Newton
Chicago Musical College, Chicago, Ill. (A) (B) (C) (D) (E) (G) (H).....	Belle Forbes Cutter
Chicago School of Expression and Dramatic Art, Chicago, Ill. (A) (B) (D) (E) (G).....	Helen C. Espie
Chicago Teachers College, Chicago, Ill. (C-2) (D-3).....	Luella Hoskins
Cincinnati, University of Cincinnati, Ohio (D-4) (J-2) (K-varies) (L) (M-4).....	W. C. Osterbrock
Cincinnati College of Music, Cincinnati, Ohio. (B-4).....	Uberto Neely
Cincinnati Conservatory of Music, Cincinnati, Ohio. (A) (D) (G).....	Hubert Kockritz
Citadel, The, Charleston, S. C. (A-6).....	N. F. Smith
Clarkston College, Potsdam, N. Y. (K-varies).....	J. L. Stiles
Clemson College, Clemson, S. C. (K-2).....	Prof. A. B. Credle
Coe College, Cedar Rapids, Iowa. (A-2) (F).....	J. Dale Welsch
College of St. Scholastica, Duluth, Minn. (A-1).....	Sister Bernard
College of St. Teresa, Winona, Minn. (B) (C) (H).....	Sister M. Marceline
College of Wooster, Wooster, Ohio. (A-4).....	Earl W. Ford
Colorado College, Colorado Springs, Colo. (K-8).....	Howard Olson
Colorado School of Mines, Golden, Colo. (K-6).....	Myron G. Pawley, Raymond Dickinson
Colorado State College, Fort Collins, Colo. (A-3).....	Frank P. Goeder, Ph.D.
Colorado State College of Education, Greeley, Colo. (A-4).....	F. L. Herman
Columbia College of Drama and Radio, Chicago, Ill. (A) (B-2) (C) (D-2) (E-2) (F-2) (G-4).....	Norman Alexandroff
Columbia University, New York, N. Y. (A-2) (D-3).....	James C. Egbert
Compton Junior College, Compton, Calif. (K-5).....	Jesse E. Hathaway
Connecticut State College, Storrs, Conn.	Dr. R. B. Corbett
Cornell College, Mount Vernon, Iowa. (A-3) (B-3).....	Albert Johnson
Cornell University, Ithaca, N. Y. (A-2) (K-4).....	Chas. A. Taylor

Cornish School, The, Seattle, Wash., (A-3) (B--2) (D-2) (E-2) (F-2) (G-3) (I) (J-3) (M)	Donald MacLean
Creighton University, Omaha, Nebr. (B-3) (D-3)	Edwin Puls
Cummock Junior College, Los Angeles, Calif. (F)	Josephine Dillon
Davidson College, Davidson, N. C. (K-4)	F. L. Jackson
Dayton, University of, Dayton, Ohio. (G) (K-3)	Prof. Louis Rose
Denison University, Granville, Ohio. (A-3)	Richard H. Howe
Denver, University of (School of Commerce), Denver, Colo. (B-2½) (D-2½) (F-2½)	Roscoe K. Stockton
Detroit, University of, Detroit, Mich. (A-2) (F)	E. A. McFaul
Doane College, Crete, Nebr. (A-4) (B) (G)	Dr. E. Russell Wightman
Dodd College, Shreveport, La. (A-3)	(not known)
Drake University, Des Moines, Iowa, (A-2) (B-2) (D-4) (E) (G-2) (I-3) (J-2)	Edwin G. Barrett
Note: Drake offers a major in radio.	
Drexel Institute of Technology, Philadelphia, Pa. (K)	R. T. Zern
Dubuque, University of, Dubuque, Iowa. (A-4) (K-4)	R. G. Wilson
Duke University, Durham, N. C. (K-3)	W. J. Seeley
Duquesne University, Duquesne, Pa. (A-3)	Madeleine S. Foust
East Central Teachers College, Ada, Okla. (A-2)	D. J. Nabors
Eastern Washington College of Education, Cheney, Wash. (K-2)	James S. Lane
Elmira College, Elmira, N. Y. (F)	Geraldine Quinlon
Emerson College, Boston, Mass. (A-3) (D-2) (E-2) (G-2)	Arthur F. Edes
Emory University, Emory University, Ga. (A-5) (K)	J. B. Peebles
Emporia, College of, Emporia, Kans. (A-4)	R. F. Miller
Florida, University of, Gainesville, Fla. (F-3) (K-varies)	Garland Powell
Florida Agricultural and Mechanical, Tallahassee, Fla. (A-2) (K-4)	H. R. Orr
Florida Southern College, Lakeland, Fla. (A-1)	Miss Alma Johnson
Fort Hays Kansas State College, Hays, Kans. (A-3)	Harvey A. Zinszer
Frances Shimer College, Mount Carroll, Ill. (D-2) (G-3)	George E. Hoffman
Franklin University, YMCA, Columbus, Ohio. (A) (K)	E. E. Dysart
Friends University, Wichita, Kans. (B-2) (E-1) (G) (K-5)	Irene Vickers Baker
George Peabody Teachers College, Nashville, Tenn. (E-2)	A. L. Crabb
George Washington University, Washington, D. C. (A-3) (K)	Prof. W. Hayes Yeager
Georgetown University, Washington, D. C. (A) (M-2)	P. J. Donovan
Georgia, University of, Athens, Ga. (D & E-5)	Prof. Edward C. Crouse
Georgia School of Technology, Atlanta, Ga. (A-3) (D & F-3) (K-3)	Irving H. Gerks
Gila Junior College, Thatcher, Ariz. (A-3) (G-2) (H-2)	William G. Kauffman
Glendale Junior College, Glendale, Calif. (A-3) (F-2)	B. L. Griffing
Gonzaga University, Spokane, Wash. (K-5)	Richard A. Brown
Grays Harbor Junior College. (A)	Not Known
Grove City College, Grove City, Pa. (A-4) (G) (H) (K-4)	Not Known
Harding College, Searcy, Ark. (A-5) (H-3)	Leonard Kirk
Hardin-Simmons University, Abilene, Tex. (F-3)	Katherine Boyd
Harvard University, Cambridge, Mass. (K)	Dr. R. W. Hickman
Hastings College, Hastings, Nebr. (A-2) (F)	Charles J. Thurmond
Haverford College, Haverford, Pa. (A-3) (K-3)	J. D. Elder
Houston, University of, Houston, Tex. (K-3½)	Harvey W. Harris
Howard College, Birmingham, Ala. (K-2)	Paul D. Bales
Idaho, University of, Moscow, Idaho. (A-2) (K-varies)	Prof. R. H. Hull
Illinois College, Jacksonville, Ill. (K-varies)	F. Cooke
Illinois, University of, Urbana, Ill. (K)	Josef F. Wright
Illinois State Normal University, Normal, Ill. (F-2)	Harvey F. Admire
Illinois Wesleyan University, Bloomington, Ill. (A-4)	Wilson B. Paul
Indiana State Teachers College, Terre Haute, Ind. (A-4) (B-4) (C-4) (D-4) (E-4)	Dr. Clarence M. Morgan
Indiana University, Bloomington, Ind. (A-3) (B-3) (C-3) (D-3)	Dr. Lee Norvelle
Iowa, State University of, Iowa City, Iowa. (A-3) (B-2) (D-3) (F-3) (G-3) (J-3) (K-2)	Bruce E. Mahan
Iowa State College, Ames, Iowa. (D-3) (F-3) (K-4) (L-4)	W. L. Griffith
Iowa Wesleyan College, Mount Pleasant, Iowa. (A-3)	Roger M. Morrow
Ithaca College, Ithaca, N. Y. (D) (E-4) (G-4)	Dr. Winn F. Zeller
John B. Stetson University, DeLand, Fla. (G-6) (H-6) (K-6)	Dr. Robert I. Allen
John Brown University, Siloam Springs, Ark. (A-3) (B-3) (I-3) (K-varies) (M-2)	Harold Fristoe

John Carroll University, Cleveland, Ohio. (B-3) (D-3) (E-3) (G-3)	Wm. A. D. Millson

YOUR RADIO LIBRARY

A comprehensive and important selection of books on Radio and Television. Appended is a listing of informative literature published and available through National Broadcasting Company, Columbia Broadcasting System and Mutual Broadcasting System.

GENERAL

- The ABC of Radio—How It Works.** National Association of Broadcasters 1938.
- Advertising for Immediate Sales,** by John Caples. Harper & Bros., 1936.
- Advertising Media & Markets,** by Ben Duffy. Prentice-Hall, 1939.
- Air Law: Outline and Guide To Law of Radio and Aeronautics,** by H. S. LeRoy. Randolph Leigh Publishing Co., 1936.
- Air Law Review,** New York Board of New York University Air Law Review, (quarterly).
- Annual Report of Federal Radio Commission 1933,** Superintendent of Documents, 1936.
- Annual Report of Federal Communications Commission 1935; 1936; 1937.** Superintendent of Documents.
- Annual Report of The Canadian Broadcasting Commission 1935,** The King's Printer, 1935.
- Annual Report, Radio Committee of the American Bar Association.**
- The BBC and Its Audience** by Basil Maine. Thomas Nelson & Sons, 1939.
- BBC Handbook.** British Broadcasting Corp., 1938.
- BBC Scrapbooks,** by L. Baily and C. Brewer. Hutchinson & Co., 1937 and 1938.
- Auditory Aids In the Classroom,** by John V. L. Hogan and R. M. Willmotte. Committee on Scientific Aids to Learning, 1938.
- Behind the Microphone,** by Stewart Chesmore. Thomas Nelson & Sons, 1935.
- Best Broadcasts of 1938-39,** by Max Wylie. Whittlesey House, 1939
- Big Business and Radio,** by G. L. Archer. American History Co.
- British Broadcasting Corporation Annual 1937; 1938,** British Broadcasting Corporation.
- Broadcast Receivers And Phonographs For Classroom Use.** Committee on Scientific Aids To Learning of the National Research Council, 1939.
- Broadcasting and Broadcast Advertising Yearbook (Annual),** Broadcasting Publications, Inc.
- Broadcasting and a Changing Civilization,** by E. H. Robinson and John Lane. The Bodley Head, Ltd., 1935.
- Broadcasting from Within,** by S. W. Smithers. Pitman, 1938.
- Broadcasting In My Time,** by S. A. Morley. Rich & Cowan, 1935.
- Broadcasting Your Talk,** by O. Atkinson. American Press, 1936.
- Business Census Report on Broadcast Stations,** U. S. Bureau of Census.
- The Canadian Broadcasting Act, 1936,** King's Printer.
- Careers In Radio.** Institute for Research, 1935.
- Children and Radio Programs,** by Azriel L. Eisenberg. Columbia University, 1936.
- Civic Education By Radio,** by T. H. Reed. Radio Institute of the Audible Arts, 1936.
- Columbia Workshop Plays,** by Douglas Coulter. McGraw-Hill Book Co., 1939.
- Communication by Wire and Radio,** by Berry. Callaghan & Co., 1937.
- The Communication Act of 1934 (Revised to May 20, 1937),** Superintendent of Documents, 1937.
- Details of the Addison Lewis & Associates Radio Survey of Minneapolis.** Addison Lewis & Associates, 1935.
- Development of Radio Education Policies in the American Public School Systems,** by Dr. Carroll Atkinson. George Peabody College For Teachers.

- Education By Radio**, Vols. I, II, III, IV, and V 1931-35. National Committee on Education by Radio, (monthly).
- Education by Radio In American Schools**, by Carroll Atkinson. George Peabody School for Teachers, 1938.
- Education By Radio In American Schools**, by Dr. Carroll Atkinson. George Peabody College For Teachers, 1939.
- Education On the Air (Yearly)**, edited by Josephine MacLacby. Yearbook of the Institute For Education By Radio. Ohio State University, 1930-34, 1936-38; University of Chicago Press, 1935.
- Educational Broadcasting**, by C. S. Marsh (ed.) University of Chicago Press, 1937.
- Education's Own Stations**, by S. E. Frost, Jr. University of Chicago Press, 1937.
- The Efficacy of Broadcasts to Schools**, by M. E. Thomas. Melbourne (Australia) University Press, 1937.
- Estimated Number of Families Owning Radio Sets in the United States**. January 1, 1938, Joint Committee on Radio Research, 1938.
- Fan Mail**, by Lowell Thomas. Dodge Publishing Co., 1935.
- Finger-tip Facts on Radio**, Caldwell-Clements Inc., 1936.
- Four Years of Network Broadcasting**, by Thomas H. Reed. Report of the Committee on Civic Education by Radio.
- The Fundamentals of Radio**, by Rolla R. Ramsey. Ramsey Publishing Co., 1935.
- A Guide To National Advertising**. National Better Business Bureau, Inc.
- Hello America**, by Cesar Saerchinger. Houghton-Mifflin Co., 1938.
- History of Radio to 1926**, by G. L. Archer. American Historical Society, 1938.
- How to Build the Radio Audience**, by Douglas Duff Connah. Harper & Bros., 1938.
- International Radio Consulting Committee—Opinions Expressed by the Committee**. Bureau of the International Telegraph Union, 1937.
- I Broadcast the Crisis**, by H. V. Kaltenborn. Random House, 1938.
- Is America Radio Democratic?**, by S. E. Frost, Jr. University of Chicago Press, 1937.
- Journalism on the Air**, by Dowling Leatherwood. Burgess Publishing Co., 1939.
- Laws of the Stage, Screen and Radio**, by R. Marchetti. Suttonhouse, 1936.
- The Law of Radio Communications**, by S. B. Davls. McGraw-Hill Book Co., 1937.
- The Library and The Radio** by Faith Holmes Myers. National Advisory Council on Radio in Education, 1939.
- Listen and Learn: Fifteen Years of Adult Education on the Air**, by Frank Ernest Hill. American Association for Adult Education, 1937.
- Magic Dials: The Story of Radio and Television**, by Anton Bruehl and Lowell Thomas. Lee Furman, Inc., 1939.
- Marconi, The Man and His Wireless**, by O. E. Dunlap, Jr., Macmillan, 1938 (revised).
- Motion Pictures and Radio**, by E. Laine. McGraw-Hill Book Co., 1939.
- Music As Presented by the Radio**, by P. W. Dykema. Radio Institute of the Audible Arts, 1935.
- Music On The Air**, by Hazel G. Kinscella. Garden City Publishing Co., 1937.
- Newspaper, Magazine and Broadcast Expenditures (yearly)**. American Newspaper Publishers Association.
- News While It Is News**, by Leland Bickford and Walter Fogg. G. C. Manthorne, 1935.
- Not To Be Broadcast**, by R. Brindze. Vanguard Press, 1937.
- On The Air**, by J. J. Floherty. Doubleday, 1937.
- One Thousand and One Tested Programs and Merchandising Ideas (Second Edition)**. Broadcasting Publishing Co., 1938.
- Outdoor, Street-Car and Radio Adverting**, by J. T. Hoyle. International Textbook Co.
- Poisons, Potions and Profits, The Antidote To Radio Advertising**, by Peter Morell. Knight Publishers, 1937.
- Practical Radio Advertising**, by Herman S. Hettlinger & Walter J. Neff. Prentice-Hall, 1938.
- Prize Contests**, by Helen King. Rugby House Publishing Co., 1938.
- Radio**, by E. E. Burns. Van Nostrand, 1938.
- Radio**, by Rudolph Arnheim (translation). Faber and Faber, 1936.
- Radio Advertising Rates and Data**. Standard Rate and Data Service (Monthly).
- Radio Advertising In Australia**. Angus & Robertson Ltd., Australia, 1937.
- Radio As an Advertising Medium**, by W. B. Dygert. McGraw-Hill Book Co., 1939.
- Radio and Education**, by Levering Tyson (ed.) (Annual). University of Chicago Press, 1931-36.
- Radio and the Farmer**, by Edmund de S. Brunner. Radio Institute of the Audible Arts, 1935.
- Radio and Television**, by Chloris Shade. Morgan-Dillon & Co., 1937.
- Radio Annual**, compiled by the staff of Radio Daily. Radio Daily Corp. (Annual)
- Radio As a Vocation**, by Joseph B. Hershman. Dodge's Telegraph & Radio Institute, 1936.
- Radio Business Promotion and Management**, by Ghirardi and Ruggles. Radio and Technical Publishing Co., 1938.
- Radio Broadcasting Manual**, by F. W. Spathe (ed.). National Retail Dry Goods Association, 1935.
- Radio Censorship**, by H. B. Summers. H. W. Wilson Co., 1939.
- Radio Glossary**, by Maurice Lowell. United States Office of Education, 1938.
- Radio In the Classroom**, by Margaret Harrison. Prentice-Hall, 1937.
- Radio Industry Survey (yearly)**. Dun & Bradstreet.
- Radio In The Local Market**. American Newspaper Publishers Association, 1935.
- Radio Law**, by Dill. National Law Book Co., 1938.
- Radio and Radio Program Survey**, by McDermott. De Paul University, 1937.

- Radio Personalities**, by Don Rockwell (ed.). Press Bureau, Inc., 1935.
- Radio and Radio Program Survey**, by McDermott. DePaul University, 1937.
- Radio: The Fifth Estate**, by Herman S. Hettinger (ed.). American Academy of Political and Social Science, 1935.
- Radio Stars of Today**, by Robert Eichberg. L. C. Page & Co., 1937.
- Radio, The Story of the Capture and Use of Radio Waves**, by John Langdon-Davies. Dodd, Mead & Co., 1935.
- Radio Variety**, by J. Watt (ed.). J. M. Dent & Son, 1939.
- Report on Social and Economic Data Pursuant To the Informal Hearing on Broadcasting, October 5, 1936**. U. S. Government Printing Office, 1938.
- Reports of Radio Researches and Works in Japan**. National Research Council.
- Retrospect and Forecast in Radio Education**, by Levering Tyson and W. J. Donovan. National Advisory Council on Radio in Education Series No. 15, 1936.
- School Broadcasting in Great Britain**, by Lester Ward Parker. University of Chicago Press, 1937.
- School Radio Scripts**. Indianapolis Public Schools System.
- The School Use of Radio**, by Cline M. Koon. University of Wyoming, 1936.
- SOS To the Rescue**, by K. Baarslag. Oxford Press, 1935.
- Some Fundamental Aspects of Radio Broadcasting Economics**, by H. S. Hettinger. Harvard Business Review, 1935.
- Story of Radio**, by Orrin E. Dunlap, Jr. Dial Press, 1935.
- The Teacher and Radio**. Radio Council of Chicago Public Schools.
- Telecommunications: Economics and Regulations**, by J. M. Herring and G. C. Gross. McGraw-Hill Book Co., 1936.
- Ten Years Before the Mike**, by Ted Husing. Farrar & Rinehart, 1935.
- Use of Radio in Parent Education** by Sidonie M. Gruenberg. National Advisory Council on Radio in Education, 1939.
- Variety Radio Directory (Annual)**, by Edgar A. Grunwald (ed.). Variety, Inc.
- What About Radio?**, by Kenneth Goode. Harper & Bros., 1937.
- Who's Who in Radio (quarterly)**. Distinctive Radio Publications, 1935-36.
- The Why and How of Broadcast Advertising Tie-ins**, by Angus and James.
- Wireless Today**, by E. H. Chapman. Oxford University Press, 1938.
- Women and Radio Music**, by P. W. Dykema. Radio Institute of the Audible Arts, 1935.
- World Radio Markets**, by L. D. Batson (ed.). U. S. Bureau of Foreign and Domestic Commerce.
- Broadcast English Vols. I, II, III**, by A. Lloyd James. British Broadcasting Corporation, 1928-1936.
- The Broadcast Word**, by A. Lloyd James. Kegan, Paul, Trench, Trubner & Co., Ltd., 1935.
- The Broadcasting of Foreign Language Lessons**, by F. H. Lumley. Ohio State University, 1935.
- Creating Atmosphere for Radio Drama**, by F. K. Hayworth. Quarterly Journal of Speech, 1935.
- Do's and Don'ts of Radio Writing**, by R. Rogers. Associated Radio Writers, Inc., 1937.
- The Educational Program**, by Merrill Denison. Radio Institute of the Audible Arts, 1935.
- Handbook for Amateur Broadcasters**, by Pauline Gibson Scholastic Publications, 1937.
- Handbook of Radio Writing**, by E. Barnouw. Little, Brown & Co., 1939.
- Handbook of Sound Effects**. U. S. Department of Interior, Office of Education, 1938.
- Handbook of Broadcasting**, by Waldo Abbott. McGraw-Hill Book Co., 1937.
- Handbook of Radio Drama Technique**. Edwards Dunlop & Co., 1939.
- How To Sing For Money**, by Charles Henderson. George Palmer Putnam, Inc., 1939.
- How to Write for Radio**, by James Whipple. McGraw-Hill Book Co., 1938.
- Learn To Write For Broadcasting**, by C. Hubert. Hurst & Backett.
- Listen In: An American Manual of Radio**, by Maurice Lowell. Dodge Publishing Co., 1937.
- Making A Living In Radio**, by Zeh Bouck. McGraw-Hill Book Co., 1935.
- New Fields for the Writer**, by S. S. Moore. National Library Press, 1939.
- On the Air**, by Flaherty. Doubleday-Doran & Co.
- Practical Radio Writing**, by Katherine Seymour and John T. W. Martin. Longmans, Green & Co., 1938.
- The Production and the Direction of Radio Programs**, by John S. Carlisle. Prentice-Hall, Inc., 1939.
- Psychology of Radio**, by Hadley Cantril and G. W. Allport. Harper & Bros., 1935.
- Radio Continuity Types**, by Sherman P. Lawton. Expression Co. (To be released shortly.)
- Radio Drama**, by S. P. Lawton. Expression Co.
- Radio Dramatics**, by Carmen. John C. Horston Publishing Co.
- Radio Manual**. U. S. Office of Education, 1936.
- The Radio Program**, by Merrill Denison. The Radio Institute of Audible Arts, 1935.
- Radio Script Duplication**. Radio Workshop of Ohio State University, 1937.
- Radio Sketches and How To Write Them**, by Peter Dixon. Frederick Stokes Co., 1936.
- Radio Writing**, by Max Wylie. Farrar & Rinehart, Inc., 1939.
- So-o-o You're Going On The Air**, by Robert West. Rodin Publishing Co., 1934.

PRODUCTION

- Audio-Visual Handbook**, by E. C. Dent. Society for Visual Education, Inc., 1937.
- Both Sides of the Microphone; Training for Radio**, by John S. Hayes and Horace J. Gardner. J. P. Lippincott Co.

Talking On The Radio, by Orrin E. Dunlap. J. Greenberg, 1936.

Writing For Broadcasting, by Cecil Whitaker-Wilson. A. C. Black, Ltd., 1935.

Writing for Radio, by Frank Nagler. Ronald Press Co., 1938.

TECHNICAL

Aircraft Radio and Electrical Equipment, by Howard K. Morgan. Pitman & Co., 1939.

Communication Engineering, by W. L. Everitt. McGraw-Hill Book Co., 1937.

Communication Engineering, by J. A. Moyer & J. F. Wostrel. McGraw-Hill Book Co., 1937.

Dictionary of Wireless Technical Terms, by S. O. Pearson. Iliffe, 1937.

Drake's Cyclopedia of Radio and Electronics, by H. P. Manly and L. O. Gorder. Drake, 1937.

Electric Communication and Electronics, by Harold Pender and Knox McLwain 3rd. John Wiley & Sons, 1936.

Electronics and Electron Tubes, by E. D. McArthur. John Wiley & Sons, 1936.

Elements of Radio-Communications, by O. F. Brown and E. L. Gardiner. Oxford University Press, 1939.

Engineering Handbook of the National Association of Broadcasters, by J. C. McNary (ed.). National Association of Broadcasters, 1936.

Experimental Radio, by Ramsey. Ramsey Publishing Co., 1938.

Fundamentals of Radio, by F. E. Terman. McGraw-Hill Book Co., 1938.

Foundations of Wireless, by A. L. M. Sowerby. Iliffe, 1938.

Measurement in Radio Engineering, by F. E. Terman. McGraw-Hill Book Co., 1938.

Modern Radio Communication, by J. H. Reyner. Sir Isaac Pitman & Sons, 1939.

Modern Radio Essentials, by K. A. Hathaway. American Technical Society, 1935.

Old Wires and New Waves, by A. F. Harlow. Appleton-Century, 1936.

Outline of Wireless, by R. Stanger (5th ed.). Reginald Saunders, 1938.

Phenomena in High-Frequency Systems, by August Hund. McGraw-Hill Book Co., 1936.

The Physics of Electron Tubes, by L. R. Koller, McGraw-Hill Book Co., 1937.

Practical Radio Communication, by A. R. Nilson and J. L. Hornung. McGraw-Hill Book Co., 1935.

Principles of Radio, by Keith Henney. John Wiley & Sons, 1938 (3rd ed.)

Principles of Radio Engineering, by R. S. Glasgow. McGraw-Hill Book Co., 1936.

Problems in Radio Engineering, by E. T. Rapson. Pitman Publishing Corp. 1938.

Proceedings of the Institute of Radio Engineers 1909-1937, Institute of Radio Engineers, 1937.

Radio Engineering, by F. E. Terman. McGraw-Hill Book Co., 1937.

The Radio Engineering Handbook, by Keith Henney (ed.). McGraw-Hill Book Co., 1935.

Radio Engineering Principles, by Henri Lauer and H. L. Brown. McGraw-Hill Book Co.

Radio Frequency Electrical Measurements, by Hugh A. Brown. McGraw-Hill Book Co.

Radio Handbook, by F. C. Jones. Pacific Radio Publishing Co., 1937.

Radio Handbook, by J. A. Moyer and J. F. Wostrel. McGraw-Hill Book Co., 1935.

Radio Receiving and Television Tubes, by J. A. Moyer and J. F. Wostrel. McGraw-Hill Book Co., 1936.

Radio and Telecommunications, by R. E. Blakey. Pitman Publishing Corp., 1938.

Short Wave Radio, by J. H. Reyner. Pitman Publishing Corp., 1938.

Short Wave Wireless Communication, by A. W. Lander and C. R. Stoner. John Wiley & Sons, 1936.

Wireless Terms Explained, by Declbel (pseud.). Pitman Publishing Co., 1937.

TELEVISION

Cinema and Television, by S. Legg and R. Fairthorne. Longmans, Green & Co., 1939.

Electronic Television, by G. Eckhardt. Goodheart-Wilcox, 1936.

Electron Optics in Television, by Maloff and Epstein. McGraw-Hill Book Co., 1938.

Photoelectric Cells, by N. R. Campbell and Dorothy Ritchie. Sir Isaac Pitman & Sons, 1936.

FUNCTIONS

To provide a common forum and a central medium for cooperative effort on behalf of all individuals and groups interested in advertising.

To elevate the standards of advertising practice and to combat any unfair competitive methods in its sale.

To help increase the effectiveness of advertising as an instrument of distribution, with its resulting benefits to business and the general public.

To determine and disseminate more accurate knowledge of the functions of advertising in business, and its social and economic values.

To aid in raising the standards of education and training for advertising practitioners.

Observation Station.....Prof. E. Divoire
TECHNICAL OBSERVATION STATION

32, Avenue Lancaster, Uccle 3 Brussels, Belgium.
Phone: 44.17.97.

FUNCTIONS

The International Broadcasting Union has been founded to establish relations between the various European and non-European organizations operating broadcasting services, to centralize the study of all questions of general interest arising from the development of broadcasting, and to promote the interest of the latter in every domain. On the technical side, the Union acts as expert for the European administrations in all questions relating to the application of the European Broadcasting Convention, which determines the distribution of wavelengths among the different European broadcasting stations. Its Brussels office checks the frequencies of broadcasting stations daily. In connection with its work the Union publishes monthly bulletins for its members as well as other information in the form of booklets and books on the subject of broadcasting service.

Honorary Directors: Hebert H. Frost, A. Atwater Kent, Paul B. Klug.

FUNCTIONS

RMA, non-profit and cooperative, was organized in 1924 to promote all interests of the radio industry.

ORGANIZATIONS

The organization is divided as to interests into four groups: (1) the Set; (2) Tube; (3) Parts, Cabinet, and Accessory; (4) Amplifier and Sound Equipment

RMA promotes sales, both domestic and export; opposes legislation detrimental to the interests of its members; directs industry standardization; informs members of new patents issued through a weekly bulletin; aids in improving merchandising practices; distributes credit information to members and assists members in collecting, investigation of fraud, etc.

Radio Manufacturers Association of Canada

159 Bay St., Toronto, Ont., Canada
 Adelaide 1531

OFFICERS

President.....A. L. Brown
 (Northern Electric Co.)
 Vice-President.....G. A. Holmes
 (Spartan of Canada, Ltd.)
 Executive Secretary.....K. H. Smith
 Chairman of Engineering Committee.....Allan B. Oxley
 (RCA-Victor Company)

FUNCTIONS

This association is a non-profit and cooperative organization founded in 1926 to promote all interests of radio industry.

The Radio Writers' Guild of the Authors' League of America, Inc.

6 E. 39th Street, New York, N. Y.
 Murray Hill 5-6930

OFFICERS

National President.....Kenneth Webb
 Vice-President.....Knowles Entrikin
 Vice-President.....Courtney Savage
 Vice-President.....Forrest Barnes
 Secretary.....Lilian Lauferty
 Executive Secretary.....Luise Silcox
 Assistant Secretary.....Margaret Scheuerman

FUNCTIONS

The Guild is one of the Guilds of The Authors' League of America, Inc. The Guild is primarily a protective organization for writers in the radio field.

Society of European Stage Authors and Composers, Inc. (SESAC)

113 W. 42nd St., New York, N. Y.
 Bryant 9-3223

OFFICERS

President.....Paul Heinecke

FUNCTIONS

Licensing use of copyrighted music.

Society of Jewish Composers, Publishers and Song Writers

152 W. 42nd St., New York, N. Y.
 Longacre 5-9124

OFFICERS

President.....Sholom Secunda
 Vice-President.....Rev. Pinchus Jassinowsky
 Treasurer.....Alexander Olshanetsky
 Secretary.....Henry Lefkowitz

FUNCTIONS

This association licenses public performance rights of music copyrighted by its members and on which they collect royalties. Association owns approximately 95 percent of the Jewish compositions.

Society of Motion Picture Engineers

Hotel Pennsylvania, New York, N. Y.
 Pennsylvania 6-0620

OFFICERS

President.....E. A. Williford
 Past President.....S. K. Wolf
 Executive Vice-President.....N. Levinson

Engineering Vice-President.....Don Hyndman
 Editorial Vice-President.....J. I. Crabtree
 Financial Vice-President.....A. S. Dickinson
 Convention Vice-President.....W. C. Kunzmann
 Secretary.....J. Frank, Jr.
 Treasurer.....R. O. Strock

GOVERNORS

M. C. Batsel, H. Griffin, A. C. Hardy, A. N. Goldsmith, H. G. Tasker.

BRANCH OFFICE

226 Equitable Bldg., Los Angeles, Calif.
 Executive In Charge.....Walter R. Greene

FUNCTIONS

In addition to its motion picture activities, this association is actively interested in television. It publishes a monthly organ in which various subjects are discussed by men in the industry.

Television Engineers' Institute of America

763 Gower St., Hollywood, Calif.
 Gladstone 3558

OFFICERS

President.....George H. Seward
 Secretary pro-tem.....Arthur A. Stern

FUNCTIONS

The objects of this Institute are the advancement of the theory and practice of television engineering and its allied arts and sciences, including facsimile and other branches of electronics; experimentation and research; the transmission, projection and reception of television images; the transmission and reception of aural television frequencies; the standardization of equipment, mechanisms and the practices employed therein; the maintenance of a high professional standing among its members. Among the means to this end the association holds meetings for the reading and discussion of papers, and the publication and dissemination of knowledge by publication and such other methods as are helpful in the fulfillment of its objectives.

University Broadcasting Council

230 N. Michigan Ave., Chicago, Illinois
 Central 2015

OFFICERS

Director.....Allen Miller

FUNCTIONS

The purpose of the Council is to promote education by radio. It is made of an affiliation of two universities in Chicago area; Northwestern University and DePaul University; Field Museum of Natural History and the Art Institute of Chicago; Chicago radio stations; and three major networks cooperating.

Woman's National Radio Committee

113 West 57th St., New York, N. Y.
 Circle 7-4110

OFFICERS

Chairman.....Mme. Yolanda Mero-Irion
 Vice-Chairman.....Mrs. Marion M. Miller
 Second Vice-Chairman.....Miss Edith Lowry
 Secretary.....Miss Helen Havener
 Treasurer.....Mrs. D. Leigh Colvin
 Executive Secretary.....Miss Ruth Rich
 Chairman, Publications Committee.....Mrs. M. D. Jackson
 Members-at-Large.....Mrs. Benjamin Graham,
 Mrs. E. C. Lewis, Mrs. Samuel Kubie, Mrs. Sidonie
 Gluenberg

FUNCTIONS

This committee has for its purpose to raise the standard of radio programs for adults, young people and children by: (1) retaining on the air the finer type of program; (2) removing objectionable features; (3) improving advertising content of broadcasts; (4) encouraging the production and presentation of more fine programs, worthwhile from the educational, cultural and entertainment viewpoint.

THE TECHNICAL SIDE

1939 ————— 1940

TECHNICAL PROGRESS IN RADIO DURING 1939

By ALVIN VON AUW
Western Electric Company

Overlong has the emphasis in reference to radio's development been on its youthfulness. As in the case of every invention of comparable importance in man's daily life, radio has inevitably reached the point where its technical progress can no longer be measured in leaps and bounds and has entered a period of maturity in which its chief concern is the consolidation of past accomplishments and the refinement of already existing developments.

1939

With the notable exceptions of frequency modulation, television and facsimile, it can be fairly said that the year 1939 saw no world-shaking innovations in broadcasting, but did see extremely important progress in design. Progress in studio and transmitter construction, the conservation of power previously wasted in medium power transmitters, the design of microphones for more efficient pick-up and of more efficient control devices for directive broadcasting have within the past year reached the stage where by the accurate prediction and control of results, they have become important factors in a marked advance in service to the listener. In this regard the ever-increasing emphasis by radio technical journals on devices for measuring the output of already existing equipment, rather than on startling new developments, is indicative of this advance of broadcasting technique from the hazy realm of surmise to the kingdom of exact knowledge.

It is well-nigh impossible to touch in due proportion upon all the elements in the advancing front of broadcasting during the past year. In so short a space the best we can do is to pick out certain developments that seem particularly notable or which seem to be typical of progress made during 1939.

With seafaring men the phrase is "from stem to stern"; with broadcasters it's "from microphone to antenna." Having developed microphones to the point

of extreme sensitivity and antennas to the point of reaching the greatest possible area with a given amount of power, broadcasting research has concerned itself during the past year with the focusing of the microphone to pick up only acoustically relevant sounds and of antennas in order to reach most effectively areas with the greatest density of population at the expense of uninhabited or sparsely peopled land, sea or swamp. Neither directional microphones nor directional antennas are new with 1939. However, an intensive study of acoustical effects and angles of sound reflection by Bell Telephone Laboratories resulted in the introduction in 1939 of Western Electric's now famous cardioid microphone, the directional characteristics of which reduce the old necessity of separating the aural wheat from the chaff by elaborate and expensive acoustic treatment to minimize irrelevant studio sounds.

Focusing

In actual practice directional broadcasting is at least a half-decade old, but 1939 saw three different elements contributing to its adoption by alert broadcasters faced with the problem of an unequal distribution of listeners in the area served by their transmitters. In the first place, the value of focusing on the most productive area has been amply demonstrated from the commercial point of view by stations which already employ it, WOR, and WOL for instance. Secondly, the FCC has endorsed directional broadcasting because it cuts down on interference between neighbors in the broadcast band. Thirdly, 1939 saw the introduction of a newly perfected "antenna control" (line branching network) which provides means for conveniently and accurately adjusting the directional array so that transmitter energy may be distributed over the surrounding area in a pattern consistent with the needs of the listeners. Further a new "phase monitor" gives the engineer a direct indication of the phase and amplitude relations of the currents in the individual radiators in a directive array, thus expediting the original adjustment of the array, permitting frequent and convenient checks on the maintenance of the adjustment and eliminating the necessity for elaborate and expensive field-strength

surveys. Thus has another broadcast device of fairly recent development finally come within the sphere of exact measurement and control.

Transmitters

The past year saw incorporated in transmitters of medium power many research features which had previously found their place only in high-powered equipment. The new features of Western Electric's recently announced 1 KW illustrate in this and many other respects the progress in transmitter design made in 1939. The new 1 KW possesses such features as the famous Doherty High Efficiency Circuit (which came out of Bell Telephone Laboratories a few years ago) to cut down appreciably the power required for operation, giving to this single unit transmitter the efficiency features of a 50 KW; stabilized feedback, enabling the 1 KW to preserve in the final radio signal all the clarity of the original audio; grid bias modulation and its attendant circuit simplicity and power economy.

But among the most outstanding of 1939's advances are the design features of the new 1 KW. Completely over and beyond the fact that one of the most distinguished of modern industrial designers was called in to make the cabinet with its smart blue and gray finish and satin chrome trim worthy of front-office presentation, Bell Laboratories engineers placed the greatest emphasis on convenience and ease of operation, quick accessibility of all parts with the highest degree of safety for personnel. All the electrical equipment is mounted on one central structure and the whole apparatus is made as fool-proof as possible, the exterior being electrically dead and all dangerous interior voltages automatically grounded when the doors are opened. To insure unerring operation all operating switches are divided by shape into three groups according to function.

Air-cooling of transmitter tubes, introduced a couple of years ago, advanced materially in 1939 as Bell Labs engineers undertook an intensive study of aerodynamics and thermal engineering to produce the tube used in Western Electric's new air-cooled 5 KW transmitter. The new tube marks the successful culmination of long research.

Television

To announce to radio engineers that television has made giant strides forward during 1939 would be as anticlimactic as hurling a ball into a blanket. 1939 was, after all, television's year. First and foremost, RCA-NBC began regular transmission from the Empire

State Building on April 30 and since that time a regular, though small, viewing audience has been built up. It would be impossible to review the technical progress of television within the bounds of the past year, because television today is at the same stage of youthful exuberance that radio was some 15 years ago. Today the FCC is besieged with requests for transmitter building permits, for permits to sell time. Television images have been sent successfully from New York to Philadelphia over the Bell System coaxial cable and remote pick-ups over telephone wires. General Electric has announced that preparations are being made to re-transmit RCA's programs from up-state New York, perhaps laying the basis for a future network. CBS readies for regular transmission. Applicants crowd the patent office with their ideas. Suffice it to say that it was television's year!

But in the field of broadcast radio, wherever chief engineers are gathered together, the topic of conversation inevitably turns to frequency modulation, so-called "static-free" radio.

Static-Free Radio

Major Armstrong at Alpine, N. J., chief proponent of f-m, the Yankee Network and Station WQXR have all been operating on experimental licenses during the year. Spring promises to show 13 f-m stations in regular operation. Amateurs compare notes and build their own f-m receivers, while proponents of traditional amplitude modulation claim that f-m has no monopoly on freedom from static, point out the disadvantages of f-m's quasi-optical horizon and that its acceptance would involve the scrapping of two billion dollars' worth of equipment. F-m's counter with the argument that a large number of transmitters, spaced 300 miles apart, can operate on the same frequency without any interference whatever.

Should f-m finally gain universal acceptance, radio research would not be completely revolutionized and have to start from scratch, for whether frequency or amplitude modulation rules the airwaves of the future, the refinements which traditional broadcasting research has developed will find their place. For the present suffice it to say that by the law of diminishing returns each innovation which comes out of the laboratories at this stage of the game implies that future research will be in terms of refinements rather than radical advances. Thus radio research will steadily reduce the distance to the goal line of perfection that is the ultimate and, fortunately for the questing human spirit, unattainable object of science.

History

On May, 13, 1912, the Institute of Radio Engineers was formed through the merging of two organizations active in the technical radio field. One of these was the Wireless Institute, the headquarters of which was in New York City and the other which was located in Boston was known as the Society of Wireless Telegraph Engineers. The former organization had a membership of fourteen at the start of 1909 and twenty-seven on January 1, 1912. The Society of Wireless Telegraph Engineers had eleven members on the first day of 1907 and forty-three on January 1, 1912. At the time of its foundation, the Institute of Radio Engineers had fewer than fifty members.

Prominent in the early work of the Society of Wireless Telegraph Engineers were John Stone Stone, Lee de Forest, and Fritz Lowenstein. Those identified with the initial work of the Wireless Institute included John S. Murphy, R. A. Somerville, Joseph D.

Fountain, R. B. Respress, R. A. Cleva, John Gregg, E. Barnwell, Philip Farnsworth, Sidney L. Williams, R. H. Marriott, G. W. Pickard, Harry Shoemaker, and Eugene Thurston. The consolidation of these two societies and the initial work of organizing the Institute of Radio Engineers were done by Alfred N. Goldsmith, J. V. L. Hogan, and R. H. Marriott.

General

The Institute of Radio Engineers functions solely to advance the art and science of radio communication. It includes among its members those who have played prominent parts in the development of radio in the United States as well as many noted radio engineers and scientists in other countries.

Membership in the Institute is strictly personal and several grades have been established. The requirements for admission to these grades is contained in the Institute's Constitution and the eligibility of the applicant is passed on by the Board of Directors.

RMA Constitution

Preamble

ARTICLE I

Name

The name of this Association shall be the Radio Manufacturers Association.

ARTICLE II

Membership

The membership of this Association shall consist of all persons, firms and corporations of the United States, eligible therefor and duly admitted, pursuant to the By-Laws now existing or hereafter adopted.

ARTICLE III

Objects

The objects of the Association shall be:

To promote an enlarged acquaintance and a more friendly intercourse among its members, and in all reasonable, lawful and proper ways to promote the best interest of the radio industry;

To foster, encourage and promote laws, rules, regulations, customs and practices which will be for the best interest of the public and the radio industry;

To reform abuses relative thereto, and

to secure freedom of its members from unjust or unlawful exactions;

To diffuse accurate and reliable information as to the standing of merchants and others dealing with members; as to all inventions, patents, processes or devices designed or intended for use in, upon, or in connection with radio products and the manufacture thereof; as to the state of the art relative thereto; and as to the condition and development of the trade in which the members are engaged, in the United States and foreign countries;

To procure uniformity and certainty in the customs and usages of such trade; to settle differences between members, and to provide for the arbitration of such differences;

To acquire by grant, gift, purchase, device or bequest; to hold and to dispose of such property as the purposes of the Association shall require, including inventions, letters patent, and processes, or rights thereunder, for the benefit of its members and not for pecuniary profit, subject to such limitations as may be prescribed by law.

MEMBERSHIP

Aerovox Corporation

740 Belleville Ave., New Bedford, Mass.

Products—Capacitors—dry and wet Electrolytics for radio and industrial purposes; Auto Radio Condensers; Paper, Wax, and Oil Impregnated Units for industrial and radio uses; Standard Mica Condensers and Silver Plate Mica Condensers of Close Tolerances; Exact Duplicate Replacement Capacitors for radio

and refrigeration; Transmitting Capacitors; Resistors—Insulated Molded and Lacquer Coated Carbon Resistors, Fixed and Adjustable Vitreous Enamel Resistors; Interference Filters; Noise Analyzer; Condenser Bridge for testing Power Factor, Resistance and Capacity.

Allen-Bradley Company

1326 South Second St., Milwaukee.

Products—Bradleyometers, Bradley-units, Bradleystats, Radioleaks.

- The American Steel Package Company**
Squire Ave., Defiance, Ohio.
Products—Variable Gang Condensers.
- Amperite Corporation**
561 Broadway, New York, N. Y.
Products—Amperite Ballast Tubes, Velocity Microphones, Musical Instrument Kontak Microphones, Microphone Stands, and Microphone Transformers.
- Arcturus Radio Tube Company**
720 Frelinghuysen Ave., Newark, N. J.
Products—Radio Tubes.
- Automatic Radio Mfg. Co., Inc.**
122 Brookline Ave., Boston, Mass.
Products—Radio Sets—Console, Table, Midget, Battery, Portable, and Automobile.
- The Bead Chain Manufacturing Company**
110 Mountain Grove St., Bridgeport, Conn.
Products—Radio Tube Contact Pins.
- Belmont Radio Corporation**
1257 Fullerton Ave., Chicago, Ill.
Products—Radio Sets—Console, Table, Midget, Combination Radio-Phonograph, Battery, Portable, and Automobile. Television Sets—Consoles.
- Bentley, Harris Mfg. Company**
Hector and Lime Sts., Conshohocken, Pa.
Products—Varnished Tubing and Sleeving.
- Birnbach Radio Co., Inc.**
145 Hudson St., New York, N. Y.
Products—Aerial Wire, Hook-up Wire, Lead-in Wire, Aerial Accessories, Stand-off Insulators, Aerial Kits, Double Antenna Systems, Automotive Radio Accessories, Short-Wave Parts, Rubber-covered Colored Wire, Transmitting Parts, and Colored Top Transmitting Parts.
- Bliley Electric Company**
Union Station Bldg., Erie, Pa.
Products—Quartz Crystals, Holders, Ovens, and associated equipment.
- William Brand & Co.**
276 Fourth Ave., New York, N. Y.
Products—Varnished Tubing, Saturated Sleeving, Mica Condenser Films and Fabricated Parts, Mica Plate in Sheets and punched to dimensions, Varnished Cambric and Paper in rolls, tape, etc., Sheet and Fabricated Bakelite, Fibre, etc.
- Walter C. Braun, Inc.**
601 W. Randolph St., Chicago, Ill.
Products—Amplifiers.
- C. F. Cannon Co.**
Main St., Springwater, N. Y.
Products—Radio Headsets.
- Centralab**
(Division of Globe-Union Inc.)
900 East Keefe Ave., Milwaukee, Wis.
Products—Variable Resistors, Volume and Tone Controls, Fixed Resistors, Ceramic Capacitors, and Switches.
- Champion Radio Works**
88 Holten St., Danvers, Mass.
Products—Radio Tubes, Resistance Tubes.
- Chicago Telephone Supply Co.**
1142-1228 W. Beardsley Ave., Elkhart, Ind.
Products—Volume Controls, Tone Controls, Switches, Fixed Resistances, Head Phones, etc.
- Chicago Transformer Corporation**
3501 Addison St., Chicago, Ill.
Products—Small Transformers and Reactors.
- Cinaudagraph Corporation**
2 Selleck St., Stamford, Conn.
Products—Loud Speakers.
- Cinch Manufacturing Corporation**
2335 W. Van Buren St., Chicago, Ill.
Products—Tube Sockets, Soldering Lugs, Terminal Strips, Binding Posts, Connector Plugs.
- Clarostat Mfg. Co., Inc.**
285 North Sixth St., Brooklyn, N. Y.
Products—Fixed Resistors, Variable Resistors, Wire and Carbon.
- Colonial Radio Corporation**
254 Rano St., Buffalo, N. Y.
Products—Radio Sets—Console, Table, Midget, Combination Radio-Phonograph, Battery, Portable, and Automobile.
- Continental Carbon Inc.**
13900 Lorain Ave., Cleveland, Ohio.
Products—Resistors, both Carbon and Wire Wound; Suppressors, Carbon Granules for Transmitters, Paper Dielectric Condensers, Filternoys to eliminate radio interference.
- Continental Radio & Television Corp.**
3800 Cortland St., Chicago, Ill.
Products—Radio Sets—Console, Table, Midget, Combination Radio-Phonograph, Battery, and Automobile.
- Cornell-Dubilier Electric Corporation**
1000 Hamilton Blvd., South Plainfield, New Jersey.
Products—Capacitors.
- Corning Glass Works**
Corning, New York.
Products—Bulbs, Tubing, Insulators.
- Cornish Wire Co., Inc.**
30 Church St., New York, N. Y.
Products—Radio Hook-up Wires, Antenna Accessories, Antenna Kits, Shielded Auto Radio Wires, P-A Wires, Electric Cords.
- Crescent Tool & Die Company**
4140 W. Belmont Ave., Chicago, Ill.
Products—"Crescent" Speakers, Tools and Dies, Miscellaneous Metal and Fibre Stampings, Transformer Channel Frames, Sub Panels, Chassis, Pulleys and Brackets.
- The Crosley Corporation**
1329 Arlington St., Cincinnati, Ohio.
Products—Radio Sets—Console, Table, Midget, Combination Radio-Phonograph, Battery, Portable, and Automobile. Facsimile Receivers.

Crowe Name Plate & Manufacturing Co
3701 Ravenswood Ave., Chicago, Ill.

Products—Tuning units for household and automobile radios; dials, scales on glass, metal, pyralin and bakelite; embossed, etched or lithographed escutcheons and nameplates; controls and decorated panels for sound equipment and analyzers, metal grilles and cabinets; standard components for radio service men and amateurs.

DeJur-Amsco Corporation

6 Bridge St., Shelton, Conn.

Products—Radio, Electrical and Photographic Products.

DeWald Radio Mfg. Corp.

440 Lafayette St., New York, N. Y.

Products—Radio Sets—Console, Table, Midget, Combination Radio-Phonograph, Battery, Automobile.

James W. Doyle, Inc.

311 N. Desplaines St., Chicago, Ill.

Products—Transformers and Coils.

Wilbur B. Driver Company

150 Riverside Ave., Newark, N. J.

Products—Carbonized Nickel Ribbon, Nickel Support Wire, Grid Wire, Filament Wire, Resistance Wire.

Hugh H. Eby, Inc.

4700 Stenton Ave., Philadelphia, Pa.

Products — Binding Posts, Battery Plugs, Speaker Plugs, Chassi Plugs, Vibrator Plugs, Molded Sockets, Cable Connectors, Cable Couplers, Rubber Capped Plugs, Molded Tip Jacks, Laminated Tip Jacks, Adaptors, Battery Adaptor Cables, Cable Assemblies, Strain Reliefs, Terminal Strips, Tie Points, Metal Punchings, Bakelite Punchings, Molded Parts, Electric Eye, Electric Eye Kits, AC and DC Relays, Radio and Electric Specialties.

Electrical Research Laboratories, Inc.

2020 Ridge Ave., Evanston, Ill.

Products—Radio Sets—Console, Table, Midget, Combination Radio-Phonograph, Battery and Portable.

The Electro Motive Manufacturing Co., Inc.

South Park & John Sts., Willimantic, Conn.

Products — Carbon Resistors, Molded Mica Condensers, Trimmer Condensers, Padder Condensers, Suppressors.

Emerson Radio & Phonograph Corp.

111 Eighth Ave., New York, N. Y.

Products—Radio Sets, Television Sets—Console.

Erie Resistor Corporation

644 West 12th St., Erie, Pa.

Products—Resistors, Silver Mica Condensers, Compensating Condensers, Iron Cores, and Plastic Parts.

Essex Wire Corporation

14310 Woodward Ave., Detroit, Mich.

Products—Radio Wires, Magnet Wire and Cord Sets.

Farnsworth Television & Radio Corp.

3700 East Pontiac St., Fort Wayne, Ind.

Products—Radio Sets, Television Sets—Console. Also Television Transmitters, Sound Transmitters, and other special apparatus.

John E. Fast & Co.

3123 N. Crawford Ave., Chicago, Ill.

Products—Fixed Electrical Condensers.

Galvin Manufacturing Corporation

4545 Augusta Blvd., Chicago, Ill.

Products—Radio Sets—Console, Table, Midget, Automobile, Battery.

General Electric Company

1285 Boston Ave., Bridgeport, Conn.

Products — Broadcast and Television Receivers. Also Handy Phone and Radio Receiving Tubes. Broadcast and Television Transmitters and Transmitting and Television Tubes.

General Instrument Corporation

829 Newark Ave., Elizabeth, N. J.

Products—Multiple Variable Condensers.

General Radio Company

30 State St., Cambridge A, Mass.

Products—Laboratory and Production Test Equipment and Apparatus. Radio Parts for General Experimental Purposes.

Gits Molding Corporation

4600 West Huron St., Chicago, Ill.

Products—Knobs, Push Buttons, Escutcheons, Trade Marks and Medallions, Concentric Cable, Drum Dials, Pointers, Remote Control Cases, Housings, Insulators.

Edwin I. Guthman & Co.

400 S. Peoria St., Chicago, Ill.

Products—R. F. Coils, Chokes, Oscillators, I. F. Transformers, Padder and Trimmer Condensers, Textile Covered and Litzendraht Wire. Radio Cabinets. Coil Winding Machinery.

Hammarlund Mfg. Co., Inc.

424-438 West 33d St., New York, N. Y.

Products—Radio Sets. Also Variable Condensers, Trimmers, Short Wave Parts.

Hawley Products Company

201 No. First Ave., St. Charles, Ill.

Products — Speaker Diaphragms and Spiders, Automobile Speaker Housings, Loop Antenna Covers and other Moulded Fibre Specialties.

***Hazeltine Corporation**

*Associate member.

15 Exchange Pl., Jersey City, N. J.

Products — Patents and Engineering Service to Manufacturers.

Hygrade Sylvania Corporation

Emporium, Pa.

Products—Radio Receiving Tubes.

Hytron Corporation

76 Lafayette St., Salem, Mass.

Products—Radio Tubes.

The Indiana Steel Products Company

135 South La Salle St., Chicago, Ill.

Products—Permanent Magnets for all purposes.

International Resistance Company

401 N. Broad St., Philadelphia, Pa.

Products—Resistors—Fixed and Variable, Metallized, Precision, Power Wire Wound, Voltage Dividers, Volume Controls, Tone Controls, Rheostats, Attenuators.

Irvington Varnish & Insulator Co.

6 Argyle Terrace, Irvington, N. J.

Products—Insulating Materials used in the Manufacture of Radio Parts.

Jefferson Electric Company

25th Ave. & Madison St., Bellwood, Ill.

Products—Radio Power Transformers, Chokes and Audio Input and Output Transformers, Television Deflecting Yokes, Horizontal and Vertical Scanning Transformers, and Centering and Focusing Coils.

Jensen Radio Manufacturing Company

6601 South Laramie Ave., Chicago, Ill.

Products—Loud Speakers.

Ken-Rad Tube and Lamp Corporation

Owensboro, Kentucky.

Products—Radio Tubes and Incandescent Electric Lamps.

Kester Solder Company

4201 Wrightwood Ave., Chicago, Ill.

Products—Solders: Plastic Rosin Filler Solder, Radio Solder, Special Flux Filled Solders and Special Fluxes for Electrical and Radio Work.

King Laboratories, Inc.

205 Oneida St., Syracuse, N. Y.

Products—Barx Embedded Getters, a part for radio tubes. Special alloys, chemicals and metals.

Kolorama Laboratories, Inc.

168 Coit St., Irvington, N. J.

Products—Television and Radio Research.

Lenz Electric Manufacturing Co.

1751 N. Western Ave., Chicago, Ill.

Products—Wires, Cables, Cords—for radio.

The Magnavox Company, Inc.

2131 Bueter Rd., Fort Wayne, Ind.

Products—Radio Loud Speakers, Mola-node "FP" Dry Type Electrolytic Filter and By-Pass Capacitors.

P. R. Mallory & Co., Inc.

3029 East Washington St., Indianapolis, Ind.

Products—Dry Electrolytic Condensers for AC and DC, Auto-Radio Vibrators, All-Wave Switches, Volume Controls, Power Rheostats, Heavy Duty and Flexible Resistors, Dial Light Assemblies, Grid Bias Cells, Jacks, Jack Switches, Push Button Switches, Plugs, Cable Connectors, Radio Convenience Outlets, Dry Disc Rectifiers, Battery Chargers, Resistance Welding Electrodes, Electrical Contacts.

Micamold Radio Corporation

1087 Flushing Ave., Brooklyn, N. Y.

Products — Mica Condensers, Paper Condensers, Electrolytic Condensers, Resistors, Ballast Tubes, and Television Condensers.

The Muter Company

1255 South Michigan Ave., Chicago, Ill.

Products—Candohm Resistors, Aerial Accessories, Voltage Regulators, Switches, Hygrometers, Relays, Condensers, etc.

National Carbon Company, Inc.

30 East 42nd St., New York, N. Y.

Products—Radio "A," "B" and "C" Batteries.

National Company, Inc.

61 Sherman St., Malden, Mass.

Products—Amateur, Experimental and Communication type Receivers and Transmitting Equipment, Dials, Eliminators, Choke Coils, Transformers, Condensers, Couplings, Amplifiers, Grid Clips, Ceramic Insulators and Sockets.

National Union Radio Corporation

57 State St., Newark, N. J.

Products—Radio Tubes.

Noblitt-Sparks Industries, Inc.

East 13th St., Columbus, Ind.

Products—Radio Sets—Console, Table, Combination Radio-Phonograph, Battery, Automobile.

Oak Manufacturing Company

711 W. Lake St., Chicago, Ill.

Products — Switches, Range, Rotor, Tap, Push Button; Vibrators, Synchronous and Non-Synchronous; Mechanical Tuners.

The Ohio Carbon Co.

1258 Berea Rd., Lakewood, Ohio

Products—Carbon Resistors and Suppressors for Autos.

Operadio Manufacturing Company

St. Charles, Ill.

Products—Loud Speakers, Amplifiers, Public Address Equipment, Intercommunicating Equipment.

Philadelphia Storage Battery Company

Tioga and C Sts., Philadelphia, Pa.

Products—Receiving Sets, Tubes, Amplifiers and Distribution Equipment.

Philmore Manufacturing Co., Inc.

113-115 University Pl., New York, N.Y.

Products — Radio Sets — Microphones, Amplifiers, Aerial Eliminators, Head-phones, Fixed Crystals and Crystal Sets.

Phonovision Corporation

850 Blackhawk St., Chicago, Ill.

Products—Radio Sets.

Pilot Radio Corporation

3706—36th St., Long Island City, N. Y.

Products—Radio Sets, Television Sets—Console and Table.

Quality Hardware & Machine Corporation

5831-51 Ravenswood Ave., Chicago, Ill.

Products—Stamping and Light Manufacturing.

Quam-Nichols Company

33d Place & Cottage Grove Ave., Chicago, Ill.

Products—Quam Permanic, Dynamic, Permanent Magnet Dynamic Speakers, Quam Aerial Kits and Private Brand Kits, Marvel Toy Telephones.

The Radiart Corporation

13229 Shaw Ave., Cleveland, Ohio

Products—Auto Radio Vibrators, Auto Radio Aerials; Power Supply Units.

Radio Condenser Company

Davis & Copewood Sts., Camden, N. J.

Products—Variable Air Condensers.

Radio Speakers, Inc.

221 East Cullerton St., Chicago, Ill.

Products—Radio Loud Speakers.

Raytheon Production Corporation

55 Chapel St., Newton, Mass.

Products—Radio Tubes.

RCA Manufacturing Company, Inc.

201 North Front St., Camden, N. J.

Products—Radio Sets, Victrolas, Battery, Portable, Automobile, and Police. Television Sets—Console, Table, Separate Video, and Kits. Broadcasting and Transmitting Equipment; Television Transmitting and Receiving Equipment; Photophone Equipment; Vacuum Tubes, including Radio Receiving Tubes, Transmitting Tubes, and parts therefor.

Readrite Meter Works

136 E. College Ave., Bluffton, Ohio

Products—Radio Test Instruments and Vane Type Meters.

Rea Magnet Wire Company, Inc.

E. Pontiac St., Extended, Fort Wayne, Ind.

Products—Magnet Wire, All Insulations.

Reliance Die & Stamping Company

1260 Claybourn Ave., Chicago, Ill.

Products—Variable Condensers, Gear Drives, Stamped Gears.

Remler Company, Ltd.

2101 Bryant St., San Francisco, Calif.

Products—Radio Sets—Console and Battery.

The Rola Company, Inc.

2530-70 Superior Ave., Cleveland, Ohio

Products—Loud Speakers.

Runzel Cord and Wire Co.

4727-31 Montrose Ave., Chicago, Ill.

Products—Diversified line of cords, both telephone and electrical.

The F. W. Sickles Company

300 Main St., Springfield, Mass.

Products—R.F. and I.F. Coils; Units; Padders, Trimmers, Silver Mica Condensers.

Solar Manufacturing Corporation

Bayonne, N. J.

Products—Dry and Wet Electrolytics, Paper Bypass Condensers, Trimmer, Molded Mica Condensers. Elim-O-Stats, Capacitor Analysers.

The Sparks-Withington Company

2400 E. Ganson St., Jackson, Mich.

Products—Radio Sets.

Speer Resistor Corporation

Saint Marys, Pa.

Products—Speer Insulated and Non-Insulated Resistors. Speer Carbon Suppressors.

Stackpole Carbon Company

Tannery St., St. Marys, Pa.

Products—Variable Resistors, Fixed Carbon Resistors, Switches, Contacts, Graphite Anodes for Tubes, Iron Cores.

Standard Transformer Corporation

1500 North Halsted St., Chicago, Ill.

Products—Transformers.

Stewart-Warner Corporation

1826 Diversey Parkway, Chicago, Ill.

Products—Radio Sets—Console, Table, Midget, Combination Radio-Phonograph, Battery, Portable, and Automobile. Television Sets—Console.

Stromberg-Carlson Telephone Mfg. Co.

100 Carlsen Rd., Rochester, N. Y.

Products—Radio Sets, Television Sets. Also Program Service Systems, and Antenna Kits.

Supreme Instruments Corporation

Howard St., Greenwood, Miss.

Products—Radio Testing Instruments.

Synthane Corporation

Oaks, Pa.

Products—Various specialties.

Transformer Corporation of America

69 Wooster St., New York, N. Y.

Products—Sound Equipment and Accessories, Electronic Control Devices.

Tung-Sol Lamp Works, Inc.

95 Eighth Ave., Newark, N. J.

Products—Radio Tubes and Radio Panel Bulbs.

Utah Radio Products Company

820 Orleans St., Chicago, Ill.

Products—Loud Speakers, Transformers, Chokes, Vibrators, Resistors, Jacks, Controls, Switches, Plugs, and Midget Motors.

The Webster Company

5622 Bloomingdale Ave., Chicago, Ill.

Products—Automatic Record Changers, Amplifiers, Phonograph Motors and Turntables, Laminations and Stampings, Microphones, Pickups.

Wells-Gardner & Company

2701 N. Kildare Ave., Chicago, Ill.

Products—Radio Sets.

Weston Electrical Instrument Corporation

614 Frelinghuysen Ave., Newark, N. J.

Products—Electrical Measuring Instruments, Sensitive Relays and Associated Devices, Radio Servicing and Tube Testing Equipment, Electrical Speed Measuring Equipment, Photoelectric Devices and Photographic Exposure Meters, West-ortherm Bi-metallic Thermometers.

Zenith Radio Corporation

6001 Dickens Ave., Chicago, Ill.

Products—Radio Sets.

RADIO BUYING GUIDE

**WHAT TO BUY
AND
WHERE TO BUY IT**

1940 BUYING GUIDE

ACOUSTICAL PRODUCTS AND SERVICE

American Communications Corp., 1650 Broadway, New York, N. Y.
Armstrong Cork Products Co., Lancaster, Pa.
Atlas Sound Corp., 1451-39th St., Brooklyn, N. Y.
Color-Tone, Acoustical Devices, Inc., 322 E. Colfax Ave., South Bend, Ind.
Cototex Corp., 919 No. Michigan Ave., Chicago.
Chicago Sound Systems Co., 200 E. Illinois St., Chicago, Ill.
Electrical Research Products, Inc., 195 Broadway, New York, N. Y.
General Insulating & Mfg. Co., Alexandria, Ind.
General Insulating Products Co., 8821 15th Ave., Brooklyn, N. Y.
Insulite Co., 1100 Builders Exch., Minneapolis, Minn.
Johns-Manville Co., 22 E. 40th St., New York, N. Y.
Kraushev & Mattison Co., Ambler, Pa.
Miles Reproducer Co., Inc., 812 Broadway, New York, N. Y.
National Rug Mills, Inc., 2494 S. 5th St., Milwaukee, Wis.
RCA Manufacturing Co., Inc., Camden, N. J.
Shure Bros., 225 W. Huron St., Chicago, Ill.
Shugart, Harold E. Co., 911 Sycamore Ave., Los Angeles, Calif.

THE DEPARTMENT of COMMERCE and its ACTIVITIES REGARDING RADIO

By

JOHN H. PAYNE

Chief, Electrical Division

Washington, D. C.

THE Bureau of Foreign and Domestic Commerce has as its main objective comprehensive service to American industry, principally along the line of business promotion. Because of the nature of this activity, it is frequently possible to supply information in regard to other phases of the radio industry, such as engineering, statistics, applications, etc., which may be asked either by students or laymen outside of industry.

Emphasis is placed on foreign business inasmuch as this is where the greatest service can be rendered. American companies, obviously, do not need assistance in their domestic business to the same extent that it can be of use in their foreign activities.

Radio assumes a leading position in the Electrical Division's activities, since it is the largest item or group of items classified as a unit, in our electrical exports. Recently, it has represented 25 to 30 per cent of the total exports of all electrical commodities from the United States to the rest of the world.

The Bureau serves industry through three rather distinct organizations—first, its 25 District and 53 Cooperative Offices located throughout the United States, through which it has facilities for intimate contact with all American individuals or businesses wishing to avail themselves of its services; second, through 300 Foreign Offices located in the capitals and principal cities of practically all countries of the world, making close foreign contacts on behalf of American industry; third, a highly specialized headquarters organization in Washington, providing experienced people in each phase of industry and in several commercial services.

For an exporter, a District or Cooperative Office can perform such services as these: indicate where there is a market for American goods; explain how best to enter a market; specify the terms on which goods are ordinarily sold in a particular market; provide data as to the competition to be encountered from foreign sources; furnish lists of buyers in the principal markets of the world; and render many other services.

The Foreign Offices are a vital factor for the Bureau's service. They constantly provide data on all the significant economic, commercial, and financial developments of the various countries. They report on the general business situation in a specific foreign market—the competition between American goods and the products of other countries—the import duties and restrictions that may be imposed—sales methods and credit terms—and the foreign-exchange situation, when pertinent. They conduct surveys covering specific commodities in definite foreign markets, and provide a variety of other current special data.

Because of the multiphase character of radio, the Electrical Division is not the only division of the Bureau interested in radio subjects. Whether the Electrical Division or the Bureau generally is addressed is unimportant, since reference and collaboration methods assure that all informed individuals will have contributed when the reply is prepared. For instance, radio from a public utility communication standpoint comes under the jurisdiction of the Transportation Division and radio advertising methods under the Specialties, which handles advertising methods and media in general. Through their cooperation, the Electrical Division is enabled to answer any inquiry within the scope of the Bureau's activities.

While the Industrial Divisions in Washington render specialized services to spe-

cific industries, there are in the Bureau seven divisions giving intensive study to various distinctive phases of foreign business characteristics. In response to inquiries from industry, they can supply information not otherwise obtainable on some of the highly specialized aspects of foreign trade.

These Divisions include:

Commercial Intelligence—compiles lists of foreign buyers or sellers. There are 32,000 such lists now available to American business. The Division maintains a "World Trade Directory" report giving commercial information on approximately 650,000 foreign buyers or sellers. Information on credit and collection conditions, and credit payment terms in foreign countries, through the "Credit Situation Abroad" service.

Commercial Laws—distributes information on the laws of all countries which relate to commerce and industry, including laws for transacting business, organization, commercial acts, and taxation, property problems (trade-marks, patents, copyrights, unfair competition, etc.), foreign insurance, factory, labor, and social-security laws affecting the cost of doing business abroad.

Finance—collects information regarding foreign banks and banking affairs, foreign monetary and exchange conditions, foreign trade financing in general, and related subjects. Is a prime source of statistics on (a) the balance of international payments of the United States; (b) foreign securities publicly offered in the United States; (c) American investments abroad; (d) foreign investments in the United States; and (e) data on related subjects such as war debts, etc.

Foreign Tariffs—current detailed records of customs tariffs, quotas, trade regulations, and commercial policy of all foreign countries, reports to American firms changes in this important field. Information on trade agreements concluded with foreign countries, and on all other phases of foreign customs requirements.

Foreign Trade Statistics—gathers, compiles, and disseminates statistics on American imports and exports. Also contributes to numerous general statistical studies sponsored by the Industrial Divisions to meet the indicated requirements of individual industries.

Regional Information—furnishes general information about economic conditions abroad. A high degree of specialization is attained in this Division through placing the work under the supervision of regional specialists in charge of the European, Far Eastern, Latin American, and Russian Sections.

Transportation—collects and analyzes data from both foreign and domestic sources on such subjects as ocean shipping, packing and packaging, tourism, materials handling, inland waterways, railway and motor transport, communications and postal services, warehousing, bills of lading, industrial traffic management, etc.

The Bureau maintains twelve Industrial Divisions, staffed by experts conversant with the details of each industry. These divisions bring the Bureau into direct touch with producers and exporters, making possible the establishment of mutually helpful relationships. For each industry, there is provided a specialized service, satisfying some of its peculiar and characteristic needs for statistical and other information. Essential information and data are collected under competent supervision, and is disseminated to the many trades in the most efficient ways that can be devised. Most of the material is provided by representatives of the Foreign Offices; the information covers a wide field of industrial and trade activities and is released to business in periodical and special bulletins.

The Electrical Division, one of the twelve similar industrial divisions, renders broad commercial services to the American electrical and radio industries. Its Radio Section serves the manufacturers of broadcasting and receiving equipment, as well as the broadcasting operators. Wide distribution of U. S. A. short wave programs has been established in cooperation with the Radio Manufacturers Association, whereby a compilation of all beamed American short wave programs is made available to publishers throughout the world.

The Division concentrates on obtaining and offering data which industry lacks the means of securing through its own endeavors. With respect to radio, the Division collects information regarding the widely varying conditions in other nations, in order to be able to inform American industry of world developments, prospective markets, needed adaptations, and other related matters.

Radio surveys have been made to develop the effectiveness of American short wave broadcasting throughout the world. Both its good qualities and its limitations as brought out in these surveys are passed on to the American short wave operators for their guidance.

Criticism from the radio or other electrical industries is solicited by the Division, in order that it may improve and make its services more useful to all interested in using them.

INTERNATIONAL BROADCAST STATIONS IN THE UNITED STATES

The term "international broadcast station" means a station licensed for the transmission of broadcast programs for international public reception. (Frequencies for these stations are allocated from bands assigned, between 6,000 and 26,000 kilocycles, for broadcasting by International Agreement). Such stations, which are required to render a broadcast service which will reflect the culture of this country and promote international goodwill, understanding and cooperation, may include commercial or sponsored programs, which gives no more than the name of the sponsor and the general character of his product or service. After July 1, no such station will be authorized to install equipment or be licensed for operation with a power less than 50,000 watts.

— INTERNATIONAL — BROADCAST STATIONS

Regulations Governing Their Establishment and Operation, as of January 1st, 1940, Together with Available Groups of Frequencies.

The term "international broadcast station" means a station licensed for the transmission of broadcast programs for international public reception. Frequencies for these stations are allocated from bands assigned (between 6,000 and 26,000 kilocycles) for broadcasting by International Agreement.

A license for an international broadcast station will be issued only after a satisfactory showing has been made in regard to the following, among others:

1. That there is a need for the international broadcast service proposed to be rendered.

2. That the necessary program sources are available to the applicant to render an effective international service.

3. That the technical facilities are available on which the proposed service can be rendered without causing interference to established international stations having prior registration and occupancy in conformity with existing international conventions or regulations on the frequency requested (Cairo Radio Regulations, Article 7).

4. That directive antennas and other technical facilities will be employed to deliver maximum signals to the country or countries for which the service is designed.

5. That the production of the program service and the technical operation of the proposed station will be conducted by qualified persons.

6. That the applicant is technically and financially qualified and possesses adequate technical facilities to carry forward the service proposed.

7. That the public interest, convenience and necessity will be served through the operation of the proposed station.

Service: Commercial or Sponsored Programs

A licensee of an international broadcast station shall render only an international broadcast service which will reflect the culture of this country and

which will promote international goodwill, understanding and cooperation. Any program solely intended for, and directed to an audience in the continental United States does not meet the requirements for this service.

Such international broadcast service may include commercial or sponsored programs provided that,

1. Commercial program continuities give no more than the name of the sponsor of the program and the name and general character of the commodity, utility or service, or attraction advertised.

2. In case of advertising a commodity, the commodity is regularly sold or is being promoted for sale on the open market in the foreign country or countries to which the program is directed in accordance with regulations of the Federal Communications Commission herein stated.

3. In case of advertising an American utility or service to prospective tourists or visitors to the United States, the advertisement continuity is particularly directed to such persons in the foreign country or countries where they reside and to which the program is directed in accordance with regulations of the Federal Communications Commission herein stated.

4. In case of advertising an international attraction (such as a world fair, resort, spa, etc.) to prospective tourists or visitors to the United States, the oral continuity concerning such attraction is consistent with the purpose and intent of rules for international broadcast stations.

5. In case of any other type of advertising, such advertising is directed to the foreign country or countries and to which

the program is directed in accordance with regulations of the Federal Communications Commission herein stated and is consistent with the purpose and intent of said regulations.

The areas or zones established to be served by international broadcast stations are the foreign countries of the world, and directive antennas shall be employed to direct the signals to specific countries. The antenna shall be so designed and operated that the signal (field intensity) toward the specific foreign country or countries served shall be at least 3.16 times the average effective signal from the station (power gain of 10).

An international broadcast station may transmit the program of a standard broadcast station or network system provided the provisions for commercial program (stated above in regard to any commercial continuities) are observed and when station identifications are made, only the call letter designation of the international station is given on its assigned frequency, and provided further that in case of chain broadcasting the program is not carried simultaneously by another international station (except another station owned by the same licensee operated on a frequency in a different group to obtain continuity of signal service), the signals from which are directed to the same foreign country or countries.

Station identification, program announcements, and oral continuity shall be made with international significance (language particularly) which is designed for the foreign country or countries for which the service is primarily intended.

Frequencies Allotted

The following groups of frequencies are allocated for assignment to international broadcast stations on an experimental basis:

<i>Group A</i>	<i>Group B</i>	<i>Group C</i>	<i>Group D</i>
6020 kc	9510 kc	11,710 kc	15,110 kc
6040	9530	11,750	15,150
6060	9570	11,770	15,170
6080	9590	11,790	15,190
6100	9650*	11,810	15,210
6140	9670*	11,830	15,230
6170*		11,850	
6190*		11,870	
		11,890	

<i>Group E</i>	<i>Group F</i>	<i>Group G</i>	<i>Group H</i>
15,250 kc	17,760 kc	21,460 kc	25,600 kc
15,270	17,780	21,480	25,625
15,290	17,800	21,520	25,650
15,310	17,830*	21,540	25,675
15,330		21,570*	25,700

<i>Group G</i>	<i>Group H</i>
21,590*	25,725
21,610*	25,750
21,630*	25,775
21,650*	25,800
	25,825
	25,850
	25,875

*Any operation on this frequency prior to September 1, 1939, shall be in compliance with Article 7, Cairo General Radio Regulations.

Separate Licenses

A separate license and call letter designation will be issued for each frequency except that where frequencies in two or more groups are required to maintain a particular international broadcast service to certain foreign country or countries, one frequency from each of the groups required may be authorized by one license and one call letter designation. In such cases these frequencies shall be used consecutively during a day as required and they shall not be used simultaneously either on the same transmitter or different transmitters.

Not more than one frequency in any group stated above will be assigned to a station.

Power Requirement

No international broadcast station will be authorized to install equipment or licensed for operation with a power less than 50 kilowatts. (This provision shall become effective as applying to existing stations on July 1, 1940.)

A supplemental report shall be filed with and made a part of each application for renewal of license and shall include statements of the following:

1. The number of hours operated on each frequency.
2. A list of programs transmitted of special international interest.
3. Outline of reports of reception and interference and conclusions with regard to propagation characteristics of the frequency assigned.

Frequency Control

The transmitter of each international broadcast station shall be equipped with automatic frequency control apparatus so designed and constructed that it is capable of maintaining the operating frequency within plus or minus 0.005 per cent of the assigned frequency. (This provision shall become effective as applying to existing stations on January 1, 1941.)

★ C U B A ★

— A SURVEY —

General—The number of sets in use in Cuba range from 100,000 to as high as 250,000 sets. Inasmuch as manufacturers in the United States have supplied most of the sets, United States exports are a reasonable accurate measurement of the market. The 1938 imports from the United States numbered 20,095.

Television—No developments except for experiments by an amateur. No transmitter is operating.

Amateurs—Amateurs are estimated to total between 250 and 300. The principal organization is the "Radio Club de Cuba," Lealtad 136, Habana. Decree No. 2132 of September 2, 1939, suspended for one month all amateur licenses, further extended to November 8. The suspension was announced to be to give the Government an opportunity to draw up regulations to govern this class of activity.

Facsimile—No facsimile service has been established. Newspapers have failed to evince sufficient interest in such a service.

Short Waves—Demand for sets is principally for those covering short waves. Reception of American and European stations, however, is not very satisfactory, partly because of local interference and partly because of severe fading. This has been improved somewhat by beam operation of American stations, although it is demonstrated that the South American beams do not give satisfactory service in Cuba. The reception of European stations is still the best.

Reception of foreign stations on the 49 meter band is extremely poor at all times. This is due in part to the fact that the frequency is not adaptable to the distance involved and also because of the high noise level. Cuban stations on all of the short wave bands come in very loud and clear and the tendency to overlap adjacent wave lengths appears to be stronger in the longer wave length band, crowding out foreign stations. The 32, 25, and 19 meter bands are good at certain times of the day. The use of tropical waves was not authorized for Cuba by the Cairo Conference of 1938.

Broadcasting—During the past year increased effort appears to have been expended in improving radio programs, and a number of stations have remodelled their equipment for more efficient opera-

tion. Several have moved to better sites outside the city. A chain is operated by station CMK, known as the Cadena Nacional Telefonica, with nine stations in the interior connected by private line. These are CMAR, CMGF, CMHW, CMJX, CMJC, CMKF, CMKR, and COGF. At the present time the equipment in use is not entirely satisfactory and material has been purchased for needed improvements.

Special efforts have been made by the Radio Bureau of the Department of Communications to cut down the number of stations and improve the character of programs and service, with some effective results, and further developments indicated.

Programs—Operators of Cuban stations claim that Cubans prefer local stations to foreign, and that there is a strong liking for so-called "typical music" such as rumbas and other native forms. Many American programs, especially musical, are well liked, especially if obtainable through Cuban stations. Increasing facilities for such rebroadcasts are being made available by American systems. This is considered an important factor in improving the general character of programs.

Advertising—Broadcasting time charges run from as low as \$5 an hour to \$50 an hour, and in a few instances as high as \$100 an hour. Considerable use is made of "menciones de 35 palabras" (announcements of 35 words). These are generally broadcast at program breaks, especially just before a popular program. Announcements may be used to a total of 10 or 15 minutes before the new program is started. Contract rates for repetition are arranged.

Listeners have indicated displeasure with the long advertising periods arising from this practice.

Transcriptions—There is only a comparatively small amount of use of transcriptions. Those familiar with Cuban broadcasting station operation state, however, that the use of transcriptions may expand somewhat in the near future as there appears to be more demand for transcription making equipment. It is customary for the advertiser to furnish his own transcriptions. Some are now being made in Cuba. Turntables are mostly 33 r.p.m.

★ MEXICO ★

— A SURVEY —

General—Present estimates indicate that there are 400,000 to 450,000 sets in use.

Sales are generally parallel to United States exports. The marked decline in radio sales during 1938 is attributed to the high and fluctuating rate of exchange. During the first 6 months of 1939 radio sales were about 50 per cent higher than during the same period of 1938 and were considered normal. It is estimated that 85 per cent of the demand is supplied by United States manufacturers and the remaining 15 per cent represents imports from other countries, especially Europe, and domestic production.

Transmitting Equipment—Most transmitters, as well as the replacement parts and accessories, are of American origin. However, the latest large installation, Station XEQ, was made with German equipment. This is probably due to facilities offered through barter trade. Broadcasting stations are increasing in number and the smaller stations are gradually increasing the volume and capacity of the transmitting equipment.

Point-to-point communication is prohibited commercially, as this is a Government monopoly.

There is no police radio. Several attempts have been made to interest the Police Department, and it is reported that it is considering an installation in the Federal District. The absence of a radio system is probably partly due to the fact that every road leaving most Mexican cities is generally guarded by a police sub-station which records all automobiles entering and leaving the city, and to the high cost of this equipment.

The number of amateur broadcasting stations have been considerably reduced because of the law now requiring that only Mexicans may be licensed with the exception of those operating under 10, 5 and 3 meter bands, which are considered as experimental work and residents of Mexico, not necessarily Mexicans, can secure the permits for operation.

Airplane transmitting equipment is used by one commercial aviation company in Mexico and the Mexican War Department. As a general rule the equipment in the planes is supplied and installed by the plane manufacturer and the broadcasting equipment is bought in the United States.

Transmitting tubes are generally of American manufacture and are of the type best suited for the transmitter for which intended.

Transmitting equipment is imported almost entirely from the United States.

Patents and Trade Marks—There is no patent interference with the sale of American radio sets and tubes in Mexico. There is no reported evidence of trade-mark piracy in the radio trade or in the trade in general in Mexico.

Television—There has been no development whatsoever in television in Mexico. It is believed that the high cost of the equipment involved will greatly restrict potentialities.

Facsimile—No radio facsimile service exists at the present time. News pictures from Europe often appear in the local press as having been received via telegraph in the United States and then flown to Mexico.

Short Wave—Short wave is becoming more popular every day due in part to the fact that United States stations and European ones have during the past year increased their broadcasts in the Spanish language. Short wave programs from the United States are popular and their reception is good. Other western and European stations are heard regularly and are popular. Progressive improvement in Mexican broadcasting stations and other transmitters have improved reception and eliminated interference.

Reception on the 49-meter band is not very good because there are too many stations operating on this frequency. There are not as many stations operating on the 31-meter band and, therefore, the reception is better than on the 49-meter band. Reception on the 25-meter band is the best. Reception on the 19-meter band is good at mid-day and during the early evening, on the 16-meter band good during the early morning and at noon time, and on the 13-meter band good during the very early hours of the morning. There have been no developments on the Tropical bands. It is believed that there are not more than 12 or 15 ultra short wave radios throughout the entire country.

Broadcasting The control of all communications is placed by the General Communications Law in the Department of Communications and Public Works. This law defines commercial broadcasting and commercial broadcasting establishments and limits their activities so as not to compete with the Government-owned systems of communications such as Posts and Telegraphs or with the commercial telephone companies.

Actual regulation and administration is exercised by the Radio-Communication Office which functions under the Department of Telegraphs and Posts of the Secretariat of Communications and Public Works. According to Regulations licenses are granted only to Mexican citizens, except in the field of cultural and experimental broadcasting. With regard to commercial broadcasting, there is apparently no legal difficulty in the way of foreign nationals who wish to enter the broadcasting field in Mexico provided they form a Mexican corporation and comply with Mexican laws, but operators must be licensed and Mexican citizens. The term of a concession for commercial broadcasting has been limited by the aforementioned Regulations to twenty years.

All broadcasting stations, regardless of their nature, must be licensed by the Secretariat of Communications and this Department must previously approve the electrical equipment to be used. This Department also reserves the right to determine the location of the station. Foreign programs transmitted to the Mexican licensed commercial broadcasting station by telephone or radio may be broadcast only upon receipt of the previous authorization from the Department of Communications and Public Works.

Programs—General daily hours of operation are from 7 or 8 a.m. to midnight. Some stations operate after midnight.

Preference is for what might be termed a "National Program," made up of vocal and instrumental Mexican music, news, classical musicals, comedies, dramas and comic dialog. Modern dance music is also very popular in Mexico. However, programs from the United States and other countries are increasing in popularity in Mexico.

There is no chain broadcasting at present, although special hookups are arranged for outstanding occasions, such as a Presidential address. On Sunday from 10 to 11 p.m. there is a national hookup dedicated to the country and broadcast by the Department of Automono de Prensa y Publicidad. Authority to require chain operation for the transmittal of the official bulletins which every station is required to broadcast is given in the regulations.

Advertising—The largest users of radio advertising time appear to be breweries, medicinal manufacturers, manufacturers of beauty preparations

and cigarette manufacturers. These four industries whose products cover the Republic, advertise on a national scale and so buy radio time from stations widely scattered throughout the Republic. Other radio users are largely localized. In the Federal District advertisers concentrate on the available markets furnished by a population of 1,447,274, and advertise in addition to the above mentioned articles, others such as shoes, clothing, furniture, foodstuffs, jewelry, etc. Stores buy radio time to advertise special sales.

Programs advertising medicinal products must be previously approved by the Mexican Department of Public Health.

Some of the prevailing methods of advertising are: programs with live talent, electric recording and phonograph records; news items; contests; sports; special events; hours such as "Information Please" in the United States; current sayings; children's rhymes and many other methods.

One of the leading commercial broadcasting companies (XEW) quotes the following rates:

28 minute periods: midnight to 2 a.m., 100 pesos; 2 a.m.-12:30 p.m., 60; 12:30 1:30 p.m., 80; 1:30-3 p.m., 130; 3-6 p.m., 85; 6-7, 110; 7-7:30, 140, rising progressively to 250 pesos from 9 to 10, and decreasing to 125 from 11 to midnight.

35-word announcements: midnight to 12:45 p.m., 6 pesos; 12:45-3:15, 14; 3:15-5, 8; 5-6, 10; 6-11, 40; and 11-12, 18 pesos.

150 word rates are about double the 35-word rates, with intermediate 50- and 75-word tariffs. No quotation is given for 50-word announcements before 7 p.m. or for the longer ones after that hour. Before and after news broadcasts, rates range from 8 to 50 pesos for 40 words, according to hour, the rate being 20 per cent less for those after news except from 6 to 8 p.m., when it is the same, 30 pesos.

All broadcasting stations in Mexico with the possible exception of one or two Government-owned stations carry advertising.

Recordings—The use of transcriptions and recording is very prevalent, especially at the dull time of the day. There is no general rule or customary arrangement for advertising transcriptions as far as can be ascertained. The turntable speeds 33 and 78 r.p.m. Most of the records that are played in Mexico are either from the United States or European countries.

Regulations The wiring restrictions prevalent in Mexico would in no way affect the design of American receiving sets, intercommunicators and television receivers.

Mexican radio regulations published in this series in "Mexico-Supplement Regulations," dated July 11, 1939, are still in force.

WHEN MINUTES MEAN MONEY.

**SEND IMPORTANT MESSAGES
VIA POSTAL TELEGRAPH!**

WHEN PEOPLE ARE "TOO BUSY," remember this:
A Postal Telegram is not kept waiting in an outer office. Postal
messengers are trained to get a *signed receipt!*

WHEN A DEAL'S ALMOST CLOSED, speed last-min-
ute, important facts via Postal Telegraph. You can be sure they
will be transmitted *accurately!*

WHEN THE UNEXPECTED HAPPENS, notify all
concerned by Postal Telegraph. It costs surprisingly little, thanks
to new low Postal Telegraph rates!

WHENEVER SPEED IS ESSENTIAL, count on the
nation-wide Postal Telegraph system—for helpful, personal
service. Just phone Postal Telegraph. Charges appear on your
phone bill.

Postal Telegraph

"SWIFT... ACCURATE... ECONOMICAL"

NEW ENGLAND

**... A Market of
Single Homes**

IN cities of 25,000 or over 59.9% of the houses are single homes -- 30.8% are valued at \$5,000 or over — home ownership is 28.4%. People living in homes of this type provide the most responsive market for hundreds of commodities.

The Colonial Network, covering 18 key buying centers, provides the locally accepted, locally effective coverage that is essential on every New England campaign — and does it economically.

THE COLONIAL NETWORK

21 BROOKLINE AVENUE

BOSTON, MASSACHUSETTS

EDWARD PETRY & CO., INC., Exclusive National Sales Representatives

"How are we
going to get
complete
coverage in
New England?"

"There's only
one answer —

The
**YANKEE
NETWORK**

— with its local
acceptance in 18
major markets."

EVERY key trading area in EVERY one of the
six states is covered by a locally-accepted
station of The Yankee Network, with a poten-
tial listenership of 5,982,238. That's sales
power plus in a \$3,579,056,000 market.

THE YANKEE NETWORK
