V. ROSNATI, G. PAGANI and F. SANNICOLÒ: Neighbouring group participation in solvolytic reactions of α -chloroketones

Tetrahedron Letters No.14, pp. 1241-1245 (1967)

p.1241, the fifth line from the top of the text should read:

.....enol form, either through a mesomeric participation of the lone electron pair, or possibly through.....

E. PAYO, L. CORTÉS, J. MANTECÓN, C. RIVAS and G. DE PINTO: Photochemical valence isomerization of oxobicyclic analogs of norbornadiene

Tetrahedron Letters No.25, pp. 2415-2417, (1967)

The authors of the above communication wish to acknowledge that H. Prinzbach, M. Argüelles and E. Druckrey independently carried out a successful photochemical synthesis of an oxoquadriacyclene derivative and published it at an earlier date (Angew. Chem., 78, 1057 (1966) than that of the above mentioned communication

T. R. KASTURI and T. MANITHOMAS: Essential oil of Ageratum conyzoides - isolation and structure of two new constituents

Tetrahedron Letters No.27, pp. 2573-3575 (1967)
