H. HART, R. L. HOLLOWAY, C. LANDRY and T. TABATA: Additions of Dichlorocarbene to Fulvenes

Tetrahedron Letters No. 56, 4933 (1969)

p. 4934, first equation: The slash through the arrow appeared mysteriously and should not be there.

ADDENDUM

W. G. DAUBEN, M. G. BUZZOLINI, C. H. SCHALLHORN, D. L. WHALEN, and K. J. PALMER: Thermal and silver ion catalyzed isomerization of the 1,1'-bishomocubane system: Preparation of a new $C_{10}H_{10}$ isomer

Tetrahedron Letters No. 10, 787 (1970)

Footnote No. 8 reports that 1,1'-bishomocubane was not isomerized by silver nitrate to the $(CH)_{10}$ isomer 6. However, we now have found that with a larger amount of silver nitrate catalyst this isomerization proceeds slowly (with a rate about 1/100 that of the saturated 1,1'-bishomocubane system).
