CHICAGO, ILLINOIS

# TO OUR FRIENDS — THE RADIO FANS

THE WONDER RADIO LOG is the most complete Log ever issued. It is designed to serve the needs of you and every other Radio Fan who cares. It contains many original and unique ideas to help you get more immediate pleasure out of your set than you have ever enjoyed and it will become more prized and appreciated as the months roll by.

It does not make any difference whether you are an expert or a beginner—regardless of the style—make or type of the set you have—the WONDER LOG will prove invaluable to you when tuning in.

Remember, **you are judged by the Log you keep** and for that reason every Radio Owner owes it to himself to use and keep only the very best—a log that is complete—convenient—versatile—one that is designed for practical everyday use—that is permanent and yet attractive enough to be a credit to any set.

Before you begin to use the WONDER—run over its pages—become acquainted with its various sections—learn the reason for each division—start right and the pleasure of ownership will be enhanced manyfold—so let's go over it together.

The Broadcasting Stations in the United States, Alaska, Philippine Islands, Canada, Mexico, Cuba, Porto Rico and Foreign Countries are first given by **Call Letters**. In this section space is allowed for keeping a perfect log of your experiences. Enter your Dial Readings here—also the exact date and day and hour you first get a station and any memorandums you care to keep.

The method of listing the Call Letters is original with the WONDER. If any change occurs in present Broadcasting Stations, or new ones are added, there is ample room to make note of these changes in the blank spaces so that your Log may easily be kept up-to-date.

Whenever you care to hear a station again you may get it promptly as your Log shows not only the position on your Dial, but the day of the week and hour at which you

previously tuned in. There is no fishing around—wasting of time—and disappointment by trying for a station when it may be silent.

The listings by **Kilocycles** and meters are conveniently arranged for those who wish them and here also space is allowed for changes and additions.

Under **Location** you will find a list of Stations with their Call Letters and Owners. The Stations are alphabetically arranged by town under the state and the time at the stations is given as Eastern, Central, Mountain and Pacific—blank spaces for any changes are under each state.

And now, we come to features which are new and unique—and which have never appeared in any Log before.

**The Wonder Radio Diary**—never before has it been possible for you to keep such a convenient and complete a memorandum of each day in a Log. And yet is there anything that will give you greater pleasure than to look back at this daily record in later years—to recall your trials—your tribulations and your delights at a time when you, like many of us today, were one of Radio's first listeners.

And how often have you heard an announcer signing off and wondered how far he was from your set—how many miles the delightful entertainment you had just enjoyed had traveled.

To gratify this wish takes but a moment—merely turn to the **Wonder Radio Distance Map** and the information is instantly accessible. It makes no difference where you are located—East—West—North—or South—the plan employed is so simple that it is easy to compute distances with the Wonder Radio Distance Map.

Enthusiastic Radio Fans everywhere have endorsed the **WONDER** and if your Log may prove as helpful and pleasing to you as it has to our many other friends, we shall feel fully repaid.

# WONDER RADIO DISTANCE MAP

How to figure the distance from your set to any Broadcasting Station  
in the United States.

First get your location and if the Station you have been listening to is on a  
straight line East, West, North or South, then count the squares which are 100 mile:

# WONDER RADIO DISTANCE MAP

each. For stations, otherwise located from you, use the circles which are 200 miles apart.

To illustrate: New York is 752 miles from Chicago as figured by the squares, while Miami, Florida, is 1300 miles according to the circles. Remember these distances are as the Crow flies and while some slight inaccuracies may occur, the Wonder Radio Distance Map has been carefully drawn and is approximately correct.

# Broadcasting Station Slogans

- KDKA** E. Pittsburgh, Pa. . . . . "The Pioneer Broadcasting Station of the World."
