

ERRATUM

G. E. GREAM and S. WORTHLEY: Synthesis of four-membered ring acyloins and α -diketones
Tetrahedron Letters No.29, pp. 3319-3322 (1968)

Note added

Since the submission of our communication, we have become aware of a recent paper (K. Rühlmann, H. Seefluth and H. Becker, *Chem.Ber.*, 100, 3820 (1967)) in which the synthesis of 2-hydroxycyclobutanone (69% overall yield from diamyl succinate) via the intermediate bis-trimethylsiloxycyclobutene is described.
