

EDITORIAL

Tetrahedron:Asymmetry is a new addition to the family of Tetrahedron Publications. The broad editorial policy is to impose the same standards of excellence for *Tetrahedron:Asymmetry* that we have built up for other Tetrahedron publications. At the same time, the scope of *Tetrahedron:Asymmetry* is broader and we have additional Consulting Editors, needed to handle the new areas of expertise. We will be happy to publish papers from other branches of chemistry which deal with important aspects of asymmetry. In this way the unity of the concept of asymmetry in chemistry will be maintained.

On behalf of the Executive Board of Editors we welcome to our family *Tetrahedron:Asymmetry* and its dynamic Editor-in-Chief, Dr S.G. Davies!

D. H. R. BARTON
