CLOYD MARSHALL, JR.

#### Prevention Vs. Cure

Judge Ben B. Lindsay has been removed from the Denver Judicial Court Bench through a technicality in the recent municipal elections. For a good many years there has been concerted opposition to this famed justice on the

part of certain circles.

To some degree this opposition is based on political reasons. But for the most part it springs decidedly from certain groups of parents. mothers and fathers are the ones who resent the Judge's wagging finger of accusation anent their wayward children. Judge Lindsay's deep study of the motives and causes underlying the immoral and iminal tendencies of children and young people has enabled him to place the blame unerringly. the dismay of ninety per cent of the parents of these juvenile offenders they find in no uncertain manner that they are directly responsible, through lack of judicious parental training. To be roundly lectured, and even penalized, from the Bench for neglect and otherwise shirking their duty toward their children, has left a good many parents somewhat chagrined but much wiser.

For years Judge Lindsay has administered juvenile law with such able effect and far-reaching success that he is nationally recognized as the outstanding leader in this rather pathetic His work in preventing crime and vice at their source, or one might say in their infancy, has been of tremendous constructive value. It is too often overlooked that young children under improper care or lack of influence are very likely to follow the easiest path and resort to lying, cheating and steal-

well-meaning parents of these children are apt to meet your informing words with withoring retorts reflecting on your meddlesome nature and evil mind in thinking that their bright-eyed youngsters are anything but perfect. Just as other parents would be speechless with horror to know just how often their children in high school indulge in the wildest flings from drunken parties to exceedingly questionable nocturnal auto rides. At such three spless tells and level tokes comprise the ering retorts reflecting on times spicy talk and lewd jokes comprise the bulk of the young peoples' conversation. The colleges have been under the cross-fire of

mornilty investigation recently. This is locking the barn door after the borse is stolen. Those who really know, confirm the fact that the boy or girl previously possessing the wilder tendencies—and the number is surprisingly large—on entering college is already a supported provider between

already a seasoned rounder, however genteel.
When trouble darkens the racy path of the unlucky, the parents, if reasonable, realize that perhaps their discipline was wanting in certain respects. Whether the child is eight or eighteen, Judge Lindsay does not leave them in doubt about this—they are as guilty as their children. as their children.

as their children.

We need more men of his ability and fearlessness on our Juvenile Court Benches. It
is to be hoped that the people of Denver will
elear up the obstructing legal technicality
and reinstate Judge Lindsay.

#### Spies In Camp

Our institutions, national leaders and American traditions have been viciously assailed recently by some self-styled American iconoclasts. One is a contemporary novelist, whose work is simply leaving his rollen remembrance to posterity. Others you have probably read in their own publications-no one

else will print them.

The cleryy, our Government and our most cherished oustoms are held in the light of blasphemy and subjected to poisonous thrusts by these little Americans who call themselves intellectuals through their gift of literary fluency. They symbolize the venomous scorpion trying to sting to death a beautiful marble statue. These men, by their despicable criticisms of American life. are reflecting their own vile natures to the detriment of our social structure.

Conceited enough to class themselves as progressive intellectuals, they are obviously duaried to insignificance in comparison with the very men and institutions they seek to destroy. Yet their own comfort and security are based on these objects of their distorted pens. In reality, they are rank defeatists, for their style fairly recks with jealousy and ency directed against human and institutional

They put America in a bad position in the eyes of other nations, for we are unintentiansily judged by the utterings of these perverted denunciators. Recently the peer of Reitish writers, R. G. Wells, was fair enough to assume a tone of public apology for his severe criticisms of the United States, for he had been shown his mistake in judging us from writings of these few contemptible American literary men.
Their base impressions, hurt us at home

and abroad.

## Radio Topics of the Day

A Weekly Review of Radio News, Thought and Opinion

#### FEDERAL COMMISSION PRODS ANNOUNCERS

Although intended for an entirely different purpose, the order of the Federal Radio Commission that each station announce its call letters and location as frequently as practicable while brondcasting and in any event not less than once every fifteen minutes, is the first step ever taken in this country, to prod the announcers.

Not long ago the commission issued an order that twice each day at the beginning and end of its program every station must announce the frequency upon which it is broadcasting. This was in line with the enforcement of the strict policy of stations keeping on their assigned frequency and wave length and so that the public as well as radio supervisors would be constantly informed as to what the station's frequency is and thus have an opportunity to check it. "Having made the chalkline," Commissioner O: H. Caldwell remarked, "we now propose to see that the broadcasters walk it."

Now to further assist the supervisors comes the order that call letters must be more frequently announced. And thereby has the commission unconsciously conferred upon the distance listener an untold blessing. Who among the listeners has not had the experience of drearily waiting for as long as half an hour at a time, especially late at night, fintil some lazy announcer wakes up sufficiently to confide his call letters and city.

#### MANY CHANGES FORESEEN IN NEWEST REALLOCATION

It is predicted that there will be upwards of 600 changes of power, wave leagth and time division in the 60-day license assignments of the Federal Radio Commission, which are expected to be announced to the public the latter part of this month, if not sooner.

The commission began by issuing temporary permits and making relatively few changes, but when the short time, or 60-day licenses are subsequently granted, it is said practically every station in the country may be affected one way or another. There will be a sweeping reduction of power of stations in residential or congested districts, and some stations may have to divide time two or three ways.

Contrary to the original idea that these short-time assignments were to be announced at intervals, it is now expected that they will all be made public at one time, and fairly soon. The commission, it deevlops, is burning midnight oil grappling with the assignments and remain at their desks long after hours each night. If, after the short-time license assignments are announced, any broadcaster feels he hasn't had a square deal, he will be given ample opportunity to tell the commission what assignments he thinks he ought to have.

Once the 60-day licenses are issued the situation will be allowed to stand pretty much as it then is for that period of time at least, and maybe until Fall, before the three-year, or what the commissioners consider the more or less permanent licenses, are granted.

## MacDonald gets the whole, wide world

William MacDonald, of Chula Vista, California, has a world-wide reputation as a "dyed-in-the-wool" DX chaser.

His list of stations, verified by Ekko stamps, totals 610, and more stamps are on the way.

MacDonald has had verification from 115 broadcasting stations outside the United States. His foreign list includes 5 stations in England, 2 in Scotland, 4 in Spain, 5 in Germany, 3 in Japan, 3 in Australia and 2 in New Zealand. Ireland, Wales, Belgium, Portugal, Russia, France, Norway, Sweden, Switzerland, India, Austria and the Philippine Islands have verified his reception, as have 17 stations in Canada, 6 in South America and 3 in Alaska.

## Page

## Express Yourself

The publishers of RADIO DOINGS are committed to a policy of giving you the kind of magazine that you want. Many letters have been received of late, particularly in response to the introduction of "Your Page," last week. These letters, in most instances, have been contradictory to each other, which leads us to go into your desires more deeply to find just what would better fit your needs in RADIO DOINGS as a superior Radio publication.

In our increasing efforts to obtain an accurate consensus of opinion from the majority of our readers we are appending a coupon arranged so that you can conveniently express your ideas of our various departments.

Simply place a check mark opposite the headings which you consider helpf' I and interesting. Along with this coupon we will welcome any comments or suggestions as to why you think certain departments should be discontinued and with what they should be replaced, if you think this necessary.

This is for your benefit, and we invite a reply from each one of our readers.

### Phonograph Reproducers

E. K. HAYES-V. M. BITZ\*

Many queries are received as to the merit of the capacit type phonograph reproducer which has recently been placed on the market, and as the writers have had the opportunity to give it a rigid test, a comparison will be made with the electro magnetic reproducer. There are three types of reproducers offered to the public, the so-called "microphone" type, the capacity type, and the electro magnetic type. Inasmuch as the "microphone type" is much inferior to the others, it will not be discussed.

The extreme pipe organ range is from 16 to 16,000 cycles physical pitch, approximately; therefore, the theoretically perfect pick up would reproduce these frequencies. There are practical limitations, however, the range of the human ear and the fact that present-day amplifying equipment will not pass efficiently such a wide band. Successful recordings of frequencies from 26 to 9000 cycles are now being made, so if our pick up and amplifying equipment will reproduce these sounds we are doing very well. To do this, the pick up must follow faithfully the grooves of the record, and must be so designed mechanically that it does not in itself damp out any of the vibrations. Both types of pick up follow the grooves very nicely. The damping effect on high frequencies is greater on the capacity type and the electro magnetic pick up does not do quite as well on the

\*Laboratory of Radio Standards:

extremely slow vibrations, however, the truest overall reproduction is obtained with a good electro magnetic pick up. A very important thing the experimenter should consider before putting a capacity pick up into operation is that the oscillator, the output of which is modulated by the pick up, specified by the manufacturers of the unit, is working in the broadcast range and will cause plenty of squeals in nearby receivers.

The most undesirable feature of the capacity pick up from the operator's standpoint is that whenever the hand is placed near the pick up, such as in winding the machine, etc., or placed near the leads from the pick up to the oscillator, considerable distortion results, as the capacity of the body detunes the oscillator. As a laboratory proposition, the capacity type pick up has considerable merit, but the experimenter and home constructor will obtain much better reproduction with the electro magnetic pick up in addition to not filling the ether in his immediate neighborhood with the "squeal" of an oscillator.

#### For the Outdoor Days— Get a Portable Radiola!

Radiola 26, with Six Radiotrons. List \$225.00

With the outdoor days coming—the picnics and camp trips and tours-get a Radiola 26, that can forget it's a home set, and change in a moment to a portable, to carry the music and the sports news with you!

Radiola 26 is famous as a portable—it has traveled nearly half the world! But it is not just a portable. It is a six-tube super-heterodyne, finely made to the last screw-and beautifully cased in walnut. On the finest program, it is clear and real. In the smartest living room, it fits luxuriously.

But when the out-o'-door days come, your Radiola 26 cleverly fills a double purpose. Small portable batteries go inside the back. The loop is in the cover, and you need take along no antenna. The loudspeaker is built in. Just pick it up from its battery cabinet-and take it along. The separate cabinet is made to hold either batteries or battery eliminators, when you listen in at home.

It pays to get a Radiola 26-not only for fine performancebut for double service-and double value! Wherever you are. in a city skyscraper or a lonely mountain top, it goes with youbrings along the music and the news!

#### Some Pertinent Opinions

Gen. George O. Squier, former Chief U. S. Signal Corps—"The house of the future will be furnished for the ear just as the house of the past has been furnished for the eye."

Tex Rickard, prominent sports promotor and showman—"I have found that radio has done more to create new fans for sporting events than any amount of advertising could possibly do."

M. H. Aylesworth, president National Braodcasting Company—"Today the Federal Radio Commission is struggling with the problem of pouring two quarts of water into a one-quart measure."

David Sarnoff, vice president, Radio Corporation of America—"It will not be long before the country will see remarkable developments in the synchronization of sound and sight by radio."

Marcus Loew, moving picture magnate (asked by Variety, "Does radio hurt your business?") "Not at all. The only time radio hurts is when there is a big fight on or a big occasion where everybody stays at home and listens in. That particular night we are hurt."

General Harbord, president, Radio Corporation of America — "Whatever radio broadcasting now does within national borders, it can eventually do internationally."

#### **New Sheldon Set**

A very unusual design in broadcast receivers has been developed by C. C. Sheldon of Los Augeles, who, it will be remembered, won the \$500 prize offered by Radio Digest in 1925, for the most efficient all-around set in any class.

His new set is of the batteryless type; 10 tubes, and incorporates many unusual features. There are five stages of tuned radio frequency amplification; the six condensers being ganged together on a common shaft and operated through a worm gear by one illuminated drum-type dial. The radio frequency transformers are of the plug-in type, making the set adaptable to the reception of all wave-lengths.

Five tuned stages afford remarkable sensitivity, the DX range being limited only by the static level. Selectivity is also an outstanding feature of the set.

The audio frequency amplifier unit of the set employs one stage of resistance

coupled, one stage of Samson impedance coupled, and the new Samson pushpull impedance stage. This combination gives a tone range and quality seldom heard. With the advent of the power tube there has been a tendency to ignore the push-pull method of amplification, which has long been considered superior to the single-tube per stage type. Sheldon's output stage uses two power tubes in the push-pull connection, and hence, is capable of tremendous volume without distortion.

The power supply unit of the receiver uses the new QRS 400-milliampere rectifier tube and provides the power for filaments, plates and grid biasing.

In summary, Mr. Sheldon's set possesses unusual selectivity, sensitivity, volume and quality, in an all-electric batteryless receiver, of advanced engineering design.

## Better Your Radio Reception

With a

"Super-Ball" Antenna

It is non-directional
Receives all wave lengths
Clarifies tone
Improves summer reception
Minimizes static
Easy to install
Less costly to erect
Sheds ice and snow
Not affected by heat

"C. P. R."

There has been a gratifying response to my suggestion that my readers send me some of their favorite recipes, so today I am passing on two that came to me through the mail, and trust that you

will find them as good as they read. These two constitute the main dishes of a delightful luncheon, and are particularly appetizing for this warm weather.

#### Cheese Ring

Three packages of cream cheese. Ruh soft with half a pint of cream. Add one cup of mayonnaise, one pint of whipping cream beaten stiff, four level teaspoonfuls of gelatin dissolved in as little water as possible. Mix and press in a noodle ring. Place in the refrigerator and when stiff, unmold on a chop plate. Place a small bowl full of mayonnaise in th center of the ring and surround with asparagus tips and the small pickled white onions, pimientos cut in strips, long string beans split, and serve with salted wafers.

#### Ginger Ale Salad

One envelope of granulated gelatin. Soak in half a cup of cold water until dissolved, then add one cup of boiling water, half a cup of sugar and one pint of ginger ale. Be sure to use the aromatic ginger ale; the dry will not do. Add one-half cup of straight lemon juice and a pinch of salt. When the mixture begins to set, add one cup of celery cut into small pieces, peeling it back so as to remove the strings, one cup of pineapple cut in squares and one cup of chopped crystalized ginger, Pour into

a bread pan and set in refrigerator about six hours. When it is ready to serve, turn out of the dish, slice and serve with a leaf of lettuce and Mayonnaise, garnished with a dash of paprika.

Because of supervision of children of school age, mothers are becoming informed, little by little, on the subject of correct foods for their children, but there are bosts of mothers who do not give as much thought to the proper balance of nourishment for their children as is ordinarily given to the raising of a pedigreed pup, or the proper fattening of a pig for market. Every woman responsible for the life of a child should study the needs of that child. seemingly a very simple matter today to find books and hear lectures on all phases of the development of the mind and body of a little child. The radio brings interesting talks right into the home if one will find the time to turn the dials, the consultation with the lihrarian will supply the mother with. books that are simple, easily read and interesting if one has at heart the desire to understand.

In the list of givers to the relief of the flood sufferers I noticed one item—"Scrubwomen, \$10.00." No identifying names and no address, but the hearts of these women went out to those in distress—they wanted to help. We might go back to a familiar story, one that has come down through the ages and still lives—the poor widow with her small gift who, "of her want did cast in all she had, even all her living." The spirit of the poor widow of Jerusalem

(Turn to Page 77)

### Koo-KoO KolyuM

By HAL DAVIS

We had the pleasure, the other day, with colleague Jack Miller (alias Mons. Jacques Millère), of visiting our good friends at KFON, Long Beach, Cal. As usual, there was a flow of repartee and humor. "Hal" Nichols horrified us by saying that the lifeguards had found a human head floating about on the waves near the big pier of Long Beach. After the exclamations had subsided, "Hal" continued, "Yes, and it was singing 'I Ain't Got No Body.'"

Earl Nichols then took the floor and asked us if we realized what an industrial city Long Beach had become. "Why," sez he, "We move a thousand tons of steel a month down here, and it doesn't cost a cent, either!" When we demunded an explanation of this engineering phenomenon, Earl explained, "Oh, it's due to the large number of horseshoe-pitching clubs in Long Beach!"

The Dear Young Things who decorate our offices have sure been having fun with the Dictographs of late! Here are a few of the "blue ones" that have been copied down from the wax

records, with their proper translations:
"Hydraulicing" for "Hydro-Electric."
"Protestant Radio" for "Patterson Radio."

"Jessie D. Spratt" for "Chief Justice Taft."

"Thick in playing politics" for "Per-

sist in playing politics."

But so far none of our delectable stenos have asked us, "How many Z's in 'Missouri'."-So much can be forgiven them!

#### WHY TEACHERS GET PREMATURE. LY GRAY

The Charming Young Co-ed from U. of C., Southern, who comes to our rescue in emergencies, sends in these selections from examination papers at the Branch:

"Algebra was the wife of Euclid." "To kill a butterfly, pinch its bornx." "The blood vessels are the veins, arteries and artilleries."

"Louis XVI was gelatined during the French Revolution."

"An abstract nown is something that you can't see while you are looking at it."

#### Cruise in the Wake of the Pirates

ET your thoughts take you back to the land of dreams where Romance rides swiftly on the wings of adventure. Drink deeply in the enjoyment of your favorite Radio program as your thoughts cruise the Spanish Main.

The Enchanter Radio Reproducer will help you to this solace and comfort. The design alone is sufficient incentive, but the perfect tonereproduced in its full tonal quality and color-will give you rich, mellow reproduction without the usual interruptions and harshness.

The Enchanter combines an art metal design-Spanish motif-of exceptional beauty and decoration, with perfect radio reproduction. Gives you all that a good speaker can, plus that wonderful invitation to cruise with your thoughts.

#### THE ENCHANTER

CONE SPEAKERS Highest grade reproducers THE TROUBLE SHOOTER

Art Hansen, Box 583, Station C, Los Angeles, asks: Aside from the chemical action in any type of a primary or secondary cell, what causes the current to flow? Or, perhaps, it would be more appropriate to ask, "Why does the chemical action cause the current to flow?" And in what direction does it flow?" 2.—What causes the magnetic field about a conducting single wire to rotate around the wire? 3.—What is the difference between an insulator and a resistance? 4.—What is the difference between the Heaviside Layer and the earth's magentic field?

ANSWER-The chemical action which takes place in a cell produces an electrical pressure, or difference in potential between the two electrodes of the cell. This pressure, or voltage, then will cause an electric current to flow when a suitable path is provided. The current constitutes a movement of electrons from atom to atom of the conducting path and through the cell, the direction of this movement heing from the negative electrode to the positive electrode in the external circuit. current is the direct result of the voltage, and the voltage is the result of chemical action. Just why certain chemical actions produce electrical voltage is not known.

2. Another unanswerable question. When electrons are in motion as in a copper wire, we find an electro-magnetic field around the wire. If such were not the case, electricity could have no practical or commercial application; we would have no motors, generators, telephone, telegraph, radio, trolley cars,and electric lights only from batteries. But WHY such a condition exists we do not know. There are a vast number of such questions that are unanswerable; for instance, why a metal sufficiently heated gives off ether vibrations of a frequency which register through the

eye as light? What is the ether? What is gravitation? How old is Ann?

3. None, only in the degree of resistance. Every material offers some resistance to the flow of an electric current. Those through which the electron stream passes readily are called conductors; the resistance of which varies greatly in different materials. An insulator is an element which offers a very great resistance and is, therefore, a very poor conductor. Rubber, glass, porcelain, bakelite, etc., are examples of insulators. Copper is a good conductor, German silver is a poor one, etc.

4. A great difference. The earth, due to the large amount of magnetic materials which it contains, is in itself a huge, permanent magnet. And, like any magnetized piece of iron, it is surrounded with a magnetic field. The Heaviside Layer is supposed to be a blanket of free ions from the Sun, 50 or so miles above the earth's surface, which being a good conductor of electro-magnetic energy, acts to bend down the upper edge of radio waves, and hence return them to earth by a process similar to reflection of light. We know that the wave front is turned back; we must imagine the manner in which it is accomplished.

James W. Davis, 3016 University Ave., Los Angeles, writes: Referring to the recent article on "Cascade Regeneration," I wish enlightenment on the fol-What advantage is lowing points: gained by tuned regenerative radio frequency amplification by the cascade method over the other methods, potentiometer, variable resistance in plate circuit, capacity feedback, etc.? In the second paragraph of the article the RF. tube is coupled to the detector through a coupling condenser of from 2 to 10 microfarads. Do you mean mfd. or mmfd.? I don't suppose you mean the

enormous capacity of 2 to 10 mfd., but can expect aimost anything in advanced regenerative a nd super-regenerative sets. While I can appreciate that one stage of TRF plus regenerative detector is superior to TRF with straight detector, I have come to the conclusion that no matter how regeneration is obtained in TRF amplification, the results are the same. While I may be entirely wrong in this conclusion, I would like the favor of your opinion.

ANSWER—The cascade regeneration principle described in the article to which you refer is more efficient than the other types you mention, for the reason that the regeneration control does not disturb the proper B and C voltage relationship, which is essential

not as efficient a method of regeneration control as the actual tuning by inductance of the plate circuit. Tuning by inductance is always more efficient than tuning by capacity when the tuned circuit is followed by a vacuum tube for the reason that a higher voltage is built up to impress upon the grid of the tube. The capacity used as a coupling in the arrangement described should be 2 to 10 mmfd.

Many readers have requested diagram and information on the construction of an A-B-C eliminator which employs no batteries or electrolytes. We are giving full details of such a unit employing the new QRS 400-milliampere tube. The power tube filament current is sup-

for efficient tube operation. A vacuum tube, to operate at maximum efficiency. either as RF amplifier, detector or AF amplifier, must have a certain definite relationship between the plate voltage and the blasing grid voltage. In other words, if your RF tube is to perform efficiently as an RF amplifier without distortion you must maintain the B-O relationship.

The potentiometer method of regeneration control. Is simply a means of varying the grid potential. This shifts the operating point on the characteristic curve, and results in distortion, since the plate potential has remained constant. The second method you mention, that of using a variable resistance in the plate circuit, causes a change in the plate voltage without any change in grid voltage, bringing about the same undesirable condition noted above, resulting in distortion. While the third method mentioned in your question does not upset the B-C voltage halance, it is

plied at a voltage of 5 volts, but the filaments of the rest of the tubes of the set must be wired in series and the grid blasing carefully adjusted. The diagram of a 5-tube TRF receiver altered to adapt it to this power pack will be given next week.

P1 is the primary of the transformer tapped for 120 volts, 110 volts and 100-volt A. C.—50-60 cycle.

S1 is the secondary of the transformer used to step up the voltage and operate the Rectifier tube. Values should be 360 V. at 300 M. A. load or 375 volts at no load.

S2 is the coll or secondary of the transformer and is used to operate the ionizer, value 4 volts at 5 amps.

S3 is coil for the A. C. filament supply value 5.5 volts at 1 amp.

T1 is the total transformer.

C1 and C2 are the buffer condensers of .1 mfd. capacity each; 600 volts D. C. working voltage.

(Continued on Page 77)

### GOOD WORK WITH A CROSLEY DX Club:

Say, you DX Hounds! I, too, have a Crosley Set 4-29, 4-tube regenerative and I can get distance as well as selectivity. My log contains nearly every station of any importance on the coast above 50 watts, those I don't bother with. I also have in my log a few distant stations of a record as being hard to get, such as WDAF, Kansas City; KMOX, St. Louis, Mo.; WBBM, Air Theater, Chicago, and CFCN, Calgary, Canada. My favorite distance stations are KSL, Salt Lake City; KOA, Denver; CNRV, Vancouver, B. C.; KFAU, Boise, Idaho, as well as KFKX, Hastings, Neb. You must take into consideration that this location is not the best for reception, on account of the humidity and low altitude; also remember I have only a 4tube set, and for a small set, I dare say, none are better. I, too, would like to see a line or two from a few Crosley owners. I am for Crosley and "Radio Doings." More power to you both.

BILLIE WALKER, 933 Sutter Way, Sacramento, Cal.

#### DX IN MAY

DX Club:

The DX page is the one I always turn to first in your magazine, as I am very interested in receiving distant stations myself.

Using an Apex 5, I have in the last three weeks received the following stations:

KGTT, KFVD, KFWO, KFWV, KFQX, KFQW, KGFJ, KFQZ, WIBO, WBBM, KFWB, KMO, KFEL, KMED, WENR, KFRC. KGY, KFAB, WTAS, KFPY, KTCL, KFSG. KMOX, KFAU. WSM. KOAC, KOWW, KFKX, KTBI, CNRV, KSL, KTAB, KOA, KOMO, KOIN, KFWM, KGER, KQW, KTAB, KOA, KOMO, KPSN, KOIN, KFWM, KGER, KQW, KTNT, KNX, KGA, WLS, KVI, KFXB, CZE, KGO, JOAK, KMTR, KFBC, KJR, KMIC. KHQ, KYA, KHJ, WOK, CKFC, CFYC, WLW, WCCO, KFXF, WSB, KPO, CFCN, KEX, WQJ, KGFM, KFOA,

KFNF, KMA, KFI, WOC, KGW, KFQB, KLX, CNRE, KGEF, KPCB, WOW,

You will notice the above includes one in Japan, eight in Illinois, three in Colorado, three in Nebraska, one in Missouri, one in Tennessee, one in Georgia, four in lowa, one in Texas, one in Minnesota and one in Mexico.

I have separated KFQZ, Hollywood, and WBBM, Chicago, both of which are supposed to be operating on the same wave length. Also have cut out KPO and received WLW only ten kilocycles removed on one side, then receive CFCN, Calgary, ten kilocycles removed on the other side, which, I think, is pretty good when so close to KPO.

J. L. DAVIS, Sebastopol, Calif.

#### ONE DIAL GETS 'EM

DX Club:

As an interested reader of "the Red Book of Radio," I herewith present some of my DX efforts. While not so pretentious as most of the regular DX hounds, nevertheless, it takes selectivity and patience to get a mere 93 stations.

Using a 6-tube Pierce Ario, Philco B Eliminator, Gosilco aerial and Utah Cone Speaker, I have had fine reception from most all of the stations. I have plenty of interference, such as the red car line, with their bum trolleys throwing off flashes and pole transformers that are continually humming.

Besides the usual easy-to-get stations, my log contains the following: KFPY, KFJR, KSO, KTNT, KFEL, KFVR, KMMJ, WJAD, WLBL, KFWF, KWG, KRE, WOK and WARC, Medford, Mass., testing: also KFKB; 39 California, 10 Washington, 6 Oregon, 6 Iowa, 5 Colorado, 3 Nebraska, 8 Illinois, 2 Missouri, 2 Utah, and one in the following states: Idaho. Texas, Wyoming, Wisconsin, Arizona, New Mexico, Kansas, Minnesota, Massachusetts, Canada, Mexico and Pennsylvania.

M. F. ROBISON, Los Angeles, Calif.

Permanentkadio Grow

The Preston Permanent Radio Ground, attached to the antenna post of your radio receiver, will give you warm weather radio reception of nearby stations that is free of the crackling static noises that make summer reception so annoying.

Buy a Preston Permanent Radio Ground from your dealer today . . . install it according to the simple instructions that accompany it . . . and note the great improvement in reception when used as an aerial. The advantages of purchasing now and burying the ground so that it will become thoroughly seasoned before the coming "DX" season are also worth thinking about.

The Stewart-Warner procedure of carefully synchronizing the performance of all units entering into the manufacture of Matched Unit Fladio insures receivers, tubes and reproducers of the highest efficiency. Notable performance records for volume, tone and selectivity have been made throughout the country by Stewart-Warner re-

Yet, for all its efficiency, Stewart-Warner radio is not expensive. Efficient receivers employing the famous 5.tube U. S. Navy receiving circuit can be purchased, on easy terms, as low as \$52.50, without accessories

Ask your nearest Stewart-Warner dealer, TODAY. to demonstrate Matched Unit Radio in your own

# National Broadcasting Co., Inc. ORANGE NETWORK

### KFI - KPO - KGO - KGW - KOMO - KFOA

Program for Week Commencing Sunday, May 22

### Sunday, May 22-9 to 12 P. M.

BIBLICAL DRAMA, "SAUL OF TAR-SUS," with Symphonic Orchestra Setting.

The National Broadcasting Company's Sunday night program of dramatized stories of the Bible have proven popular to the radio audiences of the Pacific Coast. A distinct departure from the usual Sunday night program has been made. Taking a story from the Bible that is familiar to everyone, it has been put into dialogue form in an attempt to make it more understandable and interesting to the audience. The orchestra creates a symphonic setting, completing the story with music. In the cast will be found William Rainey as "Saul," Benjamin Purrington as "Ananias," and Jean V. Plumelet as "Agrippa."

### Monday, May 23-8 to 9 P. M.

"Tales of Hoffman," by Offenbach, will be presented by the National Opera Company, under the direction of Max Dolin: Monday, May 23rd, from 8 to 9 p. m., over the Orange Network of the National Broadcasting Company.

This opera was written by Offenbach just prior to his death, and was his most serious work. He was anxious to see it produced, and his deathbed request was "Make haste, make haste to mount my piece." The composer died, however, before his opera was produced,

The story is of Hosman, a poet, who comes upon a group of German University students, who are gathered together for the purpose of merrymaking, and who make him welcome to their gathering. He tells them the tale of his three loves. First, is of Olympia, with whom he falls in love, and after many amorous advances, finds that she is only a mechanical doll whom he has been accing through magical spectacles. Next, is the Ludy Giulietta, a Venetian coquette, who involves him in a duel, and he is forced to she to save his life. Last, in Antonia, the girl with a marvelous voice which she could only use at the cost of her life. She is forced to sing and dies.

The accues bring us back to the Inn. The students depart laughing and making merry over the story of Haffman's loves, but he remains to salute his one true love, his Muse, who alone has substance and remains faithful.

The best known airs in "Tales of Hoffman" are: "The Barcarolle" and "The Doll Song,"

### Tuesday, May 24-9 to 10 P. M.

Tuesday. May 24th, from 9 to 10 p. m., the National Broadcasting Company will present their regular weekly feature. "Hits and Bits." This program is devoted to the lighter type of music. Glenhall Taylor and his Radio Music Makers will be featured. Popular vocal selections will be offered with both male and female voices featured. Orchestral arrangements of the

novelty type and closing will be twenty inlinutes of dance music with the "Kadio Music Makers."

### Wednesday, May 25-9 to 10 P. M.

"The Game of Chess," a playlet by Kenneth Sawyer Goodman, will be broadcast over the Orange Network of the National Broadcasting Company, Wednesday, May 25th, from 9 to 10 p, m., under the direction of William Rainey. The cast is composed of William Rainey as Alexis, Constantine, Wheaton Chambers, Boris, Benjamin Purrington.

### Thursday, May 26-9 to 10 P. M.

The National Light Opera Company will present "Trial by Jury" and "II. M. S. Pinatore" in tabloid version over the Orange Network Thursday, May 26th, from 9 to 10 p. m., under the direction of Max Dolin.

Both of these operas are hy Gilbert and Sullivan. "Plnafore" proved so popular when it was presented, several weeks ago, that the National Broadcasting Company was requested to again broadcast it for the radio fans of the coast. These popular operas are usually done together, and it is hoped they will prove as popular as when they were presented before. "Trial by Jury" is a dramatic courtroom scene, while "Pinafore" is a satire on the English Navy of many years ago.

### Friday, May 27-9 to 10 P. M.

"An Hour in Memory Lane." a National Broadcasting weekly presentation, is devoted to the theme, "Happy Days" this week. This program will be on the air Friday, May 27th, from 9 to 10 p. m., over the Orange Network of the National Broadcasting Company. The hour is divided into three different classes. Carnival times, with such songs as "Scenes Neopolitaine." by Massenet; "Espama Rhapsody," by Chabrier, and "Estudiantina," by LaCome and depict the carnival times of the countries around the Mediterranean. Songs of revelry of various countries, including "When Good Fellows Get Together," "The Face on the Barroom Floor" and "Heldelberg Stein Song" are suggestive of good fellowship in different countries. Camp meeting songs close the program and are descriptive of camp meetings and fireside gatherings below the Mason Dixon line.

### Saturday, May 28-8 to 9 P.M.

The regular Saturday night feature, "The Saturday Night Review" of the National Broadcasting Company will be presented over the Orange Network from 8 to 9 p. m., May 28th. A resume of the week's program will be given with excerpts of the operas and the highlights of the musical programs.

# — The Improved — Powell "B" Eliminator

Neat In Appearance Absolutely No Hum More Volume No Tubes No Acids

\$12.25

Improve Your Summer Reception!

What a Prominent Radio Engineer Thinks of the "Powell"

H. E. Satterfield, Chief Engineer, KPSN, Pasadena, Calif., writes:

"The B' Eliminator recently purchased from you has, to my opinion, operated wonderfully well and I am more than pleased with the satisfactory operation from an eliminator that is sold at such a low figure.

"The workmanship is good and the eliminator itself is fully up to all requirements. I thank you for your prompt service."

A ten.day trial with absolute satisfaction or money back

### GUARANTEE

This instrument is the result of months of experimenting and exhaustive tests. The best of materials and workmanship have been combined to insure its satisfaction with the user and it is guaranteed unconditionally for one year. If for any reason it fails to perform satisfactorily it should be returned to the seller, who is instructed to repair or replace, free of charge.

Call or Telephone VErmont 1619 for Information

Will deliver and install Eliminator in any part of the city free of charge.

# In RADIO

—and the reasons why

# Western Auto Supply Co.

T. C. Bowles

The Western Auto Supply Company, now entering the third successful year of radio sales, owe much of their suc-

T. C. BOWLES

cess in this line to their technical engineer—T. C. Bowles.

Despite his comparative youth, Bowles is a veteran in the radio experimenta-

tion field as he began his work while in the electrical engineering school of the University of Colorado in 1910. When the Western Auto Supply Company decided to add radios to their extensive line of automotive merchandise distributed throughout over 150 western stores, Mr. Bowles was at once selected as being the most logical and best fitted member of the firm to design and build the Western Air Patrol sets.

The accessory firm is now enjoying a great volume of sales throughout the western states and are making plans for an extensive campaign during the summer and fall season.

Bowles is a member of the Institute of Radio Engineers, of the Radio Trades Association and Radio Show committee. He will represent the Western Auto Supply Company interests at the Radio Manufacturers' Association Show to be held in June in Chicago.

# Timely Trade Topics

The next meeting of the Radio Manufacturers' Agents Association will be held at the Elite, 633 South Flower St., Los Angeles, at noon, Friday. May 27.

"Bertie" Smith, Kodel representative for the western states, has been called to the home office in Cincinnati for a meeting of the sales organization. He will be away about ten dayse.

A. L. Meyer, who has been in charge of the Los Angeles branch of Leo J. Meyberg Company, has been elected vice president of the Meyberg Company, and has been appointed general manager; he will make his headquarters in San Francisco at the home office. "Shorty" Sherman, who, for the past two years has been general manager for the Illinois Electric Company in Los Angeles, has been named as manager of the Los Angeles branch of the Meyberg Company.

Mr. Oscar Getz. recently elected Vice President, and who has been, for several years, General Sales Manager of the Steinite Laboratories, was a recent visitor in Los Angeles. Mr. Getz visited his various jobbers on the entire Pacific coast. He speaks most optimistically on business conditions on the coast and, as a matter of fact, in all their territory, from the Atlantic to the Pacific, their sales in the past three months have been steadily increasing.

The Steinite Laboratories are located in Atchison, Kansas, and are the manufacturers of the nationally known Steinite no-battery receivers. The National Radio & Supply Company, of 814 S. Olive St., Los Angeles, of which Messrs. F. W. Stein and Robert Hulbert are the heads, are exclusive edistributors for Southern California for the entire Steinite Line, already having over 100 leading dealers bandling these products.

The Yale Radio Electric Company announce to the trade that they have discontinued the distribution of the Federal Ortho-sonic line in Southern California. This concern always on the alert to offer to the trade and consumer the newest and best in radio, will shortly have an important announcement concerning a line of national prominence.

Ira Seltzer, of the firm of Henger-Seltzer, has just returned from an extended trip in the east where he has been visiting the factories he represents to see the models that will be offered this coming season. Seltzer is glad to find that the business received from California and the Pacific coast by eastern manufacturers shows a more consistent growth than from any other part of the country and also that the demand for parts and kits shows a great increase.

The Henger-Seltzer Company announce that they have been appointed California representatives for the Hammerlund line, and will carry an emergency stock of their products for the benefit of California jobbers. The line will be handled on a strictly iron-clad, high class jobber policy.

B. E. White, previously with Detsch & Co., is now associated with B. R. Hassler Company, representing L. S. Brach Mfg. Company and Valley Electric Company of St. Louis.

The Newbery Electric Corporation, at 726 South Olive street, Los Angeles, is making a feature of service in radio, voice and music amplification for banquets and all public meetings. They use a Universal Type Amplifier of special design and construction, which has given very satisfactory results at numerous public gatherings.

## Timely Trade Topics

The Corta Electric Co. of 177 W. Centre street, Anaheim, Calif., have added a Radio Department to their already extensive line of merchandise. They are handling nothing but the best in their new department, including the Holmes Receiving Set and Speakers, The Arborphone Receiving Set, Philco Power Unit, CeCo Tubes, Gosilco Aerial Wire and other popular lines.

The Trimm Radio Manufacturing Company, Chicago, have moved into new and more commodious quarters at 847 Harrison street. The Trimm Company are of the pioneers in the manufacture of headsets and speakers, having started in 1922, and their products are well known all over the country. Carl A. Stone Company, 305 Allied Crafts Building, Los Angeles, are their Pacific coast representatives.

(Continued from Page 27)

C3 and C4 are .1 to 1.0 mfd. condensers; 600 volts working voltage.

T2 is the Q.R.S. 400 Mill Rectifier Tube.

L1 and L2 are the choke coils, the values of which should lie between 3 to 5 Henries at 300 mills and the D. C. resistance should not exceed 100 ohms.

C5, C6 and C7 are filter condensers of 5 mfds. capacity each. These condensers should be able to operate at 400 volts D. C.

C8 is a filter condenser of 1 mfd. capacity and should be able to operate at 250 V. D. C.

R1 and R2 are fixed resistances of the following values: 600 ohms resistance. tapped as per drawing and should be capable of handling 300 mills without

heating.

R3 and R4 are 2000 ohm resistances and should be capable of handling .08

amp. without overheating.

e G1 is a .1 mfd. condenser used to connect the core and primary of the transformer to ground. This condenser should be able to stand 250 volts.

G2 is a 3 ampere fuse.

Mr. W. J. Goebel, Vice President of the Precision Electric Manufacturing Company of 1020 Santa Fe avenue, Los Angeles, is on an extended tour of the Pacific Coast and Western States.

In a letter received from him he states that the Northern dealers are not going after Radio business as they should. They should take a lesson from up-to-date dealers of California, who refuse to acknowledge any slack season, go out after the business, particularly accessory, and usually find it.

As long as the fans use their Radio Sets they are certain to consume tubes and batteries and, therefore, must have them replaced. If the dealers would only recognize this fact, they could do a fair volume of business the year around.

Woman's Page

(Continued from Page 24)

lives today in the hearts of these scrubwomen."

How many women are there I wonder who realize the fatigue, of which they complain, is caused by accumulation of poisonous acids in the blood stream and tissues, or who know that sleep is one of the best eliminators of these poisons? It would be a wise woman who would plan at least once a month, maybe once every two weeks, to take one complete day of rest in bed, sleeping as much as possible, but relaxing completely. This one day in bed under comfortable conditions might prevent the necessity of staying in bed many days, suffering from nerve exhaustion or rheumatism, or some ooe of the many ailments, all caused by the acid poisoning, usually produced by improper diet.

# Broadcasters' Digest

Joseph Diskay, formerly headlined as the famous Hungarian tenor, is now without a title, and radio can be blamed.

Some eight years ago, when Diskay first arrived in the United States, he stood on the upper deck of an open liner, looked at the Liberty statue and said, "This is to be my country." With that remark he hurled medals that had been presented him during the World War into the briny deep. He had been on the opposing forces during the war, having substituted for his brother in the eniistments when just a boy. As a captain, which rank he attained, he received many honors.

Immediately after arriving he signed for a singing tour of the country. After the prescribed time he filed his papers of citizenship, but when he was supposed to appear in New York his singing had taken him far afield. It wasn't until he had started singing over KNX that he was able to remain in one city long enough to go to the federal school and study.

This week he became a full-fledged citizen. Now he is looking for a new name, for, despite the fact that he spent a great deal of money building up his name as the famous Hungarian tenor, he refuses to sing any more under that title. He is looking for a new name now, and, until he finds one suitable, will just appear as Joseph Diskay.

Radio KNX, the Los Angeles Evening Express and the El Patio ballroom combined recently and gave a huge benefit ball for the flood sufferers of the Mississippi valley. Several thousand people attended the ball.

In between dance numbers various KNX radio artists appeared in person. This ball was in conjunction with the request of the American Red Cross for

radio stations of America to raise as their quota \$1,000,000.

Announcement has just been made by Leigh Harline, program manager of Radio Station KFXB, of the booking of a concert program to be given on the night of May 20, by advanced students of Lillian Bowles, lyric dramatic soprano, whose studio is in the Beaux Arts Building.

The program will be given during the period of S to 9 p. m., and will include the following: May Howarth, lyric soprano: Winifred Burton, dramatic soprano: Kenneth Lee, baritone; Elizabeth Logg, contralto; Dora Hall, mezzo soprano; Ruby LeClere, coloratura soprano: Lucy May Story, child soprano, with Ruth O'Connor and Bertha Buchter as accompanists.

An additional feature of this program will be the appearance of Virgii Drenberg, violinist, accompanied by Harry Nielson.

The Cliff Dwellers Cafe are broadcasting very pleasing programs from the following stations: 9:30 to 10 p. m., on Mondays, over KNX; 9:30 to 10 p. m., on Tuesdays, over KFQZ; 9:30 to 10 p. m., on Wednesdays, over KMTR, and 9:30 to 10 p. m., over KFWB.

### SYMPATHY

it is with sorrow that we learn of the death on May 9th in Cannes, France, of Mrs. Jordan L. Mott, idolized mother of Major Lawrence Mott, owner of Station KFWO. We send our most heartfelt condolences to Major Mott, and hope that the anguish of his bereavement will be softened by the knowledge that his mother's cherished memory will live long in the admiring hearts of her family and large circle of friends.

# Built to Make Radio Tubes Work Better and Last Longer

Here is a new "A" battery made especially for Radio use. An exclusive formula used in its construction enables it to deliver steady, level voltage and gives it extraordinary long life.

Like all Ray-O-Vac batteries, it has staying power. It retains its strength when not in use, and after being used it starts to rebuild its strength the instant the current is turned off.

The best way to be sure of getting radio "A" batteries with uniform voltage and staying power is to ask for Ray-O-Vacs No. 1211 by name and number.

You can buy Ray-O-Vac batteries at the better Radio, Electrical dealers, music stores, and Auto Supply houses.
