A. HASSNER and F. W. FOWLER: A general synthesis of 1-azirines from olefins. Fused azirines

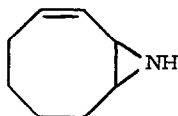

Tetrahedron Letters No.16, pp. 1545-1548 (1967).

p. 1546. line 13 should read:

.....since it has been reported that pyrolysis of II g gives much polymerization <sup>3c</sup>.....

add: 2,3-Diphenyl-1-azirine III d, however, is best prepared (in 80-95% yield) by pyrolysis of cis or trans azido stilbene II c or II d.

p. 1547. Formula XV should read

W. A. ROELFSEMA and H. J. den HERTOOG: Ring transformations in reactions of heterocyclic halogeno compounds with nucleophiles (XII)

Tetrahedron Letters No.50, pp. 5089-5090 (1967).

The structure of the intermediate between I(III) and II(IV) should be
