LISTENERS' LETTERS.

IMPORTANT TO READERS.

The address of "The Radio Times," is 8-11, Southampton Street, Strand, London, W.C.2.

The address of the British Broadcasting Company, Ltd., is 2, Savoy Hill, Strand, London, W.C.2.

RATES OF SUBSCRIPTION to "The Radio Times" (including postage): Twelve Months (Foreign), 15s. 8d.; Twelve Months (British), 13s. 6d.

Does the B.B.C. Neglect the Listener?

HE was the New Broom, but he meant to be kind, to flatter the old man who had borne the burden and heat of the day. So he said: "I will begin where you have left off."

"No, my son," was the gentle reply. "you cannot begin where I left off. You must begin where I began."

It was not altogether accurate, but it was in large measure a merited and justifiable rejoinder. Moreover, it was a rebuke.

Since the affairs of the world in general are commonly managed by misfits and inefficient, it stands to reason that there are never lacking those outside who could do it all infinitely better themselves. The Southern Railway probably knows this. Company directors learn it at annual meetings, if they did not know it before. We believe editors of newspapers are frequently brought back to the paths of rectitude and common-sense by the exhortations, kindly if anonymous, of their betters. Notorious and signal above all, we have the great public departments—the Post Office, for instance.

No one denies that there is frequently a strong element of justice and rationality in criticism. On the other hand, the just and the rational agree that criticism is often ill-founded and ignorant, prompted by ulterior motive, even malicious. But still, no one would wish to have it suppressed. For while obviously the criticism of the first order is helpful and stimulating, that of the other order serves its useful functions too, though perhaps

its effects do not operate precisely as its instigators expected or desired.

Dependent on the mentality of those against whom it is directed, it may for a moment irritate, though it is more likely to entertain, but its real service is to be found in the effect it produces outside the organization criticised. By its very nature it causes a reaction against criticism, consolidates support, and turns indecision into active goodwill.

The broadcasting body affords opportunities simply unique, unprecedented. Railways, the Post Office, Governments, even London's traffic problems wane before it. It is the happy hunting-ground par excellence.

In other realms it is usually expedient for the critic to know at any rate one or two formulæ so that his remarks may bear the occasional imprimatur of authority. But here he need know nothing at all—except, of course, his own particular foibles, and also, as we sometimes find, a personal grievance. Barsting with these, he may adduce all manner of the most remarkable revelations, bloated staff, extravagant salaries, appalling inefficiency in organization and management, and an autocratic disregard of those who, as he puts it, pay the piper and accordingly have the right to call the tune.

"It is much easier to be critical than correct," said Disraeli. "Criticism is easy, art is difficult," said another; and again, "The absence of humility in critics is something wonderful."

(Continued overleaf.)

Does the B.B.C. Neglect the Listener?

(Continued from the previous page.)

We take liberty to quote from a recent article in *The Times* on "Broadcasting—The Difficulties of Criticism":

"You might as well try to catch a Bander-natch," says one of Alice's collocutors about a creature that moved very fast and was beyond apprehension or arrest. A like image of personal disability will probably occur to any modest listener to broadcasting on learning officially from the printed word of the B.B.C. that it invites, and welcomes, criticism. It is as much as he can do to listen to the programme as it flows by. To be a critic implies that one has somewhere a stable seat above the flux—a dry place on the bank commanding the upper and nether reaches, such as is denied to those who are in mid-stream.

A National Service.

"When it is borne in mind that the service is a national one and that the public of listeners is none other than the nation itself—throughout all its variations of age, sex, class, taste, knowledge, and needs—it may be doubted whether criticism is as yet strong enough or authoritative enough to touch more than the fringes of this many-sided concern.

"Newspapers we know; theatres we know; lecturers, orators, preachers, players, singers we know, and can tackle them singly—but what is broadcasting? It has sprung upon us out of nowhere in less than two years and a half, organized itself with immense rapidity, entered practically into everybody's home, and used its unique medium to bring all kinds of communications, the conveyance of which was hitherto believed to be more or less the monopoly of certain well-defined activities, to our consciousness. It invites criticism, perhaps forgetting that criticism, in any other field, is a plant of long growth, and that it may not have had time to adjust itself to the monster now challenging it."

Criticism Welcomed.

As the writer indicates, we have always invited and welcomed criticism, and shall continue so to do. We pronounce ourselves a public service and have spared no effort worthily to discharge the heavy responsibilities committed, but also with an efficiency and economy in administration comparable to any commercial concern. The extension and development of the service alone witness to this. We have made no retaliation when either obstructed or attacked, though frequently there might have been considered cause sufficient. We have been content with the more dignified and effective plan of making progress. Nor have we claimed credit for what has been accomplished, though fully conscious that only a fractional part of the effort and attendant complications is understood. "Sprung out of nowhere, organized itself with immense rapidity," as above, and many similar comments are appreciated and are encouraging, but we challenge anyone to detect complacency or satisfaction among us, for there is still far too much ahead.

Important Factors.

The next point is that we have made no effort to organize or mobilize support on our own behalf. We have frequently been invited to do so, frequently been informed of the desirability, if not necessity, for so doing, frequently been assured of a widespread and sympathetic response. We are glad to believe that support would be forthcoming if it were required, and we feel that it would be the more effective because it had not hitherto been sought.

While so far disinclined to such action, three important factors must be borne in mind. The first is the voluminous correspondence from listeners handled at all our centres, and the continued encouragement given to listeners to communicate their views on all matters relating to programmes. The second is the existence

around most, if not all, stations of informal but substantial guilds, circles, and clubs with memberships running to many thousands, and these in addition to the standing advisory committees on various lines of activity. The third is *The Radio Times* itself, with a circulation which would surprise most people, conceived and conducted with the desire to form a connecting link between broadcaster and listener.

Attainment and Ideal.

From the beginning it has been our constant endeavour to supply the best available programmes to the greatest number at least cost. We believe that the task of creating the best broadcasting service in the world is not underestimated by the intelligent listener, but it should also be remembered that in comparison with other systems, the British service is unique in its democratic character, and in its responsiveness to public need rightly interpreted.

As indicated earlier, we do not profess to have attained the ideal—far from it, but we feel it our duty to guard jealously and insistently those basic principles of service, the application of which is steadily reducing the gap between attainment and ideal.

We have already alluded to plans for the future which include, apart from maintained programme improvement, an extension and development of technical equipment, and further alternative services. In order that listeners may have more information about our work, and may be able also to express themselves with greater freedom, we have for some months been planning an enlargement of *The Radio Times* and improving it in contents and production. We desire it to be of the same service character as is seen in the rest of our work. The proposals, incidentally, include a comprehensive insurance scheme against mishaps from the use of wireless apparatus. A definite announcement will be made as soon as possible.

Changes Foreshadowed.

There are indications in certain directions that efforts may next year be made on behalf of special interests to change the system and organization (as distinct from the formal constitution) of British broadcasting, to the end that instead of broadcasting being conducted, as now, for the benefit of the people, it may, in some measure at least, be conducted for the benefit of the broadcasters. No comment on this is required.

We view with interest the establishment of any new agency which will honestly endeavour to strengthen the service character of British broadcasting, but we would take exception to any suggestion that the interests of listeners have been disregarded, or that broadcasting has been run on lines other than those of a great public service.

Changes in the constitution of this Company have all along been anticipated for the end of next year, but we fail to see what difference it will make, other than one of appearance, for public interest has systematically been the paramount consideration. This, we believe, must remain.

Few people would doubt that Mr. E. Kay Robinson has done more to spread a popular knowledge of Natural History than anyone else since the beginning of broadcasting in this country.

In his Talks, the secrets of Nature have been revealed to us, not only in an illuminating, but in a charming manner, and he has awakened to many the enchantments of the countryside.

Eighteen of these talks have now been published in one volume by Messrs. Hodder and Stoughton in their Broadcast Library (3s. 6d. net).

"Westward Ho!"

The Story of the "Radioviews."

[On Tuesday, April 7th, Ten "Radioviews" of "Westward Ho!" will be broadcast. (S.B. to all stations.) They are based on the famous novel by Charles Kingsley, and have been arranged by Mr. A. Whitman, and will be produced by Mr. R. E. Jeffrey. This synopsis will enable listeners to follow them with greater interest.]

JOHN OXENHAM, of North Devon, recruits in Bideford for an expedition to the Spanish Main, assisted by SALVATION YEO, mariner. AMYAS LEIGH is anxious to join the expedition, but his godfather, Sir RICHARD GRENVILE, persuades him to stay at home.

Five years pass, during which Amyas has joined Sir Francis Drake in his famous voyage round the world. On his return, he asks his brother FRANK for news of ROSE SALTERNE, a noted beauty, and learns that she is not taking part in the fête.

The Captured Spaniard.

Disturbances occur in Ireland. Amyas takes part in the reduction of Fort del Oro and brings before Lord DE GREY and Captain WALTER RALEIGH a Spaniard whom he has captured, and who proves to be DON GUZMAN MARIA MAGDALENA SOTOMAYOR DE SOTO, a noted grandee. He is paroled and sent as the guest of Sir Richard Grenville, in North Devon, where he wins the affections of Rose Salterne. At a dinner party given at Annery House, he persuades the girl to fly with him. WILL CARY, a friend of Amyas', challenges De Soto; a duel follows and, eventually, the Spaniard leaves Bideford, taking Rose with him.

Amyas learns of these events from WILLIAM SALTERNE, the Mayor of Bideford, who makes him promise to seek out the Spaniard and enact vengeance on him. This concludes the first part.

A Vow Fulfilled.

The scene moves to the Spanish Main. Following an engagement at sea, Amyas decides to sink his ship and march inland in search of adventure. He is supported by JOHN BRIMBLECOMBE, who has accompanied the expedition; and the march begins. Two years later, we find the adventurers proceeding down the River Meta, and here they discover a girl named Ayacanora, who bears unmistakable signs of European parentage. She joins them in their further wanderings; and on the homeward voyage it is discovered that she is the long-lost daughter of John Oxenham, who had sailed fifteen years before for the Indies.

During this period Amyas has had no chance of fulfilling his vow of vengeance; but, with the approach of the Armada, the opportunity comes. In the great fight in the Channel he meets a galleon commanded by De Soto; chases it around the North of Scotland and is about to engage it when, in a storm, it founders with all hands off the rocks of Lundy Island. Amyas, blinded in the battle, retires to Bideford, and there discovers a great love awaiting him.

THE informal conference of European broadcasting authorities convened in London recently by the B.B.C., decided to set up an international broadcasting bureau with headquarters at Geneva. This bureau will endeavour to straighten out the numerous difficulties which occur constantly now that broadcasting has moved into the international sphere. Listeners in the Plymouth area in particular have good cause to realize the importance of some measure of international agreement on wave lengths and power. The Governments and the League of Nations are waiting until the Wireless Telegraphy Conference in Washington next year, but events are moving so rapidly that the broadcasting authorities themselves have decided to make an interim working arrangement.

Women's Work in Music.

An Old Reproach No Longer True.

FOR many years it was regarded somewhat as a reproach against women that they had done nothing "worth while" in the way of musical composition; and it is, indeed, rather remarkable that there has been no woman Beethoven, no woman Schubert, and no woman Mozart. Since woman has become "emancipated," however, she has shown that in the realm of music, as in other spheres, she can perform wonders.

When Heredity Did Not Count.

Probably few listeners are aware how many beautiful compositions we owe entirely to feminine composers; but they will have an opportunity of realizing our musical indebtedness to the "fair sex" on Monday, April 6th, when a programme consisting of works by women will be broadcast from London. Among the composers then to be represented may be mentioned Dame Ethel Smyth, Amy Woodforde-Finden, Mme. Chaminade, Carrie Jacobs-Bond, Alma Goetz, and Maude Valerie White.

Without a doubt, the foremost woman composer of to-day is Dame Ethel Smyth, for not only has she written some very fine minor works, but she has competed successfully with men composers in the writing of operas. Heredity counts for nothing with her. Her family is a noted sporting and military one, and as a child she had practically no chance of developing her undoubted genius.

A Tribute From The Orchestra.

Although Dame Ethel's genius is now recognized in this country, it was many years before such was the case, and it is a remarkable tribute to her work that she was hailed as a composer of the first rank in Germany before England awoke to a sense of her powers.

One of the greatest compliments she ever received was paid to her in Berlin. When her opera *Der Wald* was produced in the German capital, some of the newspapers were rather harsh in their remarks.

At a rehearsal, she was surprised and touched when the members of the orchestra cheered her.

"Well," she said, "my opera isn't so bad, is it, in spite of what the Press said?" Several of the players muttered: "Oh, the Press!" and then the player of the bass trombone got up and said: "Your opera is magnificent, and we all know it, and some day all the world will know it!"

A Song Writer by Chance.

One of the most tuneful and most popular songs of recent times is "A Perfect Day," by Carrie Jacobs-Bond. The composer had little thought of becoming famous until, at the age of thirty-six, her husband died and she was left almost destitute. Then it was that she turned her attention to composing, and she has written several hundred songs!

It is interesting to note, by the way, that the most famous song in the world, "Home, Sweet Home," was written by a third cousin of the composer of "A Perfect Day."

Space forbids mention of even a fraction of the compositions by women that are known all over the world. One only needs to remember "Because," by Guy D'Hardelot; the "Indian Love Lyrics," by Amy Woodforde-Finden; "Violets," by Ellen Wright; "Two Eyes of Grey," by "Daisy McGeogh," and many of the works of Liza Lehmann to realize that women can more than hold their own with men as composers of the first rank.

C. T.

Hymns We Sing at Easter.

Sacred Songs Associated With Good Friday.

THERE can be no doubt that not only many of the greatest of English hymns, but the most interesting by virtue of the circumstances under which they were written, are associated with Good Friday. To mention two only at once confirms this—"Rock of Ages" and "When I Survey the Wondrous Cross."

The first is the most popular hymn in the language, and thousands of people, during the 150 years which have passed since it was first published, have stood for a few moments between the two massive pillars of limestone in Burrington Coombe, a rocky defile in the heart of the Mendip range, where the Rev. Augustus Montague Toplady, then curate-in-charge of the nearby parish of Blagdon, is said to have taken shelter during a heavy thunderstorm, and at least to have conceived there the leading idea of his great hymn. It was this hymn which the Prince Consort, our King's grandfather, asked to be sung to him a few hours before his death, and it shared with Newman's "Praise to the Holiest in the Height" the first place in the esteem and reverence of the great Victorian statesman, William Ewart Gladstone.

Saved By a Friend.

Newman's hymn belongs to the Good Friday category of hymns, as is evidenced by such a stanza as this:—

O Generous Love! that He who smote
In man for man the foe,
The double agony in man
For man should undergo.

Newman did not intend this excerpt from his "Dream of Gerontius" for a hymn at all, but as an integral part of a poem which he is said to have regarded so little, that he had condemned it to destruction. It was saved from so undeserved a fate by the intervention of a friend, and thus was preserved "one of the happiest efforts to present the unseen world since the days of Dante."

Matthew Arnold, who was no mean judge in matters of this kind, considered "When I Survey the Wondrous Cross" to be the finest hymn in our language, and many will endorse that verdict.

"When I Survey" had five verses originally. Almost all Dr. Watts's hymns, as we know them, are "cut down" from the original length to fit the present age, which believes in brevity. However, it must be confessed that no one in his senses would put back many, if any, of the deleted stanzas.

Nearly a Tragedy.

It is a remarkable fact that only one hymn in the Methodist collection, originally formed by John and Charles Wesley, was written by their father, Samuel Wesley, senior. It is a Good Friday hymn, "Behold the Saviour of Mankind," and in connection with it a good story is told. The reverend gentleman was all his life the victim of privation and poverty, and his wonderful wife—one of the great women of the world—presented him with nineteen children, which accounts for the fact that, on the night this hymn was written, February 9th, 1709, there were sleeping in one room of Epworth Rectory, John Wesley, aged five, his three sisters, the baby, and the nurse, a number which would probably to-day be called "over-crowding."

That night the rectory caught fire and was utterly destroyed. The nurse snatched up the baby, called to the other children, and fled. All seem to have obeyed except John, who was fast asleep, and only awoke to find his escape by the ordinary ways cut off. He appeared at the window, and his father made two attempts to reach him by the stairs. However, as there

was evidently no time to fetch a ladder, a human one was improvised by one man standing on the shoulders of another, and in this way "little John" was rescued. "Let the house go," said Samuel Wesley, as he saw all his children were in safety, "I am rich enough!"

But there was something else escaped the devouring flames only second in value to that wonderful family. It was the rector's newly written hymn. He had left it—the ink barely dry—on his table near the window, and in the draught of the fire it had been blown out into the garden, and was picked up, charred indeed, but decipherable, next morning.

"Hymns For Little Children."

"There is a Green Hill Far Away" was written for children, but it has long since been adopted by both young and old as one of the dearest of all sacred lyrics. It is not generally known that this hymn is one of a definite series illustrating the Apostles' Creed. Mrs. Alexander, whose "Hymns for Little Children" had reached its 70th edition before the twentieth century dawned, had two little godsons, who found the Church Catechism both dull and difficult, and she set herself to make it neither, by means of illustrative verses.

The Creed seems to have furnished some of her best attempts at exposition and explanation. For instance, "I believe in God the Father, Maker of Heaven and earth" produced for those lucky little boys, "All Things Bright and Beautiful"; the section, "And in Jesus Christ, His only Son, our Lord" produced "Once in Royal David's City," and "Suffered under Pontius Pilate, was crucified, dead, and buried" produced the most famous of them all "There is a Green Hill."

Inspired By a Picture.

A young girl named Frances Ridley Havergal was staying with friends, and on January 16th, 1858, she came into the house feeling very tired, and sat down wearily in a chair opposite a picture of the Crucifixion which bore the words, "I did this for thee; what hast thou done for Me?" The girl picked up a piece of paper, and wrote:—

I gave My life for thee,
My precious Blood I shed,
That thou might'st ransomed be,
And quickened from the dead.
I gave My life for thee;
What hast thou given for Me?

In most hymnals to-day it is put into the third person, thus, "Thy life was given for me," but Miss Havergal always preferred her first version.

Written in a Few Minutes.

Towards the end of her life, she gave a correspondent the following dramatic account of this hymn's origin. "The hymn was the first thing I ever wrote which could be called a hymn, and it was composed when I was quite a young girl. I did not half realize what I was writing about. I scribbled it in pencil on the back of a circular in a few minutes, and then read it over, and thought: 'Well, this is not poetry. I will not go to the trouble of copying it.' I stretched out my hand to put it on the fire, but a sudden impulse made me draw back, and I put it, crumpled and singed, into my pocket. Soon after, I went out to see an old woman in an almshouse. I thought I would see if this simple old woman would care for these verses, so I read them to her, and she was so delighted with them that, when I went back I copied them out and kept them, and now the hymn is more widely known than any."

PAUL PRESTON.

Official News and Views. GOSSIP ABOUT BROADCASTING.

"G. K. C." on Sadler's Wells.

A TALK of special importance will be given by Mr. G. K. Chesterton, the writer, from London on Monday, April 6th. He will speak on "The Saving of Sadler's Wells," and listeners can look forward to a most interesting flood of oratory.

London's Good Friday Arrangements.

On Good Friday evening, April 10th, there will be no transmission from London until 7 p.m., when Handel's Oratorio, *The Messiah*, will be relayed from the Free Trade Hall, Manchester, where Mr. Hamilton Harty is conducting the performance of the Hallé Concert Society.

Famous Band's Wireless Début.

The Band of His Majesty's Coldstream Guards, under the baton of its Conductor of Music, Lieut. R. G. Evans, will make its wireless *début* at the London Station on Saturday, April 11th. The Coldstreams have for a long time past been one of the most popular bands on gramophone records, and should therefore need no recommendation to radio listeners. The artists are Miss Sophie Rowlands (soprano), Mr. Tom Kinniburgh (bass-baritone).

Old, But New.

"Not one item of the projected programme has ever been broadcast by any orchestra in the country." That is the interesting announcement made in connection with the Squire Celeste Octet performance, which will be transmitted from Chelmsford on Tuesday, April 7th. For some time past Mr. J. H. Squire has been engaged in delving into the archives of musical history, and his discoveries, which are to be interpreted by his Octet, should create a good deal of discussion among listeners. Composers whose works will be drawn upon cover a period from the eighteenth century to the present day. A double concerto, the composer of which bears a name as famous as that of Bach in the world of music, will be one of the chief items; and Mr. Squire hopes also to be able to include a melodious waltz by Johann Strauss, whose "Blue Danube" and "Morgenblätter" waltzes are known the world over.

Thorpe Bates to Broadcast.

Mr. Thorpe Bates, a baritone popular on stage and platform, is to make his first appearance before the microphone on Tuesday evening, April 14th, when Miss Carrie Tubb (soprano), Miss Mary Foster (contralto), Mr. Walter Hyde (tenor), and Miss Edith Penville (flautist) will also participate in an S.B. programme from London.

Two Radio Plays.

In contrast to the Ballad Concert mentioned above and which will be given on the lower wave-length, a programme consisting partly of Chamber Music and partly of drama will be broadcast from Chelmsford at 8 p.m. The plays to be presented have been written specially for broadcasting by Mr. Vernon Bartlett and Mr. Reginald Barclay. One is entitled *Entertaining Mr. Waddington*, a comedy in one act, and the other *The Dweller in the Darkness*, which is also scheduled for London only on April 16th. Each of the plays will last about half-an-hour; which is, perhaps, the maximum length of time that a radio play can be fully enjoyed by the listener.

An Organ Recital.

Mr. L. Stanton-Jefferies, Deputy Director of Music to the B.B.C., will broadcast a recital on the organ at the National Institute for the Blind on Sunday afternoon, April 5th. Mr. Stanton-Jefferies' organ recital last year was widely appreciated, although it was rather

unorthodox in character, and included robust music of modern English composers. At the coming recital he will play, among other works, the Fugue from the Reubek Sonata on the Ninety-fourth Psalm.

Bank Holiday Humour.

The Bank Holiday night programme on April 13th will include plenty of humorous entertainment. Mr. John E. Green, an entertainer who was an instantaneous success on the occasion of his first broadcast some weeks ago, will take part, as well as Miss Helena Millais, whose "Songs and Fragments From Life," including those diverting "Lizzie" sketches, have been a popular feature of wireless programmes. Miss Millais will give another of the "Our Elizabeth" sketches by Miss Florence Kilpatrick.

A Bank Holiday sketch, written by Mr. Keble Howard, will be broadcast at approximately 8.30 p.m. We shall also hear Mr. John Buckley, baritone, who needs no introduction to listeners, and Messrs. Scovell and Weldon, the "English Syncopated Entertainers," who will provide two groups of syncopated songs with an arrangement of Negro Spirituals.

Bach's Passion Music.

Bach's *St. Matthew Passion* will be broadcast from the Aberdeen Station on Wednesday, April 8th. The Aberdeen Oratorio Choir will be responsible for the chorus work, under the conductorship of Mr. Willan Swainson, who is a leading authority on Bach in the North. Miss Doris Vane and Miss Dorothy Hebrich, soprano and mezzo-soprano respectively, are the vocalists, and the Wireless Augmented Orchestra will take part. The tenor soli will be rendered by Mr. William Heseltine, while Mr. Dale Smith will be the baritone.

Masefield's "Good Friday."

Cardiff Station will furnish a timely programme on April 10th, when the "5WA" Radio Players are to perform Masefield's play in verse, entitled *Good Friday*. The transmission will last from 5 to 6 p.m.

Bonnie Prince Charlie.

Glasgow has a Jacobite Evening on April 16th, when memories of the romance and tragedy of Bonnie Prince Charlie will occupy two hours of the programme. "Before the Rising," "The Rising," and "The Defeat" are items in the story, while "Master Wayfarer," by J. Harold Terry, with music by Howard Carr, a production by George Ross, and the "JSC" Repertory Company, will deal with the period after Culloden. Miss Helen de Frey will sing some familiar numbers, including "Charlie Is My Darling," "Wae's Me For Prince Charlie," "Prince Charlie's Lament," and "Will Ye No' Come Back Again?"

Eastertide at Birmingham.

The Birmingham special Eastertide programme includes Mendelssohn's Overture, "St. Paul," which will be performed on Easter Sunday. The Easter music will also include excerpts from *Parsifal*, Beethoven's "Pastorale Symphony," and the Easter Hymn and Intermezzo from *Cavalleria Rusticana*, the two latter items to be given with orchestra, chorus, and soprano voices. On Easter Monday a holiday dance

Mr. G. K. CHESTERTON.

programme will be provided from 8 to 10 p.m. by the Buffalo Orchestra, and from 10 p.m. to midnight by the Savoy Bands.

Sacred Songs.

A short sacred concert has been arranged by the Nottingham Station for transmission between 3.30 p.m. and 4.30 p.m. on Good Friday. Mr. Frederick Hodgkinson, 'cellist, will figure in the programme, and Mme. Mary Dabill, contralto, will sing a number of sacred songs.

A Tchaikovsky Concert.

Listeners have themselves testified to the popularity of the Wagner-Tchaikovsky programme, which was provided recently. A further attempt to furnish entertainment along similar lines will be made on Sunday afternoon, April 12th, when some of Tchaikovsky's most popular works will be performed by the Wireless Symphony Orchestra, under Mr. Dan Godfrey's direction. The artists are Miss Gertrude Johnson, soprano, and Mr. William Primrose. The latter's violin playing at recent recitals has earned praise from music critics. His first broadcast was in the D'Erlanger programme, two months ago. At the coming event he will play the First Movement of the Tchaikovsky Violin Concerto.

Glasgow's Nautical Programme.

"Britain's Sea Power" will be the theme of a nautical programme presented by the Glasgow Station on Wednesday, April 8th. The music will include Stanford's "The Battle of the Baltic," by the Station Choir and Orchestra, and "Songs of the Fleet," with Mr. Robert Watson, chorus, and orchestra, and Elgar's "Sea Pictures," sung by Miss Astra Desmond.

For All Tastes.

A musical pot-pourri to be provided by the Manchester Station on Monday, April 13th, will contain something that should appeal to all musical tastes. Miss Mollie Seymour and Miss Nellie Norway are giving items varying from a silver hand-bell performance to duets for bells and violins. Mr. Barrington Hooper, tenor, is singing some favourite songs including Nicholl's setting of Yates' charming poem, "Down by the Sally Gardens." Mr. Archie Camden, of the Hallé Orchestra, will give bassoon selections, and a north country flavour will be introduced by Mr. L. T. Whipp, the Lancashire dialect entertainer.

Two Easter Parties.

Nottingham Station is holding two parties in Easter week, i.e., on April 16th and 18th, for members of its Radio Circle. The Exchange Hall has been lent by the Mayor, and he and the Sheriff will attend and make short speeches to the children with reference to the good work that they have done in installing wireless in hospitals throughout the town.

Another "Query" Programme.

A seventh "Query" programme will be given from London on Wednesday, April 15th. As in the case of the previous contests, the three most successful entrants are offered prizes of five guineas, three guineas, and one guinea respectively. The first five competitors will be invited to spend an evening at the London Studio. The closing date for entrants is Monday, April 20th, first post.

Scenes from a Northern Farmhouse.

Listeners "up north" are in for a Scottish Night on April 9th. A musical sketch by Miss Christine Crowe depicting scenes in a northern farmhouse will be broadcast from Aberdeen Station under the title of "A nicht wi' Mains o' Tullybogie."

PEOPLE YOU WILL HEAR NEXT WEEK.

[Harris.
Miss DOROTHY SILK (Soprano) will broadcast from London on Wednesday, April 8th, and from Newcastle, on Friday, April 10th.

[Maurice Bech & Macgregor.

Miss DOROTHY HOWELL (Pianist-Composer) will play at London Station on Monday, April 8th.

[Valentine.

Miss JOAN HASTINGS (Singer and Pianist), who will broadcast from London on Monday, April 8th.

Little-Known Compositions.

MISS DOROTHY SILK, who will be at London and Newcastle during the week, studied singing in Vienna before the War. She would probably have concentrated on German *Lieder*, had not the outbreak of hostilities diverted her talent into other channels.

Miss Silk has unearthed many little-known compositions of the fifteenth and sixteenth centuries. Apart from her work at the principal musical festivals, she has appeared in opera, having created the name part in Gustav Holst's *Savitri* at Covent Garden and the Lyric Theatre.

A Famous Conductor.

M. PAUL KLENAU occupies a foremost position in the musical world of Europe. He is director of the Singakademie, Vienna, the famous choir in that city which was founded by Brahms. He is a Dane and was chosen to direct the Centenary performance of the Choral Symphony in Vienna a year ago, and his performance at Birmingham is likely to be as memorable. M. Klenau is the only Dane who has conducted the Royal Philharmonic Orchestra of London in its one hundred and thirteen years' existence.

[Lafayette.
Mr. REGINALD WHITEHEAD (Bass) will sing at Dundee on Saturday, April 11th.

[Georges.

Mr. WILLIAM HEBELTINE (Tenor), to broadcast from Newcastle, Glasgow, and Aberdeen next week.

[Nanna.

Miss WYNNE AJELLO (Soprano) will sing at Bournemouth on Saturday, April 11th.

M. PAUL KLENAU (Composer) will conduct the Beethoven Symphony at Birmingham on Monday, April 8th.

Pieces in the Programmes.

A Weekly Feature Conducted by Percy A. Scholes.

BEETHOVEN'S CHORAL SYMPHONY.

(BIRMINGHAM, MONDAY.)

BEETHOVEN'S Ninth and last Symphony is reckoned by all musicians amongst the greatest things of their art. There are four Movements in the Symphony, the last of which is very broken in character and very dramatic. This Movement introduces solo vocalists and a chorus, and has given the work its name of "Choral Symphony."

FIRST MOVEMENT.

(About 15 minutes.)

(*Allegro ma non troppo, un poco maestoso*—Quickly, but not too quickly, rather majestically.) This opens very quietly and very mysteriously, STRINGS (*tremolo*) and HORNS sounding a bare fifth, above which the FIRST VIOLINS ("colto voce") introduce a dropping, two-note *motif*, also bare and eerie.

Gradually other instruments join, and the mass of tone increases and works up to a loud outburst by FULL ORCHESTRA, which declaims a forceful Tune, evolved from the two-note *motif* just heard.

The tone dies away again. The increase takes place again, the forceful Tune is heard again. (Everything to this point may be taken as constituting the FIRST MAIN TUNE of the Movement.)

Within a half-minute there enters, gently, in FLUTE, CLARINETS, AND BASSOONS (immediately answered by Oboes and Horns) a much more flowing subject, the SECOND MAIN TUNE, strongly contrasted by its smoothly-running character from the broken First Main Tune.

There is other "Material" in the Movement than this, but it is of less importance. If these two very distinctive Tunes are grasped on their first appearance, the course of this long and highly emotional piece will be followed.

What does it all mean? Need it mean anything tangible? It shows the Composer face to face with the immensities and the mysteries of life, and in music expressing what could be expressed in no other way and hence cannot be translated into words.

SECOND MOVEMENT.

(About 12 minutes.)

(Opening *Molto Vivace*—"With great life and spirit.") Again a dropping *motif* is given out, this time a drop of an octave, twice heard from the STRINGS, which are then mocked by the KETTLEDRUMS, and almost the whole Orchestra repeats the assertion at the top of its voice; there is a moment's pause, and—

Very softly and secretly the SECOND VIOLINS develop the dropping *motif* into a connected phrase, the VIOLAS take it up, then the CELLOS, then the FIRST VIOLINS, then the DOUBLE BASSES, and soon (all secrecy cast to the winds) the FULL ORCHESTRA—the whole thing in Fugue fashion.

The music has now become very happy—even boisterous. Soon a new Tune comes swinging along in the WIND, the STRINGS ejaculating against it the original dropping *motif*, with which the Movement opened. Out of the two Tunes already heard the music continues to be made until—

With a sudden violent change from three-in-a-bar to four-in-a-bar we are made to feel that a change of mood is at hand. It turns out to be a gentle mood, as immediately there enters softly, in OBOES and CLARINETS (with a trotting up-and-down-the-scale bass from Bassoons) a charming little tune of an innocently rustic character. Out of this a MIDDLE SECTION to the Movement develops.

Then the FIRST SECTION comes back, and

finally a few bars of CODA (*i.e.*, a closing passage) are added, which quotes from both sections.

The very end is comical. Beethoven makes as though he is going to give us the rustic tune of the Second Section again. But he stops suddenly, musical-chairs fashion, and then with three or four Full Orchestra guffaws (made from the dropping *motif*) ends the piece.

THIRD MOVEMENT.

(About 15 minutes.)

(*Adagio molto e cantabile*—"Very slow and in a smooth, song-like manner," alternated with *Andante Moderato*—"at a gently flowing pace.") This is a lovely expressive Movement. There are two Tunes of fair length (the respective characters of which are roughly indicated by the terms just quoted), and they appear in alternation, with embellishments. It is wonderful how the Composer keeps up the interest in this long, slow Movement.

Without any real pause we pass into the—

LAST MOVEMENT.

(About 24 minutes.)

With a shock we hear all the WIND INSTRUMENTS and the KETTLEDRUMS bursting into the cloistered peace.

A recitative passage in CELLOS and DOUBLE BASSES then seems to be saying something—asking some question.

The WIND AND DRUMS outburst is repeated. The STRING BASS question is repeated—it sounds as though the question is—"What are we next to play?"

The first reply to this question is a quotation from the mysterious opening of the First Movement.

The STRING BASSES speak again, and repeat that suggestion.

The next reply is a quotation from the Second Movement.

The STRING BASSES reject this also.

The third reply is a phrase from the Third Movement.

Even this is rejected. Then a line or two of a lovely NEW MELODY is heard in the WOOD WIND.

The reply this time is very different.

Then (a great moment—one of the greatest in all music) the STRING BASSES themselves give out this melody in full; after a time other instruments gradually join in, until at last all are joyously playing it.

Then comes interruption again, and when it subsides, a BARTONE is heard singing, *O friends, not these tones, let us sing something more full of gladness.*

As a snatch of the melody is again heard in the Orchestra, the Baritone begins to sing Schiller's *Ode to Joy*, the Choir soon joining in.

From here onwards the Vocal Quartet and the Choir are much used. The music is very much broken into sections. The whole effect of the latter part of the Movement has been (and perhaps always will be) strongly debated. Some find in it the Orchestra becoming articulate in a magnificent song of joy and brotherhood, others speak of it as a bad mistake on the part of the Composer. See for instance, Dr. Ernest Walker in his book on Beethoven—"The work ends with the screams of more or less exhausted sopranos and 127 rapid bangs on the big drum and cymbals."

Have we here a magnificent climax or a miserable anti-climax? "Every listener his own music critic," is always my suggestion.

N.B.—Bach's 3rd Brandenburg Concerto, for Strings (Newcastle, Sunday), was described in *The Radio Times* of March 13th.

Listeners' Letters.

"The Wireless League."

DEAR SIR,—Fully realizing the difficulty the B.B.C. have to face in trying to please everybody, it very much annoys me to read so much harsh criticism from people who cannot possibly be in a position to criticise.

I am very much interested to learn that a certain daily newspaper is forming a wireless league, but if this means novices harassing the experts, I will not join.

The criticisms of some of their readers are, in my opinion, unsound. For instance, one says that we have a *déluge* of jazz. I have never noticed it, but some people like jazz, and we have some very good music as well.

Again, another complains that the programmes are third-rate. It would be interesting to know his idea of a first-rate programme, and does he realize that we have a change of programme nightly?

Another complains of the irritating intervals. I myself think that these are reduced to a minimum. What about the intervals at theatres and music-halls?

Surely people can see that the programmes are improving week by week and I conclude by saying "Carry on the good work."

Yours, etc.,

Forest Gate, E.

H. J. T. C.

Listeners As Programme Makers.

DEAR SIR,—In view of the mutually destructive and semi-humorous criticisms of individuals who seemingly think that the 10s. annual licence which they pay (or at least should pay) is sufficient to run a nightly programme from every studio, and even to give tuning notes, to suit their own especial idiosyncrasies, might I put forward a suggestion which the B.B.C. may consider worthy of adoption?

Seven of the worst grumblers should be invited in turn to compile a complete programme at each station for at least a week. Each should be compelled to listen to his fellow grumblers' programmes.

This would make unfair critics realize the magnitude of the task of trying to please everyone all the time, week in and week out, and that the B.B.C. are worthy of all praise for pleasing the majority of people for the majority of the time.

If the B.B.C. be inclined to adopt this suggestion, I trust they will give me timely warning in order that I may arrange my holidays accordingly!

Yours, etc.,

London, W.

C. E. N.

A Plea For Patience.

DEAR SIR,—I have read with interest the article in *The Radio Times* in answer to criticisms which have appeared in the Press, and congratulate the B.B.C. for promptly placing their views before the public.

The critics have been a little too severe, as, during the past two years, the B.B.C. have done a wonderful work in making it possible for nearly all to be able to enjoy broadcasting, and as soon as they have finished erecting stations, naturally their next great object will be to improve their programmes and service. It is up to all of us to have a little patience and back up the B.B.C. by playing our part, which is mainly to take out a licence when it becomes due, and I am sure they, on their part, will soon be in a position to give us of the best.

Yours, etc.,

Wembley Hill.

"By Radio To The Stars."

DEAR SIR,—It would be unjust to the thinking public to allow the article by Mr. Austin Harrison on "By Radio to the Stars" to be accepted as the opinion of scientific men.

Might I ask the author whether he has tried to hear an alarm-clock ringing inside a glass bell jar devoid of air? Most schoolboys of twelve would tell him that sound requires a material medium (in this case, air) in order that it may be propagated. The author, having made this fatal error, proceeds to give us his views on light radiation, suggesting that our knowledge of sound should be applied to the solution of the "harnessing" of light. The truth of the matter is that light is an electromagnetic disturbance in the assumed ether; whereas, sound can only be propagated through matter. Also, our knowledge of light radiation is not so scanty as the author appears to think.

The photography of the Martian canals has been an accomplished fact for many years, and I would be obliged if the author would explain what he means by the expression "the lightning beats the thunder."

The most useful information which he gives us is that "wireless disposes of the fourth dimension, and some people reckon that it has shown us the way to communicate with the dead." The fourth dimension is a useful mathematical concept, and is not the place where ghosts live.

I am sorry to shatter the hopes of the writer regarding his proposed conversation with a Lunar scientist. Every shred of evidence we have regarding the condition of the moon's surface goes to give us a concept of a dead satellite similar to what the earth will be in about 8,000,000 years. There is no air or water, and we have every reason to assume that it is completely devoid of life.

Yours, etc.,

Teddington.

H. A. T.

Hearing Big Ben From Three Countries.

DEAR SIR,—Recently I had the unusual experience of hearing Big Ben's chimes through three countries in one hour. At twelve o'clock midnight I heard the usual signal at the conclusion of the Savoy Bands. I then tuned in a German station on a wave-length of about 330 metres, and found they were relaying Chelmsford, and through them I heard the chimes for 12.30 a.m. The German station then closed down, after which I tuned in "WGY" (U.S.A.), and they also were relaying "5XX," and from the announcer I found that the transmission was a special one for America. The concert was concluded with the British National Anthem. Then came the time signal for 1 a.m. from Big Ben. Yours, etc.,

Exeter.

W. J. S.

"At the Back of Beyond."

DEAR SIR,—A young teacher from my congregation here went recently to a lonely spot beside a loch—a school over fourteen miles from the nearest village. She felt that she was "at the back of beyond," but writes to say that the house has wireless and every night they are in touch in their solitude with London and Glasgow, and she is enthusiastic about the boon it is.

I have been struck on visiting round among the Clydeside men how much easier it is now to have a free talk with them. They are listening to speeches, lectures, music, and, most wonderful of all—to sermons. We in the Church are immensely indebted to the general policy of the B.B.C. I always compare the wireless with the cinema as a modern force. The cinema, with all its interest and elaboration, does not seem to have a policy with some ideal, and its influence is in some respects very unsatisfactory.

Yours, etc.,

Dumbarton.

W. S.

A Case of Impersonation.

The Story of a Neat Coup. By Alfred Heard.

"I SUPPOSE it is true that everybody has his or her double," remarked the Elocutionist, reflectively. "The matter interests me because, as I was leaving the Birrncastle Station a few nights ago, a complete stranger stepped up to me, muttered something which I didn't catch, hit me a crack over the head with a big stick, and disappeared!"

"Good gracious!" cried the Soprano, pityingly. "were you hurt much?"

"It made the sparks fly for a bit," the Elocutionist admitted, "and it was some minutes before I could take my bearings. It was very late, and the light outside the Birrncastle Studio is not very brilliant, as you know, so that I recovered before anybody passed. Either the man had been listening to the programme and was expressing his strong disapproval of my efforts to entertain, or he mistook me for a hated rival in love! The man for whom he mistook me must have been a distinguished-looking chap with a magnificent physique—what!"

"Tut-tut, man!" chided the Celebrated Pianist, from the depths of a luxurious divan chair.

The Contralto leant forward. "You have all heard the story of Hester Wilmow's double, I suppose?"

Came shakes of the head and murmurs of negation from the company. "Please tell us the story, Miss Cavendish?" begged the Soprano.

Glancing at her wrist-watch, the Contralto observed that the orchestra would be playing for a good ten minutes longer, and gave a preliminary cough. "Hester Wilmow, the mezzo-soprano, is well-known in the broadcasting world, of course, and her photograph has appeared every now and again in wireless journals, so that anybody sufficiently interested would come across it sooner or later. One afternoon, as she was leaving the Studio, a handsomely-dressed elderly woman stepped out of a saloon motor-car which had just drawn up and, hurrying forward, said: 'Excuse me, but aren't you Miss Wilmow?'

"Yes, that is my name," replied the singer, 'did you want to speak to me?'

"If you can spare me a few minutes, please. I am Lady Morcame, Ronald's mother!"

"Miss Wilmow was naturally somewhat taken aback by the woman's words. 'I do not think I have heard your name before, Lady Morcame,' she said, 'and I am quite sure I do not know your son. Perhaps I should tell you that in private life my name is Mrs. Frank Salter.'

"The stranger looked amazed. 'Am I to understand that you are married?' she gasped.

"I have been married two years," replied Miss Wilmow, coldly, "and I don't quite see why the fact should surprise you!"

"I beg your pardon," said the other, hurriedly; "but you would understand my surprise if you knew the circumstances. It is clear that somebody is impersonating you, and it must be somebody remarkably like you. I don't quite know what to do. The matter is more serious than I thought, and it would be better, perhaps, for me to explain matters to you and your husband at your house."

"Somewhat carried off her feet, Miss Wilmow agreed to the suggestion and, at the woman's invitation, gave her address to the chauffeur and entered the motor."

"Wasn't she afraid of being kidnapped?" cried the Soprano, anxiously.

"No, I don't think so," replied the Contralto. "She was quite capable of looking after herself.

Anyway, nothing untoward occurred, and they soon reached Corwen Mansions, where the Salters lived. On reaching the flat, which was on the first floor, Mr. Salter was introduced and briefly informed of the reason of Lady Morcame's visit. When they were all comfortably seated in the drawing-room, Lady Morcame told them a strange story.

"My son, Ronald," she said, "has just turned twenty-one, and is of a romantic temperament. He is an expert at wireless, and very fond of listening to the broadcast programmes. Some weeks back he told me that he had been introduced to a Miss Wilmow, who sang for the Broadcasting Company, and showed me her photograph in one of the wireless journals. Thinking that it was an ordinary acquaintanceship, I thought no more of the matter until, last week, Ronald suddenly informed me that he was engaged to the lady, and hoped to marry her very shortly!"

"But didn't your son introduce her to you?" inquired Frank Salter, in some surprise.

"Ronald explained that his fiancée's professional engagements would prevent her from meeting me for a week or two," replied Lady Morcame. "Now, the most disturbing feature of the whole affair is that my son sent me a wire this morning, from Manchester, to the effect that Miss Wilmow and he are going to be married by special licence to-morrow! In great agitation, as you may imagine, I referred to the broadcast programmes in the paper, and saw that Miss Wilmow was singing at the London Station this afternoon, and I decided to go to the Studio and endeavour to see her. The rest you know, Mrs. Salter. I may say that it is fairly common knowledge that my son became entitled to a very large sum of money on attaining his majority, and I feel certain that this pretended Miss Wilmow is an unscrupulous adventuress. Don't you agree?"

"Both the Salters agreed that it looked very like it, and were anxious to know what steps Lady Morcame proposed to take. 'Fortunately, my son mentioned in his telegram the name of the hotel in which he is staying, and I shall send my solicitor to Manchester to-night to get in touch with your impersonator, Mrs. Salter, and I have no doubt that he will be able, to put the matter bluntly, to buy my son's freedom. May I implore you to keep the matter a profound secret, as I wish to avoid scandal at all costs?'

"Naturally, the Salters were not anxious to be connected with the matter, and readily gave the required promise. Bidding them a cordial good-bye, Lady Morcame took her departure, and they never saw her again."

The Elocutionist was not surprised at the abrupt termination of the story, and smiled. "And the sequel, Miss Cavendish?"

"Oh, after the burglary at the Salters, when the best part of the wonderful collection of silver wedding presents was stolen, the detectives surmised that 'Lady Morcame,' whose name did not appear in 'Debrett,' was the advance guard of the gang of crooks, and had obtained admission to the flat by means of an ingenious trick in order to ascertain whether the silver was kept at the bank or at home! The orchestra has just stopped—where's my music?"

(We shall shortly publish another story in this series.)

—♦—
DURING some trans-Atlantic wireless tests an important station of the American Army was able to hear nothing. A few yards away a sixteen-year-old schoolboy received London Station quite clearly on a home-made set with an indoor aerial!

WIRELESS PROGRAMME—SUNDAY (April 5th.)

The letters "S.B." printed in italics in these programmes signify a Simultaneous Broadcast from the station mentioned.

The letters "S.B." printed in italics in these programmes signify a Simultaneous Broadcast from the station mentioned.

The High-Power (Chelmsford) Programme will be found on page 57.

2LO LONDON. 365 M.

1.0-2.0.—Time Signal from Greenwich. Music played during Luncheon at the Holborn Restaurant.

4.0-5.0.—"Books to Read," by Ann Spice. "Handwork for Children From Five to Seven," by Muriel Wrinch. Organ and Orchestral Music, relayed from Shepherd's Bush Pavilion.

5.30-6.15.—CHILDREN'S CORNER: "Simple Astronomy," (2), by Capt. M. Ainslie. "The Tale of Robin Red Breast," by Christine Chaundler. Violin Solos by Victor Olof.

6.40-6.55.—Mrs. F. AYSCOUGH, "Concerning China."

7.0.—TIME SIGNAL FROM GREENWICH. WEATHER FORECAST and 1ST GENERAL NEWS BULLETIN. *S.B. to all Stations.*

Mr. A. S. E. ACKERMANN, B.Sc., Eng. (Lond.), A.M.I.C.E., "Popular Fallacies in Engineering and Science." *S.B. to all Stations.*

Local News.

7.30. "Westward Ho!"

S.B. to all Stations.

TEN RADIOVIEWS

from Charles Kingsley's Famous Novel.

Arranged by A. WHITMAN.

Produced by R. E. JEFFREY.

1. Bideford, the birth of adventure.
2. Devon's welcome to daring voyagers.
3. Capture of Don Guzman.
4. What befell at Annery House.
5. Amyas Leigh undertakes a mission.
6. Higuero, Spanish Main; and how the oath was taken.
7. On the banks of the Meta.
8. Homeward Bound; Salvation Yeo's discovery.
9. The Armada; how Amyas settled with Don Guzman.
10. Home; Amyas, being blind, sees clearly.

Music played by

THE WIRELESS ORCHESTRA:

Conducted by DAN GODFREY, Junr.

Nautical Songs sung by

KENNETH ELLIS (Bass).

The production is an innovation in Broadcast Drama: it is an attempt to give an outline of the essential narrative of Charles Kingsley's great work. The Radioviews will be linked up by short announcements giving the details of the scenes as they are reached, and of the intervening circumstances with which the Radioviews do not deal.

In addition to sound effects accompanying the transmission, a new feature will be introduced, that of having a musical background. The actors will speak through the music; and it is hoped that all our listeners will thus have a further aid to the atmosphere which we shall try to impart.

9.15.—"From My Window," by Philemon. *S.B. to all Stations.*

9.30.—TIME SIGNAL FROM GREENWICH. WEATHER FORECAST and 2ND GENERAL NEWS BULLETIN. *S.B. to all Stations.*

Prof. R. S. RAIT, C.B.E., LL.D., "Seven Critical Moments in British History—The Jacobites." *S.B. from Glasgow to all Stations.* Local News.

THE CHILDREN'S CORNER. CONDUCTED BY THE AUNTS AND UNCLES.

A Trip to the Channel Islands.

HULLO, children! This week we have another travel talk—all about the Channel Islands—by E. M. L. Elliot.

Let's hope you are all good sailors, because, unless you are very lucky, you will have a rough voyage to-day! But even if it is ever so rough, it is worth it, for the Channel Islands are very beautiful, and their rocky coasts are thrilling.

Look at that angry group of jagged rocks, with the powerful lighthouse perched on top. Those are the famous "Casquets" on which many a good ship has gone down. Tradition says that it was here that William, son of Henry I., perished in the wreck of the *White Ship*, in 1120, and there have been many other calamities since then.

Dangerous For Ships.

There, over on your left, is Alderney, where the cows come from. Perhaps this is the least interesting of the Channel Islands, but, even so, it is worth a short visit. Rocks and reefs fringe its coasts and make the passage very dangerous for ships, and all along the south coast the land falls abruptly to the sea in a series of majestic cliffs. Near Longy Bay there is an extraordinary block of sandstone known as "La Roche Pendante," that hangs right over the cliff and looks as if it simply must topple over.

Some way south of Alderney you come to Guernsey, Herm, Jethou, and Sark, this last the loveliest island of them all. The little walled-in harbour of Creux can only hold very small steamers and these can only enter when the tide is high. The splendid cliffs are covered with purple heather and bracken, and even the rocks seem to radiate a myriad different colours.

The island is divided into two unequal parts known as Great Sark and Little Sark. These are connected by the Coupée, a lofty isthmus that

is so narrow that there is only room for a road at the top, and the sides fall sheer to the blue-green waters of the sea. All round the coast there are magnificent caves, and the most exciting cleft of all is the "Creux du Derrible," a sort of "Devil's Hole" in the cliff that communicates with the sea through a double cave. As the tide comes in, you hear it roaring through the cavern, and the water comes bubbling up in the hole.

Herm is a tiny island, but it is the proud possessor of a beach half a mile long, composed entirely of shells.

Eels as Rent.

Guernsey is the second largest island and has quite a good harbour at St. Peter Port. It is not a bit like an English town. Look at the little palm trees in the gardens and the great bushes of fuchsias and hydrangeas. Geraniums bloom out of doors in the winter and oranges and figs will ripen in the open air, so you can tell how mild the climate must be.

Such quaint old laws and customs they have in these islands! Many of them have not changed since the days of William the Conqueror, whose possessions they were. There is still one tenant who has to give his landlord one donkey every year and a cake made from a bushel of wheat. Another has to pay eighteen eels or their equivalent in money; and another, a chicken with a tail at least one inch long! You will find, too, that the peasants still speak the old Norman-French, and French is the official language of the courts.

The coast scenery is specially fine on the south, where bold cliffs alternate with exquisite little rock-strewn bays where the water is always a wonderful translucent green. At Petit Bot there are two fascinating glens leading to the sea and the lane that runs down to Moulin Huet Bay between high banks arched over with foliage, beside a little tinkling rill, must surely have strayed away from Fairyland!

But we must hurry on to Jersey, the most important of the islands. It takes two hours from Guernsey and is often the roughest part of the voyage; but when you see a lighthouse on your left, standing on the cruel Corbiere rocks, and feel the ship going "wop with a widdle between" you'll know it won't be long before you are safely on land again. Before you reach the harbour, however, you pass by one or two forts and every here and there you will see an old stone watch tower, or "Martello." Just by the harbour's mouth stands Elizabeth Castle towering up on a rocky island that can be reached from the mainland when the tide is low. Here the Prince of Wales, afterwards Charles II., took refuge in 1646, and again three years later, when George Carteret, the Governor of the island, proclaimed him King of England.

A Wonderful Castle.

You can go by train from St. Helier, along the coast to Gorey on the east, and there you will find the magnificent castle of Mont Orgueil, said to be founded on the site of an old Roman fortress.

From Gorey the road winds along the coast to the north-east corner, where it turns inland and runs past curious clefts and valleys in which tomatoes and potatoes are grown. Soon it brings you to Bouley Bay, where heather covers the cliffs and pine woods reach down almost to the sea. The whole of the north coast is remarkably beautiful, but perhaps Plemont, with its splendid cave, is the most perfect spot of all.

The west coast is low and sandy, and all along the roadside are heaps of seaweed, for seaweed is harvested in these islands and used to fertilize the land.

And when you think that the sun shines far more often in Jersey than it does in the most favoured spot in England, you will realize what gems these Channel Islands are.

FAIRIES OUT OF WORK.

By A. COLEMAN HICKS.

The Knight and the Dragon.

with her toys, and she looked round to see who had spoken to her.

"Why, you're the Fairy Godmother," she cried. "I've often seen you in the picture-books."

"Quite right, my dear," was the reply. "I want you to come with me in my car, and I'll show you where all my Fairy Folk live, so that you'll believe when you have seen them."

The car was at the door, and off they went, Sophy being rather surprised to see it was driven by a Teddy Bear in livery.

"SHALL I tell you a fairy story?"

"No," said Sophy, "I'm tired of silly fairy-tales, and don't believe there are such things as Giants and Dragons."

Sophy was lying on the hearthrug before the fire, weary of playing

Very soon the car stopped at the entrance to a splendid castle, and they had to pass two Griffins who guarded the steps—one on each side, which made Sophy rather nervous, but they only smiled at her and wagged their tails.

As they entered, a pretty girl with blue eyes and golden hair hanging down below her waist ran up to them and welcomed Sophy very kindly.

"I'm Beauty," she told her, "and I'm so tired of waiting for the Prince to come and wake me with a kiss."

"But you are awake," said Sophy.

"Oh, yes, I know I am really; but in the story I'm not; and look at the poor Prince, he still has to be the Beast, you see, because he can't change into the Prince until he wakes me with a kiss—isn't it horrid for him?" And she pointed to the Teddy Bear who had driven the car.

"And," she went on, "it's all because you children don't believe in fairies nowadays, and don't want to hear tales about them, so we are all doing nothing."

Sophy thought this was very sad, and then asked: "Do any Dragons live here?"

"Yes, there's one in the courtyard," said Beauty. "I'll introduce you to him," and they went off hand-in-hand.

"Will he bite me?" asked Sophy, timidly.

"Oh, no, he's very gentle really. He used to have awful fights with the Knight on Horseback—there is the Knight," went on Beauty, as a man in armour on a white horse rode into the courtyard and went up to the Dragon.

"Well, Fido," he said, patting it gently on

its spiky back, "where's the Princess you should be guarding?"

"Oh," growled the Dragon, as he breathed out fire and smoke, "she's gone for a walk with the Giant, and good riddance."

Darkness fell suddenly, and her new friend pointed out to Sophy a number of tiny lights that danced about on the green, always keeping in a circle.

"Oh," cried Beauty, "you're just in time to see the dance of the Gnomes. Those little lights are glow-worms, and each Gnome carries one in his cap. Don't they look pretty?"

"There goes poor old Mrs. Wagabone," continued Beauty, as a very old woman hobbled past, leaning on a broomstick. "She's a Witch really, but now that witches and fairies are out of fashion, she has to go out charing—in fact, she's a charlady—you mustn't say 'woman.'"

"Can she fly through the clouds on her broomstick?" asked Sophy.

"Well, she used to before aeroplanes were invented; but she came a nasty smack into one in the air some time ago, and since then she's given up flying."

Suddenly a gong sounded, and all the queer folk rushed into the castle.

"Aren't you coming to tea?" asked a familiar voice.

"No, Beauty, I must go home," muttered Sophy, yawning.

"Well, that's the first time anyone ever called me 'Beauty,'" said her nurse, as she picked up Sophy from the hearthrug and carried her off to tea.

"Cut out all the Fancy Stuff"

Research Director: "I don't reckon anything to this fanciful advertising."

Advertising Manager: "What do you mean?"

Research Director: "Well, every amateur knows what a valve curve means, and if you say in the advertisements that every valve is guaranteed to conform closely to the curves we publish—well, they'll compare curves first, then prices."

Advertising Manager: "I see your point and I agree. I'll offer curves in this week's Radio Times."

Reduced Prices:

RADION G.P. An economical Bright Emitter Valve, taking only 48 amps at 3.5 to 4 volts. EACH **10/-**

DULL EMITTERS RADION D.E. .34. 2 volt D.E. of great efficiency. EACH **17/-**

RADION D.E. .06. One of the best "very dull" fil. valves ever produced. EACH **20/-**

From DEALERS or Direct.

We have pleasure therefore in offering a free booklet, containing curves of our valves, to all who send a postcard, and if you are wanting a good valve right away and there is any difficulty in obtaining "RADIONS" locally send remittance direct to us, at the factory, Bollington, and we'll guarantee satisfaction.

Sole Manufacturers: RADIONS LIMITED, Bollington, Near MACCLESFIELD.

B. & D.

B.B.C. French Talk.

The following French talk will be given from London by M. E. M. Stiphon, on Thursday, April 9th. It is given here to enable listeners to follow the speaker word for word.

L'ILE DES PINGOUINS.

L'ILE des Pingouins n'est au fond qu'une histoire comique de la France.

Le vieux Saint Maël méditant un jour au fond d'une baie tranquille aperçut une auge de pierre, auge miraculeuse, qui flottait comme une barque sur les eaux de la mer. A la vue de cette embarcation nouvelle le saint homme comprit que Dieu le destinait à l'apostolat des païens; il monta à bord de la cuve, qui toutes voiles dehors, se mit à filer avec une telle vitesse qu'au bout de quelques instants la côte avait disparu. L'auge poussée par un vent de tous les diables volait comme un écouu dans les brouillards et fendait les vagues sans relâche. "Après une nuit de trois fois vingt-quatre heures les ténèbres se déchirèrent soudain et Maël se trouva dans un océan couvert de glaces flottantes." Finalement il aborda une île ronde au milieu de laquelle se dressait une haute montagne.

Mais hélas! la réverbération des glaces polaires avait affaibli les yeux du saint homme; dans le lointain il distinguait des formes animées sur les étages des rochers; pensant que c'était des hommes il se mit à les évangéliser; et après leur avoir porté la bonne nouvelle il prononça sur eux la formule du baptême. C'est ainsi que le bon Saint Maël, trompé par la faible lumière qui se glissait dans ses yeux malades, cria dans le ciel une impasse théologique; car sachez-le, ceux qu'il avait pris pour des hommes et des philosophes n'étaient autres que des pingouins!!

Le vigoureux débat auquel nous assistons dans le Paradis est des plus amusants; la situation paraît sans issue. Enfin Sainte Catherine trouve qu'une solution se présente; c'est de transformer ces Pingouins en créatures humaines et Maël, armé du nom de Dieu, changea les Pingouins en hommes. Cela fait il remonta dans son nage et remercia l'E. pebsire; après un long voyage le saint homme aborda au rivage de la Bretagne amenant l'île avec lui; ce fut lui, que sous le nom de Pingouinie ou Alca, l'île nouvelle entra dans la société des nations.

Alca évolua et peu à peu passa par toutes les phases ordinaires de la marche de l'humanité.

Tout à tour, les nouveaux civilisés inventent des vêtements, la propriété individuelle, une drastique royale, une religion nationale. Ils arrivent enfin à l'apogée de leur gloire, le jour où ils inventent les Impôts dont on frappe les petits, les faibles et les pauvres, pour le plus grand bien des grands, des riches et des forts.

Dans tous les chapitres où il traite de la civilisation pingouine A. France fait preuve de l'esprit le plus subtil et le plus ironique; le chapitre sur les arts lui fournit l'occasion de faire une parodie incomparable des théories de l'école pré-raphaélite anglaise.

Quant à la seconde partie de l'ouvrage elle n'est autre que la conclusion des romans publiés sous le nom de "Histoire contemporaine" (L'Orme du Mall, le Mannequin d'Osier; Monsieur Bergerot à Paris et l'Anneau d'Améthyste).

Dans le dernier chapitre A. France dévoile à nos yeux ce que l'avenir nous prépare. L'industrie de plus en plus concentrée n'a laissé dans la Société que deux classes seulement; celle des Capitalistes et celle des Proletaires.

"Nous voyons les ascètes de la richesse; le corps plus sec, le teint plus jaune, les lèvres plus arides, le regard plus orfèvre que les vieux moines espagnols ces milliardaires n'ont d'autre occupation que de penser à quoi le bouton d'une sonnette électrique et d'amasser des richesses dont ils ne volent pas même les signes, acquérant la vaine possibilité d'assouvir des désirs qu'ils n'éprouvent jamais."

Quant aux prolétaires ils travaillent dans les villes géantes à la lumière des phares jetant leurs feux nuit et jour; les maisons ne sont jamais assez hautes; on en construit de quarante, de cinquante étages; et d'un autre côté l'on creuse toujours plus profondément dans le sol pour faire des caves et des tunnels.

Une telle société ne saurait être réformée; le mal est incurable, et nous assistons à la destruction d'Alca; la dynamite fait sauter ce monde de Capitalistes et de Proletaires, et selon toute apparence l'humanité à jamais. Cette civilisation orgueilleuse, bâtie par le labeur douloureux et sanglant de milliers de générations, s'efface tout d'un coup et voilà que les animaux sauvages rôdent et paissent, là où hier encore, se dressait la monstrueuse capitale de la Pingouinie.

On ne peut se défendre de penser à ces vers d'Omair:—

"They say the Lion and the Lizard keep
The Courts where Jamshyd gloried and drank deep,
And Bahram, that great Hunter, the Wild Ass
Stamps o'er his head, and he lies fast asleep."

Mais A. France est plus amer et plus sceptique que le philosophe persan, car l'Histoire sans fin de la Civilisation reconstruite. Des chasseurs viennent poursuivre le gibier sur les collines qui entourent la ville bâtie; puis viennent les pâtres conduisant leurs troupeaux, puis les laboureurs poussant leurs charrues; enfin apparaissent les artisans et les ouvriers; ceux qui tissent les étoffes ceux qui travaillent les métaux et ceux qui fouillent les entrailles de la terre pour en extraire le charbon. D'un coup de sa baguette magique le grand écrivain reconstruit la Civilisation effacée; nous voilà de nouveau dans une ville démesurément grande où les maisons ne sont jamais assez hautes, où les souterrains jusqu'à ce qu'elles atteignent quarante étages et l'on creuse dans le sol toujours plus profondément.

"Ce qui a été sera; ils sont nés, ils ont souffert et ils sont morts," telle est la philosophie d'un pessimisme si poignant, qui paraîtrait se dégager de "L'île des Pingouins."

A. France a eu le courage de nous dire que ceux qui pensent, ceux qui sont les guides intellectuels du peuple refusent à tout prix d'être satisfaits de l'état actuel de la société; ils n'admettent pas qu'on puisse à coups de décrets et de lois créer un Nouveau Ciel et une Nouvelle Terre et ils refusent de chanter avec Browning: "God's in his Heaven, all's right with the World," ou avec Lamartine: "Tout est grand, tout est beau, tout est bien à sa place."

La vie est dangereuse; et il faut la vivre dangereusement; l'œil demande à voir autre chose que le monde matériel qui le remplit, et l'oreille à entendre autre chose que les sons plus ou moins intelligibles qui l'assourdissent.

La tristesse d'A. France est une tristesse raisonnée et raisonnable; il a su exprimer son pessimisme et son ironie dans une prose parfaite, dans la langue la plus pure, la plus harmonieuse, la mieux cadencée que nous ayons; voilà le l'espère de quoi nous aider à supporter patiemment les tribulations de la vie, et les iniquités de l'heure présente.

WIRELESS PROGRAMME—FRIDAY (April 10th.)

The letters "S.B." printed in italics in these programmes signify a Simultaneous Broadcast from the station mentioned.

The High-Power (Chelmsford) Programme will be found on page 37.

"East to West."

A MUSICAL JOURNEY ACROSS TWO CONTINENTS.

Public Concert in St. Andrew's Hall. Relayed to "5XX" and Edinburgh.
 CRUE DAVIDSON (Contralto).
 JOHN MATHEWSON (Baritone).
 THE AUGMENTED STATION ORCHESTRA:
 Conducted by H. A. CARRUTHERS.
 7.45. Orchestra.
 Japan: "Japanese Suite" *Gustav Holst*
 Crue Davidson.
 8.5. China: "Chinese Songs" *Granville Bantock (3)*
 8.15. Orchestra.
 "Danse Chinoise" ("The Nutcracker Suite") *Tchaikovsky*
 China: "Oriental Phantasy, 'In a Chinese Temple Garden'" *Ketelbey*
 8.30. Crue Davidson.
 India: "The Indian Love Lyrics" *A. Woodford-Finden (1)*
 8.45. Orchestra.
 Persia: An Eastern Suite, "In a Persian Market" *Ketelbey*
 8.52. John Mathewson.
 Persia: "Persian Dawn Song"
 "Night of Moon and Roses"
 "The Rose Garden of Zuhra"
 Arthur Baynon
 Orchestra.
 Italy: "Capriccio Italien" *Tchaikovsky*
 9.30.—WEATHER FORECAST and NEWS. *S.B. from London.*
 Mr. F. M. CARRUTHERS. *S.B. from London.* Local News.
 10.0.—SAVOY BANDS. *S.B. from London.*
 12.0.—Close down.
 Programme in Hall:
 9.40. Orchestra.
 France: "Carnival in Paris" *Svendean*
 "Four English Dances" *F. Cowen (11)*
 England: "Shepherd's Hey" *Grainger*
 John Mathewson.
 10.5. "Kirkconnel Lea"
 "The Deil's Awa' Wi' the Excise-man"
 Scotland: "My Nannie's Awa'" *George Shori*
 "The Wee, Wee German Lairdie"
 10.17. Orchestra.
 Scotland: Overture, "Land of the Mountain and the Flood" *H. MacCunn (11)*
 10.30.—Close down of Concert from Hall.

Brandes Superior
"Matched Tone"
Headphones

PRICE

20/-

British Manufacture
(B. B. C. Stamped)

All Brandes products carry our
official money-back guarantee,
enabling you to return them
within 10 days if dissatisfied.
This really means a free trial.

.....every one of these adver-
tisements will show an added
advantage in the construction of
Brandes Headphones.

Look at the illustration above.
See how snugly the 'phones fit
the head. A gentle pressure
on the crown, a firm clasp to
the ears, and the rest of the
head band is held well away
from the hair. This means
long-wearing comfort and the
shutting out of extraneous
sounds. Strength and firm
beauty of line typify their
finished construction.

Obtainable from any
reputable Dealer.

Matched Tone means that you hear the same sound in both ears at the same instant and you learn a new beauty of tone. Brandes Headphones are subjected to special tests definitely to establish this advantage, thus gaining the concentration of the two earpieces towards one perfectly synchronised sound. This achieved, they bring purer tones, greater volume and keener sensitivity. Primarily designed for long range work, they are excellent for trans-Atlantic or trans-Continental telephony and bring home stations with delightful ease. They are sold with a definite money-back guarantee—ask your Dealer for Brandes.

The Table Talker is another Brandes quality product at moderate price. Its full round tones are wonderfully clear and pleasing. The horn is matched to the unit so that the air resistance produced will exactly balance the mechanical power of the diaphragm. This means beautiful round-balance. Gracefully simple of line, it is finished a shade of neutral brown and is twenty-one inches high.

Table-
Talker

WIRELESS PROGRAMME—BELFAST (April 5th to April 11th.)

The letters "S.B." printed in italics in these programmes signify a Simultaneous Broadcast from the station mentioned.

2BE 435 M.

SUNDAY.

- 3.0-5.0.—ORGAN RECITAL. *S.B. from London.*
- 5.0-5.30.—CHILDREN'S CORNER. *S.B. from Bournemouth.*
- THE "2BE" TRIO:
ERNEST A. A. STONELEY (Violin);
REGINALD DOBSON (Cello);
T. O. CORRIN (Pianoforte).
- 8.15. Trio.
Andante Cantabile from Trio No. 1, Op. 1
Beethoven
- 9.0. The Station Choir.
Hymn, "Ride On, Ride On in Majesty."
Anthem, "I Will Arise" *Charles Wood* (11)
Minister of the Society of Friends: Address.
Choir.
Hymn, "Glory Be to Jesus."
- 9.30. Trio.
Trio No. 5 in G for Violin, Cello, and Piano
Mozart
- 10.0.—WEATHER FORECAST and NEWS.
S.B. from London. Local News.
- 10.15. Trio.
Andante from 3rd Trio *Haydn*
- 10.30.—Close down.

MONDAY.

- 4.0-5.30.—The Station Orchestra. Annie Kinnis (Contralto).
- 5.30-6.15.—CHILDREN'S CORNER.
- 6.40.—Mr. F. J. Bigger: "Ulster Antiquities: The Coming of the Dane and the Norman."
- 7.0.—WEATHER FORECAST and NEWS.
S.B. from London.
- Radio Association Talk. *S.B. from London.*
- Mr. M. A. C. HINTON. *S.B. from London.*
- Local News.

Light Music.

THE STATION ORCHESTRA.
FRED BECK (Entertainer).

- 7.35. Orchestra.
March, "Jack Tar" *Sousa*
Fox-trot, "Eat More Fruit"
Rule and Stogden (9)
One-step, "If All the Girls"
Clark and Donaldson (16)
Waltz, "Sometime" *Friml*
Fred Beck
Will Entertain.
Orchestra.
Eastern Suite, "In a Persian Market"
Ketelbey
"Cosmopolitan Waltzes" (French, Russian,
Viennese, and Spanish) ... *Muller-Norden*
Fred Beck
Again.
Orchestra.
Pot-Pourri on Students' Songs, "Old
Heidelberg" *Tobani*
"Serenade Napolitaine" *Drigo*
Oriental Suite, "The Rubaiyat of Omar
Khayyam" *Cadman*
- 9.30.—WEATHER FORECAST and NEWS.
S.B. from London.
- Mr. E. NORMAN HAY, Mus. Doc.: "Some
Perilous Clichés in Music." *S.B. to
Scottish Stations.*
- Local News.
- 10.0. Orchestra.
Fox-trot, "Go 'Long, Male"
Creamer and King (6)
Waltz, "Adoration" *Mogine*
Fox-trot, "Jography" *Strang* (10)
One-step, "One Little One More"
Sterndale-Bennett (16)
Descriptive Piece, "A Southern Wedding"
Lotter
- 10.30.—Close down.

TUESDAY.

- 11.30-12.30.—Gramophone Records.
- 4.0.—The Station Orchestra. Kathleen Daunt
(Mezzo-Soprano). Ida Starkie (Solo Cello).
- 5.30-6.15.—CHILDREN'S CORNER.
- 7.0-11.0.—Programme *S.B. from London.*

WEDNESDAY.

- 4.0.—The Station Orchestra. Keem McEndoo
(Solo Violin).
- 5.30-6.15.—CHILDREN'S CORNER.
- 6.40-6.55.—Mr. Alec Riddell, "Ulster Memories."
- 7.0.—WEATHER FORECAST and NEWS.
S.B. from London.
- Prof. T. H. PEAR. *S.B. from Manchester.*
- Local News.

Poetry and Ulster Plays.

- EVA MASSEY (Mezzo-Soprano).
- FREDA CAHILL (Solo Pianoforte).
- ARTHUR MALCOLM (Recital).
- VERSE SPEAKING CHORUS.
- BELFAST RADIO PLAYERS.
- 7.30. Freda Cahill.
Prelude and Fugue in D *Bach*
Ballad in F Minor, Op. 52 *Chopin*
Impromptu in A Flat, Op. 29 *Chopin*
Verse Speaking Chorus.
Selected Verse.
Radio Players.

Radio and the Empire.

By Sir Robert Donald, G.B.E., Chairman of the Empire Press Union.

Sir ROBERT DONALD.

NO one can set bounds to the progress of Radio. Already human speech is carried through the ether from England to various parts of North America, and is heard in Australia and New Zealand. These are only isolated examples projected into the future, tempting the scientist to follow in pursuit until he has conquered the whole world for the broadcaster.

Up to two years ago there was comparatively little local broadcasting in Great Britain. The transmitting stations were regarded as playthings—the work of amateurs. Mr. A. R. Burrows, in his informative and brightly-written book on the "Story of Broadcasting," has shown how slow we were to realize the possibilities of broadcasting as a new milestone in wireless, and how reluctant officialdom was to recognize that the thing was possible at all.

A Romantic Story.

In America broadcasting was booming two years before we began. First only restrictive licenses were issued. It was suspected that broadcasting was some new disturbing element which would interfere with the efficient working of Government stations. For some inexplicable reason, music was barred in this early experiment. In spite of many handicaps, "2LO" got going, and by the autumn of 1922 licensed listeners increased all over the country. Mr. Burrows tells the romantic story of radio and the dramatic developments which, in two years, made the British system the most perfect and the best organized in the world. It is a remarkable testimony to the tireless energy, initiative, and thoroughness of the staff of the British Broadcasting Company.

But our broadcasting activities are not to be limited to the British Isles. Radio recognizes no frontier, and a problem will arise before long regarding the regulation of international wireless. A conference has been held in London to study that problem. Of primary importance to us, however, is to study the extent to which vocal broadcasting will serve the Empire, supplementing wireless telegraphy. It is probable that radio and wireless telephony will make up the first chain of Empire communications.

The First Great Link.

It is thirteen years since the Empire Wireless chain was planned, and it has only one completed link which is far from perfect, and, in any case, ends in a country which is no longer under the British Crown. The first super-power wireless station within the Empire is now being erected at Rugby. It is equal in capacity to the station of the French wireless company at Ste. Assise, or the Long Island station of the American Radio Corporation, and if the Government carry out the recommendations made by a Committee of which I was chairman, Rugby will be enlarged so as to be unsurpassed in power and range by any existing super-station.

The progress of wireless telegraphy has followed a steady course in all great countries of the world except Great Britain. Here Governments have wobbled. Policies have been changed and rechanged. An Empire

Wireless chain was started and then scrapped, so that we found ourselves, after all these vicissitudes, in the unfortunate position of being behind all great Powers in wireless communications.

Marconi, the genius to whom the world owes the great advance in wireless telegraphy, presented an Empire scheme to the Government as far back as 1910. After two years' discussion, an agreement was entered into with the Marconi Company, and the first link of the Empire chain was begun, and good progress was made when the War broke out. Instead of stimulating the Government to speeding-up wireless, which the exigencies of the war did to foreign Governments, the British Government broke the contract with the Marconi Company and ceased all work on the Imperial chain. Empire wireless, in consequence, stagnated for six years. Now we are going ahead again, and the first super-power station in the British Empire will be in operation in the near future.

"Beam" Wireless.

In the meantime, a revolutionary development has taken place in the adoption of what is described as the "beam" or "directional" wireless, which for the first time limits broadcasting. Communications are confined to a restricted angle or sector. The popular impression is that the "beam" penetrates the ether like a shot out of a gun. As a matter of fact, the "beam," before it strikes its objective, across the Atlantic, for instance, is extended to several hundred miles, and before it reaches Australia is spread out to cover almost the whole western coast-line. There may, however, be developments which will confine to narrow limits directional wireless, and no one can say what startling developments science will bring about in broadcasting in the near future. It may be possible to send distinct messages destined to Canada, India, South Africa, and Australia.

"A Voice Floating Round the Earth."

Radio will register a new advance every year. There are now national broadcasting stations covering the whole of Great Britain. Before long, there may be international stations for Europe, and it is only a matter of time when the human voice will be carried with fair regularity to the four corners of the Empire. To adapt the words of Edward Carpenter:—

"The sound of a voice floating round the Earth, saying: Lo! I float over the world and over all cities and lands—wherever men and women are at home, I am at home."

THE ETHEREAL SYMPHONY.

YES, it is night—half the world sleeps
In ignorance, while music sweeps
Through great spans of eternity, and falls
Like tumbled symphony, from music halls.

The preening actors, clowns in spangled tights
Appear, and bow, and sing, behind footlights
That flood the stage with radiance of day,
The song is sung, applause, on with the play!

A gilded amphitheatre I view—
With statesmen, perfumed ladies, fashions new;
Men swarming in a glittering ferment;
All this I see, and gaze in rapt content.

Now close at hand I hear an alien sound
That penetrates my mind, illusion bound;
The footlights disappear, the singers go,
And I find myself alone with Radio.

J. W. TABER.

My Ideal Radio Programme.

By a London Cabman.

THE novelty of wireless having now entirely worn away, I think it is time that the B.B.C. should give us something worth listening to! On Sunday—the day on which thousands of us are able to sit down in comfort prepared to enjoy a couple of hours with the 'phones on—what do we get? A military band playing such stuff that we used to hear in our boyhood at the village flower show!

Of all days in the week, the B.B.C. should give us a good programme on Sundays, both in the afternoon and evening. A military band is good only for military music. Let us have the Wireless Orchestra and augment it. Give us such a programme as we had about four weeks ago, when we had "Wotan's Farewell" and the "Fire Music," and the closing scene from "The Dusk of the Gods," and, above all, eliminate on Sunday the ballad singers, both male and female.

Radio On The "Ranks."

Out of the 8,000 cabmen on the London streets (of which I am one), 7,000 seem to have wireless sets of one kind or another, and we talk about them a good deal.

Now, in submitting an ideal broadcast programme, I have not considered my own personal preferences. These were met very largely by the Wagner-Berlioz programme recently broadcast from Covent Garden.

The chief points in preparing a programme appear to be: (1) It must not be "high-brow," but it certainly must not be hackneyed; (2) very delicate effects must be kept out, as they come through badly; (3) expense must be studied. The existing Wireless Orchestra, with the addition of one first-class vocalist and one first-class instrumentalist, should be sufficient; (4) the mere reading of the programme should whet the appetite, and (5) it should last a couple of hours, or perhaps a little longer.

Unhackneyed Music.

Here, then, is a popular programme of unhackneyed music for a radio concert:—

OVERTURE "Iphigenia in Aulis" Gluck
TWO AUBADES Lalo
ARIA "Air des adieux" ("Joan of Arc")
Tchaikovsky

Vocalist.

Orchestral Accompaniment.

SECOND MOVEMENT "Symphonie Fantastique"
Berlioz

At the Ball.

FETE BOHEME "Scènes Pittoresques"
Mussenet

INTERVAL.

"THE PLANETS" Holst
(a) Mars. (b) Mercury. (c) Jupiter.

CHANSON HINDOUE "Sadko" Rimsky-Korsakov
ENTR'ACTE & VALSE "Coppelia" Delibes
"HUNGARIAN FANTASIA" Liszt

Piano and Orchestra.

"MARCHE SLAV" Tchaikovsky
A. W. C. P.

ONE of the American broadcasting stations has three canaries which frequently entertain listeners.

WIRELESS stations have been opened at Bamako in French West Africa, and Antananarivo, in Madagascar, to form part of the general scheme of wireless communications between the French colonies.

The Long and the Short of It.

Why Different Lengths of Waves Are Used. By P. P. ECKERSLEY, M.I.E.E.

SOMEONE one day will produce cold light. Meanwhile, a critic has asked why we do not erect a relay station (in Norwich) using 30 metres wave-length. In both these thoughts we see something of "vaulting ambition that o'erleaps itself and falls o' the other." My critic, too, asks why we do no short-wave work, and "why Britain should be behind in the march of progress?"

A Costly Matter.

In case my readers may think that we are indeed falling behind, I shall hope to show that quite a deal of work is, and has been, done, and that our reasons for not erecting short-wave stations are fairly comprehensive.

Short waves, it has long been known, have the advantage that the radiators or aeriæ employed for their use need be extremely small for efficiency. In general, it may be said that the dimensions of any aerial, to be efficient, should be near the dimensions of the wave-length used. It must be obvious that the cost of building aeriæ for waves of tens of thousands of metres is a costly matter, and in capital charge alone may absorb much of their potential earning power.

It may be wondered, indeed, why long waves should ever have been used. Unfortunately, there is "always a bug somewhere." Short waves, with their mincing, sprinting steps, tire easily—get tired, that is, long before they reach far. In the days when the crystal or other similar form of rectifier was alone available for receiving, the extreme feebleness of the received impulse weighed strongly in the balance against the use of short waves.

New Researches.

The advent of the thermionic valve for receiving, which had the great quality of being able to pick up ever so feeble an impulse and make it louder, gave the short wave new life. Short waves, too, are less interfered with by atmospherics. These facts led to new researches in short waves, and now the tendency is to use their remarkable qualities to an increasing degree.

Let us, then, examine what has been found out about short waves. We know (and some take care that we are in no danger of forgetting) that amateurs use them for communication to the Antipodes. Some of us know that Hertz used them even before the days of wireless amateurs, and that he reflected and refracted them, just as we can do with light waves.

Some of us know that that distinguished man of science, Senatore Marconi, assisted by Mr. C. E. Franklin, produced very short waves during the war, erected the beam station at Inchkeith several years ago, and later startled the world with some most

illuminating experiments, using beam transmission over land and sea.

I was privileged in 1920 to see some experiments conducted by Capt. H. J. Round on duplex telephony on short waves across the North Sea. Mr. C. E. Franklin, using reflectors, established about this time a duplex telephone system between Hendon and Birmingham, using a wave-length of 15 metres. In other countries similar researches were being conducted, and shortly after the war I read of the production of waves, I think, of less than a metre by some German engineers, who showed most interesting absorption effects.

How Amateurs Have Helped.

All these workers have found that, thanks to the freedom from atmospherics, the enormous radiation from small aeriæ, and the powers of re-reflecting these waves in beams, their penetrating power is enormous. All credit is due to the amateurs for having communicated with wholly inadequate power to the Antipodes. It must, however, be realized that in spite of what has happened, the fight between the long and short wave is by no means over; in fact, it is probable that we shall never wholly abandon the use of either, but shall have "each thing in its proper place."

The trouble with short waves is that they are so fickle. One day nothing can be more splendid than the signals; another time—! It is true that with greater powers and saner methods of reception a station like K.D.K.A. is quite reliable as a noise. It is, of course, well-known that certain short wave-lengths are more reliable by night than by day; in fact, Senatore Marconi showed that, in certain experiments he conducted, the strength of signal bore a relationship to the elevation of the sun.

Turning now to telephony experiments, we are here faced with another difficulty. I have already referred to K.D.K.A., America, being reliable in this country as "a noise," and listeners to this famous and wonderful station will know what I mean. While it is clear when

listening to this station that something in the way of music is being played in the so remote studio, the quality leaves much to be desired; we suffer from "night distortion" of signals, in fact.

Night Distortion.

Once cured this notable trouble, and short waves may well become a useful weapon in conquering distance. It is not certain, however, that night distortion may not defeat us for some time, and the long wave, freer but not entirely guiltless in this respect, may yet oust its energetic rival. Already our Chelmsford Station, with less power than K.D.K.A. (and with far less radiated power), has been heard in America so successfully that it has been re-broadcast with a measure of success.

The reader will have gathered that a lot of water has got to pass under bridges before we shall derive another weapon to conquer our difficulties by the use of short waves, and that the erection of a 30-metre station (in Norwich) will not necessarily put us in the van of progress.

"Wait and See."

It is true that broadcasting science will vastly improve its usefulness will, indeed, enter upon its greater stage of development when it puts us constantly *en rapport* with foreign lands. As far as Europe is concerned, I personally look chiefly to the land line as the technical link to tie us together. For greater distances, of course, short waves and beams may be "our very present help in trouble," but, meanwhile, let us "wait and see," and not plunge into permanent structures based on insecure foundations.

We have our land lines, and surely it is absurd to use 50 K.W. where a 1-50,000th of that power will suffice to link broadcastly John o' Groats with Land's End, London with Paris, or Budapest with Birmingham!

No! I do not quite see that we are behind because we do not rush in where angels fear to tread.

(Another Article by Captain Eckersley will appear shortly.)

Enthusiastic Listener: "What an excellent lecture on Nero! Why, I can almost smell Rome burning."

It has been suggested that a Concert Party should be formed, from M.P.'s of all parties in the House, to broadcast a performance from London. The idea will receive a promising send-off if Mr. F. R. Roberts, ex-Minister of Pensions, who is an accomplished violinist, accepts the invitation which has been extended to him to establish a Concert Party of Labour M.P.'s. Mr. Rhys Davies, a former Under-Secretary to the Home Office, has frequently entertained electors with songs to his own accompaniment. Mr. James Sexton and Mr. Hardy are singers of no mean order.

For economy use Wuncell Valves

The Radio Mail

For sensitiveness use Wuncell Valves

Published periodically in the interest of Valve Users

A new type of Dull Emitter. Experts declare new Wuncell Dull Emitter likely to revolutionise Valve design

To produce a Dull Emitter Valve which operates with a glow that is almost invisible in daylight is a feat that has just been accomplished by the London firm of A. C. Cossor Ltd.

Asked to give some approximate idea of the actual temperature, a representative of the firm stated that, according to pyrometer tests, the reading was 800 degrees as against the 2,000 degrees required by Bright Emitters.

The British Valve still the best. But it was on actual Broadcasting tests that this new Wuncell showed that, so far as this country is concerned, we have nothing to fear from Continental Valve manufacturers.

Connected to a fairly good aerial in North London, H.D. had to be considerably de-tuned even for three Valves in order to prevent "blasting" from the Loud Speaker, while with the fourth valve in operation every B.B.C. main station, with the exception of Cardiff, was brought in with incredible volume and exceptional purity.

owing to our close proximity to 210—could not be tuned in. The following Continental stations were also received at good Loud Speaker strength: Hilversum (a Dutch broadcasting station with call sign H.D.O.), Bremen on 530 metres, Zurich, Radio Iberica of Madrid, and a further Continental station which could not be identified owing to "fading" but which corresponded in wave-length to Vienna.

Wuncells just as sensitive as Bright Emitter Valves

The result of these tests certainly demonstrated that the new Wuncell Valves are not one whit less sensitive than standard Bright Emitter Valves. Another remarkable feature of these Wuncell Valves was their complete freedom from microphonic noises.

We understand that the reason for this improvement is to be found in the special Wuncell method of mounting the filament. Instead of being supported between two electrodes, sprung apart to counteract expansion and contraction, its filament is arched (following standard Cossor practice) and supported at the centre by a third electrode. No doubt, too, the grid—cleverly designed and very rigid—is a contributory factor to this result.

Use Wuncells along with Bright Emitters in the same Set

We were most impressed, not only by the very neat appearance of the Wuncell, but with the vast amount of forethought and research work that must obviously have been put into its construction. For instance, because it was realised by the designers that

many multi-valve users would like to try out one Wuncell in conjunction with their ordinary Valves, a special base was designed. This base carries a resistance in series with the filament to permit the valve being used with either a 4- or 6-volt accumulator. Normally, of course, the Wuncell functions at rather less than 2 volts. This excellent idea gives any amateur a chance of trying out one of these new Dull Emitters and comparing its behaviour with the Bright Emitters he may be using.

Experts that have witnessed demonstrations of Wuncell valves have expressed their satisfaction at the production of a Dull Emitter which can compare most favourably with the best Bright Emitters. It has always been felt that hitherto a sacrifice of at least 20 per cent. in volume has been the price that must be paid to obtain the conveniences offered by Dull Emitters.

The Valve for Summer Portable Sets

Several of the principal wireless dealers have stated that the introduction of the Wuncell should do much towards the solution of finding suitable Valves for portable receivers for summer-time use. They have pointed out that the .06 type of Dull Emitter requires at least three fairly bulky dry cells—the weight of which has rendered impracticable any serious attempt to put on the market a convenient portable Set cheap to buy and economical to run.

There is undoubtedly a big future for the Wuncell.

How long should Valves last?

Many keen wireless amateurs get over twelve months' service

How long a Valve lasts depends very largely on how it is used. Four men can make their sets last very much longer than others—a little care and attention now and again will prevent excessive burning and the material from losing its freshness.

That your Valves properly and you'll find they'll last very much longer. For instance, Mr. G. H. Hauser, of 9 Gollard Road, writes as follows:— "I think it is only right to testify to the excellence of Cossor Valves, more particularly as far as I am concerned the P.I. On December 1, 1923, I purchased two of these Valves and they have been going strong ever since, and are functioning well now.

While Mr. J. Harris, of 15 Stegney Bank, Newcastle-on-Tyne, thinks that sixteen months' regular service for one Cossor Valve is something of a record, Mr. W. J. H. Jones, of 15, 1925, writes:—

"In September of 1923 I purchased a P.I. Cossor Valve, and wish to state that it has given me excellent service up to date. The Valve in question has never missed the Navy Bands, nor Official News of the B.B.C. Total life of Valve, sixteen months. Perhaps there are others who can beat this record, but I, as an old user of Cossors, am perfectly satisfied."

Even this record would seem to be eclipsed by a Cossor P.I. which has been doing yeoman service every day for a period of 1,700 working hours on a One-Valve Reflex Set. The owner, Mr. Harold Cooper, of 8 Gethens Road, London, E.W. 2, expresses his satisfaction in these terms:—

"I should like to mention that I have used a Cossor No. V. 9132 in my set since last September, and averaging at four hours per day (very moderate average for amateurs and evening) it has given over 1,700 working hours, and is still going strong, and therefore bears out conclusively all you claim in your advertisement; my circuit is One-Valve Crystal Reflex."

How many Valves do you use to receive U.S.A. Broadcasting?

If your set is only a one-valver, don't lose heart

Many people still think that it is impossible to get in to two o'clock in the morning to listen to American broadcasting unless big and expensive Valve sets are available. There could be no greater mistake. If an efficient single-Valve receiver is used, and the experimenter knows how to tune his instrument very carefully, the reception of W.G.Y., K.D.K.A., and other well-known stations on the other side of the Atlantic should not be impossible. Of course, reception may be weak, it may be subject to fading, and it may not be consistent, but none the less it will be well worth trying for.

"I have been using a Cossor P.I. Valve of your make for over twelve months, with surprising results, having received several American stations also French, Belgian, German, Italian, Spanish, and other Continental stations, my latest success being a programme broadcast on October 12th from W.R.K.I. (Edison Light of Boston, U.S.A.) from whom I have received a letter confirming the items received by me. They also say that I am the first to receive their reception in London. This you will no doubt agree, speaks well for the Cossor Valve. The set used was a one-Valve reaction receiver (self-made), using four coils, on the filament and thirty on the stator."

For the successful reception of K.D.K.A. on 63 metres special coils are required, and the condensers ought to be fitted with long tuning. (Continued in next column)

Valves to be in sealed boxes

One well-known manufacturer definitely decides to issue all future Valves in sealed cartons only

A move of the utmost importance has been made by A. C. Cossor Ltd.—the well-known British Valve manufacturers. They have decided that, in order to protect the public and to ensure their Valves being used in absolutely new condition, they are now sealing every Valve in its carton at the Works. Asked how it would be possible for the dealer to be certain that he was selling a brand Cossor Valve, a member of the firm explained to a representative of the Radio Mail that this was a matter which has certainly presented some difficulties. Various methods had been, especially tried out, including sealing the legs of the Valve and other devices, but none had proved so satisfactory in practice as the method they were now adopting. This consists of wrapping the Valve in a very generous covering of cotton wool, after having first brought two copper wires from the filament legs to two studs on the end of the box. When a customer wants a Cossor Valve, these two brass contacts are placed in series with an electric flash-light battery and a bulb. If the filament should happen to be damaged, the circuit will not be complete and the lamp will not light. This test can be easily carried out without opening the end of the box by means of a very ingenious device, which we understand Cossor are supplying free of charge to all Wireless dealers.

A prominent manufacturer of Broadcast Instruments emphatically endorsed the new idea. He agreed that it was a wise move that had been long awaited. The public, he declared, welcomed any method of purchasing reliable accessories under a seal. In his opinion, the Wireless dealer—while not shirking responsibility—should take steps to see that his (the manufacturer's) responsibility ended only when the article reached the actual user.

Several Wireless stores in the West End District confirmed that the public have been quick to respond to this novel idea and had bought Cossor Valves in larger numbers than ever.

This decision on the part of the manufacturers of Cossor Valves ought to be a strong aid to the makers of H.T. Batteries.

Incidentally, we gather that the new method of sealing each Valve in a special thickness of cotton wool, in preference to fastening it in a non-rigid box, is proving wonderfully effective in preventing breakages in transport.

[Continued from previous column] handles to avoid possibility of body capacity. The peculiar point about K.D.K.A. is that, once your set will oscillate down to such a low wave-length, you can receive it on the very worst of occasions. In fact, it is not uncommon to hear of amateurs receiving the famous Kean Pathway Station on a short indoor aerial. Such an experience as that which befell Mr. E. W. Higgins, of 30 Butler Street, Manchester, is worth recording:— "It may interest you to know that I have been successful in picking up K.D.K.A., Pittsburgh, on the 14th, 15th, 16th, 17th and 20th of December, 1924, on one Valve—Cossor. I was using an indoor aerial about sixty feet and a 'graspie earth' connection. The consistency of reception proves this is no bluff. On putting in another Valve of another make I failed to make the set oscillate at all, thus proving the superiority of your Valves. This was on the short wave (80 metres). You may use any part of my letter to your benefit."

So, if you cannot pick up any American stations on a multi-valve set, remember that numbers of ordinary wireless enthusiasts—both necessarily blessed with a scientific training—have picked them up on one Valve short.

Cossor Valves

The Valves that give your Set that long distance feeling! (Continued in next column)

Are you using too much high-tension current?

Keep an eye on the H.T. voltage and you'll probably get better results

It is worth while remembering that there is no hand-and-foot rub about the amount of H.T. current you should use for your set. Why not experiment a little? Your H.T. Battery is properly supplied to you with tapings for various voltages—you should use them.

Obviously, if you are one of the lucky ones to be able to use a low H.T. voltage, you will save money, for your batteries will last longer. Mr. E. D. F. Caine, of Overseas Hill Cottage, Virginia Water, Surrey, is a very interesting letter on the subject of H.T. current, demonstrating that there is a great field for experimental work in this direction. He says that:— "It has occurred to me that it might be of interest to you to know of the excellent results I am obtaining on a One-Valve (Cossor P.I.) set, using only one valve high tension. Not only have I received all the B.B.C. main stations, and Leeds, Bradford, Ely, but Budapest, Berlin, Hamburg, and Le Petit Porton on an outdoor aerial, also on an indoor aerial. All signals received were quite clear and good. To say the least, I think this speaks volumes for your valves. I feel there cannot be much better recommendations."

It is well known, of course, that when four electrode Valves are used in suitable circuits the high-tension supply can be completely shut-off.

Have you got down to the short waves yet?

Get ready for the new Broadcasting Stations operating on 100 metres or less

There's lots of enjoyment to be obtained from short-wave reception. If you can read Morse, you should certainly alter your set so that you can get down to 90 metres and under. Any evening will find scores of British amateurs corresponding with their friends across the sea. The most extraordinary thing about these short waves is their tremendous power of penetration. Using but very little power, amateurs can send messages immense distances. Incidentally, the tuning of short waves causes the use only of high-grade components and suitable Valves. How far American amateurs use such an short waves is a matter of conjecture—it is sufficient to say that signals have been received in this country without aerial or earth. In this connection, Mr. J. Goddard Heble, the well-known Glasgow experimenter, writes as follows:—

"10th December, 1924. "Some time ago I wrote you concerning the excellent reception of American broadcasting obtained with two of your P.I. Valves. They have since demonstrated their capabilities in another way.

I am now using a Reinartz-type receiver on the very short waves of 80 metres and under, consisting of detector and one low-frequency, and during the past fortnight have logged 100 American amateurs, of which twenty were heard on one night without either aerial or earth. Either of my two 'Cossors' now almost two years old, are the only Valves I have got to oscillate below about 90 metres. (Continued in next column)

A heavy gale in the North Sea

Ship gets a severe buffeting and Wireless Receiver is seriously damaged

Two thousand years ago the Romans built some splendid bridges in this country. Many of them still remain—a silent testimony to sound design and incomparable workmanship. The arch bridge, in fact, will go down to posterity as the greatest contribution to engineering in the history of civilisation. Arch for strength was the watchword of the Romans, and it is indeed a remarkable coincidence that this same arch principle should be the watchword of a present-day manufacturer of British Wireless Valves. The Cossor Valve—the most wireless enthusiasts know—quizzes an arched filament, and two Valves of this make have just emerged triumphant from a somewhat strenuous test. But let Mr. Johnston Houston—the chief engineer of the S.S. Tynbarry—tell the story in his own words:—

"I have a great tribute to pay to the strength of the filament of your Valves. I have 4-valve receiving sets fitted with two of your Valves, Nos. 10726 and 10728, and two of other make. On the night of the 21st ult., during a heavy gale in the North Sea, my set was thrown across a cabin and dropped four feet from a table, and the breaking of the ship causing the panel of set to be torn from cabinet. On examining same after the accident, I was surprised to find your two Valves intact, the others smashed. Your two Valves are still in good going condition."

[Continued from previous column] Considering the constant use and incidental knocking about to which these Valves have been subjected, I think this speaks highly for your products, and I am looking forward to a further period of their usefulness. (Continued in next column)

Dundee Programme.

2DE 331 M.

Week Beginning Sunday, April 5th.

SUNDAY, April 5th.

3.0-5.30.—Programme S.B. from London.
8.30-9.0.—Service conducted by the Rev. J. A. MACRAE, M.A., of St. John's (Cross) Church.
9.0-10.45.—Programme S.B. from Cardiff.

MONDAY, April 6th.

3.0-4.30.—Concert. Women's Topics.
5.15-6.0.—CHILDREN'S CORNER.
7.0-10.30.—Programme S.B. from Glasgow.
10.30-11.0.—EXPERIMENTAL TRANSMISSION FOR AMATEURS.

TUESDAY, April 7th.

3.30-4.30.—Kinnaird Hall Picture House Orchestra.
5.15-6.0.—CHILDREN'S CORNER.
6.40-6.55.—Boys' Brigade Talk.
7.0-11.0.—Programme S.B. from London.

WEDNESDAY, April 8th.

3.0-4.30.—Concert. Women's Topics.
5.15-6.0.—CHILDREN'S CORNER.
7.0-11.30.—Programme S.B. from Glasgow.

THURSDAY, April 9th.

3.30-4.30.—Kinnaird Hall Picture House Orchestra.
4.30-5.0.—Recital of New Gramophone Records.
6.0-6.30.—Teens' Corner.
5.15-6.0.—Programme S.B. from Glasgow.

FRIDAY, April 10th.

5.15.—CHILDREN'S CORNER.
6.40-6.55.—Major J. Eddington Aitken. S.B. to Glasgow, Aberdeen, Edinburgh and Belfast.
7.0-10.0.—Programme S.B. from Manchester and London.

SATURDAY, April 11th.

3.0-4.30.—Concert. Women's Topics.
5.15-6.0.—CHILDREN'S CORNER.
7.0-7.30.—Programme S.B. from London.
THE BARNARDO MUSICAL BOYS.
Under the Direction of WILLIAM WIGG.
REGINALD WHITEHEAD (Bass).
7.30. Musical Boys.
Selections on:
Handbells, Gavotte, "Leopold" . . . H. Aaron
Sleigh Bells, "Tyrolienne" Rossini
Mandolines, "Impromptu" H. Aaron
Miniature Chimes, "Village Chimes," introducing "The Minstrel Boy."
Xylophones on Miniature Chimes, "Il Corricolo" Galop De Gran
Handbells, Scotch Airs.
Bagpipes, "Jenny's Bawbee" and "Barren Rocks."
Ocarinas, "Come to My Heart" . . . Verne
Marimbaphones, "Falling Leaves."
Fairy Bells and Auto Harp.
Handbells, "Land of Hope and Glory" . . . Elgar (1)
8.15. Reginald Whitehead.
"The Skipper of the Mary Jane" . . . Richards (1)
"Devonshire Cream and Cider" . . . Sanderson (1)
"Spanish Gold" Fisher (1)
8.30. Musical Boys.
Selections on:
Handbells, "The Merry Village Bells" . . . Birch
Sleigh Bells, "A Swiss Waltz."
Mandolines, "Jessamine Polka" . . . E. J. Ellis
Miniature Chimes, Scotch Airs.
Xylophones and Tubephone, "On the Road to Moscow" Loetz (12)
Handbells, "In a Monastery Garden" . . . A. W. Ketelbey (8)
Bagpipes, "Kenmuir" and "Bonnie Laddie."
Ocarinas, "If Winter Comes" . . . Tennant
Marimbaphones, "Papillonette" . . . Gambrell
Fairy Bells and Auto Harp.
Handbells, "Poet and Peasant" Suppé
9.15. Reginald Whitehead.
"Me and My Jane" S. Bennett (5)
"The Warwickshire Wooing" James
"Why Shouldn't I?" Fisher (1)
9.30-12.0.—Programme S.B. from London.

Edinburgh Programme.

2EH 328 M.

Week Beginning Sunday, April 5th.

SUNDAY, April 5th.

3.0-5.30.—Programme S.B. from London.
8.30-9.0.—Religious Service, conducted by the Rev. Canon GEOFFREY GORDON, of St. John's Episcopal Church.
Choir under the Direction of RALPH T. LANGDON, Mus. Bac.
9.0-10.45.—Programme S.B. from Cardiff.

MONDAY, April 6th.

3.0-4.0.—The Station Pianoforte Trio.
5.0-6.0.—CHILDREN'S CORNER.
7.0-9.40.—Programme S.B. from London.
9.40.—Mr. E. NORMAN HAY, Mus. Doc. S.B. from Belfast. Local News.
10.0-10.30.—Programme S.B. from London.

TUESDAY, April 7th.

11.30-12.30.—Gramophone Records.
3.0-4.0.—The Station Pianoforte Trio.
5.0-6.0.—CHILDREN'S CORNER.
6.40-6.55.—Mr. H. Mortimer Batten, F.Z.S., "The Present Standing of the Wildebeest."
7.0-11.0.—Programme S.B. from London.

WEDNESDAY, April 8th.

3.0-4.0.—The Station Pianoforte Trio.
5.0-6.0.—CHILDREN'S CORNER.
7.0.—WEATHER FORECAST and NEWS. S.B. from London.
Prof. T. H. PEAR. S.B. from Manchester. Local News.

JENNY FORRESTER (Soprano).
REGINALD WHITEHEAD (Bass).
JOHN D. MILLER (Solo Flute).
THE GARGIL MALE VOICE QUARTET:
(J. H. BEWS, A. BEWS, G. MACFARLANE, J. THORNTON.)

7.30. Quartet.
"The Mulligan Musketeers" R. W. Atkinson (2)
"Jenk's Vegetable Compound" J. C. Macy (2)
"The Wedding of Shon Maclean" A. Patterson (25)
7.45. Jenny Forrester.
"If You Are Asking" Verdi
"Jill" Calder (14)
"Waltz Song" ("Tom Jones") German
8.0. John D. Miller.
"Valse Gracieuse" } German
"Souvenir" }
"Gipsy Dance" }
8.15. Reginald Whitehead.
"Vulcan's Song" Gounod (1)
"The Three Comrades" Hermann
"The Pipes of Pan" Elgar (1)
8.27. Quartet.
"Summer Eve" J. L. Halton (11)
"A Vintage Song" Mendelssohn (11)
"Sleep, Gentle Lady" Bishop (11)
8.42. Jenny Forrester.
Song Cycle, "Pastels" Landon Ronald (5)
9.0. John D. Miller.
Sonata in B Flat Major Handel
"Offertoire," Op. 12 Donjon
"Rossignolet" }
9.15. Reginald Whitehead.
"Bonnie George Campbell" Keel
"Spanish Gold" Fisher (1)
"The Jolly Tinker" Newton
9.30.—WEATHER FORECAST and NEWS. S.B. from London.
Mr. ALLEN WROE. S.B. from Leeds-Bradford.
Mr. J. S. CHISHOLM: Horticultural Talk.
G. L. MARSHALL, on "Station Topics." Local News.
10.5 (approx.) Jenny Forrester.
"There's a Fair on the Green" Cresswell
"My Heart is Sair" arr. Stephen (34)
"Boatman o' the Forth" Gray
10.15. John D. Miller.
Two Songs Without Words Mendelssohn
"L'Oiseau du Bois" C. Le Thiere
(Continued in col. 3, page 89.)

BARONESS ORCZY'S APPEAL.

Famous Authoress Advises Readers to Take Up Pelmanism—"Not a Man or Woman Who Would Not Be Benefited," She Says.

THE Baroness Orczy, the famous authoress of "The Scarlet Pimpernel," strongly appeals to readers to take up Pelmanism.

She is convinced that it is just what thousands of people need in order to make a success of their lives.

"Let me put the problem plainly before you," she says.

"There is no man or woman living who has not been endowed with Mind and Memory and Will, just as they have been endowed with a body.

"But in just the same way as the body becomes stiff and useless and atrophied if it be not given the chance of exercising its proper functions, so the higher functions of man's entity do in most cases remain torpid and dormant for sheer want of simple and regular activity.

"Even the most superficial glance into the 'Little Grey Books' of Pelmanism will open up the most dazzling possibilities and reveal the fact that the mind—far more even than the body—can be taught and trained to a high degree of perfection.

The Road to Success.

"You can attain your heart's desire with just a very little application, a very little self-discipline, and let the Pelman Institute do the rest for you. Put yourself in their hands and let them take you by easy stages—every one of them a delight—along that beautiful road, which will lead you inevitably to success.

"And once you have started on the Pelman Course, let me assure you that you will not wish to rest till you have gone through to the end. There are 12 'Little Grey Books,' each of which represents one week of simple, easy, exceedingly pleasant mental and bodily exercises. And if you do these and follow the advice given you in the small books, each succeeding week will see you just a little more self-reliant, just a little more confident, a little more certain of ultimate success.

"Believe me, I have studied the little books, each of them a small gold mine which goes to enrich the brain. **There is not a man or woman living who would not derive some benefits from them, and there are thousands—nay, millions—to whom they would mean just the difference between a life of mediocrity and disappointment and one of prosperity and of triumph.**"

Every day letters reach the Institute from men and women who have added to their incomes, won their way to higher positions, and secured other valuable benefits as the result of taking up Pelmanism.

BARONESS ORCZY.

The Baroness Orczy, the popular authoress, who makes a striking appeal to readers to take up Pelmanism in order to make a success of their lives. Full particulars of the method advocated by the Baroness will be sent free of cost to everyone who uses the coupon printed below.

Here are a few extracts from the Institute's post bag:—

A Manager writes:—"Salary increased from £230 per annum, first to £400, then to £800, now to £1,000, in two years. My age is 33 years."

A Salesman reports that Pelmanism has given him "increased self-confidence, more tenacious memory, and a rise of £145 per annum."

An Architect writes that his income "has gone up 300 per cent."

A Clerk states that he has quadrupled his salary.

A Manager says that he has secured three increases of salary.

Another Clerk writes that he has been promoted three times.

A Shopkeeper reports that he has doubled his business.

An Artisan reports "a little over 100 per cent. increase in wages."

A Typist reports that she has been appointed Assistant Secretary. "The compliment I often get: 'You are a walking encyclopaedia,' is due to Pelmanism."

A Doctor says that he has steadily increased his practice.

In order to obtain full particulars of this wonderful system, either call at the Institute or post the adjoining coupon to the Pelman Institute, 95, Pelman House, Bloomsbury St., London, W.C.1.

Write or call to-day.

An Accountant reports a "substantial increase" in salary.

A Scientific Instrument Maker says he has received "an encouraging increase in income."

A Telegraphist says he has secured his present appointment "simply and solely" through Pelmanism.

A Major-General wishes he had taken it up 15 years ago. "I have the highest opinion of the system," he says.

A Dental Surgeon says that since taking the Course his "income has doubled itself."

A Saleswoman writes that she has secured two rises in 12 months.

A Manageress says that owing to Pelmanism she has become more self-reliant and efficient, and her salary has been doubled. "Its teaching," she writes, "is just what I needed."

A Shorthand Typist reports an increase of 80 per cent. in salary.

A Clergyman says that his preaching has improved.

A Printer says he has developed "confidence, a keener mental grasp, and a strengthened memory."

An Assistant Cashier writes:—"The Course has already paid for itself, in that I have a better position."

A Managing Director attributes his success mainly to Pelmanism.

A Mining Engineer writes that he has secured a post and increased his salary from £40 a month to £60 a month.

WHAT PELMANISM DOES.

Among the defects rapidly banished by Pelmanism are:

- | | |
|--------------------|--------------------|
| —Forgetfulness. | —Mind Wandering. |
| —Brain-Fag. | —Indecision. |
| —Inertia. | —Shyness. |
| —Weakness of Will. | —Lack of System. |
| —Lack of Ideas. | —Procrastination. |
| —Timidity. | —Mental Confusion. |

And, whilst banishing these defects, Pelmanism makes your brain keen, fresh, vigilant, and reliant, and develops such qualities as:

- | | |
|-------------------|--------------------|
| —Concentration | —Directive Ability |
| —Observation | —Forcefulness |
| —Perception | —Self-Confidence |
| —Judgment | —Driving Power |
| —Initiative | —Self-Control |
| —Will-Power | —Tact |
| —Ideation | —Reliability |
| —Resourcefulness | —Salesmanship & |
| —Organising Power | —A Reliable Memory |

that are indispensable if you wish to achieve success in any sphere of life.

"The Efficient Mind," besides containing a full description of the Pelman Course, also gives particulars of striking successes in Business and the Professions secured as a result of practising Pelmanism.

Every reader who wishes to improve his or her present position should get and read this book.

Write for a free copy to-day (using the coupon printed below) to the Pelman Institute, 95, Pelman House, Bloomsbury Street, London, W.C.1.

USE THIS COUPON (OR CALL) TO-DAY.

To the PELMAN INSTITUTE,
95, Pelman House, Bloomsbury Street, LONDON, W.C.1.

Sta.—Please send me, gratis and post free, a copy of the book "The Efficient Mind," and particulars of the offer entitling me to take the Pelman Course on especially convenient terms.

REAL POWER VALVES

When you want power valves for highly efficient power amplification, it will pay you to emphasise

MULLARD D.F.A. MASTER VALVES.

These valves have been specially designed for maximum power work with a low temperature long life filament for minimum current consumption.

NOTE THE DISTINCTIVE TYPES FOR SPECIAL OPERATION.

For Large Loudspeakers giving increased volume and clarity.

D.F.A.0. (35 amp.) and D.F.A.2 (2 amp.) for 4 volt accumulators **26/-** each
D.F.A.1 (2 amp.) for 6 volt accumulators - - - **30/-** each
D.F.A.3 (06 amp.) for dry cells or accumulators (6 volts) - - **32/-** each

For Resistance Capacity Amplifiers.

D.F.A.4 (2 amp.) for 6 volt accumulators - - - **30/-** each
Leaflet V.A.4. gives full technical information.

WHEN YOU BUY, EMPHASISE

Mullard

THE MASTER VALVE

Obtainable from all Electricians, Wireless Dealers, Ironmongers, etc., etc.

Advertisement—The Mullard Radio Valve Co., Ltd. (R.T.), Nightingale Works, Balham, S.W.12.

B.T.H. Headphones

The original pattern B.T.H. Headphones achieved a remarkable reputation for sensitiveness and tonal quality. Many improvements have since been made, with the result that to-day B.T.H. Headphones are the most comfortable and convenient instruments of their kind. Some of the more important constructional features are given below:—

Price
per pair **20/-**
(4000 ohms)
Weight with cord 9½ ozs.

- A The body is of special non-resonating material.
- B The stirrup moves freely within the slider, and takes up and retains its position without any locking device.
- C The stirrup cannot be completely revolved in the slider. Kinking and twisting of the cord are thus avoided.
- D The special slider adjustment obviates the use of screws.
- E Spring steel headbands give the exact pressure required for perfect hearing without discomfort. There is no "scissors" movement.
- F The leather covering gives perfect comfort.
- G The earpieces fit closely to the ears.
- H Best quality flexible cord.
- I Nickel plated series connector.

Obtainable from all Electricians and Radio Dealers.

Agents, The British Thomson-Houston Co., Ltd.

 Talk on the Work of the Liverpool Playhouse by William Armstrong.
 7.30-12.0.—*Programme S.B. from London.*

Feed the Brute

Try this ancient advice on your wireless set.
 A half-starved set cannot give satisfactory reception.
 Are you starving your set?
 Consider these three points.

1. THE NEW CLIMAX AERIAL INSULATOR. (Registered Design No. 708718).

This will stand FOUR TIMES the flash over voltage of the ordinary cheap shell or egg insulator while it has far less capacity to earth. It is made of the same High Tension vitreous porcelain as the 100,000 volt insulators on High Power Transmission lines. It will stand a direct pull of hundreds of pounds. It is entirely non-hygroscopic. It cannot absorb moisture even if fractured. It insulates perfectly during rainfall. It is self cleaning on all surfaces.

2. THE CLIMAX RADIO EARTH. The low-loss direct tubular earth. Far better than the old-fashioned waterpipe or gas-pipe earth. Ready for use. Easily fitted. Maximum efficiency. Length approx. 30ins. Price 5/-. Climax Insulated Low-loss Earth Lead, 20ft. 1/3.

3. THE CLIMAX LIGHTNING ARRESTER. Made on the multi-gap, quenched-spark principle. Provides atmospheric space charges and lightning discharges with a straight path to earth of very low reluctance. Protects the set whether in use or not. No switches necessary. The mica insulating discs and series multiple gaps ensure complete absence of shunting effect, leaving your signals at maximum strength. Equipped with a Climax Lightning Arrester, an aerial is a positive protection against lightning, instead of being a source of danger. Price 7/6, complete ready to fix.

Any radio dealer can supply. If difficulties are put in your way, or substitutes offered you, please send your 5/- direct to us, and we will send you the genuine CLIMAX RADIO EARTH by return.

Length approximately 30"

Price 5/-

INSIST ON THE NAME "CLIMAX": REFUSE SUBSTITUTES.

Every Climax product is clearly marked with the name "Climax."

Sylverex users become our Ambassadors

There is never a disappointed Sylverex purchaser; our most rigorous system of triple-testing makes it impossible for a faulty Crystal ever to be labelled "Sylverex." Not only is Sylverex sensitive *all over* and *right through*, but it is also *consistently* sensitive, so that whether you buy Sylverex in the Strand or in Edinburgh, or *anywhere*, you always get a *picked specimen*.

Thus every Sylverex User becomes our Ambassador—spreading the news of Sylverex amongst his friends, and even, as *this* writer has done, telling his local *Dealers* about it, too.

**"Will let all his Wireless Friends know that he has
FOUND A WINNER."**

"C. F." of Hythe, Kent, writes:—"The 'Sylverex' Radio Crystal I received from you on Monday last is the best and by far the most sensitive that I have had. I tried it on Monday night, and no matter where the Catswhisker touched, it was sensitive, and the signals were both loud and clear... I have seen the manager at

—'s this morning, and told him the result of my trial, and shall see others during the week. For I think that others should know of a good thing. It means a lot to me, as my health will not let me go out at night, and the Wireless is my only pleasure... I shall let all my wireless friends know that I have found a 'Winner.'"

In air-tight container, with Special
Catswhisker and full 2/-
directions

Sylverex

RADIO CRYSTAL
Silver-Toned Silver-Alloy.

Ask your Wireless Dealer for Sylverex—or write to us. If you cannot obtain Sylverex from your Radio Dealer, send P.O. 2/- direct, with your Dealer's name and address, and we send the Crystal by return post free. Remember, whether you buy Sylverex from your Dealer or direct, you test it at OUR expense; if you are not satisfied in every way your money is returned.

Undoubtedly

the Best Value in LOUD SPEAKERS

PUBLIC opinion amongst Radio users during the last three years has been unanimous in acclaiming the "Senior" AMPLION Models of the "Swan-Neck" and "Dragon" patterns as absolutely supreme, although so highly competitive in price.

Produced by the actual originators of Loud Speakers, they represent the highest development in construction and performance.

Following this unparalleled success the range of New Junior "Dragon" Models recommend themselves by their exceptionally moderate price, allied to remarkable volume and tonal quality, thus upholding fully the AMPLION Motto:—

Better Radio Reproduction

At the same time they provide the best value-for-money proposition on the market.

The World's Standard

AMPLION

Wireless Loud Speaker

Obtainable from AMPLION STOCKISTS and wireless dealers everywhere.

Patentees & Manufacturers:
ALFRED GRAHAM & COMPANY
(E. A. GRAHAM),
St. Andrew's Works, Crofton Park,
LONDON, S.E.4.

Demonstrations gladly given during broadcasting hours at the AMPLION showrooms: 25-26, Savile Row, W.1, and 79-82, High Street, Clapham, S.W.4.

The "Junior" Dragon Range, combining artistic appearance with "Senior" Loud Speaker quality:—
"Dragonfly" A.R. 102 ... 25/-
"New" Junior A.R. 111 ... 50/-
"New" Junior-de-Luxe, A.R. 114 ... 65/-

Any of these splendid Sets can be built up on the kitchen table without special tools or Radio skill.

Modern Wireless Set.

The All-Britain Set.

A wonderfully popular 3-Valve Set which, as its name implies, is capable of receiving all the main B.B.C. Stations at good strength.

Panel drilled and engraved 15-6
Kit of Components £4-10-0
Oak Cabinet 17-0

When all components and panel are purchased together a Marconi royalty of 37/6 must be paid in addition.

The Puriflex Receiver.

Uses a Crystal Reflex Circuit with two stages of resistance coupled low frequency amplification. A wonderful Loud Speaker Set.

Panel drilled and engraved 15-6
Kit of Components £4-2-0
Oak Cabinet 17-0

When all components and panel are purchased together a Marconi royalty of 37/6 must be paid in addition.

Modern Wireless Set.

The All Concert-de-luxe.

A very handsome Set with a telephony range of 800 to 1,000 miles. All battery connections at rear. Special plugs and jacks for telephones and Loud Speaker.

Panel drilled and engraved 15-0
Kit of Components £4-15-6
Oak Cabinet 17-0

When all components and panel are purchased at the same time a Marconi royalty of 37/6 must be paid in addition.

Modern Wireless Set.

The S.T.100 Receiver.

The world's standard 2-valve Reflex. Works a Loud Speaker 30 to 40 miles from a main B.B.C. Station and receives all other B.B.C. Stations on the phones.

Panel drilled and engraved 7-0
Kit of Components £4-14-0
Oak Cabinet £1-10-0

When all components and panel are purchased together a Marconi royalty of 25/- must be paid in addition.

Modern Wireless Wavemeter.

Every Wireless enthusiast needs a wavemeter. It tells him the wavelength of the station he is receiving. On the other hand should he want to receive a station working on a known wavelength he can easily tune his Set to that wavelength by means of the wavemeter. Price complete with battery and Silvertown buzzer fully calibrated ready for use. In mahogany or oak cabinet £3 15 0.

Complete Set of Parts for Home assembly 30-6
Polished Cabinet 12/6 extra.

Send 3d. for the Pilot Chart.

Our 32 page Pilot Chart gives complete specification of 30 different Receivers which can be assembled by anyone without special tools or wireless experience. Send 3d. for a copy to-day.

Mr. E. Gee, 15, Basing Hill, Golder's Green, N.W.11

Mr. H. Cain, 25, Southfield Square, Manningham, Bradford.

A word of appreciation to 42,347 Readers of the Radio Times.

When we announced light-heartedly our little Competition in the Radio Times, and asked the help of its readers in selecting a suitable title for the wonderful picture shown above we did not expect such an overwhelming response. To all those who took the trouble to write to us we extend a word of thanks. The magnitude of their numbers is proof positive of the esteem in which Brown Loud Speakers and Headphones are held throughout the country.

S. G. Brown, Ltd.,

HEADPHONES AND LOUD SPEAKERS

Q1051 44, 2510.

A.J.S.

FOR RADIO PERFECTION

FOR THOSE who require a four-valve Receiver of maximum efficiency in a simple, yet beautifully finished cabinet made in any shade of Mahogany, Oak, or other wood to match your furniture, there is no finer instrument than the A.J.S.

It possesses all the qualities that distinguish really good reception, and is particularly notable for long-distance work and simplicity of control.

In conjunction with the A.J.S. Loud Speaker it enables broadcasting from any station to be picked up at will and enjoyed to the utmost. Ask your dealer to show you the A.J.S. range of Wireless Instruments and component parts.

A.J.S. STANDARD 4-VALVE RECEIVER

Noted for Selectivity, Power and Clearness. Extremely flexible, it functions on wavelengths from 150 to 20,000 metres, giving most successful results on indoor aerials. Price (including all royalties): 4-valve set, complete with 4 valves, Brandes' Phones, L.T. Accumulator, Special Double Capacity H.T. Battery, Aerial Wire, Insulators and Lead-in Tube (Panel only £20 5 0.) **£27 5 0**

THE A.J.S. LOUD SPEAKER

The proportions of its non-resonant horn give correct acoustic properties which ensure true reproduction, while its extreme sensitiveness enables the utmost volume of sound to be produced with a complete absence of distortion. With Oak or Mahogany Horn and Electro-plated Fittings **£5 10 0**
With Metal Horn and Electro-plated Fittings, **£4 15 0.**

“What can you expect when you didn't look for the name?”

Every super-product sooner or later has its imitations. And British Ericsson Telephones have not escaped. Colourable imitations both in appearance and name (but not in efficiency) are being offered the public.

Look for “Ericsson” stamped on each earpiece. If absent the telephones offered you are “continental” imitations.

Back in 1909 the Admiralty adopted Ericsson British Telephones as standard. In 1917 in the gruelling tests of war the R.A.F. did the same. Their efficiency both as regards sensitivity and robustness secured this distinction. Since then we have immensely improved their sensitivity and to-day they stand supreme as “The World's proved best Telephone.” Prices at all good dealers:-

ACCUMULATORS CHARGED FREE IN YOUR OWN HOME.

ULINKIN JUNIOR.

is now famous as a most ingenious, simple, and absolutely efficient Home Battery Charger for use with Direct Current electricity supply.

ULINKIN Charges your accumulators whenever you have lights, electric heaters, irons, or vacuum cleaners in use in any part of your house, without consuming any extra current.

It is simple to fix and use and positively conforms to all regulations of electricity supply and insurance companies. It does not interfere in any way with your lighting circuit, and (most important of all) it does not necessitate interference with fuse wires.

ULINKIN JUNIOR For charging wireless accumulators of any voltage up to 5 amps. Complete with instructions and cable for connecting

12/6

ULINKIN STANDARD MODEL The famous Home Charger, as illustrated, with ammeter, complete with cable and instructions for charging accumulators up to 5 amps. on D.C. supply from 50 to 250 volts

42/-

ULINKIN SENIOR For garages, workshops, large houses, etc., for charging accumulators of any voltage up to 10 amps. Complete with ammeter, cable and instructions

52/-

All models delivered carriage free.

"I am pleased to say that I found the apparatus instrument quite satisfactory, and my effort is well pleased with it."
V. R. B.—
Electrician Engineer.

SIMPLE TO FIX AND USE. Saves its cost within a few weeks, yet lasts a lifetime. Illustrated Pamphlet and full particulars post free on request.

For every type of receiving set

WECOVALVES are now manufactured in two distinct types, the first for use in receiving sets with standard sockets, the second for Weconomy sets which feature the bayonet socket.

A new and improved manufacturing process has been inaugurated at our New Southgate Works, and all valves are marked for service thus:—

- High Frequency - Red Spot.
- Low Frequency - Orange Spot.
- Detector - - - Green Spot.

Specify Wecovalves for
Sensitiveness,
Silence in Operation,
Durability of Construction,
Low Self Capacity,
Long Life and Economy.

Price 21/-

The Weconomy socket is arranged for four soldered connections. These connections have contact points faced with a special gold and silver alloy to insure perfect contact with the base of the valve.

The World's Best Dry Battery Valve

THE RESERVED SEATS

THERE IS, of course, a social side to a concert. Friends to whom you want to talk in the interval. Friends who want to talk to you—not in the interval. And this you will miss when the concert is brought into your own house by the Cosmos Radio Valve Set. But you won't miss anything else! *Such purity of musical reproduction is new in wireless*, and the most sensitive and exacting musician will listen to it with delight. Voice, violin, whatever it be, in its own colour and character; full orchestra in all its tints.

AND SO while symphony and song and solo flow in through the Cosmos Valve Set, you make your own social side to the concert—alone, or in the company of a few friends who come in night after night for the music.

HEARING IS BELIEVING. Before choosing any wireless set, at least hear the COSMOS.

Accumulators Down Again? —They shouldn't be.

Probably your batteries are not built on sound lines for 100 per cent. efficiency.

An accumulator must possess the six exclusive features of the

IDEAL Glass Accumulators.

1. Basket pattern positives so constructed that it is impossible for active material to become displaced.
2. Glass containers especially constructed with rib separators.
3. Complete absence of frothing.
4. Practically impossible for plates to sulphate (due to material used).
5. Non-corrosive terminals.
6. Impossibility of acid creeping.

All the models are popular, but perhaps the most popular is the W.5—50 amp. hours.

Don't Buy Yet

First prove our claims—make this ten-shave test

The claims we make on Palmolive Shaving Cream seem hard to believe, we know.

So we never ask men to buy. All we urge or offer is a ten-shave test at our cost.

Men were amazed

Hundreds of thousands accepted this and they flocked to this Cream when they tried it.

Thus Palmolive Shaving Cream attained the pedestal place, without ever a man being asked to buy.

Now we ask you to make this test, if you have not. Do it as a courtesy to us. Do it in fairness to yourself. Cut out the coupon now.

FOR THOSE WHO WANT THE BEST Here is the new Dunham Receiver. BETTER THAN EVER.

Dunham instruments have already established themselves as being by far the most efficient on the market and the new model now ready is as far ahead of the old model, as the old model was ahead of other receivers.

SUPER STRENGTH—SUPER QUALITY—AND SUPER RANGE—and the same everlasting guarantee. The new circuit arrangement makes Dunham instruments by far the most efficient, and their beautiful finish gives them pride of place in every home.

The "DUNHAM" 3-Valve Receiver.

Ranges of 400 to 500 miles on the loud speaker are quite ordinary achievements and the foreign stations come through very well. Spain for example being rendered clearly on the loud speaker, results being equal to most four valve receivers and superior to a good many more. Receiver only (new model) £10 10s. 6d., plus Marconi royalty fee 37s. 6d., or absolutely complete and including royalty, etc., £16 19s. 6d.

C. S. DUNHAM (Radio Engineer),
Late of Marconi's Scientific Instr. Co.,
234 B, Brixton Hill, S.W.2.

Phone: Brixton 3525. New and easy deferred payments.

£10 A WEEK FOR LIFE— FROM AGE 55.

Not Chance but Certainty, if you adopt this simple and sure plan of providing for your later years.

Making provision for the future is by no means the difficult thing that most people imagine it to be. If you work to a plan, and with the Sun Life of Canada, you can gain financial independence at an earlier age than would otherwise be possible, and you can protect the interests of those dependent on you from the very start. The plan is not ordinary insurance: it is insurance and investment combined. You make deposits to the Sun Life of Canada of a sum that you can well afford out of your income, and to these amounts are added most generous bonuses so that when the agreed-upon time arrives you get back not simply the money that you invested, but such a substantial addition that it makes the whole transaction one of the finest that any investor can undertake. You also save each year a very pleasing amount in Income Tax. It amounts altogether, if you aim at the £10 a week for life from age 55, to several hundreds of pounds. This is an additional saving which benefits you year by year, and it is money that otherwise would have to be given to the Income Tax collectors.

Then there is the insurance which protects your family from the moment that you make your first deposit. You are insured for a definite and large sum, and to it is added each year half of each deposit that you make. That is to say, should you not live to be 55, your family will receive the full sum plus half of all you had deposited.

There is also a most attractive feature, which is called a Disability Clause. This is a guarantee to you of £40 per month should you, during the term of the policy, either through illness or accident, be permanently unable to earn a living. In such circumstances, not only will you receive this monthly sum until you reach the agreed-upon age, when you would get the £10 a week for life, but you would not have to make another deposit. Any time after three years you would be able to borrow money on your policy if it were necessary, and there are many other advantages open to you.

The Sun Life of Canada, the great Annuity Company which features this plan, has assets of over £50,000,000 under strict Government supervision. There is, therefore, the amplest security.

Let us know your name, address, exact age and the approximate amount you can deposit yearly, and, without any obligation on your part, we will tell you exactly how you can apply this ideal Plan of Investment-Insurance to your own circumstances.

FILL IN & POST TO-DAY

To J. F. JUNKIN (General Manager), 12, Sun of Canada House, Victoria Embankment, London, W.C.2. (Near Temple Station.)

Assuming that I can save and deposit £..... per please send me—without obligation on my part—full particulars of your investment plan—showing:

1. What income or cash sum I shall receive in years (15, 20, 25, 30, as you desire).
2. What sum will be automatically provided for my dependents in the event of my death.
3. How much Income Tax I shall save each year.

There is Less Rain at L.N.E.R. Resorts

GIVE THE KIDDIES the best chance of fine weather for this year's holidays, by taking them to one of the charming resorts on the Drier (the Eastern) Side of Britain.

Ask for "Holiday Suggestions," illustrating and describing nearly 70 resorts, at any L.N.E.R. Office, or from Passenger Manager, Liverpool Street Station, London, E.C.2.

A holiday THAT IS a holiday

This year try the holiday that is different. Explore new country and enjoy a healthy restful change free from irksome routine.

THE NORFOLK BROADS with their natural beauties and quiet old-world villages will enchant you. They are 120 miles from London and consist of 200 miles of safe inland rivers and lakes situated between Cromer, Lowestoft, Yarmouth and the fine old city of Norwich with its Cathedral and Castle. Splendid fishing, bathing, etc.

You hire from us for a week or longer a fully furnished wherry, yacht or motor boat which becomes your floating home, moving when and where you wish, inland, not on the sea. If desired we can supply an attendant to manage the boat and do all cooking. You only have to enjoy yourself. The cost, including boat, food, etc., averages £4 per head per week.

We will gladly send you full details and help you with information and advice.

Send at once 2d. postage for our 192-page booklet containing particulars of 300 yachts, wherries, motor boats, houseboats and barges, also catamarans we have for hire and long article "How to enjoy a Broads Holiday." Also craft on Dutch canals, Rivers Thames, Ouse, and Cam.

ALL OWNERS' CRAFT INCLUDED IN OUR BOOKLET.

Train Services, Fares and other information from any L.N.E.R., or L.M.S., Enquiry Office.

Why his salary grew from £234 to £2,500 a Year

Available to every man in this country is an easy and convenient means of rapidly improving his position. There are no obstacles to a salary-raising training by the greatest spare-time educational institution in the world—the International Correspondence Schools. Within the last thirty-three

years hundreds of thousands of men and women have benefited from our Courses.

Recently we mentioned in our advertisements the case of a young man of twenty who, on our recommendation, was engaged by a great firm at £150 a year, and who now, at twenty-three, is earning £450. That advertisement brought us a letter from an I.C.S. student now living in South America. After seventeen years with a London engineering company he was earning only £4 10s. a week, but

**becoming an I.C.S. student in Civil Engineering
he quickly got an appointment at £1,000 a year,
which was steadily increased to £2,500!**

(The name and address of this student will be given on request.)

The I.C.S. originated spare-time technical training by post 33 years ago, and since then has enrolled 3,000,000 ambitious men and women. It has teaching centres in eleven countries, and students in fifty.

Write to-day for full information as to how the I.C.S. can help you in your chosen vocation. There are 300 I.C.S. courses, of which the following are the more important groups:

Advertising	Engineering (all branches)	Salesmanship
Architecture	French and Spanish	Showcard Writing
Building	General Education	Textiles
Commercial Art	Plumbing	Window Dressing
Commercial Training	Professional Exams.	Wireless Telegraphy
Draughtsmanship	Railway Equip. & Runn'g	Woodworking

The Best Remedy known for **COUGHS COLDS**

INFLUENZA, ASTHMA, BRONCHITIS.

Cuts short attacks of SPASMS, HYSTERIA, PALPITATION.

Acts like a charm in **DIARRHŒA, COLIC** and other bowel complaints.

That Straight Line Protects You

WHEN your lightning-arrestor device puts the aerial lead and the earth in a straight line, your aerial is a definite protection to your house.

A house with an aerial and a Pressland Safety Lead-in is safer than a house without an aerial.

It is futile just to connect aerial and earth terminals on your set, or to adopt any device that does not connect aerial to earth outside the house. Lightning will not follow angles; it takes a straight line.

The Pressland Safety Lead-in

Has a self-contained discharge-gap, and provides for an external earth-lead. It is scientifically shaped to form a perfect insulator—free from surface leakage.

From your Wireless Dealer. Sizes, 6-inch, 2/-; 9-inch, 3/3; 12-inch, 3/6.

Manufactured by PRESSLAND ELECTRIC SUPPLIES LTD., HAMPTON-ON-THAMES.

Inquiries are invited from all sections of the Trade.

Phone: Molesey 22.

IF IT'S "CHASEWAY" IT'S THE RIGHT WAY—ALWAYS.

A Triumph of BRITISH ENGINEERING
The "CHASEWAY" New **HOME BATTERY CHARGER** for **Alternating Current.**

(GUARANTEED)

Whilst others have been arguing about "safeguarding" British Radio Industry, "CHASEWAY" engineers have been busy on the best "safeguard," namely, giving a better article at a reasonable price. The "CHASEWAY" DIRECT CURRENT CHARGER was produced only last September, an infinitely better product, at nearly half the price of its nearest competitor—thousands sold. Then other "CHASEWAY" components caused a stir by establishing themselves as the ONLY reliable ones of their kind on the market—really scientific and scientifically tested and guaranteed. Now the "CHASEWAY" ALTERNATING CURRENT charger has come—a real feat of engineering. The only BRITISH product of its kind. Most A.C. chargers are foreign and this BRITISH product is infinitely superior—and at a lower price. Read the following points and then write for fuller details, naming the voltage and periodicity of your local supply.

- 1.—It is our invention, and manufactured in our own Works.
- 2.—It is used by connection with Lamp Socket or wall plug.
- 3.—It is ABSOLUTELY MECHANICAL, has no liquids, no messy chemicals, no expensive bulbs to be replaced at frequent intervals.
- 4.—It is SILENT RUNNING, SELF CONTAINED, absolutely Complete, NOT A VIBRATOR NOR BUZZER.
- 5.—It is adjustable from 0 to 5 amps. charging rate.
- 6.—It is adjustable for recharging 2, 4, 6, 8, 10 and 12 volt accumulators for WIRELESS and MOTOR requirements.
- 7.—The low cost of recharging can be gauged from the fact that working on a maximum charging rate of 5 amps a 6 volt 30 actual battery consumes only one-fifth unit.
- 8.—HIGHER GUARANTEED "EFFICIENCY" THAN ANY OTHER A.C. CHARGER, BRITISH or FOREIGN.
- 9.—"CHASEWAY" Chargers of greater capacity specially quoted for.
- 10.—Models made for recharging both L.T. and H.T. Batteries.

Pat. Pat.

A.C.

Size 7in. x 6in. x 4in.

BEFORE BUYING ANY A/C CHARGER ASK ITS GUARANTEED "EFFICIENCY"—COMPARE WITH "CHASEWAY" and YOU'LL BUY THE LATTER.

D.C. STANDARD MODEL. Size 9in. x 3in.

FOR DIRECT CURRENT.

The "Chaseway" is a thoroughly practical electrical apparatus, designed specially to remove the re-charging bugbear. It can be connected by the merest amateur in any household having DIRECT (CONTINUOUS) CURRENT, and it used whilst current is in use for lights, irons, kettles, radiators in any part of the house, costs nothing for the re-charging. Once fitted, it is there for life, requires no attention, and is a wonderful boon for all accumulator users.

JUNIOR MODEL 10/6
Postage 9d.

- No. 1 For any installation of 100 to 250 volts. Size Model. 9in. x 3in. 25/- complete. Postage 9d.
- No. 2 For lower voltages and special circumstances. Model. 40/- with special adjustable resistance (2 to 5 amps).
- No. 3 For Shopkeepers, Garages, and others who can re-charge batteries for revenue—will charge several accumulators at once.

SEND STAMP FOR ILLUSTRATED CATALOGUE OF "CHASEWAY" PRACTICAL PRODUCTS.

LEAVE IT TO FLUXITE.

An un-soldered wireless set is a breeding ground for those little devils of distortion and bad reception. They thrive on the delicate currents that pass through the circuit. Each un-soldered joint is a trap. One spot alone is sufficient to lower the receptive qualities of your set, so just think what is missed

if all the joints are left unsoldered.

Fluxite chases away all soldering worries, and makes possible the perfect soldered joint, making your circuit one whole, solid piece of wiring instead of twenty or thirty odd patchy lengths.

Make up your mind and solder your wiring now. It is so simple. Leave it to Fluxite.

ASK YOUR IRONMONGER OR HARDWARE DEALER TO SHOW YOU THE NEAT-LITTLE

FLUXITE SOLDERING SET.

It is perfectly simple to use, and will last for years in constant use. It contains a special "small-space" Soldering Iron, with non-heating metal handle, a Pocket Blowlamp, FLUXITE, Solder, etc., and full instructions. Price 7/6. Write to us should you be unable to obtain it.

FLUXITE SIMPLIFIES SOLDERING

All Hardware and Ironmongery Stores sell FLUXITE in tins, price 8d., 1/4, and 2/6.

Buy a tin to-day.

*The Opinion of
the Man-who
foots-the-Bill*

IN THE OPINION OF THE HOUSEHOLDER

the installation of the KALEECO Wiring System is an unqualified success. His previous impressions of Wiring for Electric Light consisted of a general upheaval, embracing many lengths of iron piping, wood casing, torn wall-paper and the downfall of much plaster. The KALEECO Wiring System has dispelled his fears. The lead-sheathed wires are easily placed in position and do not sag; given a coat of enamel to match the surrounding decorations, they are practically invisible. In short

The "Kaleeco" WIRING SYSTEM

is a sound, neat and inexpensive method. Damage to walls is obviated by the employment of an ingenious clip.

Your local Electrical Contractor will be pleased to furnish you with full particulars and prices.

Switch on to a Dance Programme

There is always Dance Music on one or other of the British or Continental Broadcasting Stations—and with an Efescaphone "Nelson" Set you can switch on to any of them in a moment.

Efescaphone reproduction, with Puravox loud speaker, is pure and powerful; the sets are simple to operate, absolutely reliable, and handsome in cabinet work.

Less powerful, less expensive, but just as efficient sets are the Efescaphone "Rodney," "St. Vincent" and "Anson." The catalogue describing them is full of interest.

Sets are sold and demonstrated by wireless dealers and stores.

Wholesale only!

"Nelson Grand Pedestal Set" Efescaphone.

Comprising 4-valve "Nelson Grand" Receiving Set in handsome mahogany cabinet with roll shutter enclosing panel, with polished mahogany floor pedestal incorporating Puravox Loud Speaker. Wave length range covering all British and Continental Broadcasting Stations.

Price, complete with headphones, aerial outfit, and all accessories except valves, £59. Without pedestal or loud speaker, £39. A little less powerful set is the "Nelson" 3-valve model in a solid polished walnut Cabinet at £27-10-0.

Deaf

Don't Let Deafness Spoil Your Wireless.

Thousands of deaf people are enjoying the wireless concerts. They can hear the speech and the music just as well as their friends with normal hearing. The one instrument that has made this possible is the AcoustiCON. And it achieves such wonderful results because it is highly sensitive to all sounds. Moreover, it is as clear as a bell. There's no buzzing whatever. Think what it would mean to you to sit and hear all the entertainment without your set having to be tuned so loud that it is unpleasant to other people. A free demonstration of how easily you can hear speech will convince you that the AcoustiCON would be a boon in your home. It is so small too that your friends would hardly notice it. The leading Aurists will tell you that it is the finest hearing aid you can buy. May we forward you particulars, or, better still, will you call for a free test?

You can Play the Piano TO-DAY BY Naunton's National Music System

It makes no difference whether you have had previous lessons or not, whether you are young or old, we guarantee that you can play the piano to-day by this wonderful and simple system.

There are no sharps, flats or theoretical difficulties to worry you, and no tiresome or wearisome exercises or scales to be learnt. You play correctly with both hands at once. No difficulty or drudgery whatever.

FAILURE IMPOSSIBLE

"You cannot fail." All you have to do is to sit down to the piano with our music and play it at once.

Over 50,000 people are playing by it, and are playing perfectly. If they can do it, so can you. No one need ever say again, "I wish I could play"; everyone can do it to-day.

Let us tell you all about this wonderful, simple and rapid system.

Take advantage of the offer we make on the coupon below, and by return of post you will receive eight tones which we guarantee you can play; thus you can prove for yourself the simplicity of our system and the accuracy of our statements. This small outlay will open up the delights of the vast realm of music to you, and give you many years of purest pleasure.

SPECIAL TRIAL OFFER COUPON.

RHEUMATISM

Something New for this Distressing Malady.

Read this and act on what you are here told: It may be the best day's work to your life. Are you a sufferer from Rheumatism, Neuritis, Arthritis, Sciatica, etc.? You may have suffered so for some years and also spent money and tried many remedies with little or no success. Will you try at no cost a home remedy which is neither a drug nor a medicine, but a simple tropical herb which you prepare just like ordinary "tea" and drink once or twice a day? The remedy is agreeable and effective and you

"FEEL THE BENEFIT ALMOST AT ONCE"

GRANGETOWN, CARDIFF

Having been a sufferer with Neuritis in the legs for three years, and after trying all kinds of "so-called" cures, I decided to try your Hervea. On Sunday the 26th I started taking the remedy and before the end of the week I had nearly lost all pain. I was going to write to you the first week but I thought I had better wait, so now, after three weeks I can let you know that I am practically free from pain. At first I felt as if there was something missing, having got so used to sleeping. I am a Commissioner at a Cinema, where I am on my feet from evening till night and live some distance away. What used to take me three quarters of an hour to walk, I can do now quite comfortably in 20 minutes. I have recommended Hervea to everyone I know, and I think the day that my wife said for the simple reason, "I don't know how to express my gratitude for your wonderful cure Hervea."—H. F. H., 2511/24.

—not what I say, but what people tell me daily in their letters. For example, a well-known Scottish Peeress, Lady E.—recently wrote me—"People have been so struck with the marked change in me (this lady had been crippled for several years through Rheumatism) that I have had to give away three of the packets, and I am now sending for six more." I have received similar letters from Public Officials, Naval and Military Officers, Clergymen, Professional Men and persons in all ranks of life. You need Risk No Money to prove for yourself the GENUINENESS of this remedy, and I particularly ask you to write to me if you have failed so far to get relief. Simply write and send me a stamp for reply, and I will send you a trial quantity of Hervea free of charge. If you feel you are getting benefit you can have a further quantity at a small charge. The Secret of the virtue of this plant is that it Expels Uric Acid from the System, and also Prevents Further Acid Deposits Accumulating. Other chemical and drug remedies relieve for the time being, but they fail in this all-important result. Write to-day—the cost is nothing, and you may never regret doing so; in fact, it may prove "a long good-bye to Rheumatism!"

FREE PACKET

ADDRESS: Mr. H. LEE, Colonial Importer (Dept. 217), 37, Red Lion Street, London, W.G.

P.S. I am an ordinary "business man," not a vendor of patent medicines, and I know from my own personal experience that the product now offered is MOST EFFECTIVE FOR RHEUMATISM. As the selling of this product is distinct from my regular business, please mark your envelope "HERVEA."

Most Crystals Glisten.

Two large pieces of crystal, together with the essential Palladium catwhisker 2/- From your dealer or send to:
THE J.W.B. WIRELESS Co.,
510a, 512a, Euston Rd., N.W.1. (Facing Warren Street, Tube Station.)
Phone: Museum 3747.

Most crystals look very much alike. It is only by actually using the D.L.5. that you can appreciate its rare sensitivity. Sensitivity that is enduring, for after months of constant usage it still rectifies the weakest of signals with the same marvellous degree of sustained volume. For reflex circuits or straightforward crystal work, use the D.L.5.—the long-life crystal. Get a box to-day.

D.L.5. CRYSTAL

and "Palladium" Catwhisker

WIRELESS OPERATORS MARCONI

50 immediate vacancies. Additional 300 anticipated during next few months. Previous sea service not essential.

DARNING MADE EASY ONLY 1/9

AN HOUR'S WORK IN A FEW MINUTES.

THE "STAR" DARNER is a wonderful automatic hand machine for QUICKLY WEAVING smooth INVISIBLE DARNS in any fabric. Repairs the large or small holes in Stockings, Underwear, Silks, Curtains, Table Linen, etc., and clothes of any material. Impossible to make untidy darns. Makes darning a pleasure, saves time, eye-strain, and labour—so easy a child can work it. Made of strong plated metal throughout. Sent with directions. Price only 1/9 (post 3d.). Trade Enquiries Invited.

E. J. R. Co. (Dept. R.T.), 672, Holloway Road, London, N.15.

HOLIDAY CRUISES GLASGOW TO WEST HIGHLANDS AND ST. KILDA

If you have not yet fixed your Holidays, take a week's delightful sailing through Outer Hebridean Islands. EVERY TEN DAYS from Glasgow at 11 a.m. and Greenock at 3.30 p.m. by splendidly fitted steamer "HEBRIDES." On Special dates, Cruise is extended to the Romantic and Lonely Island of ST. KILDA. The Western Isles Cruise is also extended on special dates to wild and beautiful LOCH ROAG, West side of Lewis. Wireless Telegraphy Fitted.

Full particulars, Tourist Programme, &c., on application.

Telegraphic Address—JOHN M'CALLUM & Co., Telephone—"M'Callum," Glasgow, 87, Union Street, Glasgow, G1 1RS Central.

There's a condition of sale with ELECTRON you must agree to send it back - if dissatisfied -

This is no empty talk, but a very definite guarantee in connection with the very best Aerial Wire on the market. The ordinary guarantee is not sufficient, indeed, so much do we know of the wonderful results which have been obtained through the use of Electron Wire that we make this definite offer. Purchase Genuine Electron Wire at your usual Dealer. Use it as your Aerial, Lead-in and Earth. Submit it to the most thorough tests and if it does not meet the claims we make for it in every respect, return it to us in its original package giving full details, and without question the full purchase price will be immediately refunded to you.

Here, then, is your opportunity to prove the efficacy of Electron Aerial in your own home. Get a length to-day without fail. You will pass a shop on your way home.

RECENT PRESS TESTIMONY.

Extract from a letter published in *Wireless Weekly*, March 4th, 1925:—

..... I am writing this letter to let you know the wonderful results I am obtaining with your ST '41, using an aerial composed of a piece of ELECTRON WIRE thrown out of my window (my Flat being some 35 ft. high).....

Yours faithfully,
J. Gandy,
Port Said, Egypt.

Extract from a Report by the Editor in *Amateur Wireless*, March 21st, 1925:—

"I erected a number of indoor Aerials of different Wires all exactly the same length, including ELECTRON WIRE. An independent observer sat with his back to the Set, and I changed the Aerials about while

the observer noted the difference in signal strength. Every time he voted for the ELECTRON Aerial. This was quite a conclusive test, and I can recommend this Wire to anyone who wants to fit it. An Aerial with a minimum of trouble."

I have noticed with some interest that many Amateurs make a habit of religiously cleaning their Aerial Wires. I say religiously because the operation usually takes place on a Sunday morning. While it is true that the surface oxidation on the copper wire increases the high-frequency resistance of the Aerial, it is doubtful whether any amount of cleaning will improve matters, because this obviously cannot possibly clean between the strands where the atmosphere attacks the copper just as thoroughly as it does on the outer surface.

ELECTRON—THE FOOL-PROOF, GALE-PROOF AERIAL.

How much time and trouble is lost through Aerials being destroyed after heavy Gales. How far, too, are ordinary Aerials open to tampering? Electron nullifies these defects. Suspend it where you will, lead direct to the Set, use it for the Earth, and the only result possible is perfect reception.

EXTEND YOUR 'PHONES or Loudspeaker to any part of the house or garden with Electron Wire which, being insulated with vulcanized rubber, no further insulation is necessary. Use ELECTRON WIRE for your instruments. It is ideal for all connections. Now sold in 300 ft. Boxes at 5/., and 500 ft. Boxes at 8/.. Electron Wire has no equal at ten times the price.

The **CHEAPEST AERIAL** and the Best in the World.

The first valve ever made was produced in the Edison Swan laboratory

Sound production

TYPE R.
Similar in properties to AR type but gives somewhat greater amplification with same plate and grid voltages.
(Price 11/-)

TYPE AR.
Designed for amateur use to give high amplification on a low plate voltage and a filament voltage of 4.
(Price 11/-)

35 YEARS ago it was discovered that an electric bulb could produce sound as well as light. The story of "Ediswan" valves started with that discovery. Every later development has been inspired by the same pioneer spirit. To-day the valves perfected in

"Ediswan" laboratories are still "first." Their reliability in results and in service is the outcome of experiment backed by sound production at every stage.

TYPE ARDE.
The "Ediswan" ARDE valve of the dull emitter type (2 volt) is now being especially manufactured both for H.F. and L.F. work. The respective characteristics of the valves are as follows:

	L.F.	H.F.
Flament Volts	1.8-2.0	1.8-2.0
Current	0.3 amp.	0.3 amp.
Anode Volts	30-100	20-100
Total emission	16 m.a.	16 m.a.
Amplification factor	5.0	9.5
Approx. impedance	15,000 ohms	40,000 ohms
Normal working slope	0.40 ma/volt	0.30 ma/volt

The distinguishing marks are a green line for L.F. and a red line for H.F. on the side of the bulb. This line will also indicate the Anode pin of the cap. Price 18/- each.

"Ediswan" valves are designed for use with every type of set. Best results are obtainable with "Ediswan" Radiophones in conjunction with a Televox or Dulcivox loud speaker.

THE EDISON SWAN ELECTRIC CO., LTD.,
Queen Victoria Street, London, E.C.4.
