

ERRATUM

CHARLES DEBOER and RONALD BRESLOW: The Photosensitized
Dimerization of 1,2,3-Triphenylcyclopropene
Tetrahedron Letters No. 11, pp. 1033-1038 (1967).

Substitute the following for the last two
sentences,

"Phosphorescence from I at 77°K. is also weak.
Our kinetic data, with a 10^3 decrease below the
diffusion controlled rate of triplet energy transfer,
is consistent in other known rigid systems^{6,7} with an
approximately 4 kcal./mole endothermicity."
